Whether we agree or not, I want to wish a Happy New Year to all, and to your families.

This NG shit is nothing but entertainment to me, as it should be to all here, and no animals were harmed by any statements I've made this year.

U KNOW WHO

Yeah, I agree with Bush, but he should've had an
exit plan before he even thought about going in.

Take a leap Frank :)
While I agree with most of his policies, He should've had
an occupation & exit plan even before he thought about going
in.
I'm sure he thought about it, but waited a long time
before implementing it ;)

Happy New Year Dude!!! Atheists do celebrate it,
don't they (Grin)

First let me say your post gave me probably my last great laugh of
2004. I love the bung-holio reference (I get it). While you were at it,
you should have added record collectors to your tirade. Or as my (then
17) daughter put it when I dragged her to a record collector show a few
years ago; "The ratio of men to women vs. the number of pony-tails is
way out of whack here". ---Ken

I'm sure he thought about a lot of things.

> Happy New Year Dude!!! Atheists do celebrate it,
>don't they (Grin)

Us atheists celebrate anything we want, and we enjoy it more because
we are neither compelled nor limited by any religion. As for New Year
celebrations, I'm past the age where I can use it as an excuse to get
blind, stinking drunk and launch some lead skyward (air traffic is
noticably absent this evening). Nowdays I use the holiday to look back
on the past year, praise myself for my accomplishments, analyze my
failures, and contemplate the possibilities of the coming year. That,
and catch up on my bookkeeping so I can get my tax return in early.

We Koreans think Doug Adair is genius. He run keyclowns ragged in newsgroup, make plenty laughs for jolly asian folk. We write him, ask plans for 2005. Here what he reply us.

Dear Koreans,
2005 is going to be even worse for the poor
sissy keyclowns. I ratted out their auctions,
I exposed Twithed and his fugly kid, and I
made Mopedopey the poster child for gay, brain
damaged morons. In the coming year I won't
let up for a minute. Keyclowns the world over
will shiver in fear at the surprises I have in store
for them. Will they be busted by the FCC? Will
they be arrested by local police for homosexual
prostitution? Har dee har har, they will stay awake
nights wondering. Happy 2005 keysissies!!!!!!!

>
>http://focus.ti.com/docs/prod/folders/print/tl494.html

Why would I convert from a switching regulator to another switching
regulator? That doesn't make sense. I want linear regulation because
switching regulators generate square waves; i.e, noise. Also, FETs in
switching regulators aren't just FETs, they're MOSFETs, and I wouldn't
trust a MOSFET in any harsh environment, let alone under the hood of
my truck.

And BTW, nothing works "flawlessly", especially MOSFET's.

>Or you could go with 1-tip36c which would be more than adequate you
>wouldn't need 2 MJ11028's

First, a single MJ11028 can handle the same collector current as -two-
TIP36C's. Second, the hfe of the TIP36C is 25 compared to a minimum of
400 for the MJ11028, so the latter doesn't require a power transistor
to drive it. Third, the transistion frequency of the TIP36C is 3MHz,
meaning it can be prone to oscillation -especially- in any application

where surges or spikes can occur; Darlingtons barely work above audio frequencies. And most important, I don't have a TIP36C but I -do- have a stock of MJ11028's.

Please excuse Rec.Radio.CB's in-house troll Doug Adair
ham radio operator N8WWM. Unfortunately he's has
some sort of strange affection for men & gay comments,
that explains his constant forging of regulars and cross
posting to other news groups.

If you find what he posts offensive, report it to
Abuse@Qwest.net with the complete headers.

I laid low last night, we had some flood concern over here. The race was
fairly entertaining considering it's Jan 1 here in the Buckeye. They
run in -any- weather for this race and as luck would have it they got
a warm day this time. 108 cars showed up, and 89 of them raced.

As much as I hate to agree with these mental midgets, the Vatican would
rather deport itself to Mecca, rather than have a Black as the head Papal.

The Vatican is a white male institution, always was and always will be.

African Moors? Huh? I only know of the Arabian Muslims (Moors) invaded
parts of Europe for awhile.

What sources do you have of African Muslims doing this? Egyptians?
Morracans? Sources please.

In that case maybe a certified snail mail, that they have to
acknowledge would be better. AKC'ers take note. Start putting together
something we can send Google and email it to me. I will send it and
also publish it here. You snapperheads wanna see someone play TOS
ratout games, fine with us.

More keyclown ratouts, more showing mopey to be useless and impotent, more FCC action, more AKC ruling this NG, more keyclown dealers busted due to AKC pressure on the FCC, more postcards to keyclowns who are busted telling them how much we like seeing it and how much their fines make us laugh.

Keyclowns will have only one resolution, since we rule them. That is to whine and moan more about AKC stopping their off topic posts in rrcb. It is good entertainment to watch keyclowns cry.

75. RFI from fuel pump

Newsgroup: rec.radio.cb
Date: 2005-01-02 18:22:21 UTC
From: adoniscat@yahoo.com
Message-ID: <1104690141.440160.35380@c13g2000cwb.googlegroups.com>
Source record: 193715

I've got a Mazda Tribute (near replica of the Ford Escape) and have the dreaded RFI from the electric fuel pump. I've done a ton of research on the Internet and determined that the most popular option for resolving the issue is to install a RFI filter on the pump. This involves dropping the tank, which is beyond my capability. So, to do the install will involve a trip to the dealership, costing around $200 for parts/installation.

I've also seen a homebrew ferrite filter that can be installed at the power lead for the fuel pump, which is an option.

But, I did see one posting where a guy resolved the problem by upgrading to a K40 antenna, which he said filtered the RFI. So, I'm wondering if anyone has had success eliminating fuel pump RFI with a good antenna? I'm willing to give that a try, but it will probably involve ordering one, so if there's only a small chance it will work I'll probably skip this option and go straight for the filter. Thoughts?

Three questions, if you don't mind:

1. How is your radio mounted and grounded?

2. Are you using power from the lighter socket?

3. What kind of antenna you you have now?

You guys may want to start tuning back into 14.313 USB sometime soon
on a semi-regular basis.............

Ole "KJI" David from Evansville has been in there every late morning
and afternoon since New Year's Eve day and the frequency is slowly
starting to reclaim it's former glory(-hole) days as the all time RF
screwball magnet of ham radio.

I've been hearing old time voices and personalities on there *today*
that I ain't heard on since the good ole days of kv4fz and the infamous
'Mike and Judy show'. Even ole gravel himself (!the original one!) was
in there today making comments to Dayveed and the guy in TX and Ga.

So boys, put away them keyboards and GO LIVE and IN COLOR once
again on the old timey funfreaq of 14.313 USB. Trust me, ole KJI when he
gets
started, has the gravametric pull of a red giant star when it comes to
drawing
out the froot-loops, the crazies, the goofballs and the toilet ticks. It
can only
get better as time winds on! What a way to start the new year eh???

On Some Fords, some of the Geo's, and some other makes, there's an
access plate in the trunk that allows access to the fuel pump from
within the vehicle, without having to drop the tank.

It's worth a check. If you see a rectangular plate with bolts in it
under the carpet in the trunk, you most likely have an access window to
get to the fuel pump.

If not, you'll have to drop the tank.

<snip>

>3. Grounded to a bolt on the door hinge.

Seems you have a floating (ungrounded) system. DC ground is not the same as RF ground, the latter needing as short a wire as possible. In fact, the antenna base should be mounted directly to some bodywork and you can't cheat by running a wire to a ground somewhere else. The same should be done with the radio if possible, although a -very- short wire from the radio to ground (the deck beneath the console) should be OK as long as your antenna mount is well grounded.

The reason RF grounding is so important is because a floating system picks up noise very easily. Also, the antenna works much better when properly installed. You can gain 2-3 S-units (and increase your transmit range proportionately) by properly mounting the antenna. I've installed lots of CB and commercial radios and as long as everything is grounded (RF ground) there is rarely a problem with RFI..... unless the alternator is going bad or something like that, but you would be able to hear that in your AM/FM radio, too.

It's either that or drop the tank.

I agree. I also have a memory when in the 60s the ARRL pushed incentive licensing. That ARRL/FCC BS cost me some frequency spectrum usage on 80 through 15 meters that I previously had worked hard to obtain by getting my ham license. In my opinion they always have been a bunch of self centered individuals who had an agenda. I have been licensed for 45 years. Fortunately I wised up about the ARRL 44 1/2 years ago.

This is good advice... really all you would need is one 0.1UF from the positive to ground. Like he said... close to the pump.

21st Century E-Commerce Money Making Formula

This works better than letters & it's all electronic!

Posted By: E'Sean Date: Wednesday, 21 July 2004 eMoney Making Formula

"This is so awesome. Try it. The more people that do it the better."

"I turned $3 into $14,706 within the first 30 days of operating the business plan that I am about to reveal to you free of charge."

If you decide to take action on the following instructions, I will personally GUARANTEE that you will enjoy a similar return!"

Please do not be skeptical about this program.

At least think about it for a few days.

Otherwise you will be throwing away over $10,000 in cash!

Dear Friend, My name is Mark Sutton. I was laid off from my job in August of 2001 At that time I wasliving beyond my means and in serious debt. Several debt collectors were hounding me on an almost daily basis, and this consequently started a chain reaction that ended with the repossession of my car and then my home. As you can probably imagine, my prospects looked pretty bleak. Then, in March of 2002, I received a short and simple email telling me how to make over $10,000 at a time.

I ignored it because of course, I was skeptical.

However, I didn't delete that email because something about it rang true to me, and I was desperate to know whether it was possible to make that amount of money in such a short space of time. By this time, I was even deeper in debt, and I had just about reached the point of despair. I finally realized that I had absolutely nothing to lose by having a go at the plan offered to me in that email.

And apart from that, I just couldn't stop myself from thinking "What if it actually works?" Therefore, I put my doubts to one side and I went ahead and followed the simple instructions given in that email. It took me less than 30 minutes

to complete and it cost me no more than $3. And yet, by the end of 2002, I was able to book the family holiday of a lifetime in Miami, and

I bought a brand new Audi A8 with hard cash. And in the autumn of 2003, I purchased a tidy semi-detached home for no less than $125,000. And yet,

I don't owe a single penny to anyone!

To date, I have made exactly $392,718. My accountant has drawn up a cash-flow forecast in which he predicts that, within the next 24 months, I will become a millionaire just through this one business alone. Even now as I write this, I find it strange to come to terms with the fact that, like most people, I've worked hard and struggled all my life just to 'get by' and then something ridiculously simple drops into my lap and immediately turns my life around completely.

When I think back to all the similar emails I had previously deleted, it makes me shudder, because now I know just how close I came to missing out completely.

What did it say in that email?

What were those simple instructions that enabled me to amass so much money in so little time?

Well, if you'll read on, all will be revealed!

The business plan I am about to share with you works perfectly every single time. I've never made less than $10,000 from it on each occasion. Let me assure you that this is a LEGITIMATE BUSINESS OPPORTUNITY, a perfectly legal moneymaking enterprise. It does not require you to sell anything. It does not require you to speak to your friends, family or anybody else (unless you want to). In fact, you do not need to come into contact with any people whatsoever. Anyone with a pulse can become successful and make their fortune with this system. If you believe that 'every dog has his day', then follow the simple step-by-step plan exactly as it is set out below. If you do this and this alone, I GUARANTEE that within the next 30 days you will receive over $10,000 in cash via your PayPal account. I know that this must sound like an outrageous claim, particularly if you've never had possession of this sort of money before, but believe me, this business works like nothing else you may have seen before in your life!

By following the simple 3-step plan set out below, within a few short weeks your life will be transformed beyond all recognition! Please do not allow your initial skepticism to deprive you of certain financial success. If you decide not to take advantage of this life-changing opportunity, I would like you to know that I sincerely respect your decision and I understand that you will have your reasons. I therefore wish you the very best of luck for the future. I am able to say this with absolute sincerity because, as you will see, if you decide to work this plan, I will not receive any financial compensation from you whatsoever. After all, I am sharing this system with you for free. However, remember life is short. Nobody has ever said that you can't have the financial freedom to do what you want to do, when you want to

do it.

But you must first pay the price. The price here is action; it's as simple as that!

I'm very proud to be able to say that I've fulfilled my duty to my wife and children by securing their financial future in a very uncertain world, and I don't believe that any price is too great to pay for such peace of mind. THIS IS THE CHEAPEST, FASTEST & EASIEST WAY TO MAKE MONEY ONLINE - PERIOD!

There are a lot of companies out there offering to put you in your own business, but I'm so certain you will make a SERIOUS INCOME with what I am going to tell you that I'm willing to roll up my sleeves and help you begin - RIGHT NOW!!

Remember, I am not asking you to send me a single penny for the lucrative business project I am about to share with you. In addition, you will not be asked to buy anything or sacrifice your free time. You will make some fast and easy cash, using just a copy of this email and the simplest and most popular Internet payment system in existence!

You have most likely seen or heard about this project on TV programs such as 20/20 and Oprah Winfrey, or you may have read about it in the Wall Street Journal. If not, here it is below - revealed to you in step-by-step detail. This program is by no means new. It has been in existence in many forms for at least ten years. But in the early days, it required a lot more time and effort, as well as an outlay of a few hundred dollars. However, thanks to PayPal and the Internet, the outlay is now virtually ZERO! On top of that, the entire process is FASTER, EASIER, and MORE LUCRATIVE than it has EVER been! If you're already running a home business, you can easily do this one along with it. If not, this is the FASTEST and EASIEST way to earn serious money online that you've ever seen so far in the history of the Internet! This program works no matter what country you are in, or what currency you use. It doesn't matter how old or how young you are. And you certainly won't need any special knowledge or talent. You won't need to run a website, or make phone calls, or make photocopies, or send out letters through the mail, or pay for advertising, etc.

The only things you will need are: * An email address * A Premier or Business PayPal account with at least $3 deposited in it * 30 minutes of your time

This program takes just half an hour to set up. After that, there is absolutely no work whatsoever to do on your part. And yet, you will stand to gain many thousands of dollars within the next few weeks from those 30 minutes of easy work! Yes, I know, it sounds too good to be true! I thought exactly the same thing myself until I actually tried it out!

Even if you are already involved in another program, stay with it, but do yourself a big favour and DO THIS ONE as well. You have absolutely

NOTHING to lose, but you stand to gain a LIFE-CHANGING amount of money within the next few weeks! In fact, there is NO LIMIT to the amount of income you can generate from this one single business program!! The facts are simple: If you need to make a few thousand dollarss REALLY FAST, then this program is the way to do it! It's the CHEAPEST, FASTEST, EASIEST, and MOST LUCRATIVE program you will ever participate in!

Please be sure to read all of this page . . . take your time, come back to it . . . go over and over it, you won't be sorry, I can certainly promise you that! If you don't have time to read all of this now, then save this page, or add it to your Favorites list, so you can come back to it later. ALL YOU NEED IS A PAYPAL ACCOUNT & AN EMAIL ADDRESS! Just about everyone has heard about "PayPal" (if you haven't you will soon!) and when I came across this concept I knew it would work because, as a member of PayPal, I had already experienced their efficiency and excellent standing. PayPal is the simplest method of making and receiving payments online that anyone has ever seen! Anyone with an email address can join for FREE! Once you have a PayPal account, you can send and receive credit card payments to or from anyone - anywhere in the world! Please read further before you go there... You can complete this whole process within just half an hour and you will NEVER forget the day you decided to do so!!!

NEED PROOF? Here are just 3 testimonials from the countless individuals who decided to invest nothing more than $3 and half an hour of their time to participate in this program:

" What an amazing plan! I followed your instructions just 3 weeks ago, and although I haven't made 10 grand yet, I'm already up to $6,135. I'm absolutely gob smacked." Alan Humphries , Leicester

"This is Lisa. Well, what can I say?... THANK YOU SO MUCH! I sent 40 e-mail's out like you said and then I just forgot about the whole thing. To be honest, I didn't really think anything would come of it. But when I checked my paypal account a week later, there was over $3,000 in it! After 30 days I now have over $11,000 to spend! I can't thank you enough!" Lisa McDonald, Northampton

" I was shocked when I saw how much money came flooding into my paypal account. Within 3 weeks my account balance has ballooned to $7,449. At first I thought there had been some sort of error with my account!" Richard Barrie , Cirencester

Just a few months ago, each of these people were doing the same thing as you are at this very moment - reading this! But because they decided to follow the simple instructions given below, they are now considerably better off as a result. And there's no reason whatsoever why you can't share in this success. You've got nothing to lose, and EVERYTHING to gain! Let's get started, just follow the instructions exactly as set out below and then prepare yourself for a HUGE influx of cash over the next 30 days!

HERE'S WHAT YOU NEED TO DO. . .

STEP 1

Ok, if you're not already a PayPal user, the very first thing you need to do is use the PayPal link below and SIGN UP. It takes just two minutes!
https://www.paypal.com/us/mrb/pal=ZVR6VDMJUDB5Y

Be sure to use this link so you can sign up for a free PREMIER or BUSINESS account. You'll need to have a PREMIER or BUSINESS account (and not a PERSONAL account) otherwise you won't be able to receive credit card payments from other people.

STEP 2

It is an undeniable law of the universe that we must first give in order to receive. So the first thing to do when you have your Premier/Business PayPal account is to IMMEDIATELY send a $3 payment from your PayPal account to the FIRST email address in the list below, along with a note saying: " Please add me to your mailing list." Be certain to add this note, as this is what KEEPS THIS PROGRAM LEGAL. Instructions on how to send a payment are under "SEND MONEY" at the Paypal Site. It's so Easy!! When you send your $3 payment to the first address in the list, do it with a great big smile on your face because "as you sow, so shall you reap!"
<>Here's the current list
(1)bmedsker@cablespeed.com (2)disbellj@midsouth.rr.com (3) moty7ellek@adelphia.net (4)spontaniuz@msn.com (5)dholla@msn.com

After you have transferred a $3 payment to the email address at the top of the list, something very eerie happens. It gives you an indescribable, overwhelming sense of certainty, belief and conviction in the system. You've just proved to yourself that, because you have done it, there must be a great number of other people ready to do exactly the same. Thus you have now seen for yourself, first hand, that this business actually works!

STEP 3

Once you've sent a $3 payment to the address at the top of the list (along with a note,please add me to you mailing list! - this is VERY important!), the next thing you need to do is to obtain a copy of this email message, as you'll be sending it out to at least 40 people.

The copy that you will send out will contain YOUR unique PayPal referral URL and YOUR email address at number 5 in the list - having deleted the address at Number 1 in the list, and moving the others up a position. The easiest way to do this is to:

(A) Go to your toolbar (at the very top of the screen) and select EDIT and then SELECT ALL.

(B) Go to the toolbar again and select EDIT and then COPY.

(C) Start (compose) a new email message (PLAIN TEXT so everyone can view it!).

(D) Fill in your email address and subject line.

(E) Go to EDIT and PASTE to paste this text into your new email message. Now you can edit this email message in any way you want!

The first thing to edit are the email addresses in the list above. Delete the top email address, and then move the others up a position, and then add YOUR email address to the bottom of the list (the number 5 position). Be sure to use your email address that is associated with your PayPal account. But DO NOT forget to send $3 via PayPal (along with your note!) to the email address at position number 1 before deleting it! Don't be tempted to add your name to position 1 in order to earn money fast! It doesn't work like that!

If you do that, you will ONLY reach the people you directly send emails to, and then your name will be immediately removed from the No.1 place and you won't reach thousands of people! But, if you add your name to the Number 5 position, there will be literally thousands of people receiving and sending email's later - when your name is at the Number 1 spot!!!

Now you need to edit the PayPal referring URL (shown above in Step 1) with your own PayPal referring URL. You can find YOUR referring URL at Paypal after you join. Just look at the bottom of the first page once you sign into Paypal, and click on the "referrals" link. You will be given a referring URL similar to the one above, except the code number at the end will be different. Simply delete the current PayPal referral URL in Step 1 above, and replace it with your PayPal referral URL.

(F) Once you've edited your email message as outlined above, send out a minimum of 40 copies of this email. You can advertise it any way you want to But no spam.
Best of luck and remember to play fairly and honestly and this will really work

Yours Truly
Neo-Tycoon

I heard on my scanner on a 2 meter repeater some guy was fighting with
Ford for the same problem.
Not sure what Ford they were talking about. Ford did the fix,
unfortunately I don't remember what that was. Sorry about that.
I heard it a few months ago. The owner of the car is still fighting
with Ford on who will pay for it.
Good Luck!!

Interesting rig. However, doesn't that mod also allow it to use the 11 meter band (in direct violation of the FCC R&R type acceptance for that particular rig)? now, if it was being sold ro someone outside the states, then its not illegal to sell. for someone inside the states, well, there is still some legal issues from what I hear.

ah well. good luck selling it though. those radios are pretty good for just monoband units.

Turn $6.00 into $42,000...read this to find out how!!! READING THIS COULD CHANGE YOUR LIFE! I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of cash within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: "what have I got to lose except 6 stamps and $6.00, right?" Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I started getting cash in the mail! I was shocked! I figured it would end soon, but the cash just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works....Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more cash than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the cash come in! It's easy. It's legal. And, your investment is only $6.00 (Plus postage) IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends. PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy

to pay big bucks for quality lists. However, the cash made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success: STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses:

1)Nathan Gilreath 6049 Porter Ave. East Lansing, MI 48823

2)Beth Collins 1012 Woodbine Ave., Toronto, Ontario M4C 4C1

3) Melody McKinley 8 Huntingdon Drive Dartmouth, Nova Scotia B2V 1w1

4) C. Witt 12 Pine ST. Attleboro, MA 02703

5)Ben Ervin 1281 Cadillac Dr. Hamilton, OH 45013

6) D J Kelly 661 powell st apt # 3 Brooklyn Ny 11212

STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more cash you make! This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need cash, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the cash that so many others have received will come your way. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of cash in CASH!!! What an opportunity for only

$6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business! ---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS---------- Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computer's memory. Step 2) Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list. Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to. Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE Cash YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving cash from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625.00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, "what if the plan is played out and no one sends you the cash? So what! What are

the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet. Remember, play FAIRLY and HONESTLY and this will really work

I recently picked up this strange thing at a thrift shop. Trying to find out what it is. I know it isn't a radio, but figure some of you that have been around the block may know what it was.

It has Photocells written under the top left buttons, looks like contacts for a battery. GA under the other top contacts.

My guess it is from the 1930s-1950s

Pictures can be found at Http://www.randompostcinema.com/what.html

Anything you can tell me on what the heck it is, I much appreciate it. You can reach me at Kamakize@gmail.com

Thanks much!

Wrong, buttmonkey. You got a message from me because you chose to get
the KeyclownsRCoiminals NG emailed to you. I did not make that choice
for you. Wake up and smell mopey's butt crack.

As for "style", the only style twithed has is copy/pasting other
people's words and pretending they are his. He has not had an original
thought since he took his first dump as a baby.

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

122. sicko freak mopey wishes this wasnt the truth

Newsgroup: rec.radio.cb
Date: 2005-01-03 14:20:28 UTC
From: Psychiatrist to keyclowns <keyklonzrnutjobs@yahoo.com>
Message-ID: <1104760270.916495.42840@z14g2000cwz.googlegroups.com>
Source record: 193762

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

Group: rec.radio.cb
Date: Fri, Dec 31, 2004, 4:12pm
From: joxendi@bellsouth.net (Jerry)

>Slam me

>all you like, I STILL don't what is going on.

I have no clue why you feel you are being slammed, persecuted, nor why
you have the need to falsely accuse others of "going ballistic" for
merely pointing out your errant behavior of responding to forges.

_
Referring to yourself as "Lt. Colonel" when speaking to Florida is an
ego thing, Jerry, as your rank (unlike the army, navy, marines, or af)
is not recognized by civilians. Stay with Tennessee and Georgia.

>??????????????????????????????????
>?????????

>Ho hum. I still I don't know what you are

>talking about--

That isn't surprising at all. In fact, you plead ignorance every time
your trolling, violation of the hammie creed, and behavior unbecoming of
a hammie is pointed out.

>or CARE for that matter.

If you had integrity, you wouldn't need others to illustrate your
actions contradict your claims.

>If I responded to "forges",

Your use of he word "if" attempts to cast doubt on your actions when
such have never been clearer. No "if" about it, you most certainly
responded to forges.

>So tell me how "responding to forges" has

>anything to do with anything?

The mere fact you need such actions explained is telling enough,
especially when coupled with your pleas of non-knowledge and memory
difficulty.

>I have seen LOTS of people respond to forges
>in here

How irrational. Attempted abdication of your personal action by invoking another's behavior is what is wrong with this country and more specifically, you.

>And if I did, so what?

Your use of the word "if" attempts to cast doubt on your actions when none exists. You were shown the error of your ways.

>So what has "responding to forges" got to do

>with anything?

It illustrates you are about causing trouble. It illustrates denial is your prime knee-jerk reaction....but a few of your character flaws. When examined, it illustrates you use a smokescreen concerning legal issues to justify your behavior unbecoming of hammie, let alone an officer in the CAP. You are unable to effectively communicate and express yourself regarding cb or its users in any fashion other than that which pertains to legality, to which I invoke, borrow liberally, and paraphrase yourself,,,,,"HO HUM.....ZZZZZ".

>Whatever the "error" of my

>ways is, SO?

Same can be said of those who use roger beeps and cb lingo that you go on about like a little old lady...so? LOL,,,,

>One's "errors" are like an opinion: everyone

>has them.

But of course they do. Only you incite trouble and are the exact opposite of what the hammie creed professes.

>I didn't know it was

>"illegal".

Neither are the roger beeps and echo, you hypocrit..lol...having one set of rules for yourself and another for everyone else......you need more schoolin' Oxendine...good thing you hang in rec.radio,cb.
It's not illegal to act like a jerk, Jerry, or to run around and practice poor hammie technique, or to give the CAP a black eye like you have done over the years. I have a very strong feeling the CAP chain-of-command will not ignore what they are about to learn concerning the behaviior of one of their officers in public venues.
You may attempt such a defense with the proper party when appropriate. Nevertheless, you may wish to have a decent hammie explain the hammie creed to you, as you feel it is your right to disrespect people based on your personal opinion. You have plenty to learn regarding proper communication and etiquette.

_
You have a one track mind concerning radio legalities and permit it to

effect your life,,,both here and outside the group. The problem with your approach, is no one else shares your obsession with trolling for illegalities online, regardless the trivial or important nature you attach to your obsessions responsible for upsetting you so.

>It seems to be upsetting you more than me.

Your misinterpretations are not only frequent, but second only to your claims of memory impairment. To be fair, everything you have said has been not oly way off base, but absolutely false, beginning with your accusation that you were being persecuted.

>If I want to post news items, I'll do it.

You needn't act so bizarre and misinterpret the solicited comments you seek on such as bothering another.

>Seems to me YOU are the one that is angry,

>for if it didn't bother you, you wouldn't respond.
Twas you that responded to *my* post, Jerry, not the other way around. Your lucidity is beginning to wane more often than usual. Once again, your behavior is very errant and bizarre, but allow me to place it in very plain terms for you......when you make a post in usenet, it is to solicit response, whether you can comprehend such or not. When that response comes, it is not because someone is angry with you Jerry, but because that is how the usenet works. it's not really black magic, it just seems that way to you at this lowest point in your life.

>I told you 2 years ago that the stuff concering

>Pilot, etc was coming to pass, and you didn't

>believe it.

I said nothing of the sort. Your accusational lies are coming looser and faster..illustrating anger and desperation.

>Now that it IS, you're just mad and have to

>have someone to take it out on.

Then you will have no problem presenting and posting it, reverend JO.....lol..but of course, you are merely falsely accusing out of anger once again.
But what *you* are angry about, being inducted into the rec.radio.cb death pool based on your behavior on the net, your health, family history (ages of those in your family dropping like flies at middle age) and unsolicited info supplied by two no codes, a
general, and a novice..in that order. Smart money predicts you will stroke or have an MI and die in the next three years and that you will not suffer, but go very fast. Don't take it personal, but if my family began kicking off all at the same young age, I'd find a hobby that didn't upset me like cb does you.

>If I am "dialling in to Canada", so what? What

>has it got to do with anything?

The same relation as the legalities you invoke. The same relation as you invoking anothers behavior to justify your own.

>And what "actions" would that might be?

>PROVE where I have broken a regulation or

>have had an NAL.

Your obsession with rules and regs is not shared by this group and is not even a remote topic acknowledged by the majority of us, for which you seem to live.

>Search court records to find "dirt".

Court records? Why would I wish to search court records? You are a legend only in your own mind. See above.

>(www.123nc.com), You won't find it. Not even
>a speeding ticket. So there!!!

I'm not interested in your background, Jerry, as you were forced to expose your misery right here among our pages. Your entire life story plays out among your posts and IF there was anything one wished to know of you, it can be found among your heretic ramblings.

_
>Lt Col??? Florida???? What in the world are

>you talking about?

You are resembling a bowling pin more and more with each post you make, Jerry. I also see, you are a great ng liar. Shall we proceed with this issue where you refer to yourself as a Lt. Col in the CAP?

>If I did, what did it have to do with this

>newsgroup?

Why Jerry, I have never seen so many replies from you begin with "What 'if'.....
It has very much to do with your professing
you had no idea what I was referring when I mentioned "Lt. Col" to you. All you have, are "if's" Jerry, but just for your sanity's sake,,,it has the same relevance as your obsessions. Also, the CAP, especially officers, are held to communty standards, and if one of their members is deliberately harassing people because of their LEGAL choices, such as you often do, I believe their superiors have a right to know, the same belief you hold when you feel one is wrong in their actions.
You may wish to explain your errant behavior and conduct unbecoming of a hammie to the CAP by pointing to what other people say and do.

_
  You have turned into one who is the exact opposite of which the

hammie creed respresents. Perhaps the CAP should receive some of your more colorful posts where you troll and harass cbers because of their lingo.

>EEEEEEEEWWW! That must really get to

>you.

Once again, excuse you. It is your issue, I merely noted your errant and bizarre behavior,,again.

>The lingo, I mean.

Oh no,,I find it quite colorful,,I use it myself. In fact, I am quite fond of it, and the mere act of you taking issue with it illustrates your hypocrisy and bias of the two services.

>Heck, the lingo speaks

>for itself. All you gotta do is listen to the CB.

So does the hammie lingo, but for yet another odd, bizarre, and errant reason, you harass people for their use of such lingo. Such behavior most certainly violates the hammie creed. That lingo issue burns you more than echo and roger beeps, it would seem. Many legal issues get you riled, Jerry, and for no reason other than your personal anger and dislikes. This makes you a lid, Jerry.

>N8WWM, don't know the man, never met him.

You most certainly have had extensive email correspondence with him, but I never claimed you met the felon. Still, I find it fabulous you had the knee-jerk reaction to disassociate yourself from such a notion conceived and brought forth only by yourself.

>He can post whatever he wants to. Doesn't

>affect me. I'll post what I want to.

That IS how ng's work. Ironic that someone of your licensure status repeatedly expresses such difficulty regarding the simplest of communication skill, but then again, I have always maintained that some of those who are licensed in communications know the least about it.

>Tennesee

>and Georga???????????????? You are

>rambling..........

Perhaps, but that rambling is in your playgroud, Jerry. You regularly play with Fl, Tn and Ga when you play "gimme status" with your CAP games.

>What in the

>world??????????????????????????

>Pardon me, but I simply don't understand this.

Hehe,,,that's what you said concerning your self-professed status as a "Lt Col", also, until the truth was forcibly extracted from you. Your cornfusion may be because you struggle with proper communications and cite memory impairment. In fact, when instructed properly, you acknowledge everything you previously claimed, is too difficult for you to grasp. if you behaved yourself you wouldn't have so many dilemmas, both real and imagined.

>None of this makes any sense to me. Fl, Tn,

>Ga, "gimme status"???

That could have been said to you the last time you said "I dont understand" concerning my comments about you self-espousing your "Lt Col" title, but I figured if I waited long enough, you would disqualify your own statements...you never fail to disappoint.

>zzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzz
>zzzzzzzzzzzzzz

>Again, Ho Hum and

>zzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzz.

Happy New Year, K4KWH!

>(yawn)

Ah, go back to your radical preaching, Jerry. After all, you do refer to yourself as a man of the cloth, in addition to being a Lt Col in the CAP. Although, I've never met anyone who refers themself a minister (who harasses God's children and admits taking pleasure in other's misfortunes), a hammie (who harasses legal cbers) who claims he is a Lt Col in the CAP who harasses people based on absolutely nothing more than his personal opinion. You are quite the man of the cloth, k4kwh. Indeed.

Why do you say that? I've never had any problems with RF Parts gain
matched parts. They may only be screening for gain though... as I see a
wattage level written in pencil on one of the striplines. Really they
should be screening for beta as well...

Idiot. And you're not an idiot because you don't know the difference
between 'beta' and 'gain' -- you're an idiot because you profess
ignorance when the facts are just a mouse-click away.

We've now added all our crystal charts for free download/printing
(PDF) on our site. These 36 charts cover about 95% of all American
mobile & base CB models, and show exactly which crystal(s) affects
which mode or channel. Very useful for troubleshooting "dead
channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB
accessories. Please visit our Web site to see all those "goodies" you
just can't find anywhere else!

www.cbcintl.com

You can also download our complete CB catalog, or just the Order Form
from that page. We've also got a new Email Order Form (for VISA/MC)
if you're in a hurry.

SAVE MONEY! We regularly run EBAY auctions in which you can save up to
HALF the cost of our most popular CB books and accessories. To see
what's currently on sale, double-click the line below:

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right--namely, FREE! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

What does the upper label on the corner say?

This looks like it was made in the early 1930's to the mid 1940's. If I had more views of it, especialy clearly (not out of fucus) showing me the labels on everything, including rear views, I may be able to identify it. I am very familiar with many of the types of test gear and radio equipment from that era.

Now you ARE delusional!! I could ramble on and on and about things that don't exist if I wanted. That's what you are doing!

I only have a few comments, then I am going to sit back and let you spew your nonsense.

1. Family and health issues? My father is 91-still on his feet. Everybody, with the exception of those who died in accidents have made it at least into their 80s.

2. Whatever you say concerning this "Lt/Col" stuff , I haven't a clue what you are talking about. And if I WERE a member of an organization such as CAP, my actions with regarding "forges" and this newsgroup has no affect, so tell whomever you like. What *that* organization does, and it's members do, it only applies to the scope of the duties laid out WITHIN the group, no effects participation in a newsgroup--same as it would be with the Moose Lodge, or Elks or Masonic. If it were possible to interfere with one's affiliations--whatever they may be--, they'd never be able to keep anyone around. I can hear it now : "HE SAID SUCH-N-SUCH AND I DON'T LIKE IT" "I'M GONNA GET SO-N-SO IN TROUBLE" Yeah, right.

3. Minister?? You really ARE nuts now!! For I have NEVER been a minister, am not one now, and never will be one. So you can try to make something out of that as well, for it is FALSE. I worked in the transportation industry for 23 years. How you got me mixed up with a "minister" is beyond me.

4. My "licensure" also has nothing to do with anything. If I want to make a comment, and someone doesn't like it, well , too bad.

5. Well, I've 'misbehaved' before, and I reckon I'll probably do it again. it all depends on one's point of view.

I am now done responding to this thread since, despite your protestions to the contrary, I really don't give a rat's ass what you think. That's what this group is anyway, right? It's all about one upmanship, right? Hmmm, kinda like the CB! LOL!

Bye, now.

21st Century E-Commerce Money Making Formula

This works better than letters & it's all electronic!

Posted By: E'Sean Date: Wednesday, 21 July 2004 eMoney Making Formula

"This is so awesome. Try it. The more people that do it the better."

"I turned $3 into $14,706 within the first 30 days of operating the business plan that I am about to reveal to you free of charge."

If you decide to take action on the following instructions, I will personally GUARANTEE that you will enjoy a similar return!"

Please do not be skeptical about this program.

At least think about it for a few days.

Otherwise you will be throwing away over $10,000 in cash!

Dear Friend, My name is Mark Sutton. I was laid off from my job in August of 2001 At that time I wasliving beyond my means and in serious debt. Several debt collectors were hounding me on an almost daily basis, and this consequently started a chain reaction that ended with the repossession of my car and then my home. As you can probably imagine, my prospects looked pretty bleak. Then, in March of 2002, I received a short and simple email telling me how to make over $10,000 at a time.

I ignored it because of course, I was skeptical.

However, I didn't delete that email because something about it rang true to me, and I was desperate to know whether it was possible to make that amount of money in such a short space of time. By this time, I was even deeper in debt, and I had just about reached the point of despair. I finally realized that I had absolutely nothing to lose by having a go at the plan offered to me in that email.

And apart from that, I just couldn't stop myself from thinking "What if it actually works?" Therefore, I put my doubts to one side and I went ahead and followed the simple instructions given in that email. It took me less than 30 minutes

to complete and it cost me no more than $3. And yet, by the end of 2002, I was able to book the family holiday of a lifetime in Miami, and

I bought a brand new Audi A8 with hard cash. And in the autumn of 2003, I purchased a tidy semi-detached home for no less than $125,000. And yet,

I don't owe a single penny to anyone!

To date, I have made exactly $392,718. My accountant has drawn up a cash-flow forecast in which he predicts that, within the next 24 months, I will become a millionaire just through this one business alone. Even now as I write this, I find it strange to come to terms with the fact that, like most people, I've worked hard and struggled all my life just to 'get by' and then something ridiculously simple drops into my lap and immediately turns my life around completely.

When I think back to all the similar emails I had previously deleted, it makes me shudder, because now I know just how close I came to missing out completely.

What did it say in that email?

What were those simple instructions that enabled me to amass so much money in so little time?

Well, if you'll read on, all will be revealed!

The business plan I am about to share with you works perfectly every single time. I've never made less than $10,000 from it on each occasion. Let me assure you that this is a LEGITIMATE BUSINESS OPPORTUNITY, a perfectly legal moneymaking enterprise. It does not require you to sell anything. It does not require you to speak to your friends, family or anybody else (unless you want to). In fact, you do not need to come into contact with any people whatsoever. Anyone with a pulse can become successful and make their fortune with this system. If you believe that 'every dog has his day', then follow the simple step-by-step plan exactly as it is set out below. If you do this and this alone, I GUARANTEE that within the next 30 days you will receive over $10,000 in cash via your PayPal account. I know that this must sound like an outrageous claim, particularly if you've never had possession of this sort of money before, but believe me, this business works like nothing else you may have seen before in your life!

By following the simple 3-step plan set out below, within a few short weeks your life will be transformed beyond all recognition! Please do not allow your initial skepticism to deprive you of certain financial success. If you decide not to take advantage of this life-changing opportunity, I would like you to know that I sincerely respect your decision and I understand that you will have your reasons. I therefore wish you the very best of luck for the future. I am able to say this with absolute sincerity because, as you will see, if you decide to work this plan, I will not receive any financial compensation from you whatsoever. After all, I am sharing this system with you for free. However, remember life is short. Nobody has ever said that you can't have the financial freedom to do what you want to do, when you want to

do it.

But you must first pay the price. The price here is action; it's as simple as that!

I'm very proud to be able to say that I've fulfilled my duty to my wife and children by securing their financial future in a very uncertain world, and I don't believe that any price is too great to pay for such peace of mind. THIS IS THE CHEAPEST, FASTEST & EASIEST WAY TO MAKE MONEY ONLINE - PERIOD!

There are a lot of companies out there offering to put you in your own business, but I'm so certain you will make a SERIOUS INCOME with what I am going to tell you that I'm willing to roll up my sleeves and help you begin - RIGHT NOW!!

Remember, I am not asking you to send me a single penny for the lucrative business project I am about to share with you. In addition, you will not be asked to buy anything or sacrifice your free time. You will make some fast and easy cash, using just a copy of this email and the simplest and most popular Internet payment system in existence!

You have most likely seen or heard about this project on TV programs such as 20/20 and Oprah Winfrey, or you may have read about it in the Wall Street Journal. If not, here it is below - revealed to you in step-by-step detail. This program is by no means new. It has been in existence in many forms for at least ten years. But in the early days, it required a lot more time and effort, as well as an outlay of a few hundred dollars. However, thanks to PayPal and the Internet, the outlay is now virtually ZERO! On top of that, the entire process is FASTER, EASIER, and MORE LUCRATIVE than it has EVER been! If you're already running a home business, you can easily do this one along with it. If not, this is the FASTEST and EASIEST way to earn serious money online that you've ever seen so far in the history of the Internet! This program works no matter what country you are in, or what currency you use. It doesn't matter how old or how young you are. And you certainly won't need any special knowledge or talent. You won't need to run a website, or make phone calls, or make photocopies, or send out letters through the mail, or pay for advertising, etc.

The only things you will need are: * An email address * A Premier or Business PayPal account with at least $3 deposited in it * 30 minutes of your time

This program takes just half an hour to set up. After that, there is absolutely no work whatsoever to do on your part. And yet, you will stand to gain many thousands of dollars within the next few weeks from those 30 minutes of easy work! Yes, I know, it sounds too good to be true! I thought exactly the same thing myself until I actually tried it out!

Even if you are already involved in another program, stay with it, but do yourself a big favour and DO THIS ONE as well. You have absolutely

NOTHING to lose, but you stand to gain a LIFE-CHANGING amount of money within the next few weeks! In fact, there is NO LIMIT to the amount of income you can generate from this one single business program!! The facts are simple: If you need to make a few thousand dollarss REALLY FAST, then this program is the way to do it! It's the CHEAPEST, FASTEST, EASIEST, and MOST LUCRATIVE program you will ever participate in!

Please be sure to read all of this page . . . take your time, come back to it . . . go over and over it, you won't be sorry, I can certainly promise you that! If you don't have time to read all of this now, then save this page, or add it to your Favorites list, so you can come back to it later. ALL YOU NEED IS A PAYPAL ACCOUNT & AN EMAIL ADDRESS! Just about everyone has heard about "PayPal" (if you haven't you will soon!) and when I came across this concept I knew it would work because, as a member of PayPal, I had already experienced their efficiency and excellent standing. PayPal is the simplest method of making and receiving payments online that anyone has ever seen! Anyone with an email address can join for FREE! Once you have a PayPal account, you can send and receive credit card payments to or from anyone - anywhere in the world! Please read further before you go there... You can complete this whole process within just half an hour and you will NEVER forget the day you decided to do so!!!

NEED PROOF? Here are just 3 testimonials from the countless individuals who decided to invest nothing more than $3 and half an hour of their time to participate in this program:

" What an amazing plan! I followed your instructions just 3 weeks ago, and although I haven't made 10 grand yet, I'm already up to $6,135. I'm absolutely gob smacked." Alan Humphries , Leicester

"This is Lisa. Well, what can I say?... THANK YOU SO MUCH! I sent 40 e-mail's out like you said and then I just forgot about the whole thing. To be honest, I didn't really think anything would come of it. But when I checked my paypal account a week later, there was over $3,000 in it! After 30 days I now have over $11,000 to spend! I can't thank you enough!" Lisa McDonald, Northampton

" I was shocked when I saw how much money came flooding into my paypal account. Within 3 weeks my account balance has ballooned to $7,449. At first I thought there had been some sort of error with my account!" Richard Barrie , Cirencester

Just a few months ago, each of these people were doing the same thing as you are at this very moment - reading this! But because they decided to follow the simple instructions given below, they are now considerably better off as a result. And there's no reason whatsoever why you can't share in this success. You've got nothing to lose, and EVERYTHING to gain! Let's get started, just follow the instructions exactly as set out below and then prepare yourself for a HUGE influx of cash over the next 30 days!

HERE'S WHAT YOU NEED TO DO. . .

STEP 1

Ok, if you're not already a PayPal user, the very first thing you need to do is use the PayPal link below and SIGN UP. It takes just two minutes!
https://www.paypal.com/us/mrb/pal=ZVR6VDMJUDB5Y

Be sure to use this link so you can sign up for a free PREMIER or BUSINESS account. You'll need to have a PREMIER or BUSINESS account (and not a PERSONAL account) otherwise you won't be able to receive credit card payments from other people.

STEP 2

It is an undeniable law of the universe that we must first give in order to receive. So the first thing to do when you have your Premier/Business PayPal account is to IMMEDIATELY send a $3 payment from your PayPal account to the FIRST email address in the list below, along with a note saying: " Please add me to your mailing list." Be certain to add this note, as this is what KEEPS THIS PROGRAM LEGAL. Instructions on how to send a payment are under "SEND MONEY" at the Paypal Site. It's so Easy!! When you send your $3 payment to the first address in the list, do it with a great big smile on your face because "as you sow, so shall you reap!"
<>Here's the current list
(1) bigmicrosoft @yahoo.com (2) disbellj @midsouth.rr.com (3) moty7ellek @adelphia.net (4) spontaniuz @msn.com (5) dholla @msn.com

After you have transferred a $3 payment to the email address at the top of the list, something very eerie happens. It gives you an indescribable, overwhelming sense of certainty, belief and conviction in the system. You've just proved to yourself that, because you have done it, there must be a great number of other people ready to do exactly the same. Thus you have now seen for yourself, first hand, that this business actually works!

STEP 3

Once you've sent a $3 payment to the address at the top of the list (along with a note,please add me to you mailing list! - this is VERY important!), the next thing you need to do is to obtain a copy of this email message, as you'll be sending it out to at least 40 people.

The copy that you will send out will contain YOUR unique PayPal referral URL and YOUR email address at number 5 in the list - having deleted the address at Number 1 in the list, and moving the others up a position. The easiest way to do this is to:

(A) Go to your toolbar (at the very top of the screen) and select EDIT and then SELECT ALL.

(B) Go to the toolbar again and select EDIT and then COPY.

(C) Start (compose) a new email message (PLAIN TEXT so everyone can view it!).

(D) Fill in your email address and subject line.

(E) Go to EDIT and PASTE to paste this text into your new email message. Now you can edit this email message in any way you want!

The first thing to edit are the email addresses in the list above. Delete the top email address, and then move the others up a position, and then add YOUR email address to the bottom of the list (the number 5 position). Be sure to use your email address that is associated with your PayPal account. But DO NOT forget to send $3 via PayPal (along with your note!) to the email address at position number 1 before deleting it! Don't be tempted to add your name to position 1 in order to earn money fast! It doesn't work like that!

If you do that, you will ONLY reach the people you directly send emails to, and then your name will be immediately removed from the No.1 place and you won't reach thousands of people! But, if you add your name to the Number 5 position, there will be literally thousands of people receiving and sending email's later - when your name is at the Number 1 spot!!!

Now you need to edit the PayPal referring URL (shown above in Step 1) with your own PayPal referring URL. You can find YOUR referring URL at Paypal after you join. Just look at the bottom of the first page once you sign into Paypal, and click on the "referrals" link. You will be given a referring URL similar to the one above, except the code number at the end will be different. Simply delete the current PayPal referral URL in Step 1 above, and replace it with your PayPal referral URL.

(F) Once you've edited your email message as outlined above, send out a minimum of 40 copies of this email. You can advertise it any way you want to But no spam.
Best of luck and remember to play fairly and honestly and this will really work

Yours Truly
Neo-Tycoon

Turn $6.00 into $42,000...read this to find out how!!! READING THIS COULD CHANGE YOUR LIFE! I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of cash within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: "what have I got to lose except 6 stamps and $6.00, right?" Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I started getting cash in the mail! I was shocked! I figured it would end soon, but the cash just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works....Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more cash than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the cash come in! It's easy. It's legal. And, your investment is only $6.00 (Plus postage) IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends. PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy

to pay big bucks for quality lists. However, the cash made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success: STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses:

1)Nathan Gilreath 6049 Porter Ave. East Lansing, MI 48823

2)Beth Collins 1012 Woodbine Ave., Toronto, Ontario M4C 4C1

3) Melody McKinley 8 Huntingdon Drive Dartmouth, Nova Scotia B2V 1w1

4) C. Witt 12 Pine ST. Attleboro, MA 02703

5)Ben Ervin 1281 Cadillac Dr. Hamilton, OH 45013

6) D J Kelly 661 powell st apt # 3 Brooklyn Ny 11212

STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more cash you make! This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need cash, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the cash that so many others have received will come your way. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of cash in CASH!!! What an opportunity for only

$6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business! ---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS---------- Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computer's memory. Step 2) Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list. Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to. Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE Cash YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving cash from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625.00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, "what if the plan is played out and no one sends you the cash? So what! What are

the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet. Remember, play FAIRLY and HONESTLY and this will really work.

Source record: 193792

Hi everybody, I am troubled with transmission line vswr, I hope this is the right place to ask this question. Is the sr formula same with unmatched generator? I mean I know that

SWR = (1 + |Gamma_Load|) / (1 - |Gamma_Load|)

Gamma_Load is reflection coefficient at load side.

But I think there is a problem with this formula when generator is unmatched to the transmission line so that there is also a reflection at generator side. Is that correct or am i making a mistake somewhere?
Thanx in advance.
Arif.

>Arif.

You are correct. There can be more than one mismatch in a system.
Group your system components so you have only two parts:

Effective Source (generator + transmission line)
Effective Load (load)

Then regroup the system again:

Effective Source (generator)
Effective Load (transmission line + load)

The number of possible mismatches depends on the number of components
in the system. For example, if your system has five components you can
have four possible mismatches.

Does that help?

Why would the generator be "unmatched" in your case is the first question to ask. However to answer your question I would say no. The logic proceeds as follows.

Another common formula for calculating SWR is based on measuring the forward and reflected power from the load.

SWR=(1+sqrt(Pref/Rfwd))/(1-sqrt(Pref/Pfwd))

In the case of a matched generator there is no power reflected from it. In the mismatched case power is reflected and simply adds to the forward power from the generator towards the miss matched load. Since the generator is now miss matched it does not put out full power, it can't by definition of a conjugally matched generator which can only put out max power in to a matched load. This extra power is partly absorbed by the load and some is reflected back toward the generator where it is again reflected back towards the load. At some point this process of reflections and re-reflections settles out to a steady state.

http://home.iag.net/~w2du1/Appendix%207.pdf

Look at examples A, B and C diagrams.
http://home.iag.net/~w2du1/Appendix%206.pdf

http://home.iag.net/~w2du1/Chapter%2023.pdf

The power absorbed by the load and what is reflected back is only a function of the load miss match. The generator miss match only alters the forward power. The load miss match controls the reflected power towards the generator, which is always a fixed fraction of the forward power whatever it maybe. Thus I would say the SWR is not dependent on the generator miss match to the line, but can the generator miss match can affect the measured forward power seen on the line. Also when you're measuring the miss match on

the line you are generaly interested in the "load miss match" which as I
stated above is stricly a function of the forward power sent to the load,
and the power reflected from it back towards the generator.

Mopey goes there to work the toilets. The extra cash is what he uses to pay for his adult toys and his ads in porno magazines.

Maybe twithed should go...a team of mopeydopey and FUGGLY KID working the toilets would be quite profitable

Source record: 193853

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

Hey Peepeeholic:
Yes I am in Toledo. I have plenty of down home hospitality for you or ANY of the other queens in here who wish to stir up some mess.
You wanna come by and visit? I will be delighted to send you back to the MISTAKE ON THE LAKE with a thought in your mind that it was a real dumb idea.
Imagine, Peepeeholic...Imagine...You come to my place and star some junk...I put you face down and hurtin extreme, take pics of you laying there with a bumped up noggin, and post 'em to the NG. I relish you coming by. I am good in the callbook, just as I told your wife, the trainedpuppet.
Have not had this much fun since I used to go cuttin' coax and building jamming oscillators back when I was 16 yrs old.

N8WWM chickenshit coward in person:

I didn't mix you up with anyone, but I really am not interested in your personal life,,,,,,these things were illustrated to remind you, you were wandering and invoking subjects that had nothing to do with the original thread.

>4. My "licensure" also has nothing to do with

>anything.

It does. That you are unable to grasp such,,,I'll leave it at that.

>If I want to make a comment, and someone

>doesn't like it, well , too bad.

Back at you concerning roger beeps, echo, and talk of amplifiers.

>5. Well, I've 'misbehaved' before, and I reckon

>I'll probably do it again. it all depends on one's

>point of view.

Deliberate responses to what you know are forges, isn't a point of view. It's an intentional act unbecoming of one who attempts to come across as one concerned with legalities, what's right, and doing things by-the-book according to the rules.

>I am now done responding to this thread

>since, despite your protestions to the contrary,
>I really don't give a rat's ass what you think.

Once again, excuse you, as it (again) was *you*, not I, who began "protestations".

>That's what this group is anyway, right? It's all

>about one upmanship, right?

At least the manner in whcih you operate and view things have never been more clear.

> Hmmm, kinda like the CB! LOL!

Cb is happening for many of us..especially the dx on the freeband. Oh yea,,,I have some figures for you,,,see you next post.

>Bye, now.

Happy New Year!

178. FCC STATS

Damn,,,,,three convictions for AM/SW users out of the entire year. It appears despite the noise and bullshit placed forth by n8wwm and k4kwh, enforcement action against cbers is not only down, but on a continual decline.

-

2004 Enforcement Action Database Index
Total Enforcement Actions: 55

One thing you did not say, butt pirate...several of those busts were the result of AKC action.

Plus the thousands of busted keyclown auctions...forgot that, didja, limpwrist?

Ya see, muffin boy...there's FCC...and then there's AKC. You can't stop the AKC no mater what trash you talk.

Received: from [205.162.217.3] by webmail15.lax.untd.com with HTTP:Sat, 1
Jan 2005 22:36:02 GMT

liar emailed me and said:

Hey Doug, you can go finger fuck yourself. You emailed me asking
for info about me?? I dont give a rats ass who you deal with you
contacted me. I gave you the info, yet I have no idea who you
are, you havent given me anything verifiable nor do I care if
the info isn't good enough for you, I could care less about
your AKC games I have fun breaking balls without your permission
or approval. And have even stuck up for you against those you
despise... but now, I can see why they think your an assclown.

I reply to the liar:

Whatever dude. I don't have conversations in my email with
people I don't know, or for sure know who they are. As for your
bullshit about not knowing me, that is what it is...bullshit. I
am well documented, and I don't care who "knows" me. If you
don't know who I am and you have been in the NG more than 2
minutes in your life you are just too stupid to even have a
lower brain that allows breathing and the heart to pump blood.
Therefore, you are theoretically non existant.

You are also on my list of spammers, and will be reported to
your ISP if you continue messaging me. Take this as legal notice
that if you send me more email you are consenting in advance to
a charge of $2,999.00 for that privelege. Do your research
before you decide to email me again, because I have the right to
file such a lawsuit. In Ohio it only costs $29.00 to file it,

and if you do not show up I win automatically.

Do yourself a favor and chill out while it only cost you being exposed as a lying sack.

Source record: 193873

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

>that has posted here many times that he is responsible for people like
>Dennis' departure from the group.

I don't know who was responsible for Dennis's departure from this
group, and I suspect that neither do you. You only grasp at straws and
make wild guesses. It's no different than what your detractors do to
you, when they accuse you of being Dave Mc Campbell et al.

I don't defend people, I defend principles. If there is insufficient
proof (and heresay testimony from anonymous internet groupies does not
count as proof) to verify an allegation, then I tend to remain
skeptical.

>> Dennis was a friend,
>
>
>Well, to be perfectly fair, this group was witness to how you treat your
>"friends" on more than one occasion. Your comments concerning
>your"business partner" is testament to such and a fine example.

How have I mistreated my friends, as if you know of any examples?

>>and a welcome addition

>>sound RF principles. Dennis was one of the

>>few who set people straight. I applaud and
>>respect him for that.
>
>
>Unfortunately, you defended the jerkoff that attacked not only Dennis,
>but just about everyone else on this group, also.

That does not mean, as you erroneously claimed, that I took part in
his departure from the group.

> In fact, you jumped
>aboard the canine wagon with both paws, claiming the FCC and Rainreport
>means nothing concerning enforcement.

I only claimed that there was no definitive proof, at the time, that
the interference was being caused by the person who was being accused.
Knowing how this person had set himself up in a despised position, it
was easy to postulate how someone looking for some sort of "revenge"
could have framed him for it. All I said was not to count all of your
eggs before they all hatch. Premature summary judgements are
irresponsible.

Like I said, I defend principles. Heck I'd even defend you if the
situation warranted it. I believe that people should get what they
deserve, nothing more or less.

>Just more double talk from one who has been shown to not only ride both
>sides of a debate with self-contradiction, but also fosters and incites
>flames from all parties.

A skilled debater is able to assume either side of an issue and argue
it with equal effectiveness. You may call it contradiction. I call it
"Keeping an open mind".....

I haven't used Channel 6 since I was in a CB club that used that
channel in the 1970's, and I only had a Lafayette HA-250 amplifier in
the car then.

There is no way you could reliably know whether I am operating on any
particular frequency. You are too far away to hear me, and any
"tidbit" of info that you might hear, is of questionable credibility.

>Did you check out Michael Savage lately? He's slamming Bush, saying we
>are hated by all in Indonesia because of his policies and that is the
>new terrorist breeding ground.

Savage is an idiot. But there is no pleasing the liberals. First they
accuse us of not responding fast enough, or with enough money. Now I
hear that we are starting to supply so much more money, that we are
making India look bad. It would seem that no matter what we do, it's
never the right thing......

Frank,

You only managed to prove that you're as biased and open to
propaganda, on the left, as you accused me of being to the right.

Kerry has many big secrets to hide, and it may have saved him to lose
the election, as the quest to reveal them has lost much of it's
appeal.

I saw no further point in playing the "my website can beat up your
website" games with you. You want to believe the lie, then go right
ahead. I know better.......

What left-wing propoganda? I presented a -BIG- list of documented
FACTS that you shruged off as mere speculation. On the contrary, you
provided nothing -but- conjecture, most of which was contradicted by
the FACTS. And the FACTS don't care which side you are on.

Gee, and here I thought it was the "official military records can beat
up your website" game.

> You want to believe the lie, then go right
>ahead. I know better.......

Yeah, I suppose you're right -- those pesky facts are just a nuisance
when you know what the truth -really- is, right Dave?

Hello:

This ng is great! Thank you all for sharing your collective information and experiences with CB and HAM.

I'm looking for a way to communicate in a remote region that is in, and surrounded by, mountains and hills. There is no cell service.

Can CB or HAM operate here? What would need to be set-up? What I'd like to have is a base station for the house, something for a car or truck, and then a couple mobile units for hiking, etc. A distance of 100 mile radius from the base station would be incredible, but a 20-30 mile radius is most needed.

Any information you choose to share is greatly appreciated. Also, since I'm new and trying to learn, if you are feeling generous, explainations are more than appreciated! For example, "you could use CB, but it's limited to XYZ, but you can overcome that with ABC, etc." Hope that makes sense!

The best way to find out what you can use is by listening to what you
can receive -- you can't work it if you can't hear it. Get yourself a
general-coverage receiver and start logging.

same old argument. what makes you think you are any better (your statements
of late tend to cast doubt on that)?

There is a problem though, I didn't choose how I live and what I get paid.
You can thank a drunk driver for that back in the late 1980's.

I'd like to see how well you cope with diminished income and all that goes
with it for more than a decade. Think you'll fare as well?

Since you can't offer anything constructive to the subject at hand (I.E. the
radio with chipswitch) then I suggest to you (and others) that this thread
is now at an end. any further comments from you in this grain will only
serve to make you look even more foolish (if thats even possible).

The 2 knobs fitted on it are UK military, circa 1939-1947. Maybe some
lend-lease item?.

Rich, could you please make all the auction items
in on post, instead of spamming the group.

Very nice radio. I owned one at one time. The mike is not compatible and
will have to rewired to remove the amplifier.

Well EBay has strict rules about this. You would've
thought he learned this last time people complained to him
about doing this.

Santa was great to me. I had a wonderful holiday season.
You had givin my "X" a base for a penetrator antenna many years ago and I am planning on putting it up on my new house.
I just wanted to make sure you were still around so I could pick your brain if need be.
Or maybe I'll just drop by since I recently moved back to the desert.
Thanks!

Keyclown makers of illegal amps are not Techs. Not in any way. They are federal criminals taking money for illegal items and selling junk to morons. All brad band impedednce transformer setups are inferior to tuned circuits.

Aside from that, CB's are allowed to make a higher percentage of RF junk per watt output than many other radios, because they are supposed to be operated at LOW POWER. When you amplify the garbage that a broadband transformer cannot filter, since it is NOT a tuned circuit, you are contributing to the RF pollution problem. This aspect is totally ignored by keyclown amp makers, who do not care what garbage their garbage generates, as long as they get money.

Not for long..(from another group)

Please Note: The AOL Newsgroup service will be discontinued in January
2005.

For members using AOL over a dial-up connection, you will no longer be
able to access Newsgroups. If you have a separate high-speed

connection, you can contact your broadband provider to see if they offer Usenet/Newsgroups. Usenet services can often be accessed through a third party reader, such as Mozilla Thunderbird (http://www.mozilla.org/projects/thunderbird/).

We apologize for this inconvenience.

Ohio Recount Steeped in Fraud
Democracy Week | Commentary
Saturday 01 January 2005
There is something you can do.
The presidential vote recount in Ohio is over - or is it?
The Green and Libertarian Party candidates who paid for the recount may have a claim of fraud against election officials and at least one voting machine company. If they can't get a new recount, they ought to at least get their money back.
Here's what happened.
Any Ohio county did not have to do a full hand recount if a random sample of three percent of the ballots in their county matched the original count.
The first fraud count: Not all the counties, if any, pulled the test precincts at random, nor did they allow the trained observers to see how the test precincts were selected.
Rep. John Conyers, ranking minority member of the House Judiciary Committee, sent a letter to all the presidential candidates, in which he he stated: "At least one precinct in Medina County that would not have voting anomalies was both carefully pre-selected and pre-counted, so that the initial 3% recount that is mandated by the Ohio Secretary of State would not return a mismatch between the initial tally and the recount." [Read Rep. Conyers' Letter]
Once they selected the test precincts, some counties shared that information with the voting machine technicians, who then made adjustments on the machines and gave advice on how to create an exact match. That would be the second fraud count. Technicians from Triad, the

company operating many of the counting machines, visited 41 of the 88 county election offices.

Triad technicians admitted that they helped the counties avoid the full recount by faking the match on the three percent count. [Read a transcript of the admissions].

When all else failed, election officials changed ballots to make the count come out right. An election official stated that she "did not want the hand count and the machine count to be different because they did not want to do a complete hand count," according to a trained observer quoted in Rep. Conyersâ☐☐ letter. That would be fraud count number three.

Mr. Conyers also wrote to Triad, asking them to provide information regarding the company's ability to control the machines remotely, which a Triad representative admitted. [Read Rep. Conyers' Letter to Triad]

Fraud count number four would be that the Secretary of State, who also served as Mr. Bushâ☐☐s state campaign chairman, refused to issue guidelines to the counties for the handling of undervotes, overvotes and other issues, a clear violation of the â☐☐equal protectionâ☐☐ ruling of Bush v. Gore. Counties used wildly different rules during the count and the recount, depriving the recount parties of true value for their investment.

The same Secretary Blackwell may have been a party to the systematic violation of equal voting rights by shorting minority precincts of voting machines, while over seventy extra machines languished in a truck. The day-long lines in many minority neighborhoods cost Mr. Kerry thousands of votes, by some estimates.

This article scratches the surface of what was done in Ohio to suppress and subvert the vote and render the recount meaningless. For in depth reporting, your best source is The Columbus Free Press.

What Can You Do?

Rep. Conyers has said that he will stand to object to the acceptance of the Electoral College vote when it arrives at a joint session of Congress at 1pm on January 6. Other House members will join him. One Senator is needed to stand with them.

Senators don't want to look like lunatics. They need support from home. The most effective thing Americans can do THIS MONDAY AND TUESDAY is to print out the Conyers' letters from the links in this article, write a quick letter to the editor as a cover letter, and hand carry them to local newspaper editorial writers.

If a Senator with a concern for democracy can be found, then the Ohio mess will become a major story as committees investigate and the mainstream press piles on. The chance of it overturning the presidential election is miniscule, but it will set the stage for election reforms and for the punishment of criminals in high places, and it will dissolve the notion of a present mandate.

A useful cover letter would state that, regardless of party, Americans must insist on the fair and non-partisan administration of elections, and that our Senators should stand with Rep. Conyers to

demand an investigation and a pledge of reform before this yearâ□□s election is accepted by Congress. We are too great a country to accept damaged goods instead of a reliably honest election result, or else our claims of spreading democracy to other lands is a sham. Your letter could remind the editors of how many people have sacrificed and died for our freedoms, the emblem of which is, more than our flag, our ballot.

After you hand deliver the letter to your newspaper, take a copy to the field offices of your two Senators, if you live within distance.

_

Also, what is going on with Nethercutt, now?

  In some cases, the
repercussions can be severe, such as Dennis had in that bullshit when
Hall and Lelnad and Dogie all conspired to contact his employer.

>Keep my name out of this.

Your name was netered by yourself and voluntarily on this subject.

>No, you mentioned it erroneously.

What I did, was illustrate your double-speak and unending defense of N8
when he was popped by the FCC.

>I had NOTHING to do with it.

Aw, come on, Dave...one doesn't need google to realize how many times
you not only defended vehemently, but aligned yourself with the jerkoff
that has posted here many times that he is responsible for people like
Dennis' departure from the group.

>I don't know who was responsible for Dennis's

>departure from this group,

You lobbied too hard in defense of N8wwm and his lawbreaking to make
such a claim at this point in time.

>and I suspect that neither do you.

>You only grasp at straws and make wild

>guesses. It's no different than what your

>detractors do to you, when they accuse you of
>being Dave Mc Campbell et al.

>I don't defend people, I defend principles.
.
Hehe..surely surely,,,,just like you claimed you don't attack people,
you attack their posts,,which was shown to be bullshit with your myriad
of personal woes and offtopic insults ladled throughout your posting
history..
No "principles" were defended when you redundantly insisted information

given the rainreport by the FCC is not proof of one breaking the law and that those listed there should not be considered guilty of any wrongdoings.

> Ifthere is insufficient proof (and heresay

>testimony from anonymous internet groupies

>does not count as proof) to verify an

>allegation, then I tend to remain skeptical.

Same thing you said concerning the rainreport when they busted your buddy n8wwm.

>Dennis was a friend,

Well, to be perfectly fair, this group was witness to how you treat your "friends" on more than one occasion. Your comments concerning your"business partner" is testament to such and a fine example.

>How have I mistreated my friends, as if you

>know of any examples?

See above.

>and a welcome addition

>to this usually technically challenged group,

>who tended to believe "CB science" over

>sound RF principles. Dennis was one of the

>few who set people straight. I applaud and

>respect him for that.

Unfortunately, you defended the jerkoff that attacked not only Dennis, but just about everyone else on this group, also.

>That does not mean, as you erroneously

>claimed, that I took part in his departure from

>the group.

In all probability, it does. You claimed in the past you had nothing to do with N8WWM, and had to be shown you most certainly were playing his games by reposting some of your more colorful and harssing posts. I am now aware some of your extremely weird behavior has been attributed to the medication to which you have been taking for some time, however, at this point in time, you appear to forget the post to which you were forced to admit "Yes, I admit I fell into Doug's bullshit".
this was extracted from you only after your continued denials and only after you were caught playing games with Dogie and harassinh good people

in this group.

_
In fact, you jumped
aboard the canine wagon with both paws, claiming the FCC and Rainreport
means nothing concerning enforcement.

>I only claimed that there was no definitive

>proof,

And you were dead wrong.

> at the time, that the interference was being

>caused by the person who was being

>accused.

Once again, you are showing what little you know of the law governing
that of which you are you licensed. Protocol at the FCC dictates prior
to any offense being logged, an official FCC, assignee, or designee MUST
witness the infraction. Exceptions to this are when the FCC receives
calls from individuals not afiliated with the FCC, like k4kwh, who are
merely reporting infractions they allegedly witnessed. In such cases,
the FCC *may* contact the individual accused, but they (FCC) ALWAYS make
certain the individual is NOT accused by the FCC until they witness
infractions of violation of the law themselves. In these cases, the FCC
will release a statement to the effect of: "John Doe was notified by the
FCC that they received information he was in violation of ..... on
(insert date here)..." In these instances, a reply is requested
addressing the FCC's inquiry. In N8WWM's case, and others like it (where
the FCC already determines infractions occurred), the FCC simply
releases a statement to the effect of :"N8WWM was found to be in
violation" or "Enclosed are recordings of N8WWM's violations".

>Knowing how this person had set himself up in
>a despised position, it was easy to postulate

>how someone looking for some sort of

>"revenge" could have framed him for it.

You are the only one to continue to set forth this preposterous notion.

>All I said was not to count all of your eggs

>before they all hatch. Premature summary

>judgements are irresponsible.

Only it wasn't a premature judgement nor an isolated incident. It was
several violations (according to the FCC) on several occasion, and the
FCC had ALREADY determined the violations occurred, yet, you undermind
their authority when it comes to N8WWM getting busted.

>Like I said, I defend principles.

And like you were shown above, you're wrong.

>Heck I'd even

>defend you if the situation warranted it. I

>believe that people should get what they

>deserve, nothing more or less.

Hehe,,,erroneously seeing yourself as judge of what others deserve is
part of your problem, Dave, and quite the narcissistic.

_
Just more double talk from one who has been
shown to not only ride both sides of a debate with self-contradiction,
but also fosters and incites flames from all parties.

>A skilled debater is able to assume either side

>of an issue and argue it with equal

>effectiveness.

Feeling compelled to always foster debate in a discuss room.....you
should be in a debate group, Dave, as this is labeled but a mere
discussion group. A skilled debater can handle and debate on both sides
of an issue equally effective. When you present your position of
underminding the FCC concerning their releaseed statement claiming N8WWM
was caught jamming, you do so out of personal opinion, not facts that
support your self-debate. Regardless the manner you see yourself, such
an approach is by no means effective nor skilled.

>You may call it contradiction. I call it "Keeping

>an open mind".....

When you call one a felon and a criminal for using the same illegal amps
you utilize and for talking skip on channel 6 like you, nothing about an
open mind exists. It's shameful hypocrisy and intentional malice.

That's a wonderful story, if it's true. Is there any solid proof other
than these allegations and he said-she said testimony to back it up?

The paper never refuses ink, and politically motivated people have
incentive to lie.

Perhaps they should do a recount in Pa.. There were all sorts of
allegations of fraud in Philthy. Perhaps they may find that Bush
really won Pa. as well. Then Ohio becomes a moot point. Are you sure
you really want to go there?

Your guy lost. Get over it.....

>Your guy lost. Get over it.....

Pay attention, Dave: It doesn't matter who won or lost the election. Kerry conceeded -- end of story. So quit invoking his name to distract from the -REAL- issue which is the huge scale of the voting fraud that happened during the election. This problem threatens the very core of this democracy, and if presidential elections can be rigged then we might as well throw in the towel. Future elections will be meaningless and open to any power-monger with enough money to buy the election, maybe even someone as diabolical as Hitler or Stalin. But I suppose you wouldn't mind such a 'leader' or how he comes to power just as long as you agree with his publically stated moral principles and objectives..... but wasn't it you that said, "politically motivated people have incentive to lie"?

Get a clue, Dave.

Nope. If you ever took anything it would be while I was sleeping.

As for that traceroute, hey...kinda funny, ay? I mean, the posting goes out and there's an IP address attached to it, so you attempt to show your completely lacking techinical abilities by posting a traceroute? Cub Scouts could do that, and they would have the benefit of something you have never had, adult supervision.

When you post traceroutes you show how impressed you are with your ability to find one. This in turn shows clearly that you are impressed with your limp wristed self way too much for the childishlishly simple level the source of that esteem comes from.

You are the one scared of showing who you are, wimpy.

Say what you will, but one fact remains: You have not stopped the AKC. You never will. Must just suck so bigtime to be faced with that fact and get all mewling and quivering like you do.

>Dennis' departure from the group.

I made a single defensive comment regarding the then sketchy
allegations of interference. Later information seemed to make the case
much plainer. But you can't judge my initial comment against later
information. And by making that single "defense" hardly qualifies as
"aligning" with him. You do have a flair for the over dramatic.

>
>>I don't know who was responsible for Dennis's
>>departure from this group,

>>respect him for that.
>
>Unfortunately, you defended the jerkoff that attacked not only Dennis,
>but just about everyone else on this group, also.

As brought to my attention in another post, Dennis' departure
pre-dated Doug's "activities". The person most likely to have had a
hand in it was Mark Fuller. You might want to sit and play Google
games again before making yet another false claim.

>>That does not mean, as you erroneously
>>claimed, that I took part in his departure from
>>the group.
>
>
>In all probability, it does.

No, in all actuality, it doesn't.

> You claimed in the past you had nothing to
>do with N8WWM,

True. I have never had words with Doug.

>and had to be shown you most certainly were playing his
>games by reposting some of your more colorful and harssing posts.

What posts have I authored have been the least bit "harassing"?
Pointing out anti-social behavior is hardly harassing. If you can't
deal with the truth, it's not my fault.

> I am
>now aware some of your extremely weird behavior has been attributed to
>the medication to which you have been taking for some time,

What? Now what are you smoking? For someone who claims to not care
about the personal activities of others, your are a virtual fountain
of information. Unfortunately, most of the time, it's wrong. I am
taking no medication other than occasional cholesterol and acid reflux
medication. That is certainly not something which would affect my
"behavior".

> however, at
>this point in time, you appear to forget the post to which you were
>forced to admit "Yes, I admit I fell into Doug's bullshit".

I freely admitted that. Like I said at the time, I agreed with Doug's
principle of advocating legal CB operation. I did not endorse or
condone his methods of spamming the newsgroup.

>this was extracted from you only after your continued denials and only
>after you were caught playing games with Dogie and harassinh good people
>in this group.

That statement is a bold faced lie. I challenge you to prove
otherwise. Which, like in all other cases, you will be unable to.

>When you call one a felon and a criminal for using the same illegal amps
>you utilize and for talking skip on channel 6 like you, nothing about an
>open mind exists. It's shameful hypocrisy and intentional malice.
>

I do not shoot skip. I don't LIKE skip. When I used to use an
amplifier, it was to GET OVER or chase it off the channel. That was
many years ago. I've since changed my attitude with respect to the
law. Like I said before, I have not used channel 6 since the late
70's. Once again, if you have any proof otherwise, I'd be glad to see
it.

You really need to seek help to deal with your habitual lying,
misrepresenting, and distorting of the truth.

Freepress.org is a leftist propaganda organization, so it does not
surprise me that they hype the negative issues to make it seem worse
than it is. But you seem to have a problem differentiating between
real hard irrefutable FACTS with biased editorial opinion.

>>The paper never refuses ink, and politically motivated people have

>>you really want to go there?
>>
>>
>>Your guy lost. Get over it.....
>
>
>Pay attention, Dave: It doesn't matter who won or lost the election.

Sure it does. Would all these P.E.S.T. victims be screaming for a
recount in Ohio if Kerry had won? That was my whole point. There were
all sorts of allegations of voter fraud in Pennsylvania, particularly
in heavily democratic strongholds like Philadelphia. But nobody cares
because Kerry won the state, even if by less of a margin than Bush won
Ohio.

>Kerry conceeded -- end of story.

No, it's not. There are all sorts of sore loser groups trying everything from trying to throw out the electoral vote, to impeaching Bush. They just can't deal with the fact that THEY LOST. Crying voter fraud is just another attempt to deny the fact that THEY LOST. Denial is the first step.

I wasn't happy when Clinton won, but I didn't accuse every state where he won of fraud (Even though, in all likelihood, there was probably some).

> So quit invoking his name to distract
>from the -REAL- issue which is the huge scale of the voting fraud that
>happened during the election.

Tell me Frank, do you believe that there has always been voter fraud, or do you think that this is suddenly something new?

>This problem threatens the very core of
>this democracy, and if presidential elections can be rigged then we
>might as well throw in the towel. Future elections will be meaningless
>and open to any power-monger with enough money to buy the election,

Like George Soros?

>maybe even someone as diabolical as Hitler or Stalin.

Or Ted Kennedy?

> But I suppose
>you wouldn't mind such a 'leader' or how he comes to power just as
>long as you agree with his publically stated moral principles and
>objectives..... but wasn't it you that said, "politically motivated
>people have incentive to lie"?

Yes, but you seem to think the whole issue of fraud is one sided. You scream with righteous indignation because your guy lost, not because you have a genuine concern over the voting process. Id be willing to bet that had Kerry won, you wouldn't care if allegations of voter fraud surfaced. You'd be saying to me, the same thing I'm saying to you.

I also find it curious that those who seem the most opposed to putting policies in place to lessen the chance of fraud are mostly democrats. Mandatory voter ID, and a more secure voting environment have all been shouted down by democrats. They used the lame "disenfranchised" and "racism" arguments to hide their real worry that a truly fair election would hurt them. No more buying votes with cartons of cigarettes, or bottles of ripple.

>Get a clue, Dave.

I would think that you need one as well.

Exact post please, not a passage taken out of context. That doesn't sound like me. I usually refer to the current state of channel 6 as the "toilet bowl".

The fact that I am aware of what goes on there (my radio does have ALL 40 channels), does not mean that I USE it.

Try again.

>"just having fun". Yet it's ok for these same people to ruin the fun of
>everyone else with their nonesense, and if we don't like it, it's too
>damn bad?

My opinion is simply this...
When I am on a channel that I dislike I go to another channel (I have
many) or I leave the area(mostly in the mobile) or I turn my radio
off(it's real easy)!!!!
I know how it is on the superbowl (channel 6) and as with others on
this newsgroup and on the band, when it gets too much for me I leave.

Dave, it's really quite easy!!!
SInce that channel seems a waste of time and of course you feel like
degrading those on it, you should avoid that channel at all costs!!!!
Although I am a computer professional and I interact everyday with
people who don't know what the heck a "roger right-on, cotton chopper
and a mud duck is..." I can easily make the transaction between the 2
worlds. I am not stuck in either!!!!

Take care sandbagger you are one bad ass cotton chopper!!!!!!!!!!!!
Take care and have a pleasant day!!! We can't change the world, we can
only live in it!!!!!!

ICE, ICE AND MORE ICE MR. ICECOLD BIG APPLE TREES JUST HAMMERED
DOWN!!!!!!!!!
One of the original 3 Soul Brothers
from NYC

Try again Twist......

Dave
"Sandbagger"

>
>Freepress.org is a leftist propaganda organization,

Enough with the labels. You have also labeled the mainstream media as
being heavily biased to the left, yet it is the mainstream media that
refuses to cover the Ohio recount or release the raw exit poll data.
Your labels don't reconcile with the facts. As for freepress.org, I
suggest you read their "About" page which describes the organization
and chronicles it's history. I doubt you will read it because people
like you are too afraid to face facts that might conflict with your
biased opinions. You would rather slap labels on others instead of
admitting that there is a possibility you are wrong. But you really
-should- read it because people with open minds don't share your fear,
and they are the people you will be arguing with until you wake up and
smell the sheep-dung.

> so it does not
>surprise me that they hype the negative issues to make it seem worse
>than it is. But you seem to have a problem differentiating between
>real hard irrefutable FACTS with biased editorial opinion.

Are you suggesting that a 124% voter turnout is just an "editorial
opinion"?

<snip>
>>Pay attention, Dave: It doesn't matter who won or lost the election.
>
>Sure it does. Would all these P.E.S.T. victims be screaming for a
>recount in Ohio if Kerry had won? That was my whole point. There were
>all sorts of allegations of voter fraud in Pennsylvania, particularly
>in heavily democratic strongholds like Philadelphia. But nobody cares
>because Kerry won the state, even if by less of a margin than Bush won
>Ohio.

Read the transcript I cited. These are the same organizations that
cried foul when Gore tried to manipulate the recounts in Florida,

criticized the Clinton victories, and have members that are official election observers for this and other countries. Yet you try and paint them as hired guns for the Democrats. As you have demonstrated many times before, your perspective is so slanted you are falling over.

>>Kerry conceeded -- end of story.
>
>No, it's not. There are all sorts of sore loser groups trying
>everything from trying to throw out the electoral vote, to impeaching
>Bush. They just can't deal with the fact that THEY LOST. Crying voter
>fraud is just another attempt to deny the fact that THEY LOST. Denial
>is the first step.
>
>I wasn't happy when Clinton won, but I didn't accuse every state where
>he won of fraud (Even though, in all likelihood, there was probably
>some).

"They" is not "me". Whether the current president makes you whine or dine, voting fraud is the issue. The "Kerry-lost-get-over-it" routine is getting old and you are sounding like a broken record. The most important issue right now is voting fraud. Address the issue at hand. Some day later we can address how your wool got sheared by Bush's propoganda machine.

>> So quit invoking his name to distract
>>from the -REAL- issue which is the huge scale of the voting fraud that
>>happened during the election.
>
>Tell me Frank, do you believe that there has always been voter fraud,
>or do you think that this is suddenly something new?

Voting fraud has been around ever since voting was invented. But there has never been fraud on a scale like what was seen Nov. 2. Nor to the extent that, if left unchecked, could directly affect the government of the most powerful country in the world. You aren't suggesting that voting fraud should be ignored because it's going to occur no matter what, are you? Because that's the same kind of excuse illegal CBers use to justify their operation.....

>>This problem threatens the very core of
>>this democracy, and if presidential elections can be rigged then we
>>might as well throw in the towel. Future elections will be meaningless
>>and open to any power-monger with enough money to buy the election,
>
>Like George Soros?
>
>>maybe even someone as diabolical as Hitler or Stalin.
>
>Or Ted Kennedy?

Gee, I don't know..... did Ted Kennedy kill millions of people? Is that the secret ambition which convinced him to enter the political

arena? I'm asking because the facts don't indicate anything of the sort, but -you- know the -real- truth, don't you Dave? So polish your lamp, gaze into your crystal ball, call the psychic friends network, or do whatever it is you do to gain such pervasive insight into the truth..... and tell me, what -are- Ted's secret ambitions?

>> But I suppose
>>you wouldn't mind such a 'leader' or how he comes to power just as
>>long as you agree with his publically stated moral principles and
>>objectives..... but wasn't it you that said, "politically motivated
>>people have incentive to lie"?

>Yes

No kidding.

>, but you seem to think the whole issue of fraud is one sided. You
>scream with righteous indignation because your guy lost, not because
>you have a genuine concern over the voting process. Id be willing to
>bet that had Kerry won, you wouldn't care if allegations of voter
>fraud surfaced. You'd be saying to me, the same thing I'm saying to
>you.

Did you come to those conclusions after reading tea leaves or throwing bones? Maybe you should read some of my previous posts regarding Bush, how I defended him in the past. Maybe you missed my criticizms of Gore for trying to manufacture votes by selective recounts. Maybe you missed my many posts where I clearly stated that I only vote for independents and/or third party candidates, and voted for Nader in this election. Or maybe you just aren't paying attention to the facts.

It's so much easier for you to comprehend if you tell yourself that I voted for Kerry and that I'm a sore loser, isn't it? Well, as usual, you're wrong. I voted for Nader. And even though he lost the election, I didn't have any expectations that he would win. But he and other third party candidates -did- make a strong showing, which was my intent with my vote, and for that reason I am -very- happy with the outcome of the election.

Except for the fraud.

>I also find it curious that those who seem the most opposed to putting
>policies in place to lessen the chance of fraud are mostly democrats.
>Mandatory voter ID, and a more secure voting environment have all been
>shouted down by democrats. They used the lame "disenfranchised" and
>"racism" arguments to hide their real worry that a truly fair election
>would hurt them. No more buying votes with cartons of cigarettes, or
>bottles of ripple.

Both Republicans and Democrats oppose those issues equally. And it wasn't the Democrats who initiated the recount in Ohio; it was the Greens and the Libertarians with cooperation from voting rights organizations. Once again you have showed how skewed your perspective

is towards the Republicans.

>>Get a clue, Dave.
>
>I would think that you need one as well.

What you think about me carries no weight since you have yet to
demonstrate that you are capable of thought that is independent and
rational; i.e, above the level of domesticated livestock.

If the shoe fits......

>You have also labeled the mainstream media as
>being heavily biased to the left, yet it is the mainstream media that

Because even the mainstream media realizes that this story is more
fluff than substance, despite their left leaning slant. Unlike
unaccountable rags like "freepress.org" the mainstream media has
accountability to the masses. Especially after "Rathergate" they are
especially leary of stories which cannot be verified with some degree
of accuracy.

It would seem that your "standards" for what passes as "truth" is much
less.

>Your labels don't reconcile with the facts.

What you perceive as "fact" is the at the core of the issue. Unless
you personally had a hand in the investigation, you are getting your
information from a 2nd, 3rd or 4th party. Any one of which can
"modify" the facts by adding a degree of bias to the point that the
message has skewed. But, for some reason, you can't seem to see that.

> As for freepress.org, I
>suggest you read their "About" page which describes the organization
>and chronicles it's history.

I'm sure Adolf Hitler wrote a glowing review about himself as well.
What "freepress.org" says about itself is meaningless. What other
groups, who track the political agendas of these rogue "news"
services, says is what tells the real story.

> I doubt you will read it because people
>like you are too afraid to face facts that might conflict with your
>biased opinions.

Frank, when are you going to realize that you "facts" are nothing more
than YOUR biased opinions. Telling me that my bias is wrong based on
your bias is laughable.

> You would rather slap labels on others instead of
>admitting that there is a possibility you are wrong.

There is always a possibility that I am wrong. But not this time. I've
been around the block to know how this all works. Republicans are not
angels by any stretch of the imagination. But just like you telling me
I'm wrong based on your own bias, democrats screaming "foul" at an
election that they lost, and pointing at republicans for cheating,
while they cross their fingers behind their backs is equally
ridiculous.

They BOTH cheat. They always have. But I am incensed that democrats
have the balls to be so blatantly hypocritical.

> But you really
>-should- read it because people with open minds don't share your fear,

My FEAR? What "fear" is that?

>and they are the people you will be arguing with until you wake up and
>smell the sheep-dung.

Until *I* wake up? You'd better pinch yourself man, because it is not
I who is sleeping.....

>> so it does not
>>surprise me that they hype the negative issues to make it seem worse
>>than it is. But you seem to have a problem differentiating between
>>real hard irrefutable FACTS with biased editorial opinion.
>
>
>Are you suggesting that a 124% voter turnout is just an "editorial
>opinion"?

Are you equally concerned that the overturning of a clear republican
victory in Washington State after not just one, but a few recounts,
and by a similar "bloat" in voter turnout?

>>>Pay attention, Dave: It doesn't matter who won or lost the election.
>>
>>Sure it does. Would all these P.E.S.T. victims be screaming for a
>>recount in Ohio if Kerry had won? That was my whole point. There were

>>all sorts of allegations of voter fraud in Pennsylvania, particularly
>>in heavily democratic strongholds like Philadelphia. But nobody cares
>>because Kerry won the state, even if by less of a margin than Bush won
>>Ohio.
>
>
>Read the transcript I cited. These are the same organizations that
>cried foul when Gore tried to manipulate the recounts in Florida,
>criticized the Clinton victories, and have members that are official
>election observers for this and other countries. Yet you try and paint
>them as hired guns for the Democrats.

Like I said, if the shoe fits. The sheer intensity of the protests and
the unwillingness for so many people to accept the outcome of the
election is more telling as to the driving force behind this brouhaha.

> As you have demonstrated many
>times before, your perspective is so slanted you are falling over.

I don't have to worry about falling over, as your equally slanted
perspective in the other direction will balance me out.

>>>Kerry conceeded -- end of story.
>>
>>No, it's not. There are all sorts of sore loser groups trying
>>everything from trying to throw out the electoral vote, to impeaching
>>Bush. They just can't deal with the fact that THEY LOST. Crying voter
>>fraud is just another attempt to deny the fact that THEY LOST. Denial
>>is the first step.
>>
>>I wasn't happy when Clinton won, but I didn't accuse every state where
>>he won of fraud (Even though, in all likelihood, there was probably
>>some).
>
>
>"They" is not "me". Whether the current president makes you whine or
>dine, voting fraud is the issue. The "Kerry-lost-get-over-it" routine
>is getting old and you are sounding like a broken record.

But that is the basic point. Hell, these people now protesting Bush's
second victory are the very same people who were claiming for the last
4 years that Gore REALLY won and that Bush was "selected, not
elected". They haven't gotten over 2000, they just changed the loser's
name.

> The most
>important issue right now is voting fraud.

Why now?

> Address the issue at hand.
>Some day later we can address how your wool got sheared by Bush's
>propoganda machine.

By providing me more leftist propaganda that you believe as fact? No
thanks Frank. I can spot snake oil at quite a distance.

>>Tell me Frank, do you believe that there has always been voter fraud,
>>or do you think that this is suddenly something new?
>
>
>Voting fraud has been around ever since voting was invented.

So why is it such an issue for you now? Where were you in '92?

>But there
>has never been fraud on a scale like what was seen Nov. 2.

By what factual (not op-ed opinion) information do you base this
claim? How do you determine total voter fraud?

> Nor to the
>extent that, if left unchecked, could directly affect the government
>of the most powerful country in the world.

Mayor Daily of Chicago certainly knew that.......

> You aren't suggesting that
>voting fraud should be ignored because it's going to occur no matter
>what, are you?

Certainly not. I am for tightening the rules that regulate voting,
including several measure which make many democrats very "uneasy".

But I don't think that voter fraud is any worse now than it had been
in the past. Surely you haven't forgotten about the bus loads of
illegal immigrants, the jailed felons, and the buying of votes with
cartons of cigarettes in days past?

>
>
>>>This problem threatens the very core of

>>fraud surfaced. You'd be saying to me, the same thing I'm saying to
>>you.
>
>
>Did you come to those conclusions after reading tea leaves or throwing
>bones?

The same way that I know how people think. The same way that I
diagnosed Twisty's sociopathic tendencies.

>Maybe you should read some of my previous posts regarding Bush,
>how I defended him in the past.

The past is just that. Don't even try to tell me that you favored
Bush, because that would be a lie.

>Maybe you missed my criticizms of Gore
>for trying to manufacture votes by selective recounts. Maybe you
>missed my many posts where I clearly stated that I only vote for
>independents and/or third party candidates, and voted for Nader in
>this election. Or maybe you just aren't paying attention to the facts.

When have you ever spoken about politics on this newsgroup before
Frank? Until this past election, this newsgroup pretty much stayed the
course on radio related issues.

I do recall you saying that you voted for Nader, even though you were at the same time, defending Kerry and his policies with more vigor than one of his lackey political pundits. I find it hard to believe that someone could be behind one candidate yet espouse the "good" points of his opponent. It's duplicitous.

>It's so much easier for you to comprehend if you tell yourself that I
>voted for Kerry and that I'm a sore loser, isn't it? Well, as usual,
>you're wrong. I voted for Nader.

But you defended Kerry as if you were married to him.

>And even though he lost the election,
>I didn't have any expectations that he would win.
> But he and other
>third party candidates -did- make a strong showing, which was my
>intent with my vote, and for that reason I am -very- happy with the
>outcome of the election.

Strong showing? Nader got what 2% of the vote? You call that "strong"? Ross Perot made a better showing.

But I am glad for Nader. He at least syphoned the most idealistic utopian liberal voters away from Kerry, which may have allowed Bush to win again. For that I thank him.

>Except for the fraud.
>
>
>>I also find it curious that those who seem the most opposed to putting
>>policies in place to lessen the chance of fraud are mostly democrats.
>>Mandatory voter ID, and a more secure voting environment have all been
>>shouted down by democrats. They used the lame "disenfranchised" and
>>"racism" arguments to hide their real worry that a truly fair election
>>would hurt them. No more buying votes with cartons of cigarettes, or
>>bottles of ripple.
>
>
>Both Republicans and Democrats oppose those issues equally. And it
>wasn't the Democrats who initiated the recount in Ohio;

Who was it then who filed suit in Ohio because there were claims of insufficient voting machines in heavily democratic voting places?

> it was the
>Greens and the Libertarians with cooperation from voting rights
>organizations.

Bullshit Frank, plain and simple. If you can't see through that, you are more blind than I thought. What incentive would there be, and what gain would be had for those odd-ball independents to bring about this action? It doesn't pass the smell test Frank.

>Once again you have showed how skewed your perspective
>is towards the Republicans.

I am a conservative, and I lean toward republicans because they best represent my interests. That's no great secret. But you have yet to admit your political slant, and the accompanied bias. You're in denial Frank.

>>>Get a clue, Dave.
>>
>>I would think that you need one as well.
>
>
>What you think about me carries no weight since you have yet to
>demonstrate that you are capable of thought that is independent and
>rational; i.e, above the level of domesticated livestock.

If you truly believed that you would not waste your time trying to "show" me how "wrong" I am. The fact that you are unable to back up anything you stand for with anything other than your own form of propaganda, and have failed ant every attempt to discredit my position is what keeps you coming back for more. In a way, you're acting just like Twisty, when he can't "prove" the lies he spews about other people.

This country was built by people who held strong traditions and believed in putting in a full day's work, for a full day's pay, wanted the government to protect our interests abroad, but wanted them out of our personal lives. They also did not need or want a social "safety net" to help the slackers of society avoid the consequences of natural selection, and paid for by the sweat of the productive people.

No matter how idealistic and utopian left thinking liberals might believe, there will never be a natural "classless society", because all people are different in how they prioritize their lives and how they achieve (or not). It's not the government's place to "provide" for people, or to "equalize" the country's wealth.

To the victor, go the spoils. Try to be a victor Frank......

So you are denying that the majority of the "big radios" on Channel 6 are running any sort of high power? Gee, where do all those guys with the "long nose Suburbans", with the 4 or 5 alternators use their stuff then?

It is a fact that when a station over 20 miles away from me gives me an "S9" signal, they are NOT running legal power, with the rare exception of the one or two guys I worked who were airborne. This conclusion is reached through empirical analytical observation, which is the same thing the FCC does when they first investigate an alleged "high power" infraction.

I never stated nor implied that I knew exactly how much power they were running, only that it was easily obvious, through the process of observation, that it was ILLEGAL.

When you are skilled at radio, you tend to hear other clues which make it a give away as well. Certain class "C" amp raspy distortions are dead giveaways.

Now, go find some other thread where you can quote me out of context again......

It's not my personal feelings, but a logical observation.

>you make the claims, but fail to provide for them as always,,this was
>your initiated game, not anyone elses

I have hardly been "bewildered". I told you and everyone else how it
was done. It was done by utilizing a 7805 regulator to create a steady
5V for the bias supply. The 5V was then dropped through a resistor and
applied to the base of each of the 2290 devices. The bias voltage was
limited to .6V by utilizing a forward biased diode on each transistor,
which was placed on top of each "pill" for heat tracking and
stability. It's not rocket science, for someone who knows what they're
doing. You know, I might just take a some pictures of the project and
put them on my website just to squash your incessant babble.

Yep, that was also based on empirical observation and experimentation.
The 70's were good to me.....

>Damn Dave,,you weren't licensed back when you had this antenna. Was this
>the point in your life when you told people to "buy a bandaid" when they
>complained of you bleeding them?

That's probably about right. Are you now suggesting that someone can't
change their habits, or opinions with time? Like a 10 year old kid
who makes farting noises with his armpit will never progress beyond
that? Is someone who smokes 2 packs of cancer sticks a day, destined
to remain a chain smoker, and can never quit?

I said that I hadn't USED channel 6 since the 70's. That means talking on it. That does not preclude an occasional listen when spinning the dial. Since I have seen no evidence to suggest that the channel isn't still the "toilet bowl", I don't stay.

You sure love to make issues out of semantics......

Keep trying. I love to watch you jump through hoops.

Dave

280. CB radio stuff for sale

Newsgroup: rec.radio.cb
Date: 2005-01-06 16:31:25 UTC
From: zirconx9@yahoo.com
Message-ID: <1105029085.956318.63040@f14g2000cwb.googlegroups.com>
Source record: 193920

5W dummy load with output for frequency counter, nice and compact. $10 shipped

Two Astatic D-104 microphones. They are on T-UG8 bases. Both are kind of rough, the metal needs cleaned and polished.

First One - missing the bottom cover, the base looks like it has scratches on it or missing paint flecks or something. It is wired with a 4-pin screw on mic connector.

Second One - Has the felt cover on the bottom of the base, the metal on this one is worse than the other one, but I imagine it would clean up nicely. The base is in much better condition on this one. Wired with a 5-pin DIN mic connector.

$25 each plus shipping. ($10 UPS Ground, $6 USPS Parcel Post, $8 USPS Priority) PayPal, check or money order.

Radio Shack 22-305 Frequency Counter with orignal box, manual and antenna - $55 shipped.

MY-65 Digital Multimeter - like this: http://www.multimeterwarehouse.com/my65.htm brand new but missing the red test lead - $45 shipped.

I might have some SWR/Power meters too, and some Sams Photofacts for older CB radios. let me know if you are interested in one of those and I'll see if I can dig them up.

Shipping prices listed are via USPS Parcel Post to the lower 48 states. Reasonable offers accepted.

-Ryan

Apparently, that is a an argument you are having with yourself.
Your personal feelings are not "facts".
Making a personal opinion that "channel 6 harbors the dregs of society"
and claiming it is nothing short of empiracle evidence that illegalities
occur is jovial.
Referring to your statement as "fact" that illegalities are occurring,
is about as far from common sense and factuality that one can achieve.

>you?

That's a good thing you don't partake in those activities anymore, Dave...as I NEVER took part in those activities cited by you,,bragging about your radio that caused severe bleed,,,laughing about the intentional intereference the bleed caused,,telling people to buy a bandaid when you were bleeding,,,,..I guess some of us (me) were light years ahead of others (you) in radio mannerisms and operating procedure. I never splattered, never ran huge power, never was a jerk on the air, even as a child, I not only knew better, I was taught better. Glad you "grew up" and joined those of us who have been waiting for idiots like you to stop being part of the problem. Although, just for the record, you have claimed you haven't operated illegally since the seventies or eighties, but that little gem you cited about running the AB amp in your vehicle was made in '98, not that long ago, and was referring to your cb use. But if you grew up since then, I'm happy to say, I was indeed a part of it, since that is when we first exchanged pleasantries and you began crying about technical legalities,
Keep it rolling,,,,

>Apparently, that is a an argument you are having with yourself.

No, you are trying to claim that there are no illegal operators on 6,
based on your rejection to my claim that what I can hear on almost a
daily basis is in fact illegal.

>Your personal feelings are not "facts".

No but my trained observations skills can be considered as strong
evidence to the positive.

>Making a personal opinion that "channel 6 harbors the dregs of society"

Yes, that part is my personal opinion.

>and claiming it is nothing short of empiracle evidence that illegalities
>occur is jovial.

That you once again think that you can somehow claim that these
illegal operators do not exist is ludicrous.

>Referring to your statement as "fact" that illegalities are occurring,
>is about as far from common sense and factuality that one can achieve.

So once again, I ask you, do you know for a fact that there are no
illegal operations, on a daily basis, being committed on channel 6?

All I have to hear is one overmodulated, distorted and overdriven
station to KNOW, that it's illegal (and there are way more than one on
6) It's EASY to tell. I won't give you another case of heartburn by
getting into the spectral analysis that can be performed on the
signals that anyone can receive, with the proper test equipment. So
please don't embarrass yourself and insult the rest of us by trying to
claim otherwise.

You're getting more sloppy and desperate by the day.....

I don't expect you to understand the dynamics of the local CB
population back then, but any interference that I deliberately did to
anyone back then was to those who were asking for it, in the form of a
payback (You know all about paybacks right?). Plus, I was a teenager
then. That should explain everything. I knew way more about radio
back then than my maturity level could control.

>I guess some of us (me) were light
>years ahead of others (you) in radio mannerisms and operating procedure.

Yet, you operate on illegal frequencies and see nothing wrong with
breaking federal law? How is that any better than what you lambast me
for?

>I never splattered, never ran huge power, never was a jerk on the air,
>even as a child, I not only knew better, I was taught better.

But you see nothing wrong with breaking federal communications law as
an adult? It would seem that respect for the law was a subject skipped
over when you was "learned".

> Glad you
>"grew up" and joined those of us who have been waiting for idiots like
>you to stop being part of the problem.

I'm not the one operating on illegal frequencies or using above legal
power limits.

> Although, just for the record,
>you have claimed you haven't operated illegally since the seventies or
>eighties, but that little gem you cited about running the AB amp in your

No, that was in reference to 10 meter operation.

> But if you grew up since then, I'm happy to say, I was indeed a
>part of it, since that is when we first exchanged pleasantries and you
>began crying about technical legalities,

You had nothing to do with it. Had I not grown up, I'd be singing
right along side of you with the "screw everyone else, I'm going to
talk where I want" attitude.

It would seem that you still need to mature enough to learn respect
for the law...

That still doesn't explain why they won't release the raw exit poll
data. And you fail to realize the simple fact that 'mainstream media'
is predominately owned and operated by huge corporations that strongly
favor the Republicans. If they slant in any direction it's going to be
towards the conservatives.

>
>Frank, when are you going to realize that you "facts" are nothing more
>than YOUR biased opinions. Telling me that my bias is wrong based on
>your bias is laughable.

".....Ohio's GOP Supreme Court Chief Justice, Thomas Moyer, has
refused to recuse himself, even though allegations of vote switching ï¿½
where votes cast for one candidate are assigned to another in the
computerized tabulation stage ï¿½ involve his own re-election campaign.

.....

Ohio's official recount was conducted by GOP Secretary of State
Kenneth Blackwell, despite widespread protests that his role as
co-chair of the state's Bush-Cheney campaign constituted an serious
conflict of interest. Blackwell has refused to testify in the election
challenge lawsuit alleging massive voter fraud, as have a number of
GOP county election supervisors. Blackwell also refuses to explain why
he has left more than 106,000 machine-rejected and provisional ballots
entirely uncounted.

.....

The final recount tested roughly 3% of the roughly 5.7 million votes cast in the state. But contrary to the law governing the recount, many precincts tested were selected not at random, but by Blackwell's personal designation. Experts with the election challenge suit have noted many of the precincts selected were mostly free of the irregularities they are seeking to investigate, while many contested precincts were left unrecounted.

.....

In other precincts, impossibly high voter turnout figures -- nearly all of them adding to Bush's official margin -- remain unexplained. In the heavily Republican southern county of Perry, Blackwell certified one precinct with 221 more votes than registered voters. Two precincts -- Reading S and W. Lexington G -- were let stand in the officially certified final vote count with voter turnouts of roughly 124% each.

In Miami County's Concord South West precinct, Blackwell certified a voter turnout of 98.55 percent, requiring that all but 10 voters in the precinct cast ballots. But a freepress.org canvas easily found 25 voters who said they did not vote. In the nearby Concord South precinct, Blackwell certified an apparently impossible voter turnout of 94.27 percent. Both Concord precincts went heavily for Bush.

.....

In Warren County, Bush was credited with 68,035 votes to Kerryï¿½s 26,043 votes. But just as the county's votes were about to be counted after the polls closed on November 2, the Board of Elections claimed a Homeland Security alert authorized them to throw out all Democratic and independent observers, including the media. The vote count was thus conducted entirely by Republicans....."

Those are facts, Dave. Not left-wing propoganda, "editorial opinions" or "MY biased opinions". Facts.

>> You would rather slap labels on others instead of
>>admitting that there is a possibility you are wrong.

>>opinion"?
>
>Are you equally concerned that the overturning of a clear republican
>victory in Washington State after not just one, but a few recounts,
>and by a similar "bloat" in voter turnout?

First off, it was -HARDLY- a "clear republican victory". The first
count was done by machine and gave Rossi a lead so slim that it
triggered an -automatic- recount. That recount narrowed the lead to a
few dozen votes. It would have been foolish of any opponent -not- to
request a hand recount, which put Gregoire in the lead by 139 votes.
The rules were followed and Gregoire won. Now the Republicans are
whining up a storm and begging for a second election. Also, there have
been allegations that King County counted unconfirmed provisional
ballots. If that's true then it would be foolish for Rossi -not- to
contest the election. So far he hasn't.

But overall, Washington seems to be accomplishing what Ohio, Florida,
New Mexico and several other states cannot: conduct an election with a
transparent process.

And for the record, I didn't vote for either of them -- again I voted
third-party.

>>>>Pay attention, Dave: It doesn't matter who won or lost the election.
>>>
>>>Sure it does. Would all these P.E.S.T. victims be screaming for a
>>>recount in Ohio if Kerry had won? That was my whole point. There were

>illegal immigrants, the jailed felons, and the buying of votes with
>cartons of cigarettes in days past?

The key phrase is "days past". Those problems have been addressed,
have they not? We have -new- problems that need to be addressed, such
as a corporation that wrote the software for the voting machines and
whose CEO promised to deliver the state's electoral votes to Bush;
election officials (i.e, the Secretary of State) who is also the
campaign manager for that state; the shorting of voting machines in
selected precincts; etc, etc.

Yeah, right. And I've been on Usenet a lot longer than I've been in
this newsgroup.

>I do recall you saying that you voted for Nader, even though you were
>at the same time, defending Kerry and his policies with more vigor
>than one of his lackey political pundits. I find it hard to believe
>that someone could be behind one candidate yet espouse the "good"
>points of his opponent. It's duplicitous.

I defended Kerry against your bullshit propoganda. I'll re-restate
what I posted previously on the subject: "I have stated before that
I didn't think Kerry was a strong enough leader to be president. He
doesn't have the connections, his communication skills aren't quite up
to snuff (but not as bad as Bush), and he doesn't command a presence
in Congress (which would be necessary for a president, especially if
his party doesn't hold the majority)."

And anyone can see that Bush has some good qualities. He has a certain
charisma that he uses to great advantage. Like Time magazine notes, he
sticks to his guns (even if they are pointed in the wrong direction).
And just because he got mixed up with the wrong crowd (the Vulcans)
that doesn't mean he's a bad guy. A moron perhaps, but not necessarily
evil as some people claim.

It's far from duplicitous. It's simply a matter of looking at the
facts without bias.

>>It's so much easier for you to comprehend if you tell yourself that I
>>voted for Kerry and that I'm a sore loser, isn't it? Well, as usual,
>>you're wrong. I voted for Nader.
>
>But you defended Kerry as if you were married to him.

I defended Communism in a debate in high-school. That doesn't mean I'm
a communist (or married to a communist). And I didn't defend Kerry so
much as I disproved the lies and conjecture you ignorantly chose to
believe without regard to the facts.

>>And even though he lost the election,
>>I didn't have any expectations that he would win.
>> But he and other
>>third party candidates -did- make a strong showing, which was my
>>intent with my vote, and for that reason I am -very- happy with the

>Frank.

My political "slant" is towards the Constitution. That's my political
party, that's my religion, and that's my first concern whenever I step
into the voting booth. The Republicans may represent -your- interests
(whatever they may be, and I don't think I want to know), but -my-
interest happens to be preserving a democratic form of government.

> and have failed ant every attempt to discredit my position

Oh, really? You still think that Kerry didn't get his honorable discharge until 2001 despite the official military records? Or do you prefer to believe someone else's misinformed interpretation of documents that are available for you to read any time you want? Or have you dismissed the facts in favor of some conspiricy to forge those records and cover up some deep, dark secret that exists only in your imagination? Or maybe you are a card-carrying member of the Bush propaganda machine and intentionally spout this garbage because the party serves your interests?

>is what keeps you coming back for more. In a way, you're acting just
>like Twisty, when he can't "prove" the lies he spews about other
>people.

yawn.

>This country was built by people.....

Yes it was. "We The People", not "We the Republicans" or "We the Christian traditionalists". Get that through your head.

>Yes, that part is my personal opinion.

Why is -this- your personal opinion and not fact? What happened to
your "trained observation skills"?

>>and claiming it is nothing short of empiracle evidence that illegalities
>>occur is jovial.
>
>That you once again think that you can somehow claim that these
>illegal operators do not exist is ludicrous.

Nobody suggested that illegal operators don't exist. The question is
your standard of proof, that what you claim to be illegal
transmissions are illegal IN FACT, not in your opinion or belief.

No I didn't. Not in 2000 and not in 2004. I did support him after the
first election mainly because I was supporting his office. I still
support the office, just not the man.

> Any vote for Nader, was one less vote
>for the waffle king.

That's a propaganda tactic first used by both sides when Perot was an
unknown variable. Let me make this perfectly clear: A vote for anybody
that isn't an ass or an elephant is a vote against both those parties.
And to lay blame on people who voted third-party is a pretentious
crock of shit. Don't believe me? Just wait until the next election for
WA governor, when the Republicans are going to use the same bullshit
excuse claiming it was the third-party candidates that stole their
victory.

> The best part is, you knew Ralphie had a snow
>balls chance in hell of being elected. Was Nader even on the ballot,
>or did you have to write him in?

He was most certainly on the ballot, as were the candidates for the
Green and Libertarian parties, and a few others.

This country shouldn't be limited to two political parties, so I don't
vote for either of them -regardless- of who I think is going to win.
As the saying goes, "It's better to light a single candle than to sit
and curse the darkness".

THIS IS REAL, TAKE YOUR TIME AND READ THIS.....NO BODY IS SCAMING YOU...
THE 5 MINUTES IT WILL TAKE YOU TO READ THIS WILL CHANGE YOUR FUTURE....

$$ make thousands w/ paypal.com + $1 x 6

How to make thousands of $$ dollars on paypal.com

I'm sure you've read these letters asking you to send $1 to 6 different addresses.

Putting your home address or mailing address on the internet can be risky,

but through paypal all you have to provide is your email address.

It's safe and easy just go to www.paypal.com and set up your FREE account!!!!

No credit card needed. I am not a gullible person and have never trusted things

like this, but I gave it a try, hey its only $6, I figured at least 6 people would

respond out of the millions of people that use the internet. You should give it

a try too! You have nothing to lose, and $$ thousands to gain!

Read on for the letter that I found ...

HOW TO TURN $6 INTO $6,000+!!! THIS REALLY CAN MAKE YOU EASY MONEY!!!

IT WORKS!!! BUT YOU HAVE TO FOLLOW IT TO THE LETTER FOR IT TO WORK!!!!

A little while back, I was browsing through newsgroups, just like you are now and came across

an article similar to this that said you could make thousands of dollars within weeks with only

an initial investment of $6.00! So I thought, "Yeah, right, this must be some kind of scam"

but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00

though paypal to each of the emails stated in the article.

You then place your own email address in the bottom of the list at #6, and post

the article in at least 200 news groups. (There are thousands) No catch. That was it.

So after thinking it over, and talking to few people first, I thought about trying it.

I figured what have I got to lose except $6.00, right? Like most of us I was a little

skeptical and a little worried about the legal aspects of it. It follows the same

regulations as the "mailed chain letters, which according to the U.S. Post Office

(1-800-725-2161) is indeed legal! Then I invested the measly $6.00.

Well GUESS WHAT!!? Within 7 days, I started getting money in my paypal account!

I was shocked! I figured it would end soon, but the money just kept coming in.

In my first week, I made about $20.00. By the end second week I had made a total

over $1,200.00!!! In the third week I had over $10,000.00 and it's still growing.

This is now my fourth week and I have made a total of just over $36,000.00

and it's still coming in rapidly. It's Certainly worth $6.00.

I have spent more than that on the lottery!!

Let me tell you how this works and most importantly, why it works?

Also, make sure you print a copy of this article now,

so that you can get the information off of it

as you need it.

$$

REQUIREMENTS: You must have a confirmed paypal account. If you do not have

a paypal account you can go to www.paypal.com and follow the instructions

to set up a free account. In order to place the initial $6 into your account,

you will have to confirm your bank account with paypal (which may take a few days).

Paypal is 100% secure and is used my millions of people world wide.

Confirming a www.paypal.com account simply means (1) paypal will first ask you

to confirm the email you used to sign up your paypal account by sending you an email

with a link for you to click to that email. As soon as you click that link your email

is confirmed. (2) Paypal will then make two small deposits into your bank account if you

set up your paypal account with a checking or savings bank account. Or paypal will make

two small deposits to your credit card if you set up your paypal account with your

credit card. Then after a few days (it takes up to a few days for these deposits

to appear in your bank account or on your credit card statement) then after a few days

you go back to the www.paypal.com website and sign in. Then you click where it says

this account is not yet confirmed. A screen will pop up that gives you 2 boxes to fill in.

You then enter the numbers of the 2 small deposit amounts (two separate 2 digit numbers)

that were deposited to your bank account or credit card.

Now you have a working and confirmed paypal account and can receive payments.

$$

[STEP 1] Send, though paypal, $1.00 to each email on the below list.

Make the subject of the payment "Email List" and in the comments,

write "PLEASE PUT ME ON YOUR EMAIL LIST."

What you are doing is creating a service by this - and best of all

you are not giving your address to anyone you do not know.

THIS IS ABSOLUTELY LEGAL!! YOU ARE CREATING A SERVICE.

The email list...... Paypal accounts are on this email lists;

#1)brittany124@excite.com

#2) mthall@renc.igs.net

#3) Mishavk27@aol.com

#4) nike31101@aol.com

#5) careentre7@hotmail.com

#6) swalton@tds.net

www.PAYPAL.COM

Subject of Payment: ***Email List***

Comments: ***PLEASE PUT ME ON YOUR EMAIL LIST.***

[STEP 2] Now take the #1) email off the list that you see above, move
the other

addresses up one (6 becomes 5 & 5 becomes 4, etc) the put YOUR
email address

(the one used in your paypal account) as #6) on the list.

**MAKE SURE THE EMAIL YOU SUPPY IS EXACTLY AS IT APPEARS IN YOUR PAYPAL
ACCOUNT.**

[STEP 3] Change anything you need to, but try to keep this article as
close

to original as possible. Now, post your amended article to at least 200
newsgroups,

message boards, etc. (I think there are close to 32,000 groups) All you
need is 200,

but remember, the more you post, the more money you make - as well as
everyone

else on the list!
In this situation your job is to let as many people see this letter as
possible. So they
will make you and me reach!!!!

You can even start posting the moment your email is confirmed. Payments
will

still appear in your paypal account even while your bank account is
being confirmed.

$$

DIRECTIONS ## HOW TO POST TO NEWSGROUPS + MESSAGE BOARDS

Step #1) You do not need to re-type this entire letter to do your own
posting.

Simply put your CURSOR at the beginning of this letter and drag your CURSOR

to the bottom of this document, and select 'copy' from the edit menu.

This will copy the entire letter into your computer's temporary memory.

Step #2) Open a blank 'Notepad' file and place your cursor at the top of the

blank page. From the 'Edit' menu select 'Paste'. This will paste a copy

of the letter into notepad so that you can add your email to the list.

Steps #3) Save your new Notepad file as a .txt file. If you want to do your postings

in different sittings, you'll always have this file to go back to.

Step #4) Use Netscape or Internet Explorer and try searching for various newsgroups,

on-line forums, message boards, bulletin boards, chat sites, discussions, discussion groups,

online communities, etc. EXAMPLE: go to any search engine like yahoo.com, google.com,

altavista.com, excite.com - then search with subjects like ?millionaire message board?

or ?money making message board? or ?opportunity message board? or ?money making discussions?

or ?business bulletin board? or ?money making forum? etc. You will find thousands & thousands

of message boards. Click them one by one then you will find the option to post a new message.

Step #5) Visit these message boards and post this article as a new message

by highlighting the text of this letter and selecting 'Paste' from the 'Edit' menu.

Fill in the Subject, this will be the header that everyone sees as they scroll

thru the list of postings in a particular group, click the post message button.

You're done with your first one! Congratulations! THAT'S IT!! All you have to do

is jump to different newsgroups and post away. After you get the hang of it,

it will take about 30 seconds for each newsgroup!

**REMEMBER, THE MORE NEWSGROUPS AND/OR MESSAGE BOARDS YOU POST IN,

THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200**

That's it! You will begin receiving money within days!

JUST MAKE SURE THE EMAIL YOU SUPPY IS EXACTLY AS IT APPEARS ON PAYPAL.

$$$

?? NOW THE WHY PART: Out of 200 postings, say I receive only 5 replies (a very low example).

So then I Made $5.00 with my email at #6 on the letter. Now, each of the 5 persons

who just sent me $1.00 make the MINIMUM 200 postings, each with my email at #5

and only 5 persons respond to each of the original 5, that is another $25.00 for me,

now those 25 each make 200 MINIMUM posts with my email at #4 and only 5 replies each,

I will bring in an additional $125.00! Now, those 125 persons turn around and post

the MINIMUM 200 with my email at #3 and only receive 5 replies each, I will make

an additional $625.00! OK, now here is the fun part, each of those 625 persons

post a MINIMUM 200 letters with my email at #2 and they only receive 5 replies

that just made me $3,125.00!!! Those 3,125 persons will all deliver this

message to 200 newsgroups with my email at #1 and if still 5 persons per 200

newsgroups react I will receive $15,625.00! With an original investment of only

$6.00! AMAZING!! When your email is no longer on the list, you just take latest

posting in the newsgroups, and send out another $6.00 to emails on the list,

putting your email at number 6 again. And start posting again.

Your paypal TRANSACTION ACTIVITY will look like this:

DATE: June 30, 2008 *** TYPE: Payment *** TO/FROM: From *** NAME/EMAIL: Mary Jones

GROSS: $1.00 USD *** PAYPAL FEE: -$0.33 USD *** NET AMOUNT: $0.67 USD ***ACTUAL AMOUNTS***

DATE: June 30, 2008 *** TYPE: Payment *** TO/FROM: From *** NAME/EMAIL: John Canada

GROSS: $1.00 CAN *** PAYPAL FEE: -$0.11 CAN *** NET AMOUNT: $0.89 CAN ***ACTUAL AMOUNTS***

The thing to remember is, do you realize that thousands of people all over the world

are joining the internet and reading these articles everyday, JUST LIKE YOU are now!!

So can you afford $6?? And see if it really works?? I think so? People have said,

what if the plan is played out and no one sends you the money? So what are the chances

of that happening when there are tons of new honest users and new honest people

who are joining the internet and newsgroups everyday and are willing to give

it a try? Estimates are at 20,000 to 50,000 new users, every day,

with thousands of those joining the actual Internet.

Remember, play FAIRLY and HONESTLY and this will work.

Seriously, most people think this is a scam, but you actually do get thousands

of dollars out of it, it is NOT another crazy scam, if people follow through

with sending out $6, it works!!!!!

If a third-party candidate was expected to take votes from the Republicans you can bet that the roles would be reversed. The two big parties will do whatever they think will get them the votes, even if it means supressing a vote for a third-party candidate. The only thing this proves is that neither one of the parties have any interest in free and open elections, which is what I have been saying all along, and also why I don't vote for either of them.

Also, notice that the article states that Nader had his own petition to run under the Reform Party ticket. So which petition won?

Exactly my point. Nader helped get Bush elected.

I wanted to post a follow-up to this... I ended up building the homebrew filter and it worked perfectly - totally eliminated the fuel pump noise. It cost less then twenty bucks in materials and was very simple to assemble and install. Here's a link to the directions I followed:

http://97vette.com/sporttrac/rfi_fix/rfi_fix.html

A little specific info if you have a Tribute/Escape: to get to the power leads, simply remove the driver's side back seat (it slides forward) and pull back the carpet. There's a small square panel that easily unscrews to reveal the leads (pink and black). There's plenty of room within this panel to store the RFI filter. Couldn't be easier!

No, I believe the "sour grapes" story was told by Grimm and involved a
nutritionally-challenged fox.

Well it was a fairly close election, and it's no secret the Dems didn't
want Ralph taking votes that might otherwise go to JK. I don't know how
many votes RN garnered in the end.

That's a question which can't be answered because there's no way to
tell how many Nader votes would have been Kerry votes if Nader hadn't
run.

My question is if Nader had more influence on the election than voting
fraud. That -can- be answered if there were more fraudulent Bush votes
than the total votes for Nader, which may indeed be the case.

Turns out that somebody just filed a contest of the WA gov. election
claiming that the margin of victory was smaller than the margin of
error. That's a perfectly legitimate argument. The election continues.

Nah, we've had warmer weather and rain/sleet/slush lately. Did plow from midnight till 9 this morning tho..needed a big azz'd squeegee instead of a plow.. You're right, very strange weather patterns.

How did your SW radio Christmas present go over?

>unknown variable.

Actually there was a lot of truth in it. Perot syphoned quite a few
votes away from Bush 1. Heck I almost voted for him. His straight up
non-nonsense business approach to the economy was refreshing and
resonated with fiscal conservatives.

The reverse can be applied to Nader. He appeals to the hard core left,
who, for whatever reason don't think the democratic party has gotten
liberal enough (Chilling thought). It's a fairly safe bet that if
Nader had not been on the ticket that MOST of his votes would have
probably gone to Kerry.

Since Nader did not make as big of a splash as Perot did, his total
effect on the eventual election outcome is speculative. But to deny
that there was any effect is myopic.

> Let me make this perfectly clear: A vote for anybody
>that isn't an ass or an elephant is a vote against both those parties.

One party more than the other depending on which political ideology of
the third party who manages to rise up out of the noise floor of write
in status.

>And to lay blame on people who voted third-party is a pretentious
>crock of shit.

To deny the influence of those third party vote syphoners is equally
ludicrous.

> Don't believe me? Just wait until the next election for
>WA governor, when the Republicans are going to use the same bullshit
>excuse claiming it was the third-party candidates that stole their
>victory.

No, it was clever democratic operatives who (after a few recounts)
managed to manufacture enough extra votes to swing the election their
way.

Where's your cry of voter fraud there Frank?

>> The best part is, you knew Ralphie had a snow
>>balls chance in hell of being elected. Was Nader even on the ballot,
>>or did you have to write him in?
>
>
>He was most certainly on the ballot, as were the candidates for the
>Green and Libertarian parties, and a few others.

Nader was denied a place on the ballot in Pa. He didn't have enough
legitimate petitioners. Although the Libertarian candidate, Badnarick,
managed to make it....

>This country shouldn't be limited to two political parties, so I don't
>vote for either of them -regardless- of who I think is going to win.

So you are the "anti-voter"?

>As the saying goes, "It's better to light a single candle than to sit
>and curse the darkness".

There's also a saying about standing in the middle of a crowded
highway......

Don't get me wrong, the whole principle of a democratic government
should embrace as many political candidates as they can. Third (and
4th) parties are a good thing. But in all practicality, they are alone
in a sea of red and blue. Even if a third party candidate were to win
the office of president, they'd be opposed by both sides of congress.

And that's really the catch 22. Many people contemplate their votes.
They may like what a 3rd party candidates says, but realizes that they
stand little chance of winning. So the question becomes, should they
vote for someone who they ideologically agree with the most, or the
candidate who somewhat agrees with you, but who has a better chance of
actually winning?

Is it better to completely lose your chance to influence the direction
of this country or is it better to at least get SOME of your political

views represented?

That is the voter conundrum.

>>based on your rejection to my claim that what I can hear on almost a
>>daily basis is in fact illegal.
>
>
>I'm sure some of them are illegal, but my surity is not fact.

Why not? Are you claiming that empirical observation is not
sufficient? Are you now promoting the concept that if you are not
"right there" and personally witnessed an illegal transmission that
you can't factually determine that it was what it was?

Is your zeal to trounce me over my opposing political views blinding
your objectivity with regard to radio issues, which you have far
better knowledge of?

>
>>>Your personal feelings are not "facts".
>>
>>No but my trained observations skills can be considered as strong
>>evidence to the positive.
>
>
>Trained observation skills = Tarot cards.

So, you're telling me that you can't listen to a channel and pick out who the most blatant illegal operators are simply by the sound of their rigs, and by the splatter they produce? Would it help you to know that a spectrum analyzer connected to the I.F. of a receiver confirmed my initial observation?

I never claimed to be able to make a quantitative evaluation, only a determination that the transmissions were illegal.

>>>Making a personal opinion that "channel 6 harbors the dregs of society"
>>
>>Yes, that part is my personal opinion.
>
>
>Why is -this- your personal opinion and not fact?

Because it is simply my opinion. What constitutes a "dreg" is subjective.

>What happened to your "trained observation skills"?

They are limited to technical evaluations of radio signals, which is NOT subjective.

>>>and claiming it is nothing short of empiracle evidence that illegalities
>>>occur is jovial.
>>
>>That you once again think that you can somehow claim that these
>>illegal operators do not exist is ludicrous.
>
>
>Nobody suggested that illegal operators don't exist. The question is
>your standard of proof, that what you claim to be illegal
>transmissions are illegal IN FACT, not in your opinion or belief.

If you hear a loud noise and turn around to see a souped up car buzzing down the road at a high rate of speed, far above the posted speed limit for that road, would you not be able to determine as a fact that the car was being operated illegally?

No, you could not determine just how fast the car was traveling, but you could easily tell from the excessive noise, and the rate of speed as compared to the other (legal) cars, that this one was illegal.

If you are attempting to discount empirical observation as an invalid method to determining facts, then there are a whole lot of scientists who will be sorely disappointed. Starting with paleontologists all the way to astronomers.

We don't agree politically Frank. That much is true. But don't let that one facet taint your objectivity in other subjects.

You obviously know little about the industry of journalism. It's a
known given to all, but the most liberal people, that the mainstream
media (with the exception of Fox) leans very much to the left. There

have been several articles and books written on the subject. Dan
Rather's latest embarrassing escapades should serve as a beacon of
illumination to the subject.

>he has left more than 106,000 machine-rejected and provisional ballots
>entirely uncounted.

Who's to say that that number of ballots are really there and that
they are valid? We all know that the vote count exceeded the
registered voters.

Another classic case of inventing an issue and then implying a
nefarious agenda when the party responsible refuses to acknowledge the
bogus issue, thereby casting doubt and suspicion over his integrity.

>The final recount tested roughly 3% of the roughly 5.7 million votes
>cast in the state. But contrary to the law governing the recount, many
>precincts tested were selected not at random, but by Blackwell's
>personal designation. Experts with the election challenge suit have
>noted many of the precincts selected were mostly free of the
>irregularities they are seeking to investigate, while many contested
>precincts were left unrecounted.

And when you are determined to find a flaw, the fact that there aren't
any automatically means that this was "planted"? Gee, maybe the main
issue is that the allegations of fraud have been greatly overstated.

>In other precincts, impossibly high voter turnout figures -- nearly
>all of them adding to Bush's official margin -- remain unexplained. In

>and independent observers, including the media. The vote count was
>thus conducted entirely by Republicans....."
>
>
>Those are facts, Dave. Not left-wing propoganda, "editorial opinions"
>or "MY biased opinions". Facts.

Yes, the overall articles are facts, but the underlying reasons and
the suspicions generated or implied are the result of bias.

Yes, it's a fact that Blackwell didn't step aside. But it's propaganda
to imply a nefarious motive.

Yes, it's a fact that voter turnout exceeded 100% in many places. It's
propaganda to suggest that the excesses were all or mostly for Bush.

>>> You would rather slap labels on others instead of

>>elected". They haven't gotten over 2000, they just changed the loser's
>>name.
>
>
>Like I said before, "they" is not "me". Whether Gore won or lost, his
>conduct during the recounts was reprehensible.

I'll give Kerry some credit there. He dropped below the radar and didn't make an issue of it. But I suspect (My cynicism kicks in) that this is probably the result of some good advice given to him so as not to repeat Algore's demise, as I'm sure Kerry will try another run in 08. He's already working on it. He was supposedly shaking hands with soldiers in Iraq recently.....

>>> The most
>>>important issue right now is voting fraud.

>>

>>cartons of cigarettes in days past?
>
>
>The key phrase is "days past". Those problems have been addressed,
>have they not?

I cannot make that statement. I have read stories of party workers
caught with ballots leaving a prison in Pa. I doubt if these issues
have been truly "addressed". It may have been covered over a bit more
effectively, but I believe that they're still there.

>We have -new- problems that need to be addressed, such
>as a corporation that wrote the software for the voting machines and
>whose CEO promised to deliver the state's electoral votes to Bush;

Hearsay. There's no proof that any such "promise" ever occured.

>election officials (i.e, the Secretary of State) who is also the
>campaign manager for that state; the shorting of voting machines in
>selected precincts; etc, etc.

Interesting that in those places were voting machines were "shorted",
were handled by democrats. They have only themselves to blame if they
were not able to accommodate their constituency.

>>>>>This problem threatens the very core of

No, it's only relevant when it's relevant , such as past record of
voting fraud suggests that it was a problem for far longer than some
of you realize. I have never read anything on this group of you
defending Bush. This group has had very little political crap in the
past, with the exception of the Iraq war and this past election.

Unlike you, I don't google every person to see what other boards they
might post on and then read their "stuff". I don't really care all
that much.

>
>
>I defended Kerry against your bullshit propoganda.

The truth remains that Kerry refused to release ALL of his military
records. What's he hiding?

> I'll re-restate
>what I posted previously on the subject: "I have stated before that
>I didn't think Kerry was a strong enough leader to be president.

My 5 year old daughter knew that.

> He
>doesn't have the connections, his communication skills aren't quite up
>to snuff (but not as bad as Bush),

Yet Bush IS the leader, so I would have to say that good vernacular is
not something that is required to be electable.

>and he doesn't command a presence
>in Congress (which would be necessary for a president, especially if
>his party doesn't hold the majority)."

Considering he is the #1 most liberal senator in congress, he would
have a tough time.

>And anyone can see that Bush has some good qualities.

Everyone has "some" good qualities. That's nothing earth shattering
Frank.

>He has a certain
>charisma that he uses to great advantage.

So did Clinton.

> Like Time magazine notes, he
>sticks to his guns (even if they are pointed in the wrong direction).

That he sticks to his guns is an example of conviction to principles.
A sign of a strong leader. That they are pointed in the wrong
direction is a matter of subjectivity.

>And just because he got mixed up with the wrong crowd (the Vulcans)
>that doesn't mean he's a bad guy.

The "Vulcans"? Who might they be? Are you making some sort of Star
Trek reference to logical, and rational thinking, as opposed to
emotionally driven people? If so, then I would think that's a plus.

> A moron perhaps, but not necessarily
>evil as some people claim.

He's much smarter than most people think. His flaw is his poor
speaking skills. But there are plenty of smart people who can't
communicate their thoughts concisely. Then there are people who have a
golden tongue. But what they say so well is pure bunk. Clinton was an
example of that.

>It's far from duplicitous. It's simply a matter of looking at the
>facts without bias.

Which you have thus far demonstrated that you are unable to do.

>>>It's so much easier for you to comprehend if you tell yourself that I
>>>voted for Kerry and that I'm a sore loser, isn't it? Well, as usual,
>>>you're wrong. I voted for Nader.
>>
>>But you defended Kerry as if you were married to him.
>
>
>I defended Communism in a debate in high-school.

A skilled debater can take either side in a debate and make valid
points. But this isn't a debate for the sake of debate style points.
This is a debate driven by personal feelings.

I also suspect that you are probably a lot more open to certain
communist ideals. Most liberals are.

>That doesn't mean I'm
>a communist (or married to a communist). And I didn't defend Kerry so
>much as I disproved the lies and conjecture you ignorantly chose to

>>gain would be had for those odd-ball independents to bring about this
>>action? It doesn't pass the smell test Frank.

>
>
>Have you ever thought for one moment that there may be people that
>actually care about fundamental issues such as voting rights? Or is
>that dish too liberal for your table?

Are you so idealistic that you can't understand what drives political
agendas? If there is not something to be gained strategically, then it
doesn't happen. If it was indeed a few "independents" who initiated
this action, I would bet a year's salary that they were "funded"
through the back door by the DNC or one of their "loose associates"

Like the term "follow the money", look to see who stands to benefit
the most, and that's where you will find the real source of this
latest voter fraud cry.

>>>Once again you have showed how skewed your perspective
>>>is towards the Republicans.
>>
>>I am a conservative, and I lean toward republicans because they best
>>represent my interests. That's no great secret. But you have yet to
>>admit your political slant, and the accompanied bias. You're in denial
>>Frank.
>
>
>My political "slant" is towards the Constitution. That's my political
>party, that's my religion, and that's my first concern whenever I step
>into the voting booth. The Republicans may represent -your- interests
>(whatever they may be, and I don't think I want to know), but -my-
>interest happens to be preserving a democratic form of government.

By voting for a liberal who's core ideals contain the notion that the
government should assume a greater role as society's "nanny"?

If you're such a student of the constitution, you should know that the
government was never intended to do anything more than protect ,
facilitate and represent our interests in the world market.

If you were a strict constitutionalist, the libertarian party would be
a better fit.

>

What, you mean the ones he refuses to release?

> Or do you
>prefer to believe someone else's misinformed interpretation of
>documents that are available for you to read any time you want? Or
>have you dismissed the facts in favor of some conspiricy to forge
>those records and cover up some deep, dark secret that exists only in
>your imagination? Or maybe you are a card-carrying member of the Bush
>propaganda machine and intentionally spout this garbage because the
>party serves your interests?

I believe in the old saying, where there's smoke there's fire. There
are a fairly sizable group of people who have come forward with
testimony as to Kerry's actions in Vietnam. Due to the nature of the
"wounds" he received, and the short amount of time he was actually
there, lends credibility to the notion that he was hardly the
"valiant" soldier that he tried to make himself out to be.

>>is what keeps you coming back for more. In a way, you're acting just
>>like Twisty, when he can't "prove" the lies he spews about other
>>people.

>yawn.

Hit a little close to home?

>>This country was built by people.....
>
>
>Yes it was. "We The People", not "We the Republicans" or "We the
>Christian traditionalists". Get that through your head.

Back then "We the People" were mostly Christian people, with solid
moral values and a greater sense of personal responsibility. I don't
want to see this country degrade from it's former glory by forgetting
that.

>high power?

Apparently, that is a an argument you are having with yourself.

>No, you are trying to claim that there are no

>illegal operators on 6, based on your rejection

>to my claim that what I can hear on almost a

>daily basis is in fact illegal.

I claimed nothing of the sort. I claimed only that
your claim is bullshit, which it is.
Your personal feelings are not facts, despite how many times you invoke
them as such. Let's look at it again since you still can not grasp it.
You said

>`channel 6, which is notorious for harboring

>the dregs of society, who regularly run high

>power, is all the "evidence" I need, to

>determine that the station in question is in fact,
>llegal."

Once again, your personal feelings are not facts. That illegal operation
occurs on such a channel was never contested by myself, despite your
deperate attempt at trying to say it was. I merely claimed your ersonal
feelings cited above are in no manner "evidence".
The FCC knows the reputation of channel 6 also, only they have protocol
to determine if someone is breaking the law, not personal feelings they
refer to as "empirical evidence" as you do.
Your personal feelings are not "facts".

>No but my trained observations skills can be

>considered as strong evidence to the positive.

No,,,it can not. It is personal testimony to be taken into consideration. It is intangible and can not be entered as evidence, only supporting testimony. Huge difference where the law is concerned, but with your demonstrated hate and disdain for the law and your fellow hammie and cb operators, it's crystal clear you have no clue of the law that pertains and governs your chosen hobby. You demonstrated this when you held roger beeps and echo illegal on cb because you "couldn't find a rule that permitted them".

>Yes, that part is my personal opinion.

See what you can learn when you are force fed? At the beginning of this thread, you claimed it was fact, now, after proper instruction, you admit it is "personal opinion". Good show.

–
and claiming it is nothing short of empiracle
evidence that illegalities occur is jovial.

>That you once again think that you can

>somehow claim that these illegal operators do

>not exist is ludicrous.

You're unglued, davie, You *need* such a distraction, but sucks for you I said nothing of the sort. Try again,

>You're getting more sloppy and desperate by

>the day.......

>Dave

>"Sandbagger"

>N3CVJ

Such intense projection, Dave.
To someone that is so used to looking up at everyone else, like yourself, it might appear that way. Repeat failures at attempting to place words in other's mouths to obfuscate your incompetence isn't lost on anyone, Dave.

No, Dave, you weren't a teenager when you were making these posts, but
good luck on trying to get the contingency to believe your
frequent-flowing lies.

> I knew way more about radio back then than

>my maturity level could control.

I guess some of us (me) were light
years ahead of others (you) in radio mannerisms and operating procedure.

>Yet, you operate on illegal frequencies and

>see nothing wrong with breaking federal law?

>How is that any better than what you lambast

>me for?

I never splattered, never ran huge power, never was a jerk on the air,
even as a child, I not only knew better, I was taught better.

>But you see nothing wrong with breaking

>federal communications law as an adult? It

>would seem that respect for the law was a

>subject skipped over when you was "learned".

Respect for the law has abolutely nothing to do with selective
disregardment. Until you can distinguish between such, you are forced to
remain captive to your own ignorance reagrding your service. You have
illustrated this time and time again with your attempted non-valid
comparisons between my words and your actions.

Glad you
"grew up" and joined those of us who have been waiting for idiots like
you to stop being part of the problem.

>I'm not the one operating on illegal

>frequencies or using above legal power limits.

But you do, Dave. Your lies come to fast and furious for there to be any
truth in your statements, In fact, you have become one of the most
unreliable posters in this group when it comes to anything at all. All
your posts are suspect, at best. Your agenda has been ilustrated, as has
your hypocrisy, contradictions, deliberate misattributions to others,
and lies, But then again, where would this group be without lids like
you to keep us ahead of your game...

–
Although, just for the record,
you have claimed you haven't operated illegally since the seventies or
eighties, but that little gem you cited about running the AB amp in your
vehicle was made in '98, not that long ago, and was referring to your cb
use.

>No, that was in reference to 10 meter

>operation.

No,,it wasn't. Read the thread. It was about cb and 10 meter wasn't even
mentioned until just now, by yourself, years later.

–

But if you grew up since then, I'm happy to say, I was indeed a part of it, since that is when we first exchanged pleasantries and you began crying about technical legalities,

>You had nothing to do with it.

Sure I did. Chec the time frame. You were lying and screaming about legalities, aligning yourself with n8WWM, when I entered this group back in the late ninetes,,,,the same time you were running your amp on cb.

> Had I not grown up, I'd be singing right along

>side of you with the "screw everyone else,

It would seem that you still need to mature

>enough to learn respect for the law...

>Dave

>"Sandbagger"

I have incredible respect for the law. In fact, there are two sandbaggers in this group howling their azzes off watching you come apart with such remote accusations. Someday, I may permit you to be clued in.

I have hardly been "bewildered". I told you and everyone else how it was
done. It was done by utilizing a 7805 regulator to create a steady 5V
for the bias supply. The 5V was then dropped through a resistor and
applied to the base of each of the 2290 devices. The bias voltage was
limited to .6V by utilizing a forward biased diode on each transistor,
which was placed on top of each "pill" for heat tracking and stability.
It's not rocket science, for someone who knows what they're doing. You
know, I might just take a some pictures of the project and put them on
my website just to squash your incessant babble.

>Exactly dave you just added ab-1 bias to the

>am which certainly would clean it up, but what

>would the spoiled kid in Tampa know he

>doesnt even solder his mike plugs on.

_
I'm not in Tampa. And I do solder my own mic plugs at this
point,,,sometimes. But when one has access to super techs like myself,
it allows me more relax time to do more valuable and constructive things
with my time, such as making certain your continuing education begins
and ends when I choose. But damn it man, just wait until I start
soldering linears.

>When the dx is running strong, that is exactly what people are trying to
>tell you.

The "DX" has nothing to do with the amount of splatter and the
distortion a signal may have. The only effect that "DX" may have is
heterodyning of co-channel signals. In any case, when my observations
were made, the "DX" was not running heavy enough that a clean sample
of any particular transmission could not be made.

> I find it absoutely astounding this is lost upon you

That's not surprising considering you once tried to tell me (and the
group) that a 4 watt skip station 1000 miles away could potentially
walk on top of a 4 watt station a half mile away, totally disregarding
the effects of R.F. path loss.

>of your recent comments self-professing an incredible amount of adept
>and technical radio knowledge. Coupled with your claim concerning roger
>beeps and echo on cb being illegal (they're not) merely because you were
>unable to locate a rule specifically permitting their use, and it merits

There are specific rules which specifically prohibit devices used for
"entertainment" and "amusement" purposes. There is also a specific
rule which outlines permitted tone signals. A Roger Beep is not listed
under permissible tone signals. Following simple logic, since there is
no valid rule which permits a particular device, then the device
defaults to one of "amusement or entertainment" status and is
prohibited.

So therefore it can be assumed that a roger beep and (even more
definite) an echo box could be considered "entertainment" or
"amusement" devices and, as such, are specifically prohibited.

You can make the point that the FCC doesn't care enough to make a case about these things, and I would probably agree with you. But the fact remains that they are prohibited by the rules.

>Irony: When some of those licensed for communications know the least
>about their chosen endeavor.

Bigger Irony: Someone with obvious comprehensive issues chastising others for the same flaw.

>your claim is bullshit, which it is.

So which is it? If you are denying my claim that there are illegal
stations on channel 6, then by simple inverse logic, you are claiming
that there are NO illegal stations on channel 6. If, you acknowledge
that there are, in fact, illegal stations on channels 6, then my claim
cannot be false.

You REALLY need a course in logic.

Or will you try to weasel out of it by claiming that the term "high
power" is ambiguous?

>Your personal feelings are not facts, despite how many times you invoke
>them as such. Let's look at it again since you still can not grasp it.

>occurs on such a channel was never contested by myself

Then you have to agree with my statement that the majority of big
radio stations are running illegally.

>, despite your
>deperate attempt at trying to say it was. I merely claimed your ersonal
>feelings cited above are in no manner "evidence".

The fact that these stations exist and are illegal are a matter of
record for anyone who's ever spent any time there. My "personal
feelings" notwithstanding.

How do you think I gathered the evidence that prompted me to make that
claim? It was based on empirical observation.

>The FCC knows the reputation of channel 6 also, only they have protocol
>to determine if someone is breaking the law, not personal feelings they
>refer to as "empirical evidence" as you do.

You are up a tree now. How do you think the FCC makes the
determination that a specific high powered station is worthy of
further investigation? Do you think a little empirical observation
just MIGHT be a clue?

The FCC is able to make a quantitative analysis by inspecting the
physical station to determine just HOW illegal they are. But I don't
need to be that precise. Just knowing that they ARE illegal is all
that matters.

Because I can't follow through beyond the initial observation stage,
you think that means that my observations are invalid? Boy are you
naive and devoid of comprehensive abilities.

>Your personal feelings are not "facts".
>
>>No but my trained observations skills can be
>>considered as strong evidence to the positive.
>
>
>
>No,,,it can not. It is personal testimony to be taken into
>consideration.

Look up "expert witness" for a clue.

> It is intangible and can not be entered as evidence, only
>supporting testimony.

This is not a court of law. I need to convince no one. And you aren't
denying it either. You just want to argue the point because *I* made

it. The deeper you go in the "debate", the wackier and off the wall
your retorts become. Such as your next statement:

> Huge difference where the law is concerned, but
>with your demonstrated hate and disdain for the law and your fellow
>hammie and cb operators

This is absolutely side splitting, coming from an admitted federal law
breaker, to accuse ME of harboring hate and disdain for the law.

>, it's crystal clear you have no clue of the law
>that pertains and governs your chosen hobby.

What IS clear is that you twist and obfuscate the law to fit into what
you think it is, and not what it truly says.

You will defend the dubious legality of an obvious "entertainment"
device, but see nothing wrong with operating on clearly unauthorized
frequencies, or running power beyond the legal limit.

Such is the nature of a sociopathic mind.

> You demonstrated this when
>you held roger beeps and echo illegal on cb because you "couldn't find a
>rule that permitted them".

Because there aren't any. Otherwise you would have posted it. But
there ARE rules which specifically prohibit devices used for
"amusement or entertainment".

>>Yes, that part is my personal opinion.
>
>See what you can learn when you are force fed? At the beginning of this
>thread, you claimed it was fact, now, after proper instruction, you
>admit it is "personal opinion". Good show.

Only the first part is. The second part was empirical observation

347. Converting sweep tube amp to 4cx250 amp

Newsgroup: rec.radio.cb
Date: 2005-01-07 20:19:52 UTC
From: Jimmie <Gfender@carolina.rr.com>
Message-ID: <I9CDd.4536$hQ6.349574@twister.southeast.rr.com>
Source record: 193987

Just finished a project of converting my old 4 sweep tube amp to 4cx250. I f the amp uses a doubler type power supply forget it. Might as well build from scratch. Bridge type power supplies can be converted to doublers that will give about 1600 VDC. At this voltage power out of the 4cx250 will be about the same as 4 sweep tubes. Im getting about 800 watts PEP. Dont even think about running 2 4cx250s, OF course you could but the rest of the amp parts will never handle it and again you might as well build from scratch.

You may have something there for the first few microseconds of the
transmission but after a quiescent state is reached all that matters is the
impedance of the line and the load. It has been argued if not settled that
power sent back to the generator is not reflected again but either adds or
subtracts from the generator power.

>their rigs, and by the splatter they produce?

When the dx is running strong, that is exactly what people are trying to
tell you.

>The "DX" has nothing to do with the amount of
>splatter and the distortion a signal may have.

It has everything to with it. For the amount of times you professed to
having talked skip on the freeband, followed by recent denials of you
talking skip, you should know that on MANY occasion, a signal can be
severely wavering from an S1 to an S9 (for but one of many
examples),,,when that signal is coming in at an S9, the splatter may be
intense if you changed the channel and went one up or down. When that
signal is coming in on a wavering S1, you will hear absolutely nothing
on your next channel. Once again, the wavering is a direct result
of...taa daaa....skip.

>The only effect that "DX" may have is

>heterodyning of co-channel signals. In any

>case, when my observations were made, the

>"DX" was not running heavy enough that a

>clean sample of any particular transmission

>could not be made.

You can qualify it away now, but your original claim is still bullshit.

_
I find it absoutely astounding this is lost upon you

>That's not surprising considering you once

>tried to tell me (and the group) that a 4 watt

>skip station 1000 miles away could potentially

>walk on top of a 4 watt station a half mile

>away,

Absolutely. In fact, I have taught you many things regarding HF propagation and communication law of which you have no clue.

>totally disregarding the effects of R.F.

>.path loss.

Never. That last part was added desperation.

-
Coupled with your claim concerning roger beeps and echo on cb being illegal (they're not) merely because you were unable to locate a rule specifically permitting their use, and it merits

>There are specific rules which specifically

>prohibit devices used for "entertainment" and

>"amusement" purposes.

But only you continue to err and place such in that category. Your argument is with the FCC, not those of us who are able to correctly understand their law.

>There is also a specific rule which outlines

>permitted tone signals. A Roger Beep is not

>listed under permissible tone signals.

>Following simple logic, since there is no valid

>rule which permits a particular device, then the
>device defaults to one of "amusement or

>entertainment" status and is prohibited.

That isn't simple logic, that's but an openly biased albeit incorrect interpretation based on nothing more than your past stated disdain for such items and your ignorance of the law that governs your hobby.

>So therefore it can be assumed that a roger

>beep and (even more definite) an echo box

>could be considered "entertainment" or

>"amusement" devices and, as such, are

>specifically prohibited.

Only by yourself.

>You can make the point that the FCC doesn't

>care enough to make a case about these

>things, and I would probably agree with you.

Not only would I never make such an invalid comparison, I disagree with such a statement.
Email the fcc and ask them about your claim, Dave.

>But the fact remains that they are prohibited

>by the rules.

Insisting on remaining ignorant is your right at all cost.

Irony: When some of those licensed for communications know the least about their chosen endeavor.

>Bigger Irony: Someone with obvious

>comprehensive issues chastising others for

>the same flaw.

>Dave

>"Sandbagger"

This is quite simple, really....me: 100% correct..you: 100% wrong.

>high power?

Apparently, that is a an argument you are having with yourself.

>No, you are trying to claim that there are no

>illegal operators on 6, based on your rejection

>to my claim that what I can hear on almost a

>daily basis is in fact illegal.

  I claimed nothing of the sort. I claimed only that your claim is
bullshit, which it is.

>So which is it? If you are denying my claim

>that there are illegal stations on channel 6,

>then by simple inverse logic, you are claiming

>that there are NO illegal stations on channel 6.

That isn't inverse logic, that's illogic invoked by yourself. Once
again, since you are displaying an uncanny sense of self-cornfusion, the
legality of stations on channel 6 was never the issue. The only issue
was the manner in which you claimed you could tell they were illegal.

>If, you acknowledge that there are, in fact,

>illegal stations on channels 6, then my claim

>cannot be false.

>You REALLY need a course in logic.

>Or will you try to weasel out of it by claiming

>that the term "high power" is ambiguous?

See above.
Your personal feelings are not facts, despite how many times you invoke them as such. Let's look at it again since you still can not grasp it.
You (N3CVJ)said:

>`channel 6, which is notorious for harboring

>the dregs of society, who regularly run high

>power, is all the "evidence" I need, to

>determine that the station in question is in fact,
>llegal."

Once again, your personal feelings are not facts. That illegal operation occurs on such a channel was never contested by myself.

>Then you have to agree with my statement

>that the majority of big radio stations are

>running illegally.

Pay attention, Dave, that claim was never opposed.
I merely claimed your personal feelings cited above are in no manner "evidence".

>The fact that these stations exist and are

>illegal are a matter of record for anyone who's

>ever spent any time there. My "personal

>feelings" notwithstanding.

Fine,,but the mere fact they exist, and (here we go Dave,,pay attention once again, only for a short while longer)...is NOT a "fact"attesting to their legality, nor is your original claim, which has been soundly defeated.

.
>How do you think I gathered the evidence that

>prompted me to make that claim? It was

>based on empirical observation.

Neat. You went from obtaining what you mistakenly and erroneously referred "empirical evidence" to obtaining "empirical observation", afterwards (in retrospect). We follow your logic, Dave. Truly.

The FCC knows the reputation of channel 6
also, only they have protocol to determine if
someone is breaking the law, not personal
feelings they refer to as "empirical evidence" as you do.

>You are up a tree now. How do you think the

>FCC makes the determination that a specific

>high powered station is worthy of further

>investigation? Do you think a little empirical

>observation just MIGHT be a clue?

Not by you. Just like coming from Jerry, they are mere allegations and by no means considered "empirical observation". The FCC, or their assigned designee MUST witness an infraction prior to action be taken against individual, other than a mere warning.
Tell me more about this tree that has you pizzing all over yourself with errors.

>The FCC is able to make a quantitative

>analysis by inspecting the physical station to

>determine just HOW illegal they are.

Keep grabbing at other subjects. You;re bound to find one you know *sonething* about.

> But I don't need to be that precise.

In order to determine if one is guilty and to be called a criminal, you most certainly do.

>Just knowing that they ARE illegal is all that

>matters.

You can't make that judgement and it pisses you off. Only a court of law can determine one's guilt,,even if they *are* guilty, the referring to one as criminal without that person being convicted in a court of law can be both libel and slander.

>Because I can't follow through beyond the

>initial observation stage, you think that means

>that my observations are invalid?

You already proved your observations are completely skewered because you base them on incorrect information.

>Boy are you naive and devoid of

>comprehensive abilities.

Your personal feelings are not "facts".

>No but my trained observations skills can be

>considered as strong evidence to the positive.

Did you train yourself, Dave? What special training did you receive,
regarding these observation skills you feel important enough to invoke?
No,,,it can not. It is personal testimony to be taken into
consideration.

>Look up "expert witness" for a clue.

You are no expert. Referring to yourself as "expert" doesn't make it so.
My gosh Dave, I have never seen you so starved for status.

_
 It is intangible and can not be entered as evidence, only supporting
testimony.

>This is not a court of law.

And as such, you have no right calling another a criminal based on your
(1) "empirical evidence". Such was shown to be nothing more than your
personal opinion. You were made to acknowledge and change your plea
concerning what you previously and erroneously referred. Your "empirical
evidence" morphed into "empirical observations", which can actually be
an oxymoron in itself, coming from you, but that's another story for
anotther day.

> I need to convince

>no one. And you aren't denying it either. You

>just want to argue the point because *I* made

>it. The deeper you go in the "debate", the

>wackier and off the wall your retorts become.

>Such as your next statement:

  Huge difference where the law is concerned, but with your
demonstrated hate and disdain for the law and your fellow hammie and cb
operators

>This is absolutely side splitting, coming from

>an admitted federal law breaker, to accuse ME
>of harboring hate and disdain for the law.

You not only laughed at those you were bleeding and thumbed your nose
with your operating habits, you were as verbally abusive on the air as
you are in this group. You base your false allegations against others
based on nothing more than your incorrect and flawed interpretation of
the law. An example is you incorrectly holding one who violates the dx
law as a "federal criminal." Your argument of *why* you consider such to
be true (it isn''t),,,is the sidesplitting material.

It's crystal clear you have no clue of the law that pertains and governs
your chosen hobby.
What IS clear is that you twist and obfuscate the law to fit into what

you think it is, and not what it truly says.

>You will defend the dubious legality of an

>obvious "entertainment" device,

it's not dubious at all Dave. It's cut and dry. email the fcc and ask them. You are the only one expressing such difficulty in interpretating their rules.

>but see

>nothing wrong with operating on clearly

>unauthorized frequencies, or running power

>beyond the legal limit.

On target-specific frequencies, and I don't run but 100 watts, the exact wattage YOU claimed would not be a problem for freebanders if they were running a clean station, which I always have, unlike yourself.
Your problem has always been your approach. The amount of time spent on the freeband is miniscule compared to where I usually spend my time, yet due to your overt concern with my personal world, you choose to focus only on illegal freeband activity. Nevermind I am in complete compliance with a past post of yours concerning how operators operate on the freeband, this is a new day and a new contadiction from yourself.

>Such is the nature of a sociopathic mind.

Not only do you fancy yourself an expert witness and radio technical guru, you suffer from the Walter Mitty complex and fabcy yourself a physician.
You have certainly illustrated how starved you are for status, Dave. I hope you gain some self-confidence some day and can be satisfied with who you are and not who your delusions dictate.

–
You demonstrated this when
you held roger beeps and echo illegal on cb because you "couldn't find a rule that permitted them".

>Because there aren't any. Otherwise you

>would have posted it.

I know enough not to search for negatives.

>But there ARE rules which specifically prohibit

>devices used for "amusement or

>entertainment".

>Yes, that part is my personal opinion.

See what you can learn when you are force fed? At the beginning of this thread, you claimed it was fact, now, after proper instruction, you admit it is "personal opinion". Good show.

>Only the first part is. The second part was

>empirical observation

>Dave

>"Sandbagger"

A much more reasonable observation by yourself.

>who cut and pasted a quote from

>ICECOLDNYC and erroneously claimed it was
>mine.

Nope, you sure aren't. You're the one that has such a damaged ego, you need foster the self-purported notion you hold various degrees, are an expert witness to the courts, and claim doing over 70 mph makes one a "federal criminal".

–

Besides, it doesn;t take a rocket scientist to understand the kind of operator you are,,,you already admitted to being the worse kind of operator that exists.

>Someone who didn't take crap from idiots?

The idiot was self-explanatory in your posts.

> Yea, I'm guilty

No doubt.

>. But unless you're one of those idiots, you can
>hardly make a valid claim that my "style" is the
>"worst kind of operator that exists".

One of them.

>I've done more to help other CB'ers than you

>could possibly imagine.

You're right. I can't imagine one who was such an ass on the air at anytime in their life, has changed their ways, and I say this only in light of your actions and comments on this group. Granted, many of your comments were made out of ignorance, but ignorance is no excuse when it comes to the law you so often misquote ad misinterpret.

No one understands your "dynamics" nor your "empiricle evdence" nor your
incorrect blathers about echo and roger beeps being illegal on cb.
>No, only you have a problem with straight talk.
Try putting some forth,,,,you never have.

>You prefer speaking with forked tongue.

That you are unable to find a rule expressly permitting roger beeps on
cb, is all the "dynamics" on needs to understanding your twisted world.

>Already addressed.

And you're still incorrect.

>Move on.

>(You know all about paybacks right?).

If you are attempting to draw some type false analogy between my typed
words and your committed actions, you better dig a little deeper in your
desperation bag,,,,,whoops, nothing left.
>See, you can comprehend things when you

>really want to! It's funny that what you do here

>today, is so similar to what I used to do in the

>1970's.

No dave, in now way does what I "do" here have any comparison to your
actions that affected other people and infringed upon their right to use
their radio free of interference from yourself.

>The thing is, in 1974 I was 14, so what's your

>excuse for your immature and antisocial

>behavior today?

Again, I knew enough at 14 not to act like you did.

>Plus, I was a teenager then. That should

>explain everything.

No, Dave, you weren't a teenager when you were making these posts, but
good luck on trying to get the contingency to believe your

frequent-flowing lies.

>Are you caught in some form of dissociative

>time warp? The internet didn't exist (at least

>not in this form) when I was making noise on

>the band.

Correct,,,so stop invoking that time period, ,,,i metioned nothing of it, only of the time period when you made your posts concerning your illegal radio activities.

>The fact that I can tell stories from back then,

>does not mean that I'm still doing the same

>thing.

Nope,, but when you make a post that says "I still run an amp" in a thread speaking of ...taa daa..."CB" in a CB group, it most certainly does.

>If I write a recollection of an event which

>occurred 30 years ago, does that mean that

>what I write about is still true?

If you wrote it, chances are, none of it is true.

_
I never splattered, never ran huge power, never was a jerk on the air, even as a child, I not only knew better, I was taught better.

>But you see nothing wrong with breaking

>federal communications law as an adult? It

>would seem that respect for the law was a

>subject skipped over when you was "learned".

Respect for the law has abolutely nothing to do with selective disregardment.

>It has EVERYTHING to do with it. How can

>you claim to respect the law, when you feel

>you have the right to ignore it when it suits

>your purpose?

I never said I had the "right" to disregard it, which is why I (now pay attention here) *selectively* disregard it.
Your agenda has been ilustrated, as has

your hypocrisy, contradictions, deliberate misattributions to others, and lies, But then again, where would this group be without lids like you to keep us ahead of your game...

>It would be forced to deal with sociopath like

>you, and your warped views on the way the

>world is.

One who fancies themself qualified in multi-fields of discilinary studies, but who isn't, is much more in line with a sociopath than any claim you make concerning such.

>It would seem that you still need to mature

>enough to learn respect for the law...

I have incredible respect for the law.

>And you prove it every day when you

>disregard the law which prohibits you from

>utilizing more than the 40 legal class D

>channels.

The only thing proved here is your ignorance arrived via arrogance. As illustrated, you have many delusions concerning yourself and your qualifications, so it comes as no surprise when you foster delusions of myself, such as disregarding the law "every day"..but such an approach does justify your behavior to that inner twisted psyche.

_
In fact, there are two
sandbaggers in this group howling their azzes off watching you come apart with such remote accusations. Someday, I may permit you to be clued in.

>Someday I may clue you in to just how a

>psychological study of your posting habits was
>included in someone I know's psychology

>report on deviant behaviors.

That would be so rich, if you knew who the hell you were responding, especially in lieu of the fact that you have falsely presented yourself as qualified to make the impressions you now cite of another.
All the more curious, is the fact you are asking educated individuals in this group to believe such an alleged professional would dare make a determination based only on a cartoon character and the very carefully crafted information you were tossed. The "deviant", has never been more clear, and for that, I thank you.

>Dave

>N3CVJ

>You obviously know little about the industry of journalism. It's a
>known given to all, but the most liberal people, that the mainstream
>media (with the exception of Fox) leans very much to the left.

No, that's not a "given". In fact it's quite the opposite. Since the
invention of mass media it has been manipulated by the powers that be,
whether that power is the people, a government, the corporation that
owns the media, or whatever. And there is a very simple and obvious
proof to this: One of the first objectives of an army that invades
another country is to shut down or take over the media. This is
because if they don't the media can be used against them by the
defenders, AND the invaders can use the media to their advantage by
discouraging resistance.

The fact is that there has never been a better source of false
information than the mass media. The only question is where that false
information is coming from. Well, that depends on who controls the
media. In the US the people certainly don't control the media -- it's
controlled by the huge corporations that own it and the government
that regulates it. THAT'S the source of any misinformation you get
from the allegedly "left-biased" or "liberal" media. That's a fact!

Who says I "discarded" it? On the contrary, I proved that your
accusation was not just lame, but also quite ignorant. I proved that
sheople like you take the word of others instead of checking the facts
for yourself, which you claimed you did. But if you did you would have
seen that there is nothing sinister at all about Kerry's discharge.
The story was nothing more than propoganda invented to discredit Kerry
and you drove that car without even checking the tires.

<snip>

>
>Another classic case of inventing an issue and then implying a
>nefarious agenda when the party responsible refuses to acknowledge the
>bogus issue, thereby casting doubt and suspicion over his integrity.

Yet another simple concept that you don't understand. Suspicion naturally falls on the person or persons who benefited from the problems. Kinda like some guy's wife is murdered right after he took out a huge insurance policy and he doesn't have an alibi. This warrants a justifiable suspicion (unless, of course, you are the guy being implicated, then you make up your own justifications).

>>The final recount tested roughly 3% of the roughly 5.7 million votes

>And when you are determined to find a flaw, the fact that there aren't
>any automatically means that this was "planted"? Gee, maybe the main
>issue is that the allegations of fraud have been greatly overstated.

There were indeed "automatically means" as written in Ohio state law. It requires a random sampling of precincts. The precincts were not chosen at random but hand-picked by the person who has a big stake in the outcome of the election (have you looked up the definition for "conflict of interest" yet?).

>>In other precincts, impossibly high voter turnout figures -- nearly
>>all of them adding to Bush's official margin -- remain unexplained. In
>>the heavily Republican southern county of Perry, Blackwell certified
>>one precinct with 221 more votes than registered voters. Two precincts

>>certified final vote count with voter turnouts of roughly 124% each.
>
>Can they determine which of the total vote count were bogus and that
>most of the bogus votes were for Bush?

Yes. I didn't major in stats so read the articles on their website for yourself.

>>In Miami County's Concord South West precinct, Blackwell certified a
>>voter turnout of 98.55 percent, requiring that all but 10 voters in
>>the precinct cast ballots. But a freepress.org canvas easily found 25
>>voters who said they did not vote. In the nearby Concord South
>>precinct, Blackwell certified an apparently impossible voter turnout
>>of 94.27 percent. Both Concord precincts went heavily for Bush.
>
>It's a shame that those extra votes for Kerry might have to be
>removed.........
>
>You assume that any extra votes mean that the were Bush plants. What
>if they were Kerry plants?

What if you are ignoring the fact that there were more votes than voters?

>>In Warren County, Bush was credited with 68,035 votes to Kerryï¿½s
>>26,043 votes. But just as the county's votes were about to be counted
>>after the polls closed on November 2, the Board of Elections claimed a
>>Homeland Security alert authorized them to throw out all Democratic
>>and independent observers, including the media. The vote count was
>>thus conducted entirely by Republicans....."
>>
>>
>>Those are facts, Dave. Not left-wing propoganda, "editorial opinions"
>>or "MY biased opinions". Facts.
>
>Yes, the overall articles are facts, but the underlying reasons and
>the suspicions generated or implied are the result of bias.

Ok, here are the facts:

First, it's statistically impossible that all the errors were
accidental.

Second, the errors that resulted in extra votes were in predominantly
Bush areas.

Third, the errors that resulted in supressed votes were almost always
in districts that favored Kerry.

Those are the facts. Now it doesn't take a rocket surgeon to reach the
conclusion that there was voting fraud perpetrated by Bush and/or his
supporters. And neither do you need to be a genius to figure out who
perpetrated this fraud, since many of the decisions that resulted in
these errors were made by Blackwell (co-chair of Ohio's Bush/Cheney
campaign -- remember "conflict of interest"?).

Can you put the puzzle together yet? How much simpler can I make it
for you?

<snip>
>Liberalism is destined to fail, as nothing positive has even come from
>a socialistic paradigm. I just don't want to see this country dragged
>through the muck to before they realize it.

You are confusing liberalism with socialism. They are not the same.
Far from it.

<snip>
>>First off, it was -HARDLY- a "clear republican victory". The first
>>count was done by machine and gave Rossi a lead so slim that it
>>triggered an -automatic- recount. That recount narrowed the lead to a
>>few dozen votes. It would have been foolish of any opponent -not- to
>>request a hand recount, which put Gregoire in the lead by 139 votes.
>
>Votes that were "suddenly" found......

Which were later verified and the total favored Gregoire, which begs
the question: were they were lost accidently or intentionally? If they

were lost intentionally I don't think the Democrats were responsible.

>>The rules were followed and Gregoire won. Now the Republicans are
>>whining up a storm and begging for a second election. Also, there have
>>been allegations that King County counted unconfirmed provisional

Try 1876.

<snip>
>>Official military records are "leftist propoganda"?
>
>Which records? Kerry's military records? Oh that 's right, he refused
>to release them all.

You mean the records that say his other records (the records that
-were- released) are all phoney? Or maybe you are referring to his
medical records? The man was an officer in a war zone, so he must have
had a security clearance -- should he release classified documents
that are part of his military record?

Just what do you think is on those documents? Now before you stick
your foot in your mouth and answer that, remember that you don't have
those records and therefore have no evidence, empirical or not, as to
their nature. So the only clue you have as to what they are (other
than the obvious, as I stated above) is purely conjecture. Ok, feel
free to answer the question -- let 'er rip!

<snip>
>>>By what factual (not op-ed opinion) information do you base this
>>>claim? How do you determine total voter fraud?

Possibly. The question is to what extent.

>>We have -new- problems that need to be addressed, such
>>as a corporation that wrote the software for the voting machines and
>>whose CEO promised to deliver the state's electoral votes to Bush;
>
>Hearsay. There's no proof that any such "promise" ever occured.

Once again you didn't bother to verify the facts for yourself before spouting off your big mouth. I did a search on O'Dell's quote and got over 15,000 hits. Here's just one:

http://www.commondreams.org/headlines03/0828-08.htm

>>election officials (i.e, the Secretary of State) who is also the
>>campaign manager for that state; the shorting of voting machines in
>>selected precincts; etc, etc.
>
>Interesting that in those places were voting machines were "shorted",

>were handled by democrats. They have only themselves to blame if they
>were not able to accommodate their constituency.

You simply -refuse- to look at the other side of the coin, don't you?
It was those same Democrats that lodged the complaints! They were told
a variety of different lies about how the machines were apportioned,
which is one of the issues Blackwell was supposed to address in the
deposition he evaded.

So is the picture coming into focus yet?

<snip>
>>>I really don't know, but his interests in the direction of this

>>this newsgroup.
>
>If you make a post in another of several thousand other newsgroups,
>how can you in all fairness expect the people HERE to know about it?

Very good point. And with that truth in mind, how can you "in all
fairness" say that I lied when I claimed to have supported Bush in the
past? You jumped to your conclusion without all the facts. And the
facts were available on google if you had the inclination to verify
the facts before you framed your indictment. But that's just not your
style, Dave -- after all, you already know the truth -despite- the
facts, right?

>Maybe you think we keep tabs on each other? Maybe I'm the odd-ball in
>that respect, as I don't.

The difference is that I, unlike you, don't make claims or accusations
unless I have the facts to back them up.

<snip>
>>I defended Kerry against your bullshit propoganda.
>
>The truth remains that Kerry refused to release ALL of his military
>records. What's he hiding?

You claimed he didn't get his honorable discharge until 2001 which was
a totally fabricated lie. And you can't even admit it. So now you
focus on records he didn't release without a shred of evidence that
they hold anything of importance to you. What was that you said
earlier about suspicion and political bias.....?

Maybe for you. My motivation happens to be preservation of the concept
of a democratic system of government.

>I also suspect that you are probably a lot more open to certain
>communist ideals. Most liberals are.

Again with the labels..... FYI, this country has adopted ideals from
just about every political process ever conceived, including Marxism,
communisim, socialism and fascism. Some are good and some are bad. But
as I tried to explain to you a while back, the Republican ideal is not
such a great concept in it's pure form -- it's a totalitarian-style
government where manipulation is the rule and freedom is an illusion.

Didn't you read Plato's "Republic" like I suggested?

>>That doesn't mean I'm
>>a communist (or married to a communist). And I didn't defend Kerry so
>>much as I disproved the lies and conjecture you ignorantly chose to

>
>What facts? The crap you gleaned from Kerry's own website? Yea,
>there's no bias there.....

You mean the official military records (in your words, "crap") that were released by the Pentagon? Why yes, that's exactly where I got my facts. Yet you, in your unbridled wisdom, want the Pentagon to release more "crap" when you can't even accept the facts from the "crap" that was already released (from the same source). If the first load of "crap" was phoney, what makes you think a second load of "crap" is going to be any more legitimate? Or if you think that second load of "crap" is going to provide you with facts then why can't you accept the facts from the first load of "crap"? That's a load of crap, Dave, and you are a very confused person.

Are you so pessimistic that you see the political process as nothing but a disingenuous quest for power? That every act is motivated by a self-serving political agenda? If so then you don't know people half as well as you think you do. FYI, there are quite a few people in the political arena that actually serve the interests of the public and not their wallets. Maybe -you- need to be a little more idealistic.

I said nothing of the sort. I simply question how much influence they
had, and how that influence compares the the amount of voting fraud.

Not in my case. If I'm limited to those two choices (or even just one
choice) I simply won't vote for that position, and that's exactly what
I did with a couple races in this last election. But if you want to
gaze into your crystal ball and divine the intentions of other voters
then don't let me stop you.

So you're suggesting that anyone who wants to vote for a third party
shouldn't vote at all?

>Don't get me wrong, the whole principle of a democratic government
>should embrace as many political candidates as they can. Third (and
>4th) parties are a good thing. But in all practicality, they are alone
>in a sea of red and blue.

Times change. It wasn't always this way, and it won't be this way
forever. There are people who like the status-quo and others who think
we can do better. I happen to belong to the second group.

> Even if a third party candidate were to win
>the office of president, they'd be opposed by both sides of congress.

That's assuming the congress is so dominated, which is not a given.

>And that's really the catch 22. Many people contemplate their votes.
>They may like what a 3rd party candidates says, but realizes that they
>stand little chance of winning. So the question becomes, should they
>vote for someone who they ideologically agree with the most, or the
>candidate who somewhat agrees with you, but who has a better chance of
>actually winning?

The lesser of two evils? Hey, I can't tell anyone how to vote. But
people should realize that this isn't a football game, and just
because your candidate didn't win doesn't mean you are a loser. You
cast your ballot and, barring any fraud or supression, your voice is
heard regardless of who wins the election.

>Is it better to completely lose your chance to influence the direction
>of this country or is it better to at least get SOME of your political
>views represented?
>
>That is the voter conundrum.

Who says that voting for a third party has no influence? It causes a -great deal- of influence when there are a significant number of people voting third-party, and especially when all those third-party votes are greater than the margin of victory between the other two parties. If it didn't have any influence then neither party would have pushed this "don't waste your vote" bullshit propoganda when they were afraid of losing votes to that third party. But instead of listening to those votes and addressing their concerns, the two parties chose to shoot down the votes by propoganda and manipulation of the media. Even the ultra-liberal (so you so claim) Dan Rather and CBS almost -never- mentioned Nader or any of the other third-party candidates. I guess they aren't as liberal as you thought.

They would like to think so. I keep hoping that Texas (and Florida)
will make good on their threats to secede from the Union -- it would
boost the GNP by at least 10% because we wouldn't have to clean up
their messes anymore.

Heck no! I wouldn't even think about one of those fad diets. Those
methods can cause more harm than good.

Losing weight isn't hard at all. First, don't set goals or limits
cause that's just setting yourself up for failure. Just be a little
more aware of little things you can change. Like eating a little more
fish and a little less beef, snacking on peanuts instead of pringles,
using parking spaces further away from the door, etc. Little things
like that can add up to a big difference over time. And don't try to
make those changes all at once. It's kind of like a zen thing -- just
having an awareness of things you -can- change will prompt the changes
to come by themselves in their own good time.

Naw, it's no secret, and you don't need to pad the wallet of some
hyperactive TV jock.

Eating is more an issue of -what- you eat instead of how much you eat.
Peanuts (and other nuts) are great because they fill you up fast and
have some food value without any cholesterol. Sugar just stimulates
the appetite and makes you want to eat more. And beef is a -very-
fattening food -- just look at where it comes from! So I do a shrimp
stir-fry a couple times a month instead of hamburgers.

As for exercise, no need to clock your pulse at the gym -- those are
things to do when you want to get your heart and muscles into better
shape. The important thing is to expend energy that would otherwise

become luggage, which you can do just a little bit at a time without working up a sweat. Just take advantage of the opportunities, like walking up a flight of stairs instead of taking the elevator..... heck, even grinding your own coffee beans would help. Any pinhole you can poke in the inner-tube will deflate it that much faster.

Dial-up. I'm trying to stay with local companies, but they all seem to be getting bought out by bigger outfits. They keep dropping their rates to be competitive but the service suffers. I would be perfectly willing to pay more for good service but they can't seem to figure that out.

It still remains calories consumed against calories spent. I'm 40 pounds
thicker from when I was 18. I eat anything I like, and I blame to 40 lbs on
slower metabolism, and delegating.

Ummm, no Dave. DX has everything to do with DX splatter.

>Ummm, no Dave. DX has everything to do with DX splatter.

He's right, Dave. You can receive more than one skip signal from the
same transmission, and their phasing can cause intermodulation
distortion in any RF stage of your receiver. All that's required is
enough non-linearity in just one stage and the signals will modulate
each other. The result is what appears to be splatter but is really a
fault of the receiver. Happens all the time with cheap shortwave
radios. And DX doesn't have to be up to get a good signal -- I have
heard many clear DX signals from seemingly dead bands.

Obviously, the AKC (American Key-Down Club) has homosexual tenancies as they constantly forge emails indicating so. Number two...as youngsters, they were constantly beat-up and had their lunch money taken by some big-bad CB'ers, and now they try to retaliate via a computer keyboard. Number three...their Daddy was 'Gang-raped' by a bunch of CB'ers, and they are now the offspring of such, better known as "Asshole Babies." You guys have done NOTHING to stop the flow of ANYTHING. Hell...you can't even log on to
http://members3.boardhost.com/americaneagle/
You girls are PATHETIC!

>No Frank these are not facts they are your opinion just like Dave has his
>opinion about illegal operator on channle 6.

No, it's fact, and history is loaded with examples that prove it. The
US government regularly uses mass media, both foreign and domestic,
for disseminating misinformation. They can even do this even by their
silence; i.e, by omission. Refusing to keep the US updated on the Ohio
recounts sends the message that the issue is less important than
Martha Stewart getting second prize in the prison bake-off. And the
corporations that own the media outlets regularly use them to
influence public opinion to favor their own agendas, the most blatant
and recent example being the Sinclair group's push in the Bush
campaign.

And until Dave can provide an example where one of the allegedly
illegal operators he allegedly heard was found guilty, got an NAL, or
even admitted his guilt publically, then his allegations are nothing
more than his opinions, not facts.

Damn! I'll bet it was great!!
If it stops raining, I'll go Pheasant hunting tomorrow. I'll
soak the bird in a brown sugar, Bourbon brine then smoke them or slow cook
them in the BBQ.

I'm already running 3.11 (and ME if I flip a switch, but I only use
that to log onto secure sites). So you figured out how to set up DSL
and/or broadband on 3.11?

If you think that number of ice cream and pizza places, weather, and number of sporting goods stores are good ways to measure if a city is "fat" or not, then sure. This "study" by Men's Fitness Magazine -- basically the men's version of Cosmo -- is little more than junk science.

On the other hand, the Centers for Disease Control (CDC) did a more scientific study where BMIs from a sample size of the population were considered. I don't know why that one gets no publicity, while the junk science does. The top cities are a little different.
http://www.obesity.org/subs/fastfacts/cities.shtml

And here are a few comments from today's Houston Chroncle:
http://www.chron.com/cs/CDA/ssistory.mpl/front/2979999
"One minute Mayor Bill White debunked Men's Fitness magazine's methodology for labeling Houston the nation's fattest city, and the next minute he announced a new wellness initiative to combat the label.
'It's calculated with voodoo and fraud,' White said of the rankings of 50 cities across the nation featured in the magazine's February issue. To determine the rankings, the magazine staff does not actually weigh anyone, but examines 14 elements of city life, including the number of fast food and pizza restaurants.
'The rankings themselves are flawed,' White said at a City Hall news conference Wednesday. He questioned the fairness of not counting delis as fast food places in New York or Chicago, but counting Smoothie Kings as fast food places in Houston. Results of the creative formula differ from the findings of more official medical research, such as that from the Centers for Disease Control and Prevention."

So I would take the Men's Fitness rankings with a grain a salt. Well, maybe I wouldn't even give them that. It's just a marketing ploy to

sell more magazines.

It's that darn left-wing media again, ignoring the facts and pushing
their socialist agenda of selling magazines. So what pinko-liberal
company owns Men's Fitness?

'Owned' by you???...LMAO. Obviously you need a few lessons in supply and demand. An old Chinese proverb once said that if you cut the snakes head off, two more will grow in it's place. There's a line of people just waiting to fill the void for every distributor who is shut down. I TRULY wish you luck, but if you were really that good, President Bush would have tapped you long ago for his 'Drug Czar' to stop the flow of illegal drugs into this Country. But you go ahead and fight your one-man battle, and we'll all sit back and chuckle. Keep your finger in the dike!

Admit it,, you're just jealous of Keith, aren't you, dougay.. Keith has way
too much class to play into your cowardly akc games... Right dougay????

Is it because he's a regular, normal kind of ham radio guy and he doesn't have
some grotesque, irrational gripe against Cb'ers.. or so called keyclowns????

You must be very misguided idiot, if you think that makes Keith, a Judus????

heh heh heh... You truly are a bitter little creep, without a soul, n8!

Oh...if you say so. But truth be known, I can simply pick up the phone and have a Davemade or 667V here in a couple of days. Don't forget about the transporters of illegal gear either. The three largest transporters that are guilty of shipping illegal goods across state lines (isn't that a felony?) are:
www.usps.com
www.ups.com
www.fedex.com

Go get 'em!

Ok.. Mr. Felon Hero.. :))

--
RE: Warning Notice--Amateur Repeater W8RZM

Dear Mr. Lagger:

Our records indicate that you are the trustee for the above repeater system. Enclosed are recordings of violations on the repeater by N8WWM. The transmissions continued for a considerable time and there was no evidence of a control operator.

Since you are the trustee for the repeater, it is important for you to understand that you are responsible for its proper operation. The decision to operate a repeater is a totally voluntarily one. Repeaters are a convenience in the Amateur Radio Service, not a necessity. A repeater is a station just like any other station; and under Section 97.205 of the Commission's rules, all stations must have a licensee and control operator. Under Sections 97.103(a) and 97.105, control operators must ensure the immediate proper operation of a station, regardless of the type of station control. Furthermore, "automatic" control does not mean "unattended" operation. Unattended operation is not authorized under the rules.

The repeater licensee/trustee is responsible for all recurring violations and violations that are not inadvertent, just as a licensee is responsible for a base station HF station operation in the licensee's home. You must prevent recurring and deliberate violations on the repeater by locking rule violators out, using tones, warning users, limiting its operation, or taking whatever steps necessary commensurate with your responsibility as the licensee of the station. If you are unable to do so, then you must shut down your station.

If you are unwilling or unable to prevent violations on the W8RZM repeater, then your operator and station license will be subject to enforcement action by the Commission. Such action may include monetary forfeiture, operator license suspension or station license revocation.

KC8QJP
FORMAL DISCIPLINARY HEARING-KATHLEEN R. LEE
Chairman Woods noted that Kathleen Lee was issued CPA certificate 36,525 on July 15, 1998. The hearing was to consider disciplinary action against Ms. Lee's CPA certificate pursuant to Ohio Revised Code section 4701.16(A)(5), conviction of a felony under the laws of any state or of the United States. Ms. Lee was convicted in the United States District Court, Northern District of Ohio of five counts of Aiding & Assisting in Filing False Tax Returns, a violation of 26 USC 7206(2), on June 12, 2000. Ms. Lee did not appear at the hearing. The Board agreed to deliberate the disciplinary action in a later executive session.
Action taken.
Kathleen R. Lee, CPA 4701.16(A)(5)-Convicted of aiding & assisting in filing of false tax returns. CPA certificate revoked.

485. Which Wilson antenna should I get? 3' or 4' or 62"

Newsgroup: rec.radio.cb
Date: 2005-01-09 14:40:54 UTC
From: joe3301955@aol.com
Message-ID: <20050109094054.29068.00000001@mb-m27.aol.com>
Source record: 194125

I recently got a 96 Buick Roadmaster station wagon. Do to a lack of mounting locations I plan to use a magnetic roof mount antenna. The 62"(Wilson 1000) looks nice, it's amazing to see a wire that thin stand straight up, but an antenna like that looks high maintenance, considering the car top is 5 foot high and the antenna would be another 5 foot high. Would I lose much reception if I went with a 3 foot fiberglass antenna or a 4 foot flexible fiberglass antenna ? The top of the 4' antenna would only be 9' high and therefore less likely to get hit in drive-ins like the bank and fast food joints.
When I get an antenna I expect it to last at least 5 years.
The radio I will be using is a Uniden pc68 elite, because I really like the Uniden pc68ltw in my other car.

Source record: 194129

I have owned two Midland 79-892 mobiles over the years, and the noise blanker has never worked on anything. Has anyone ever owned a Midland 79-892 40 channel sideband mobile that had a noise blanker that worked? Just curious. As far as I can tell you flip the noise blanker on and nothing happens.

I never had any problems with a 3 or 4ft antenna.
For my motorcycle, a honda 400CBA, I had mounted a 3ft antenna on the rear
rack.
I made a bracket just for my GE CB mounted over the headlight.
That was in 1978.
Never had a problem with it and reception was decent.
Unless I can mount a 102" whip on the bumper, I usually go with a 4ft
maggie.
Or if it's my car outright, I'll drill a hole on the side and put in a ball
mount.
Easy enough to repair the damage later.

Get the 62" Wilson, for the ease of it. You might get a
little better performance from the 4", but the ease of install
and use of the Wilson far out weighs the loss of performance.

I recently got a 96 Buick Roadmaster station wagon. Do to a lack of mounting locations I plan to use a magnetic roof mount antenna. The 62"(Wilson 1000) looks nice, it's amazing to see a wire that thin stand straight up, but an antenna like that looks high maintenance, considering the car top is 5 foot high and the antenna would be another 5 foot high. Would I lose much reception if I went with a 3 foot fiberglass antenna or a 4 foot flexible fiberglass antenna ? The top of the 4' antenna would only be 9' high and therefore less likely to get hit in drive-ins like the bank and fast food joints.
When I get an antenna I expect it to last at least 5 years.
The radio I will be using is a Uniden pc68 elite, because I really like the Uniden pc68ltw in my other car.

I'm sure you've read these letters asking you to send $1 to six different addresses. Putting your home address or mailing address on the internet can be risky, but through PayPal all you have to provide is your email address. It's safe and easy. Just go to www.paypal.com and set up your FREE account! No credit card is needed. I am not a gullible person and have never trusted things like this, but I gave it a try. Hey it's only $6. I figured at least 6 people would respond out of the millions of people that use the internet. You should give it a try too! You have nothing to lose, and thousands to gain! Read on for the letter that I found (of course, I added my PayPal e-mail on #6)...

HOW TO TURN $6 INTO $6,000+!!! THIS REALLY CAN MAKE YOU EASY MONEY!!! IT WORKS!!! BUT YOU HAVE TO FOLLOW IT TO THE LETTER FOR IT TO WORK!!!! A little while back, I was browsing through newsgroups, just like you are now and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah, right, this must be some kind of scam" but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 though PayPal to each of the emails stated in the article. You then place your own email address in the bottom of the list at #6, and post the article in at least 200 news groups. (There are thousands) No catch. That was it. So after thinking it over, and talking to few people first, I thought about trying it. I figured what have I got to lose except $6.00, right? Like most of us I was a little skeptical and a little worried about the legal aspects of it. It follows the same regulations as the "mailed chain letters, which according to the U.S. Post Office (1-800-725-2161) is indeed legal! Then I invested the measly $6.00. Well GUESS WHAT!!? Within 7 days, I started getting money in my PayPal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $20.00. By the end second week I had made a total over $1,200.00!!! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $36,000.00 and it's still coming in rapidly. It's Certainly worth $6.00. I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works? Also, make sure you print a copy of this article now, so that you can get the information off of it as you need it.

$$

REQUIREMENTS: You must have a confirmed PayPal account. If you do not have a PayPal account you can go to www.paypal.com and follow the instructions to set up a free account. In order to place the initial $6

into your account, you will have to confirm your bank account with PayPal (which may take a few days). PayPal is 100% secure and is used my millions of people world wide. Confirming a www.paypal.com account simply means (1) PayPal will first ask you to confirm the email you used to sign up your PayPal account by sending you an email with a link for you to click to that email. As soon as you click that link your email is confirmed. (2) PayPal will then make two small deposits into your bank account if you set up your PayPal account with a checking or savings bank account. Or PayPal will make two small deposits to your credit card if you set up your PayPal account with your credit card. Then after a few days (it takes up to a few days for these deposits to appear in your bank account or on your credit card statement) then after a few days you go back to the www.paypal.com website and sign in. Then you click where it says this account is not yet confirmed. A screen will pop up that gives you 2 boxes to fill in. You then enter the numbers of the 2 small deposit amounts (two separate 2 digit numbers) that were deposited to your bank account or credit card. Now you have a working and confirmed PayPal account and can receive payments.

$$

[STEP 1]
Send, though PayPal, $1.00 to each email on the below list. Make the subject of the payment "Email List" and in the comments, write "PLEASE PUT ME ON YOUR EMAIL LIST." What you are doing is creating a service by this - and best of all you are not giving your address to anyone you do not know. THIS IS ABSOLUTELY LEGAL!! YOU ARE CREATING A SERVICE. Here are the latest PayPal e-mails on the e-mail lists:

#1)brittany...@excite.com

#2) mth...@renc.igs.net

#3) Mishav...@aol.com

#4) nike31...@aol.com

#5) careent...@hotmail.com

#6) jjrvn...@hotmail.com

www.paypal.com

Subject of Payment: ***Email List***

Comments: ***PLEASE PUT ME ON YOUR EMAIL LIST***

[STEP 2]
Now take the #1) email off the list that you see above, move the other addresses up one (6 becomes 5 & 5 becomes 4, etc) the put YOUR email address (the one used in your PayPal account) as #6) on the list. **MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS IN YOUR PAYPAL ACCOUNT**

[STEP 3]
Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups, message boards, etc. (I think there are close to 32,000 groups) All you need is 200, but remember, the more you post, the more money you make - as well as everyone else on the list! In this situation your job is to let as many people see this letter as possible. So they will make you and me reach!!!! You can even start posting the moment your email is confirmed. Payments will still appear in your PayPal account even while your bank account is being confirmed.

$$$

DIRECTIONS ON HOW TO POST TO NEWSGROUPS/MESSAGE BOARDS.

[Step 1]
You do not need to re-type this entire letter to do your own posting. Simply put your CURSOR at the beginning of this letter and drag your CURSOR to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into your computer's temporary memory.

[Step 2]
Open a blank Notepad file and place your cursor at the top of the blank page. From the 'Edit' menu select 'Paste'. This will paste a copy of the letter into notepad so that you can add your email to the list.

[Step 3]
Save your new Notepad file as a .txt file. If you want to do your postings in different sittings, you'll always have this file to go back to.

[Step 4]
Use Netscape or Internet Explorer and try searching for various newsgroups, on-line forums, message boards, bulletin boards, chat sites, discussions, discussion groups, online communities, etc. EXAMPLE: go to any search engine like yahoo.com, google.com, altavista.com, excite.com, then search with subjects like "millionaire message board" or "money making message board" or "opportunity message board" or "money making discussions" or "business bulletin board" or "money making forum" etc. You will find thousands and thousands of message boards. Click them one by one then you will find the option to post a new message.

[Step 5]
Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting 'Paste' from the 'Edit' menu. Fill in the Subject, this will be the header that everyone sees as they scroll thru the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations! THAT'S IT!! All you have to do is jump to different newsgroups and post away. After you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS

AND/OR MESSAGE BOARDS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money within days! **JUST MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS ON PAYPAL.**

Have fun!

Have you considered a 5-watt family radio that may be more
stable .... or a connection via telephone for a more
dependable connection?

I see you were up all night drooling on your keyboard again, Adair. Go see
your court ordered shrink.

AKC= Adair Keyboard Coward.

Defendant N8WWM DOUGLAS ADAIR present in court.

Defendant having admitted to a probation violation, and
having waived oral hearing, defendant is found in violation
of probation.

Defendant having been convicted of the offense of Nonsupport
of Dependents, in violation of Revised Code Section
2919.21(A)(2), a felony of the 4TH degree.
Probation as ordered by this Court on April 11, 1997 is
ordered continued with the following added conditions:

(1) Seek and maintain gainful employment;
(2) Defendant to seek mental health counseling
(3) Execute wage withholding agreement.

Nice antenna install, you incompetent twit.

Tell me then Frank, where is the "falacy" in my logic?

I stated that there are illegal stations on channel 6 based on my own
empirical observations.

Twist claimed that my statement is "bullshit". So if my statement that
there are illegal operators on channel 6 is invalid, then you are
making the statement that there are no illegal operators on channel 6.

If you are merely objecting to my method of determining the status of
those stations, I would be glad to engage in a technical discussion
with you as to these methods.

That'll never happen, since you have such a paranoia about remaining
anonymous. And such is the double edged sword of remaining anonymous.
If you really are someone of worthiness, and respect, well never know
it, and you remain a newsgroup punch-clown, who spreads lies about
other people only to provoke or continue controversy.

You are the "Anti" Doug.

>especially in lieu of the fact that you have falsely presented yourself
>as qualified to make the impressions you now cite of another.

It's all part of the fun for me. For the record, I never said that I
am a licensed practitioner. I said that I enjoy studying human
psychology from my own curiosity, as a hobby. But I do know others who
are in the process of obtaining their professional credentials.

>All the more curious, is the fact you are asking educated individuals in
>this group to believe such an alleged professional would dare make a
>determination based only on a cartoon character and the very carefully
>crafted information you were tossed. The "deviant", has never been more
>clear, and for that, I thank you.

And that is your fall back. You respond in a predictable manner,
with anticipated responses to carefully presented stimuli. Yet, when
your picture is presented to you, you then make the claim that this is
all somehow a "facade", a cartoon character that doesn't exist in
reality. Well, if that's true, then you should be working in
Hollywood, because you'd be a shoe-in for the remake of "One flew over
the cookoo's nest".

You really are a piece of work. Your random chatter and convoluted
conclusions are both entertaining and enlightening to those of us who
actually enjoy observing people who fall outside the definitions of
normal.

Uh... Nooooo. Splatter is the result of a dirty transmitter, and those
products show up as a "comb" of harmonics which decrease in amplitude
as you move farther away in frequency from the fundamental carrier. If
the fundamental signal is +10db over S9, then those distortion
products will be plainly heard if they are only 10 db or so down on an
adjacent channel. That same splattering station, when he fades down to
an S1 signal, is now so weak, that his adjacent channel splatter
products are now under the noise threshold of the receiver. THAT is
why you don't hear them.

>This is quite simple, really....me: 100% correct..you: 100% wrong.

When it comes to radio theory, you haven't been correct about a single
thing.

That depends on what you mean by "over-driven" Simply bumping up the
carrier power, will decrease your modulation, and will eventually
result in severe back swing. If it's excessive, the modulation will
also sound "fuzzy". At that point, it will be easy to see that it's
not a legal CB transmitter. But it may not be splattering all that
much.

If you bump up modulation to over 100%, then that will cause splatter,
which is also easily observed.

530. America Need Unchained Spectrum

Newsgroup: rec.radio.cb
Date: 2005-01-10 13:38:11 UTC
From: twistedhed@webtv.net

America Needs Unchained Spectrum
>By Gregg Blonder

Misguided regulations of the airwaves are thwarting precious opportunities to innovate and create so-far undreamed of services.

Good is the enemy of great. The risk we venture capitalists fear most is not the failed investment, nor the modest success, but the lost opportunity. Ten good deals in the wrong market will never do as well as one in the right market. And venture capitalists who can't latch onto rising stars have to find another line of work.

Americans need to develop a similar fear of opportunities lost to a lack of innovation. It should be a national priority. If we fail to reinvigorate the country's engines of innovation, I worry that the balance of innovative economic power will shift more or less permanently toward Asia.

NO LICENSE REQUIRED. Take the Internet. Thirty years in gestation, the World Wide Web created billions in new wealth and is as intertwined in our lives as Monday Night Football and AC power.
Why was it so successful? Because the "great" had enough time and enough freedom to emerge.
The federal government never mandated rules, regulations, or a purpose for the Internet, and large corporations dismissed it as a fad. As a result, entrepreneurs had time to experiment with new business models at nearly zero incremental cost -- without a license or oversight.
Greatness took root.

WHAT A WASTE. A decade later, on the heels of the merely "good" CB radio, the now-ubiquitous cellular phone market was created. A few slivers of unlicensed spectrum -- virgin bands of wireless broadcasting channels for cordless phones and Wi-Fi -- were slowly released, all under the watchful eye of the Federal Communications Commission.
Now, you can't escape the ring of a cell phone, and Wi-Fi hot spots infest every coffee shop and hotel lobby. Sounds like a great success, right? Guess again. Our misuse of spectrum is one of the greatest lost opportunities of the last century, falling victim to the siren call of the merely good.

What's wrong with our current spectrum policies? First of all, more than 90% of all spectrum is wasted -☐ a perishable commodity leaking opportunity away every second. Cell-phone use plummets during evening hours, which is why wireless companies give away after-hours minutes.

STIFLING OVERSIGHT Over-the-air TV now serves less than 20% of the market. Each analog channel could be replaced by six digital channels. And one TV tower blankets an entire city transmitting a single program, instead of hundreds of small street-corner antennas each sending out hundreds of different shows and reusing the same bandwidth over and over again.

In a free market this commodity would be cleared in no time. But licenses and regulations discourage both the innovation and investment that would absorb it.
Second, in a country that celebrates its support for the entrepreneur and small business, the price of entry is too high. What small business can afford hundreds of millions of dollars for a wireless license to simply discover if a customer might want to purchase a new wireless service?
In a dynamic and changing world, what entrepreneur would buy a license laden with usage restrictions -- the kind meted out by the FCC forcing one band to be used for only voice calls and another only for local commercial TV?

It's like buying a truck from Ford, with a restriction that it can be driven only on Sundays while carrying nonagricultural products.

TAKING BABY STEPS. And third, spectrum is so politicized that nimble decision-making is impossible. For more than a decade the FCC, in a vain attempt to save the U.S. consumer-electronics industry, has pushed high-definition TV onto broadcasters.
For more than two decades the FCC has weighed conflicting comments suggesting new spectrum policies ☐- and has taken only baby steps toward deregulation and minimal spectrum swaps. Before that, the FCC delayed new technologies like UHF channels or color TV, to placate the Big Three networks. Smart entrepreneurs had to go elsewhere for inspiration.

In short, today's spectrum usage is sodden with the inefficiencies that arise when a command-and-control economy prescribes exactly who will produce what and for what purpose.

OPENING NEW DOORS. Freeing spectrum would create another opportunity like the Internet. A fully functioning market would expand current spectrum usage by 100 times and add 100 times more entrepreneurial ideas than exist in the minds of the current spectrum owners.

Imagine, for example, private mobile broadcasting that would help architects visually track construction problems at remote sites. Or new games, such as three-dimensional hide and seek.

Who knows? I don't, and that's the marvelous thing. History has shown over and over that once a real opportunity exists, people apply their creativity to it.
What stands in the way of change? The principal obstacles are the current owners of billion-dollar swaths of spectrum, who in any freeing of spectrum would resist losing their dominant positions.

BUYING AND SELLING BANDWIDTH. Yet the FCC and Congress, if they had a mind to, could find a relatively painless way around those owners -☐ and even, eventually, get them to acquiesce. I suggest a three-point spectrum-freeing plan over time that would:

☐ Let broadcasters retain their current TV licenses for any purpose they desire, in exchange for releasing the rest of the TV spectrum for unregulated purposes. HDTV broadcasting should be an option, not a mandate.

☐ Eliminate usage restrictions from cell-phone service providers, providing they resell that spectrum to third parties. If entrepreneurs want to monitor vending-machine inventories at 2 a.m., great. Let the market decide whether free minutes or fees are best.

☐ Slowly return all licensed spectrum to a Chicago Board of Trade-like commodities exchange, trading spectrum on a second-by-second basis to entrepreneurs and businesses alike. For each trade, the government could charge a 1% fee. Let supply match demand and variable cost.

WORLD STANDARDS. The combined revenue from the taxes paid by profitable entrepreneurs and the users fees paid for auctioned spectrum, I believe, would prove more than enough to rapidly purchase back the additional spectrum held by the large corporations that paid billions for it.

Talk about win-win-win! Everyone would gain, especially the U.S. economy. As the successful pioneers of the first broad, free-market-driven spectrum exchange, we would set world standards for usage and equipment. The U.S. economy, the home of innovation and the lone entrepreneur, would prevail once more.

Blonder is a general partner at Morgenthaler Ventures and is based in Princeton, N.J.

That would be so rich, if you knew who the hell you were responding,

>That'll never happen, since you have such a

>paranoia about remaining anonymous.

Just can't help yourself,,,lmao.
Only you are concerned with the personal identity of cbers with such a
fervor. Concerning your self-espoused accomplishments concerning the
internet, you sure have a cow over following internet safety protocol,
security experts advice, and basic isp groundrules for the internet.
Very telling is your dwelling on that of which you are not permitted.
You're like a spoiled child that keeps being told "no" over and over and
all he can do is cry about how unfair life is and blame others for his
misery.

>And such is the double edged sword of

>remaining anonymous. If you really are

>someone of worthiness, and respect, well

>never know it,

The people you consider "we" in addition to yourself, are in no position
to judge, despite your self-elevational status to judge, jury, and
executioner. Such delusions are what has you so angry over being kept so
impotent regarding that of which you are continually denied.

> and you remain a newsgroup punch-clown,

Davie's feelings are hurt again,

>who spreads lies about other people only to

>provoke or continue controversy.

>You are the "Anti" Doug.

Yes, and you align yourself with him and have defended him on many occasion. In fact, the entire ng is anit-doug except for yourself. See the claritty you can muster when off the Soma.

especially in lieu of the fact that you have
falsely presented yourself as qualified to make the impressions you now cite of another.

>It's all part of the fun for me.

It has been illustrated many times you find "fun" through your lying.

>For the record, I never said that I am a

>licensed practitioner.

It hasn't pervented you from thinking of yourself as holding the same qualification as such...lol.....but of course you aren't a physician Davie, "For the record",,,you simply are not qualified to make judgements reserved for physicians only. Such a candidate would never have the need to foster what they think of themselves in an unsolicitited and gratuitous manner such as your low self-esteem dictates.

>I said that I enjoy

>studying human psychology from my own

>curiosity, as a hobby.

Nevertheless, you have permitted yourself to be reduced to fodder by deluding yourself that you are as qualified as a licensed physician. You are not.

> But I do know others

>who are in the process of obtaining their

>professional credentials.

All the more curious, is the fact you are asking educated individuals in this group to believe such an alleged professional would dare make a determination based only on a cartoon character and the very carefully crafted information you were tossed. The "deviant", has never been more clear, and for that, I thank you.

>And that is your fall back.

Read between the lines. When you're done, share that temper with is a bit more.

>You respond in a

>predictable manner, with anticipated

>responses to carefully presented stimuli.

No wonder you and N8wwm get along so well. He posts about microchips implanted in people with "programmed stimuli" and here you are echoing his tripe..lmao..you really slip the hell up when you get mad, Davie. You're garbage, Dave,,insane hammie garbage that gives the service a black eye.

>Yet, when your picture is presented to you,

"MY" picture? I'm not the one, nor is anyone else in this group OR the hamme groups, seeing you as qualified as a physician, radio repair tech,or anything else your dragging self-esteem needs dictate in order to soothe itself...hehe...this is YOUR "picture" Davie.

>you then make the claim that this is all

>somehow a "facade", a cartoon character that

>doesn't exist in reality.

I never said anything about a facade. I just enjoy watching you come apart at the gills exasperating yourself with over 5 years worth of incompetence and impotence crying about the personal identity of cbers who have all demonstrated not only a superior intellect compared to your deluded self, but much more proper communication etiquette and skill than you can ever hope to achieve.

>Well, if that's true, then you should be working

>in Hollywood, because you'd be a shoe-in for

>the remake of "One flew over the cookoo's

>nest".

Again, I point you to your self-delusional claims concerning your non-qualifications.

>You really are a piece of work.

Here were go,, N3CVJ off the deep end,,,,come on back when you can handle yourself with proper communication technique. Get over yourself and put your destroyed ego behind you and stop trying to make every topic about mememmemmemmem, even though I do rule your world in and outside this ng.

>Your random chatter and

(snip)
It's not about me, dave,,never was,,,its all about your personal issues, misdirected anger, and
your personal character flaws that force you to dwell on others private lives and information
It is clear you were never made to see yourself as the majority do and forcing you to do so has proved a bit more than
you were prepared.
When the anger I control in you stops seething and you can manage

coherent thought and remain on subject instead of permitting your damaged psyche and low self-esteem to morph all radio subjects in your twisted mind into one of what ails only you (personal, off-topic information),,c'mon back for more educational fun.

N3CVJ said
>The "DX" has nothing to do with the amount of
>splatter and the distortion a signal may have.

It has everything to with it. For the amount of times you professed to having talked skip on the freeband, followed by recent denials of you talking skip, you should know that on MANY occasion, a signal can be severely wavering from an S1 to an S9 (for but one of many examples),,,when that signal is coming in at an S9, the splatter may be intense if you changed the channel and went one up or down. When that signal is coming in on a wavering S1, you will hear absolutely nothing on your next channel. Once again, the wavering is a direct result of...taa daaa....skip.

>Uh... Nooooo. Splatter is the result of a dirty

>transmitter,

Bleed,,splatter,,,,you're wrong, ya' know..a dirty transmitter is but ONE example.....once again you incorrectly claimed that skip does not affect splatter, and are trying to distance yourself from your espoiused ignorance only after you have been corrected,
Several educated cbers and hammies have clued you in, but as always, you aer set in your ways and you DO have the right to remain ignorant, depite several people providing you the correct information.

> and those products show up as a

>>nefarious agenda when the party responsible refuses to acknowledge the
>>bogus issue, thereby casting doubt and suspicion over his integrity.
>
>
>Yet another simple concept that you don't understand. Suspicion
>naturally falls on the person or persons who benefited from the
>problems. Kinda like some guy's wife is murdered right after he took
>out a huge insurance policy and he doesn't have an alibi. This
>warrants a justifiable suspicion (unless, of course, you are the guy
>being implicated, then you make up your own justifications).

But you are automatically assuming that those "illegal" ballots were
done for the benefit of Republicans. That is a poor assumption to
make.

>>>The final recount tested roughly 3% of the roughly 5.7 million votes
>>>cast in the state. But contrary to the law governing the recount, many
>>>precincts tested were selected not at random, but by Blackwell's
>>>personal designation. Experts with the election challenge suit have
>>>noted many of the precincts selected were mostly free of the
>>>irregularities they are seeking to investigate, while many contested
>>>precincts were left unrecounted.
>>
>>And when you are determined to find a flaw, the fact that there aren't
>>any automatically means that this was "planted"? Gee, maybe the main
>>issue is that the allegations of fraud have been greatly overstated.

>>>In Miami County's Concord South West precinct, Blackwell certified a
>>>voter turnout of 98.55 percent, requiring that all but 10 voters in
>>>the precinct cast ballots. But a freepress.org canvas easily found 25
>>>voters who said they did not vote. In the nearby Concord South
>>>precinct, Blackwell certified an apparently impossible voter turnout
>>>of 94.27 percent. Both Concord precincts went heavily for Bush.
>>
>>It's a shame that those extra votes for Kerry might have to be
>>removed.........
>>
>>You assume that any extra votes mean that the were Bush plants. What
>>if they were Kerry plants?
>
>
>What if you are ignoring the fact that there were more votes than
>voters?

I'm not, but you seem to think that any fraud is automatically the
fault of, and benefitted republicans.

>>>In Warren County, Bush was credited with 68,035 votes to Kerryï¿½s
>>>26,043 votes. But just as the county's votes were about to be counted
>>>after the polls closed on November 2, the Board of Elections claimed a
>>>Homeland Security alert authorized them to throw out all Democratic
>>>and independent observers, including the media. The vote count was
>>>thus conducted entirely by Republicans.........."
>>>
>>>
>>>Those are facts, Dave. Not left-wing propoganda, "editorial opinions"
>>>or "MY biased opinions". Facts.
>>
>>Yes, the overall articles are facts, but the underlying reasons and
>>the suspicions generated or implied are the result of bias.
>
>
>Ok, here are the facts:

>
>First, it's statistically impossible that all the errors were
>accidental.

It's statistically IMPROBABLE, not impossible.

>Second, the errors that resulted in extra votes were in predominantly
>Bush areas.

But that does not mean that those extra votes were for Bush. It's
equally likely that Kerry operatives planted extra votes in those
heavy Bush areas to make the vote look more "balanced", and therefore
less suspicious.

>Third, the errors that resulted in supressed votes were almost always
>in districts that favored Kerry.

And those districts were run by democrats. So what does that say?

>Those are the facts.

You are still wording the facts as to imply a conclusion which is not
supported by the known evidence.

> Now it doesn't take a rocket surgeon to reach the
>conclusion that there was voting fraud perpetrated by Bush and/or his
>supporters.

Only if you deny that "the other side" is equally capable and has a
history of doing it as well.

> And neither do you need to be a genius to figure out who
>perpetrated this fraud, since many of the decisions that resulted in
>these errors were made by Blackwell (co-chair of Ohio's Bush/Cheney
>campaign -- remember "conflict of interest"?).
>
>Can you put the puzzle together yet? How much simpler can I make it
>for you?

But it's still speculation. It's another affirmation of the consequent
logical fallacy to arrive at a conclusion without considering other
possibilities.

>>Liberalism is destined to fail, as nothing positive has even come from
>>a socialistic paradigm. I just don't want to see this country dragged
>>through the muck to before they realize it.
>
>
>You are confusing liberalism with socialism. They are not the same.
>Far from it.

If you take the line of political idealogy, and start at the middle,
as you head further right, you become more conservative. At the
extreme end of the "right wing", is fascism. Now take the same journey

toward the liberal left, and when you reach the extreme " left wing",
you have socialism and finally anarchy.

Perhaps you need a refresher course in political ideologies.

Here's an interesting link:

http://www.oregonvos.net/~jflory/205/ide_over.htm

><snip>
>>>First off, it was -HARDLY- a "clear republican victory". The first
>>>count was done by machine and gave Rossi a lead so slim that it
>>>triggered an -automatic- recount. That recount narrowed the lead to a
>>>few dozen votes. It would have been foolish of any opponent -not- to
>>>request a hand recount, which put Gregoire in the lead by 139 votes.
>>
>>Votes that were "suddenly" found......
>
>
>Which were later verified and the total favored Gregoire, which begs
>the question: were they were lost accidently or intentionally? If they
>were lost intentionally I don't think the Democrats were responsible.

Why not? You assume that these votes were originally lost and then
found. They could have also been planted.

>>>The rules were followed and Gregoire won. Now the Republicans are
>>>whining up a storm and begging for a second election. Also, there have
>>>been allegations that King County counted unconfirmed provisional
>>>ballots. If that's true then it would be foolish for Rossi -not- to

>because of fraud, but because he says the system didn't work in his
>favor...... what a weiner!

Your's right, I didn't see it. It doesn't sound very typical of
republicans.

>>>But overall, Washington seems to be accomplishing what Ohio, Florida,
>>>New Mexico and several other states cannot: conduct an election with a
>>>transparent process.
>>
>>The only thing transparent are the operations of those trying to stuff
>>the ballot box with enough extra votes to overturn an election
>
>

>Where did that happen, Dave? In Washington? Cite your source.

It's a possibility you refuse to consider. Voter fraud has been here
for many decades and has been used by both sides.

>And to return from your spin, how about answering the question: Are
>you suggesting that a 124% voter turnout is just an "editorial
>opinion"?

I'm suggesting that you shouldn't automatically assume that the
republicans were the major perpetrators in the fraud.

There was two forms of fraud occurring. Fraudulent voting, and
fraudulent counting. One was trying to cancel the effects of the
other.

><snip>
>>>I don't like Bush and I don't like Kerry. Which way am I slanted?
>>

>
>You mean the records that say his other records (the records that
>-were- released) are all phoney? Or maybe you are referring to his
>medical records? The man was an officer in a war zone, so he must have
>had a security clearance -- should he release classified documents
>that are part of his military record?

You are making an assumption again. You assume that this missing
records have some sort of security issue. That may not be the case.
They may also contain actions which might paint the good senator in a
not so favorable light.

>Just what do you think is on those documents? Now before you stick
>your foot in your mouth and answer that, remember that you don't have
>those records and therefore have no evidence, empirical or not, as to
>their nature.

Neither do you. But I tend to believe that if you have nothing to
hide, you have nothing to fear. The fact that he refused to release
his FULL records, especially after Bush was forced to release his,
suggests a suspicious motive. If there was a security aspect to them,
then he could just say that, but he didn't.

>So the only clue you have as to what they are (other
>than the obvious, as I stated above) is purely conjecture. Ok, feel

>
>
>Ok, so how does his opinion justify voting fraud in Ohio?

There is no "justification", only the notion that fraud has happened
before, and that the old metropolitan democratic political machines
pretty much wrote the book on it. So they are hardly above reproach on
this issue.

Ohio is under the microscope now, for much the same reason as Florida
was 4 years ago. There are 49 other states, which may have had an even
greater degree of fraud than what is alleged in Ohio. But what should
be plainly obvious is that the whole thrust of this Ohio fraud issue
is not to correct the problems in fraud, but to give the liberals
another reason to claim that Bush didn't actually WIN the election.

There may be (and likely is) cases of fraud in large metro areas in
states like New York and Pa., which favored the democrats. If someone
were motivated to dig deep enough, it MAY be found that Bush could
have won in Pa. (Which would make Ohio a moot point) as well. If
identifying and solving voter fraud were the true motivational factor,
then ALL states (at least the ones with close percentages) should be
subjected to some scrutiny. As I said before, the percentage of
victory for Kerry in Pa. was less than Bush's victory in Ohio. I stood
in line for almost 3 hours to vote and I didn't find on person who was
voting for Kerry, out of the people we "informally" polled (You get
bored when you stand in line for that long). The breakdown of a county
by county vote in Pa., shows that the vast majority of the state was
red, with the exception of Philadelphia, which was radically blue
(80%), Pittsburgh, and around Erie county. Is it possible that those
heavily democratic places might have committed some sort of fraud as
well? Indeed there were stories of some Phila machines being "loaded"
with votes before the polls even opened. They explained that away as a
simple "use" counter, but it was suspicious all the same.

Why aren't you calling for an investigation in those places, if you
are truly interested in tracking down and correcting voter fraud?

>>>>> You aren't suggesting that

I love the idea, and in fact, have suggested the exact same thing in
the past. The problem is that many people are real paranoid about
using their SSN for things like voting, and start thinking "big
brother" thoughts. For whatever reason, people think that a national
I.D. is somehow an invasion of privacy. It's the Twisty syndrome of
feeling the need to hide behind some form of relative anonymity.

>
>Are you so pessimistic that you see the political process as nothing

>but a disingenuous quest for power?

That pretty much describes the political machines of today. When a political party is willing to stand by and do nothing to help the economy, and also wish for continued recession as a means to gain political clout, it shows where their priorities are.

> That every act is motivated by a
>self-serving political agenda? If so then you don't know people half
>as well as you think you do.

Cynicism is alive and well in politics. That's a fact

> FYI, there are quite a few people in the
>political arena that actually serve the interests of the public and
>not their wallets.

Name them. And I'm not talking about small town supervisors or someone of a school board. I'm talking about the big time.

In almost every case, when a government representative does something seemingly altruistic, there is an underlying political motivation for it. Finding it, is the key to understanding what greases the machine.

>Maybe -you- need to be a little more idealistic.

What, and blind myself to reality?

>Ummm, no Dave. DX has everything to do with DX splatter.

No, it doesn't. Dx is simply an enhancement of the atmosphere which
allows a signal to propagate farther then normal line of sight. It
does not add "splatter" to an otherwise clean signal.

>> So therefore it can be assumed that a roger beep and (even more
>> definite) an echo box could be considered "entertainment" or

>>
>> You can make the point that the FCC doesn't care enough to make a case
>> about these things, and I would probably agree with you. But the fact
>> remains that they are prohibited by the rules.
>
>We've gone over this before Dave, your wrong.

I have referenced two part 95 rules which address both the issue of
permissible non-voice transmissions and also prohibited transmissions
which include devices which are used for entertainment and amusement.

Conversely there are no rules which specifically allow either a roger
beep (and other noise makers) or echo boxes. Since neither are defined
under permissible non-voice transmissions, it can reasonably be
concluded that these devices would be considered amusement or
entertainment devices, and as such prohibited.

You tell me I'm wrong, then please prove it by providing the rules
which allow these devices.

>He's right, Dave. You can receive more than one skip signal from the
>same transmission, and their phasing can cause intermodulation
>distortion in any RF stage of your receiver.

No dice Frank. The effect you have described is commonly referred to
as "multipath". The differences in phase angles of the received
signals can cause either an addition to or a subtraction from the
fundamental signal. But it does not cause it to splatter. A special
form of this is called "selective fading" which can cause different
parts of the signal to fade differently, which can distort the audio.
But this is not "splatter, and will not make the signal "bleed" more.
Heck the HF ham bands are almost always utilizing skywave propagation.
If what you say were true, then the ham bands would be virtually
unusable due to all the signals splattering across the band. With the
exception of a few bad apples running some illegal equipment, this is
normally not a problem.

>All that's required is
>enough non-linearity in just one stage and the signals will modulate
>each other.

I have never seen this happen in any of the quality receivers I've
owned over the years.

Unless the signal is in motion (doppler effect) the frequency will
remain the same even if the phase shifts. Since all the multipath
signal frequencies are the same, there will be no mixing products
generated.

If that were the case, then any group of signals, local or skip, would
do the same thing. That's not something that you'd want in a good
receiver. But you can't pin the faults of a bad receiver design on
atmospheric phenomenon.

This is almost as hokey as saying that a certain antenna will make you
sound "louder".

Propagation, like antennas, are passive. It only radiates or
re-radiates a signal. It does not modify it . If a signal is clean,
then the propagation will propagate it as such.

> The result is what appears to be splatter but is really a
>fault of the receiver. Happens all the time with cheap shortwave
>radios.

Ah! But why do you assume that I have a "cheap shortwave radio"?

What happens when you put a low noise GasFET preamp behind a bandpass
filter and then into a spectrum analyzer? Surely you know what
splatter looks like on a spectral display?

> And DX doesn't have to be up to get a good signal -- I have
>heard many clear DX signals from seemingly dead bands.

A clear, and stable DX condition will not distort a radio signal.

A station which is backswinging wildly, with fuzzy distorted audio,
and splattering 3 channels in each direction, is running illegally,
regardless of the fact that the FCC hasn't yet cited them for it.

Please visit http://www.pokergameofskill.com
All informations is FREE. I sell nothing.
I am a poker guru who has built this web site mostly as a hobby. I talk about some of the things it takes to win at poker.
I have been winning at poker month after month for years. I know that it is a game where skill will win in the long run. I would like poker to be more widely excepted as a sport. Once you start thinking about the advanced concepts of poker, wich I will talk about some of them in my website and if you play a little bit so that you can grasp the concepts better, then you will start to realize how much skill is actually involved when playing poker and you might find yourself facing the challenge of a lifetime. I sure did. Poker is a competitive sport where the best player will end up with the money in the long run. If you like to compete or just like a challenge, then you will like playing poker after you have learned more about it.

My site is new and I have not had the time to edit some pages yet, so please be understanding of some of the grammar errors you will find.

The only thing DX has to do with DX splatter is that if "DX" isn't
running you wouldn't hear it.

Splatter or out of bounds emissions are those falling outside the
normal bandwidth of a signal and are the result of modulation.

DX doesn't cause splatter it allows it to propgate farther.

You may not hear anything on the next channel because the signal may
not be strong enough or because of "selective fading" . Splatter is
caused by the modulation, it may or may not be intensified by skip.
But it is not caused by "skip" If you had a constant carrier(no
modulation), skip or not, you wouldn't have splatter.

a.k.a, "fading".

No it doesn't, and that's not what I said. I said that a non-linear
stage in the receiver can turn that fading into what appears to be
splatter. If you want an example I have a couple cheap shortwave
radios that do exactly that; you pay for shipping and you can examine
them all you want.

Indeed that is the case Carl....I suggest she organize an
Explorer Post there, built around hi-tech electronics and
ham radio. We've had one for nearly 30 years here in the
Phoenix area; Explorer Post 599. We've sent hundreds of
kids on to careers in engineering, computers, and related
technical fields. Exploring is open to both males and
females, ages 14-20, as both youth members and adult
advisors. You can make of it what you want, without all the
"wrong" kind of old white males intimidating your kids.

Rick T.
W7RT
Committee Chairman,

Explorer Post 599

On the other hand, airports do something similar. Many public, unmanned airports have a system worked out that if you kerchunk three or five times on one of the airport's frequencies, the runway and taxiway lights turn on for 10 or 20 minutes.

Wrong. The proof is in the pudding. The media has intentionally spread
misinformation to the public in the past, and there's no reason to
think that they have stopped and won't do it again.

>>> There
>>>have been several articles and books written on the subject. Dan

>By doing what? Citing claims from Kerry's own website? Surely you can
>see the slant there.

Those were official military records, not "claims". The only slant was
in a story intended to misinform people who where either uneducated
about military records, too lazy to read the records for themselves,
or too willing to accept the story without scrutiny. So which category
did you trip into, Dave?

>><snip>
>>>Hmmm.. Who watches the watchers?
>>
>>
>>People who, unlike yourself, have enough ambition to verify the facts

>>for themselves.
>
>The problem is that what you consider as "fact" is often little more
>than a different, but equally questionable, source.

You are still unable to differentiate fact from an opinion......

A 'fact' is undisputed and/or undisputable. For example, the validity of Kerry's military records is undisputed. But an 'opinion' can, and usually is, disputed. Staying with the same example, it is someone's opinion that Kerry did not receive an honorable discharge until 2001. So the validity of the opinion is measured by weighing it against the facts. The facts are that Kerry's military service was characterized as honorable, and that he did indeed receive an "Honorable Discharge Certificate" upon completion of his military obligation in 1978. So the opinion is in contradiction to the facts and is therefore bogus.

Now if you are going to dispute the source of the documents then you are either accusing the Pentagon of forgery or accusing the military of inappropriate conduct. Regardless, the allegation requires that the documents be both true and false at the same time. For example, if the DD-215 of 2001 was indeed Kerry's final discharge as claimed by your opinion, then the document must be false because it contains no such statement. And if the document is false then the claim that it marks the date of his final discharge is no longer valid. So -that- opinion is bogus.

Is the fog beginning to clear yet?

<snip>
>>LOL! Conflict of interest is a simple concept. Are you telling me that
>>you don't understand it?
>
>I understand that a public elected official is supposed to be able to

>impropriety, and without evidence to suggest the presence of
>impropriety, then the elected people should be allowed to do the jobs
>that we elect them to do. There are many cases where elected officials
>come across situations where there may be a conflict of interests.
>Should that official recuse himself every time this happens?

That's the generally accepted practice, and it's also the law in most states. It's done all the time in the courts. Judges often recuse themselves from a case because of some personal or business relationship with one of the parties. It's done to -prevent- any allegations of partiality. In Ohio there was a judge who refused to recuse himself from the contest hearings despite the fact that his own election could have been affected by his decision. That's a conflict of interests, and no doubt that decision will affect his career in the future.

Also, there -is- evidence of impropriety in the Ohio election, as well
as the recount and the contest.

<snip>
>>Yet another simple concept that you don't understand. Suspicion
>>naturally falls on the person or persons who benefited from the

>make.

Not when the vast majority of those illegal ballots DID benefit the
Republicans.

<snip>
>>>You assume that any extra votes mean that the were Bush plants. What
>>>if they were Kerry plants?
>>
>>
>>What if you are ignoring the fact that there were more votes than
>>voters?
>
>I'm not, but you seem to think that any fraud is automatically the
>fault of, and benefitted republicans.

Not automatically. The fact is that the vast majority of the illegal
ballots favored the Republicans. If you think that Democrats committed
voting fraud in order to benefit the Republican candidates then that's
your problem.

<snip>
>>>Yes, the overall articles are facts, but the underlying reasons and
>>>the suspicions generated or implied are the result of bias.
>>
>>
>>Ok, here are the facts:
>>
>>First, it's statistically impossible that all the errors were
>>accidental.
>
>It's statistically IMPROBABLE, not impossible.

Statistical probability sometimes reaches a point so low that it can
safely be assumed to be an impossibility. Such is the case with the
Ohio election statistics.

>>Second, the errors that resulted in extra votes were in predominantly
>>Bush areas.
>

>But that does not mean that those extra votes were for Bush. It's
>equally likely that Kerry operatives planted extra votes in those
>heavy Bush areas to make the vote look more "balanced", and therefore
>less suspicious.

The recount was requested to determine if that was a possibility, but
Blackwell didn't allow recount sampling in any suspected areas. Hence
the contest.

>>Third, the errors that resulted in supressed votes were almost always
>>in districts that favored Kerry.
>
>And those districts were run by democrats. So what does that say?

Wrong. Most of them were run by Republicans. Regardless, the statewide
election was run by Blackwell. It was his office that controlled the
tabulation and certified the impossible results. "So what does that
say?"

>>Those are the facts.
>
>You are still wording the facts as to imply a conclusion which is not
>supported by the known evidence.

The facts imply their own conclusion. If you think you can word them
in a way that is any more objective then go for it. Otherwise, your
opinions don't negate the facts.

>> Now it doesn't take a rocket surgeon to reach the
>>conclusion that there was voting fraud perpetrated by Bush and/or his
>>supporters.
>
>Only if you deny that "the other side" is equally capable and has a
>history of doing it as well.

Nobody is denying anything of the sort, and such a denial isn't
required to reach the conclusion. But you -could- say that the
Republicans were more effective at rigging the Ohio election than the
Democrats and I wouldn't have any problem with that.

>> And neither do you need to be a genius to figure out who
>>perpetrated this fraud, since many of the decisions that resulted in
>>these errors were made by Blackwell (co-chair of Ohio's Bush/Cheney
>>campaign -- remember "conflict of interest"?).
>>
>>Can you put the puzzle together yet? How much simpler can I make it
>>for you?
>
>But it's still speculation. It's another affirmation of the consequent
>logical fallacy to arrive at a conclusion without considering other
>possibilities.

First, you need to brush up on your logic. Second, it's a reasonable conclusion based on factual premeses. Third, if you reach a conclusion based on improbable scenarios (such as a conspiricy to cover up Kerry's military record) then the conclusion is, likewise, just as improbable. So have you spotted any UFOs lately?

>>>Liberalism is destined to fail, as nothing positive has even come from
>>>a socialistic paradigm. I just don't want to see this country dragged
>>>through the muck to before they realize it.
>>
>>
>>You are confusing liberalism with socialism. They are not the same.
>>Far from it.
>
>If you take the line of political idealogy, and start at the middle,
>as you head further right, you become more conservative. At the
>extreme end of the "right wing", is fascism. Now take the same journey
>toward the liberal left, and when you reach the extreme " left wing",
>you have socialism and finally anarchy.
>
>Perhaps you need a refresher course in political ideologies.
>
>Here's an interesting link:
>
>http://www.oregonvos.net/~jflory/205/ide_over.htm

Interesting, yes. It's also interesting how Rokeach's quantification of political ideology (assuming it can be done) differs from your own. At this point it's clear that you are quite confused and are seeking simplistic explanations for complex issues. There is no "line" or chart you can draw to describe a political ideology. Go to the library and check out the vast amount of material on politics. Then look in the history section and try to count all the different kinds of governments that have existed since the beginning of recorded history. Yet you think you can sum it all up with something as simple as a line?

The difference between a liberal and a conservative is that the liberal wants things to change and the conservative wants things to stay the same. I don't know how you came up with your extrapolations to socialism, anarchy and facism, but I can make a guess that it probably -didn't- come from a source of any authority or education.

The fact is that the government incorporates many aspects of just about every political ideology. For example, our medical and educational systems are partially socialized; the infrastructure is run under a mostly collectivistic system; the military works best under fascism; etc, etc.

So for you to sit there and slap everyone with your simplistic labels does nothing but demonstrate your ignorance.

>><snip>
>>>>First off, it was -HARDLY- a "clear republican victory". The first
>>>>count was done by machine and gave Rossi a lead so slim that it
>>>>triggered an -automatic- recount. That recount narrowed the lead to a
>>>>few dozen votes. It would have been foolish of any opponent -not- to
>>>>request a hand recount, which put Gregoire in the lead by 139 votes.
>>>
>>>Votes that were "suddenly" found......
>>
>>
>>Which were later verified and the total favored Gregoire, which begs
>>the question: were they were lost accidently or intentionally? If they
>>were lost intentionally I don't think the Democrats were responsible.
>
>Why not? You assume that these votes were originally lost and then
>found. They could have also been planted.

I don't think so. The press contacted some of the people whose ballots
were lost, people who voted for both parties, and they were all quite
pissed off. And I doubt that you heard enough of the facts surrounding
the incident to reach that conclusion. But if you prefer to believe
the less likely scenario that the votes were planted then that's your
right:

"You have the constitutional right to be stupid." -- Gov. Ventura

>>>>The rules were followed and Gregoire won. Now the Republicans are
>>>>whining up a storm and begging for a second election. Also, there have
>>>>been allegations that King County counted unconfirmed provisional
>>>>ballots. If that's true then it would be foolish for Rossi -not- to
>>>>contest the election. So far he hasn't.
>>>
>>>Usually republicans are not as baby-ish when it comes to conceding a
>>>close election.
>>
>>
>>ROTFLMMFAO! That's a good one, Dave! It's clear you didn't see Rossi's
>>press conference where he begged the public to ask for a second
>>election. It was pathetic! Now he's contesting the election -not-
>>because of fraud, but because he says the system didn't work in his
>>favor...... what a weiner!
>
>Your's right, I didn't see it. It doesn't sound very typical of
>republicans.

It sounds typical of any Democrat -or- Republican that can't accept
defeat. They are now all over the TV begging the public to initiate a
revote. Check this out: www.revotewa.com The reason for it is bogus:
If there election was flawed then the fault was with the system; so
until those faults are corrected there can be no valid revote. The
petition is nothing more than an request to hold another flawed
election in hopes that the result will favor Rossi.

But I do agree with the private contest that the results are invalid
because they are within the margin of error. If that holds up in court
then the legislature should hold an emergency session to establish
some uniform ballot rules and -then- hold a second election.

>>>>But overall, Washington seems to be accomplishing what Ohio, Florida,
>>>>New Mexico and several other states cannot: conduct an election with a
>>>>transparent process.
>>>
>>>The only thing transparent are the operations of those trying to stuff
>>>the ballot box with enough extra votes to overturn an election
>>
>>
>>Where did that happen, Dave? In Washington? Cite your source.
>
>It's a possibility you refuse to consider. Voter fraud has been here
>for many decades and has been used by both sides.

You didn't answer the question, Dave. Let's try it again: Were ballot
boxes stuffed in Washington?

And yes, I most certainly do consider the possibility that voter fraud
occurs -- where have you been for this entire conversation?

>>And to return from your spin, how about answering the question: Are
>>you suggesting that a 124% voter turnout is just an "editorial
>>opinion"?
>
>I'm suggesting that you shouldn't automatically assume that the
>republicans were the major perpetrators in the fraud.

I don't -automatically assume- any such thing. I came to that
conclusion because the voting statistics demonstrate a very high
probability that the extra votes favor Bush.

And you -still- didn't answer the question: Do you think 124% voter
turnout is just an "editorial opinion"?

>There was two forms of fraud occurring. Fraudulent voting, and
>fraudulent counting.

Agreed.

> One was trying to cancel the effects of the
>other.

Cite your source.

>><snip>
>>>>I don't like Bush and I don't like Kerry. Which way am I slanted?
>>>
>>>To the left. That much is obvious. You're a liberal. I guess the
>>>democratic party isn't pink enough yet.
>>
>>

>>So I'm liberal because I happen to be concerned about free and open
>>elections?
>
>No, you're a liberal because you support Nader.

I support Nader and every other third-party candidate, be they
liberal, conservative, socialist, communist, or from any other
ideology (with the exception of Lyndon LaRouche, for obvious reasons).
But I -don't- support the two-party cartel that currently exists in
our government.

>>The only people who -wouldn't- be concerned about voting
>>fraud are facists. Are you a facist, Dave? (And notice that I didn't
>>slap you with the label -- I have enough respect to ask first!)
>
>Are you denying that you are a liberal?

I'm not a liberal -- I'm an American.

> And no, I'm not a fascist,
>simply a conservative.

Thanks for the clarification. From now on I will use the label you
have placed upon yourself.

>><snip>

>>>>Official military records are "leftist propoganda"?
>>>
>>>Which records? Kerry's military records? Oh that 's right, he refused
>>>to release them all.
>>
>>
>>You mean the records that say his other records (the records that
>>-were- released) are all phoney? Or maybe you are referring to his
>>medical records? The man was an officer in a war zone, so he must have
>>had a security clearance -- should he release classified documents

>>that are part of his military record?
>
>You are making an assumption again. You assume that this missing
>records have some sort of security issue.

And you assume that they have some sort of sinister information that could implicate him as a communist spy or something worse. What's the difference between the two assumptions? One is reasonable, the other is paranoid fantasy.

> That may not be the case.
>They may also contain actions which might paint the good senator in a
>not so favorable light.

NASA may be withholding photos that show alien habitation on Mars, the CIA may have flying saucers in Area 51, and George H. W. Bush may be a hermaphrodite. All three allegations have some foundation in fact: NASA withheld some photos from Mars probes, UFOs have been seen at Area 51, and Bush Sr. giggles like a girl. So what foundation do you have for -your- allegation?

>>Just what do you think is on those documents? Now before you stick
>>your foot in your mouth and answer that, remember that you don't have
>>those records and therefore have no evidence, empirical or not, as to
>>their nature.
>
>Neither do you. But I tend to believe

.....uh oh

> that if you have nothing to
>hide, you have nothing to fear.

Then post your SSN to this newsgroup.

> The fact that he refused to release
>his FULL records, especially after Bush was forced to release his,

Cite your source that says; a) Bush released -all- his records, and b) he was -forced- to release all his records.

>suggests a suspicious motive. If there was a security aspect to them,
>then he could just say that, but he didn't.

People lie, right? If there was something sinister in those records he could have simply said that the subject matter was a security risk, or that they were medical records. You still haven't provided any reason to believe that those records were in any way incriminating.

>>So the only clue you have as to what they are (other
>>than the obvious, as I stated above) is purely conjecture. Ok, feel
>>free to answer the question -- let 'er rip!
>
>The fact that they remain sealed says more.

The fact that they remain sealed says nothing more than that they remain sealed. You don't know what's in those records any more than I do. Yet you choose to speculate that they contain some damning and incriminating information. On what do you base your speculation, Dave? Your own "belief"? Are you a proponent of "faith-based justice"? So if someone goes to court for a crime, the burden of proof no longer rests with the prosecution? Proof of guilt is decided by a jury based only on the allegation and the silence of the defendant? Guilty until proven innocent? Have you never heard of the 5th Amendment? Or is that another one of those "liberal" concepts that leaves a bad taste in your mouth?

I'll ask this again, Dave: Are you a fascist?

<snip>
>>Unless you have a time machine and can travel back to correct any
>>occurance where it -did- make a difference, the question is moot:
>
>The same thing can be said for this past election. It doesn't matter
>if it was 2 months ago, or two decades ago.

Well, yes it does because the issue is still fresh and the direct results can still be rectified if needed.

>>The issue is happening NOW and can be addressed NOW.
>
>That's a far different statement than the one where you claimed that
>fraud is more rampant today than ever before. A statement that you
>have no factual information to back up.

You got me there, Dave. Now, how about providing some facts to back up -your- accusations and speculations? If you can't then I would expect you to do as I did and concede any such issue you can't back up with facts. Can you do that?

<snip>
>>>But you do live in the U.S. Mayor Daily epitomized the democratic
>>>"machine" that exists in many large cities. The fact that most cities
>>>vote heavily democratic may have much more than voter "demographics"
>>>to attribute to it.
>>
>>
>>Ok, so how does his opinion justify voting fraud in Ohio?
>
>There is no "justification", only the notion that fraud has happened
>before,

A fact I never denied.

> and that the old metropolitan democratic political machines
>pretty much wrote the book on it. So they are hardly above reproach on
>this issue.

Voting fraud has been around a lot longer than the Democratic party,
Dave. In fact, it's been around almost as long as elections!

>Ohio is under the microscope now, for much the same reason as Florida
>was 4 years ago. There are 49 other states, which may have had an even
>greater degree of fraud than what is alleged in Ohio. But what should
>be plainly obvious is that the whole thrust of this Ohio fraud issue
>is not to correct the problems in fraud, but to give the liberals
>another reason to claim that Bush didn't actually WIN the election.

What it will do is push for uniform voting standards, laws prohibiting
conflict of interests for voting officials, better accountability for
tabulation errors, etc, etc. IOW, a more fair and equitable election
system that's less suseptible to fraud. Is that such a bad thing? Or
is it just a bad thing when the candidate you voted for might be
implicated?

>There may be (and likely is) cases of fraud in large metro areas in
>states like New York and Pa., which favored the democrats. If someone
>were motivated to dig deep enough, it MAY be found that Bush could
>have won in Pa. (Which would make Ohio a moot point) as well.

The only problem with that scenario is that the state's voting records
have already been examined and indicate nothing on the scale that's
found in Ohio. It's true that many people are trying to make this a
Bush/Kerry issue, but I'm not. You can keep claiming I am, but like I
said before, claims don't suddenly become true just because you repeat
them enough times.

> If
>identifying and solving voter fraud were the true motivational factor,
>then ALL states (at least the ones with close percentages) should be
>subjected to some scrutiny.

Who said they -weren't- subjected to scrutiny? They were. You can bet
that analysts have crunched the numbers from -all- the states if for
no other reason than to work the demographics for the next election.

> As I said before, the percentage of
>victory for Kerry in Pa. was less than Bush's victory in Ohio. I stood
>in line for almost 3 hours to vote and I didn't find on person who was
>voting for Kerry, out of the people we "informally" polled (You get
>bored when you stand in line for that long).

So you have your own version of an "exit poll". Congratulations. So
why should I accept -your- exit poll data as fact and ignore the
official exit poll data that CNN refuses to release? Oh, that's right,
you have some sort of sixth sense regarding the truth, huh?

> The breakdown of a county
>by county vote in Pa., shows that the vast majority of the state was
>red, with the exception of Philadelphia, which was radically blue
>(80%), Pittsburgh, and around Erie county. Is it possible that those
>heavily democratic places might have committed some sort of fraud as

>well? Indeed there were stories of some Phila machines being "loaded"
>with votes before the polls even opened. They explained that away as a
>simple "use" counter, but it was suspicious all the same.
>
>Why aren't you calling for an investigation in those places, if you
>are truly interested in tracking down and correcting voter fraud?

http://freepress.org/departments/display/19/2004/969

The reason you hear most about Ohio (but not from the "liberal" media)
is because most Bush supporters are content with the results of the
election, fraud or not. Does that make sense to you?

<snip>
>>>I also favor requiring all voters to show an I.D. which includes their
>>>voting precinct.
>>
>>
>>I agree 100%. How about simply registering everyone over 18 by their
>>SSN? And making their votes accessible after the election to see for
>>themselves that their vote was counted (instead of lost, changed by a
>>machine, or "enhanced" by an election worker)?
>
>I love the idea, and in fact, have suggested the exact same thing in
>the past.

Excellent! We have found some common ground!

> The problem

.....oh no

> is that many people are real paranoid about
>using their SSN for things like voting, and start thinking "big
>brother" thoughts. For whatever reason, people think that a national
>I.D. is somehow an invasion of privacy. It's the Twisty syndrome of
>feeling the need to hide behind some form of relative anonymity.

I'll buy that. If people want to stand up and be counted they
shouldn't be afraid to stand up and be counted.

<snip>
>>>>The key phrase is "days past". Those problems have been addressed,
>>>>have they not?
>>>
>>>I cannot make that statement. I have read stories of party workers
>>>caught with ballots leaving a prison in Pa. I doubt if these issues
>>>have been truly "addressed". It may have been covered over a bit more
>>>effectively, but I believe that they're still there.
>>
>>
>>Possibly. The question is to what extent.
>

>We may never know the answer to that. The only thing we can do is
>reduce the chance that it can happen in the future.

Again, we find common ground.

>>>>We have -new- problems that need to be addressed, such
>>>>as a corporation that wrote the software for the voting machines and
>>>>whose CEO promised to deliver the state's electoral votes to Bush;
>>>
>>>Hearsay. There's no proof that any such "promise" ever occured.
>>
>>
>>Once again you didn't bother to verify the facts for yourself before
>>spouting off your big mouth. I did a search on O'Dell's quote and got
>>over 15,000 hits. Here's just one:
>>
>>http://www.commondreams.org/headlines03/0828-08.htm
>
>I read it, but that still doesn't prove that O'Dell actually made that
>statement in the context that he would use his company's voting
>machines as a vehicle to that goal. It only states that the statement
>was made in a fund rasing letter. So are you of the opinion that CEO's
>should not promote any party affiliation?

As if he would publically state, "I intend to manipulate the
tabulation of votes with software so it favors Bush". Revisit
"conflict of interest". The machines and software should be available
for inspection, but the judge (the one who refused to recuse himself)
would not allow it.

>>>>election officials (i.e, the Secretary of State) who is also the
>>>>campaign manager for that state; the shorting of voting machines in
>>>>selected precincts; etc, etc.
>>>
>>>Interesting that in those places were voting machines were "shorted",
>>>were handled by democrats. They have only themselves to blame if they
>>>were not able to accommodate their constituency.
>>
>>
>>You simply -refuse- to look at the other side of the coin, don't you?
>
>Why should I? You're doing enough for both of us.

I'm trying, but you only seem to be reading from one side of your
monitor.

>>It was those same Democrats that lodged the complaints! They were told
>>a variety of different lies about how the machines were apportioned,
>>which is one of the issues Blackwell was supposed to address in the
>>deposition he evaded.
>
>How do you know they were lies? The fact remains that in those heavily

>democratic voting precincts, the distribution of voting machines was
>controlled by the democrats, so they have no one but themselves to
>blame if they short changed their constituents.

Wrong:

http://freepress.org/departments/display/19/2004/917

That's just one example. There were plenty more. Are you ever going to
read these articles? Or would you rather make me post them one by one
as you continue to make inaccurate statements?

<snip>
>>>>>I really don't know, but his interests in the direction of this
>>>>>country are diametrically opposed to what a free capitalist society
>>>>>would want.
>>>>
>>>>
>>>>Really? Care to elaborate?
>>>
>>>One word: Liberal.
>>>
>>>Three other words: Redistribution of wealth.
>>
>>
>>That's called "collectivism", not "liberalism". It's time you learned
>>the difference.
>
>They are related in that liberals are only lighter versions of
>socialists. At least as defined by today's terms. Read the link I
>provided, and do some searching for yourself.

I read the link and responed appropriately. I invoke that same
response here.

>It's a fact that democrats are more known for increasing taxes and
>increasing "safety net" social programs. This in nothing more than
>redistribution of wealth.

Many of those "safety net" social programs are not only necessary, but
designed to prevent more costly problems in the future. Such as AIDS,
smoking, and other health information campaigns designed to take the
burden away from Social Security and other medical programs that end
up flipping the bill.

And you seem somewhat biased in your accusations: After all, it was
Clinton who instituted some overdue welfare changes such as work
initiative programs. OTOH, Bush is responsible for that drug discount
card fiasco which is basically just government subsidation of drug
companies at the expense of the elderly, while at the same time he has
cut vet benefits to the point where they are almost nonexistent. So if
there's any redistribution of wealth being done it's done by both
sides. Which side you favor depends on who gets the wealth -- you, or

someone who needs it.

>><snip>
>>>>Ok, I see how this works..... the past is relevent only when it favors
>>>>your argument, such as previous accounts of voting fraud. Right?
>>>
>>>No, it's only relevant when it's relevant , such as past record of
>>>voting fraud suggests that it was a problem for far longer than some
>>>of you realize. I have never read anything on this group of you

>>past?
>
>Because, I would have thought you understood that we are talking
>within THIS venue. No one should be expected to know what goes on
>outside of this group.

But I -did- voice my support of Bush in this venue, as I cited in the
link above. Are you now going to try and escape your error by saying
the post wasn't directed at you, or that you were on vacation, or some
other lame excuse? You didn't check your facts before you ran your
mouth. That's -your- fault, Dave. Not mine.

>> You jumped to your conclusion without all the facts.
>
>Ok, then I'll modify my original statement to limit it to this
>newsgroup only.

You screwed up, you can't admit it, and you can't vindicate yourself
by pulling an ex-post-facto excuse.

>>And the
>>facts were available on google if you had the inclination to verify
>>the facts before you framed your indictment. But that's just not your
>>style, Dave -- after all, you already know the truth -despite- the
>>facts, right?
>
>You made the point, you provide the evidence. I don't have the time to
>sift through every post you made looking for references to GWB.

Yeah, it's just too much effort to find the facts. Your "belief"
system is so much easier, isn't it, Dave?

>>>Maybe you think we keep tabs on each other? Maybe I'm the odd-ball in
>>>that respect, as I don't.
>>
>>
>>The difference is that I, unlike you, don't make claims or accusations
>>unless I have the facts to back them up.
>
>Most of which you have yet to show.

Most of which you have yet to verify for yourself and accept that they
are in contradiction with your beliefs.

>><snip>
>>>>I defended Kerry against your bullshit propoganda.
>>>
>>>The truth remains that Kerry refused to release ALL of his military

>>>records. What's he hiding?
>>
>>
>>You claimed he didn't get his honorable discharge until 2001 which was
>>a totally fabricated lie. And you can't even admit it. So now you
>>focus on records he didn't release without a shred of evidence that
>>they hold anything of importance to you. What was that you said
>>earlier about suspicion and political bias.....?
>
>I read about his honorable discharge. That was only one element of a
>number of suspicious activities that Kerry was involved in during and
>post Vietnam which may have served to undermine this country's efforts
>in the war, including two trips to France, to meet with the N.
>Vietnamese representatives, in a capacity not authorized by our
>government.

One step at a time: Is it your opinion that the available records are phoney? If not, is there something in those records that makes you think he did not receive an honorable discharge in 1978 as opposed to 2001 as you first claimed? A better question might be if you actually read the documents yourself, but that would be silly..... you wouldn't make such damning accusations without first verifying the facts for yourself, would you Dave?

Once we clear -that- up we can move on to your next accusation, which would be his "suspicious activities" after the war, and then his visit with NV officials.

But first things first. Honorable discharge in 1978: yes or no?

>>And BTW, if you don't know who the Vulcan's are then you are -WAY- out
>>of touch with current political issues.
>
>Really? Then would you be so kind as to provide something that tells
>me who there mysterious "Vulcans" are?

http://tinyurl.com/6mf8m

>> Maybe you shouldn't even be
>>having this conversation with me -- but what the hell, a little
>>ignorance never stopped you before, right?

>That pretty much describes the political machines of today. When a
>political party is willing to stand by and do nothing to help the
>economy, and also wish for continued recession as a means to gain
>political clout, it shows where their priorities are.

That can be said for both parties, and in that respect I agree with it
completely. But I wouldn't apply it to everyone in the political
arena, nor would I apply it to all Republicans or all Democrats.
People are people. Some are good, some are bad. Just because a person
may be a Democrat, a Republican, a liberal or a conservative, that
doesn't automatically render judgement on that person.

>> That every act is motivated by a
>>self-serving political agenda? If so then you don't know people half
>>as well as you think you do.
>
>Cynicism is alive and well in politics. That's a fact

Cynicism most definitely has -you- by the balls.

Off the top of my head? Colin Powell. Bill Frist. Bob Dole. John
McCain. Need more names?

>In almost every case, when a government representative does something
>seemingly altruistic, there is an underlying political motivation for
>it. Finding it, is the key to understanding what greases the machine.

There is some truth in that statement, but it's certainly not a rule
of thumb. Your implication is that politicians cannot have honorable
intentions. But many do. Some of them lose those intentions after
getting caught in the quagmire, but some don't. Some appear to have
alternative intentions but are forced to "deal with the devil" on
occasion (which I think may be the rule in politics regardless of
intent). But they are still people and there are many good people in
this world. Maybe you have lost sight of that.

>>Maybe -you- need to be a little more idealistic.
>
>What, and blind myself to reality?

Contrary to the opinion of some, you -can- have ideals and be
realistic at the same time. You just have to keep yourself balanced.

I'm sure you've read these letters asking you to send $1 to six different addresses. Putting your home address or mailing address on the internet can be risky, but through PayPal all you have to provide is your email address. It's safe and easy. Just go to www.paypal.com and set up your FREE account! No credit card is needed. I am not a gullible person and have never trusted things like this, but I gave it a try. Hey it's only $6. I figured at least 6 people would respond out of the millions of people that use the internet. You should give it a try too! You have nothing to lose, and thousands to gain! Read on for the letter that I found (of course, I added my PayPal e-mail on #6)...

HOW TO TURN $6 INTO $6,000+!!! THIS REALLY CAN MAKE YOU EASY MONEY!!! IT WORKS!!! BUT YOU HAVE TO FOLLOW IT TO THE LETTER FOR IT TO WORK!!!! A little while back, I was browsing through newsgroups, just like you are now and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah, right, this must be some kind of scam" but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 though PayPal to each of the emails stated in the article. You then place your own email address in the bottom of the list at #6, and post the article in at least 200 news groups. (There are thousands) No catch. That was it. So after thinking it over, and talking to few people first, I thought about trying it. I figured what have I got to lose except $6.00, right? Like most of us I was a little skeptical and a little worried about the legal aspects of it. It follows the same regulations as the "mailed chain letters, which according to the U.S. Post Office (1-800-725-2161) is indeed legal! Then I invested the measly $6.00. Well GUESS WHAT!!? Within 7 days, I started getting money in my PayPal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $20.00. By the end second week I had made a total over $1,200.00!!! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $36,000.00 and it's still coming in rapidly. It's Certainly worth $6.00. I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works? Also, make sure you print a copy of this article now, so that you can get the information off of it as you need it.

$$

REQUIREMENTS: You must have a confirmed PayPal account. If you do not have a PayPal account you can go to www.paypal.com and follow the instructions to set up a free account. In order to place the initial $6

into your account, you will have to confirm your bank account with PayPal (which may take a few days). PayPal is 100% secure and is used my millions of people world wide. Confirming a www.paypal.com account simply means (1) PayPal will first ask you to confirm the email you used to sign up your PayPal account by sending you an email with a link for you to click to that email. As soon as you click that link your email is confirmed. (2) PayPal will then make two small deposits into your bank account if you set up your PayPal account with a checking or savings bank account. Or PayPal will make two small deposits to your credit card if you set up your PayPal account with your credit card. Then after a few days (it takes up to a few days for these deposits to appear in your bank account or on your credit card statement) then after a few days you go back to the www.paypal.com website and sign in. Then you click where it says this account is not yet confirmed. A screen will pop up that gives you 2 boxes to fill in. You then enter the numbers of the 2 small deposit amounts (two separate 2 digit numbers) that were deposited to your bank account or credit card. Now you have a working and confirmed PayPal account and can receive payments.

$$

[STEP 1]
Send, though PayPal, $1.00 to each email on the below list. Make the subject of the payment "Email List" and in the comments, write "PLEASE PUT ME ON YOUR EMAIL LIST." What you are doing is creating a service by this - and best of all you are not giving your address to anyone you do not know. THIS IS ABSOLUTELY LEGAL!! YOU ARE CREATING A SERVICE. Here are the latest PayPal e-mails on the e-mail lists:

#1)brittany...@excite.com

#2) mth...@renc.igs.net

#3) Mishav...@aol.com

#4) nike31...@aol.com

#5) careent...@hotmail.com

#6) jjrvn...@hotmail.com

www.paypal.com

Subject of Payment: ***Email List***

Comments: ***PLEASE PUT ME ON YOUR EMAIL LIST***

[STEP 2]
Now take the #1) email off the list that you see above, move the other addresses up one (6 becomes 5 & 5 becomes 4, etc) the put YOUR email address (the one used in your PayPal account) as #6) on the list. **MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS IN YOUR PAYPAL ACCOUNT**

[STEP 3]
Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups, message boards, etc. (I think there are close to 32,000 groups) All you need is 200, but remember, the more you post, the more money you make - as well as everyone else on the list! In this situation your job is to let as many people see this letter as possible. So they will make you and me reach!!!! You can even start posting the moment your email is confirmed. Payments will still appear in your PayPal account even while your bank account is being confirmed.

$$

DIRECTIONS ON HOW TO POST TO NEWSGROUPS/MESSAGE BOARDS.

[Step 1]
You do not need to re-type this entire letter to do your own posting. Simply put your CURSOR at the beginning of this letter and drag your CURSOR to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into your computer's temporary memory.

[Step 2]
Open a blank Notepad file and place your cursor at the top of the blank page. From the 'Edit' menu select 'Paste'. This will paste a copy of the letter into notepad so that you can add your email to the list.

[Step 3]
Save your new Notepad file as a .txt file. If you want to do your postings in different sittings, you'll always have this file to go back to.

[Step 4]
Use Netscape or Internet Explorer and try searching for various newsgroups, on-line forums, message boards, bulletin boards, chat sites, discussions, discussion groups, online communities, etc. EXAMPLE: go to any search engine like yahoo.com, google.com, altavista.com, excite.com, then search with subjects like "millionaire message board" or "money making message board" or "opportunity message board" or "money making discussions" or "business bulletin board" or "money making forum" etc. You will find thousands and thousands of message boards. Click them one by one then you will find the option to post a new message.

[Step 5]
Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting 'Paste' from the 'Edit' menu. Fill in the Subject, this will be the header that everyone sees as they scroll thru the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations! THAT'S IT!! All you have to do is jump to different newsgroups and post away. After you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS

AND/OR MESSAGE BOARDS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money within days! **JUST MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS ON PAYPAL.**

Have fun!

Probably, but if you have a 100 radio's and a third of
them are running their modulation clipped, then you
will hear it even worse, correct?

>
> Splatter or out of bounds emissions are those falling outside the
> normal bandwidth of a signal and are the result of modulation.
>

Correct

> DX doesn't cause splatter it allows it to propgate farther.

Correct. When you have a lot more radio's trying to talk
on one freq, don't you think that it will now increase your
adjacent channel splatter?

Ah, that explains everything. So when a normal channel
has maybe 5 to 10 operators, add another 100 because of
skip conditions, of course there will be some running
clipped & mod radio's, you don't think that enhances
the splatter?

Nope. They are not guilty of breaking any law until
a jury of their peers find them guilty with the evidence
given them through the judicial process. Not because
someone says "because they are on that channel,
they must be breaking the law".

>hurt either. <g>

Yea, that pretty much covers it. It's a shame that the desire to prove
me wrong at all costs, drives certain people to deny the obvious.

>> BTW, I agree, tweaking idiots used to be fun "back then". But today,
>> it's hardly worth the time.
>>
>Yep, about the only time I use AM anymore is on a trip, ch 19 still comes
>in handy for traffic reports.

I prefer the "quiet" of SSB, but for some reason, the people around
here don't take advantage of it. They all run around with modified ham
rigs or "10 meter rigs" and yet stick to an AM channel. Heck a good
Cobra 29 would work just as well, and cost a lot less.....

>> Sometimes it's more fun tweaking the idiots here........
>>
>There's one I'd like to tweak in person..too bad he's too gutless to

>>That'll never happen, since you have such a
>>paranoia about remaining anonymous.

>Just can't help yourself,,,lmao.
>Only you are concerned with the personal identity

Your identity is who you are. You said it yourself: "If I only knew
who the hell I was responding too"..... The implication, of course, is
that I would somehow recognize you as someone I either know, or is
someone of some prestige or notoriety, which commands some degree of
respect. But as long as you choose to hide behind your "cartoon
character", we'll never know that, and you remain an anonymous little
twit, who lacks the guts to come clean.

BTW, I'm not the one desperately trying to find out little tidbits of
information about other people on here, like your erroneous claim that
my wife's name was "Kim T. Hall", or who once claimed that you had it
on good authority that I'm a bitter divorced man, or that I was
"abused" by my grandfather at a young age.

For someone who claims to care little about personal information, you
sure make efforts to find it, even if it is wrong. Just another
example of your hypocrisy, and lies.

> of cbers with such a
>fervor. Concerning your self-espoused accomplishments concerning the
>internet, you sure have a cow over following internet safety protocol,
>security experts advice, and basic isp groundrules for the internet.
>Very telling is your dwelling on that of which you are not permitted.
>You're like a spoiled child that keeps being told "no" over and over and
>all he can do is cry about how unfair life is and blame others for his
>misery.

As opposed to you who, when told "no", just do it anyway in disregard
for the laws of society?

>>And such is the double edged sword of
>>remaining anonymous. If you really are
>>someone of worthiness, and respect, well
>>never know it,

>The people you consider "we" in addition to yourself, are in no position
>to judge, despite your self-elevational status to judge, jury, and
>executioner.

Borrowing terms from Frank now? You really are devoid of originality
aren't you?

> Such delusions are what has you so angry over being kept so
>impotent regarding that of which you are continually denied.

If that were true, it would be laughable. The day that I let this
newsgroup rule my life, will be the day I leave. Like the radio, I
control what goes on. I make you speak. When I'm done, I stop, until I
feel the need to slap your sociopathic self around again. But you are
blinded by your own elevated sense of self worth to see that, or be
able to make such a judgement as to who is really "impotent".

You still don't get it. The only time someone is "impotent" is when
they are ignored. You can't control yourself enough to allow that. By
constantly responding to me, you have guaranteed that I am anything
but "impotent".

>> and you remain a newsgroup punch-clown,

>Davie's feelings are hurt again,

You assume that I have feelings to hurt.

>>who spreads lies about other people only to
>>provoke or continue controversy.
>>You are the "Anti" Doug.

>Yes, and you align yourself with him and have defended him on many
>occasion.

Doug is more rational than you are. All that comes from your fingers
is double talk and obfuscation. At least Doug is consistent, even if
warped.

>>It's all part of the fun for me.

>It has been illustrated many times you find "fun" through your lying.

I have not lied about anything. Your statements to the contrary is
not proof, but rather your desperation.

On the other hand, you are the one who lies. My fun is exposing you
for what you are. By attempting to place other people on the

defensive, it keeps the spotlight off of your own transgressions, such as your blatant disregard for federal law, which you claim, on one hand, to respect, yet selectively ignore when it suits you. Another glaring example of your hypocrisy.

>>For the record, I never said that I am a
>>licensed practitioner.

>It hasn't pervented you from thinking of yourself as holding the same
>qualification as such.

How could you possibly know what I think of myself? Once again your narcissistic sense of elevated self worth has propelled you to the role of seer.

>..lol.....but of course you aren't a physician
>Davie, "For the record",,,you simply are not qualified to make
>judgements reserved for physicians only.

Anyone can make informed observations with the proper background. You don't need to be licensed to do it, until you expect to get paid for it.

>Such a candidate would never
>have the need to foster what they think of themselves in an
>unsolicitited and gratuitous manner such as your low self-esteem
>dictates.

More double speak? It is easily observed that you have assigned a much greater worth to what I do, than I, myself, have ever stated. You are the one who lied about my claiming to be a medical professional. You are the one who claimed that I am some sort of master of the internet. I have never made any such claims. The problem is YOU. You lie like a rug.

>>I said that I enjoy
>>studying human psychology from my own
>>curiosity, as a hobby.

>Nevertheless, you have permitted yourself to be reduced to fodder by
>deluding yourself that you are as qualified as a licensed physician. You
>are not.

I am qualified to see the virtually textbook example of Anti-social personality disorder as expressed by your actions here.

(Now is a good time to once again remind us how this is only a "cartoon character", and not who you really are) Uh huh.....

>
>>You respond in a
>>predictable manner, with anticipated
>>responses to carefully presented stimuli.

>No wonder you and N8wwm get along so well. He posts about microchips
>implanted in people with "programmed stimuli" and here you are echoing
>his tripe.

Funny thing, he's right. You can't muster enough self control to not respond to those "programmed stimuli". You are like a moth drawn inexplicably to the flame, which will end up being its demise. That's why we all laugh at you. You are all too transparent and predictable. When I'm done with you, I'll stop posting again. But you can't resist getting in the last word.

Your sociopathic behavior and your disregard for federal law makes you the worst example of person society has to offer. You create controversy and then feed off of the attention of others to bolster your own low self esteem. You do what you want without due concern for the rights of others. In short, you treat others as your own personal litterbox.

>.lmao..you really slip the hell up when you get mad, Davie.
>You're garbage, Dave,,insane hammie garbage that gives the service a
>black eye.

By operating on the freeband, you are neither a CB'er nor a ham. You are nothing short of a lawbreaking radio pirate. So what does that say? Who are you to criticize the operating habits of others when you have a closet full of your own "issues"?

More hypocrisy.

>>Yet, when your picture is presented to you,
>
>
>"MY" picture? I'm not the one, nor is anyone else in this group OR the
>hamme groups, seeing you as qualified as a physician, radio repair
>tech,or anything else your dragging self-esteem needs dictate in order
>to soothe itself...hehe...this is YOUR "picture" Davie.

One does not need to be a "qualified" anything to see the obvious. All one has to do is access the DSM-IV which is available in many places on the internet, and look up APD, and then compare the symptoms with your past behavior (Which is archived for posterity).

The only one in denial is you. But like the old saying: "When you try to tell a nut that he's nuts, he'll swear that you're crazy."

When your thought processes (and I use the term loosely) are comprised
of a series of binary thought patterns, where everything is either
black or white, I can see why you might think that. But if you
actually KNEW something, (other than "CB Science") you'd know that the
term "overdriven" has many applications, as illustrated by my earlier
response.

>

Only because you now can hear more radios. skip doesn't cause splatter.

Take the same 100 radios that were causing splatter when the skip was running (all stations running S9). Now move them all so they are local to you (again all stations running S9). From what you have said you believe the splatter is going to decrease ?

If you actually believed that bullshit, you would be a nudist.
If someone has nothing to hide, then why would they fear anything? And of course if they do have something to hide, we would want the government to know. After all, this is how the Jews lived in Nazi Germany, the Ukrainians lived in the Soviet Empire, and how the Chinese peasants lived under Emperor Mao.
Of course, Davie's nazi doctrine he adheres to is a well known slogan of oppressive totalitarian regimes throughout history and is fascist, something he confuses with extreme radical conservatism.

"One who would give up essential liberty obtain a little temporary safety deserve neither" B. Franklin

"Dissent is the highest form of patriotism" T. Jefferson

It's OK Twist, Geo can't ever seem to keep up with
a thread.
Here's what Dave typed:

"So you are of the Twisted notion that a person is not breaking the law
until they are caught?

Dave
"Sandbagger" "

To which I replied correct. Nothing in that statement does it say
breaking "FCC Rules". Geo will never admit to being wrong nor will he ever
admit to me being right, it would ruin his
image of being the #2 troll behind Doug.
Start your sexual innuendoes here Geo ::::::::::::

Well. It has been my experience that when skips
running, you will have more incidents of adjacent
channel splatter than when it's not. I'm sure "Skip"
is not causing it, but it sure does "Heighten" it.

Just Wondering if CB is completely dead or is it still going on in some places? I know truckers still use them, but when i was a kid in NJ we had all kinds of base stations and mobile. It was actually OVER crowded most nights. Now it seems like things have died off, but is there still places in this country with a thriving radio community? If so what state(s)?

As credible as the claim that the mainstream news isn't biased.

>Check this out: In the past 20 years, millions have died in African
>wars and the media barely mentioned it. Yet during the same time
>period the media covered just about every little fistfight in the West
>Band and Gaza. Which way is -that- slanted, Dave?

It is slanted toward the areas of interest to most Americans. It's no
big secret to anyone who's been around the block a few times.

>>> Since the
>>>invention of mass media it has been manipulated by the powers that be,
>>>whether that power is the people, a government, the corporation that
>>>owns the media, or whatever. And there is a very simple and obvious
>>>proof to this: One of the first objectives of an army that invades

>
>
>Didn't I say, "ONE of the first objectives [plural]....."?

There can only be ONE first objective. The rest descend from there.
This reminds me of a manager that I once worked for, who assigned job

priorities. When he started assigning several jobs to the "#1
priority", I asked him how he wanted us to prioritize the #1 priority.
He wasn't amused......

>>> This is
>>>because if they don't the media can be used against them by the
>>>defenders, AND the invaders can use the media to their advantage by
>>>discouraging resistance.
>>
>>Lies work both ways.
>
>
>Now you're catching on.

Considering that Saddam Hussein was a regular watcher of CNN, the
military used to give out false information so that the media would
unknowingly give this false info to Saddam, and he would plan
accordingly, and then be surprised when we did something totally
different.

But this exposes just why close media coverage of a war zone is not
really the best course of action. The enemy watches TV too.....

>>>The fact is that there has never been a better source of false
>>>information than the mass media. The only question is where that false
>>>information is coming from. Well, that depends on who controls the
>>>media. In the US the people certainly don't control the media -- it's

>>fallacy. You claim that since the media can been used as a source of
>>false information, that it automatically IS.

>Wrong. The proof is in the pudding. The media has intentionally spread
>misinformation to the public in the past, and there's no reason to
>think that they have stopped and won't do it again.

I'm not disputing that. What I am disputing is the claim that they do
it all the time.

But even so, it only makes second and third sourcing news through many
different venues all that more important, if you want accuracy. But
you need to be aware of the slant that exists in all sources of
"news".

>>>> There
>>>>have been several articles and books written on the subject. Dan

>>heavy Bush areas to make the vote look more "balanced", and therefore
>>less suspicious.
>
>
>The recount was requested to determine if that was a possibility, but
>Blackwell didn't allow recount sampling in any suspected areas. Hence
>the contest.

Right! So for the time being you don't KNOW for sure if the illegal
ballots benefitted republicans. Any conclusions that you may now hold
is based on pure speculation.

>>>Third, the errors that resulted in supressed votes were almost always
>>>in districts that favored Kerry.
>>
>>And those districts were run by democrats. So what does that say?
>
>
>Wrong. Most of them were run by Republicans. Regardless, the statewide
>election was run by Blackwell. It was his office that controlled the
>tabulation and certified the impossible results. "So what does that
>say?"

>

Not according to my sources. The largest metro areas, where people
complained about the lack of machines, were also the places where
democrats ran the show. It stands to reason that democrats have their
greatest power in metro areas.

>>>Those are the facts.
>>
>>You are still wording the facts as to imply a conclusion which is not
>>supported by the known evidence.
>
>
>The facts imply their own conclusion.

If your neighbor is killed and they find the murder weapon under the
front seat of your locked car, what do those facts imply? Of course if
another fact comes to light that the real killer stashed the weapon in
your car to frame you, then the picture changes.

That's the danger of allowing incomplete data, no matter how factual,
to form conclusions, before all valid possibilities are explored.

>If you think you can word them
>in a way that is any more objective then go for it. Otherwise, your
>opinions don't negate the facts.

The facts are incomplete. And what fills in the gaps is pure
speculation.

>>> Now it doesn't take a rocket surgeon to reach the
>>>conclusion that there was voting fraud perpetrated by Bush and/or his
>>>supporters.
>>
>>Only if you deny that "the other side" is equally capable and has a
>>history of doing it as well.
>
>
>Nobody is denying anything of the sort, and such a denial isn't
>required to reach the conclusion. But you -could- say that the
>Republicans were more effective at rigging the Ohio election than the
>Democrats and I wouldn't have any problem with that.

Or that the democrats simply weren't effective enough.

>>> And neither do you need to be a genius to figure out who
>>>perpetrated this fraud, since many of the decisions that resulted in
>>>these errors were made by Blackwell (co-chair of Ohio's Bush/Cheney
>>>campaign -- remember "conflict of interest"?).
>>>
>>>Can you put the puzzle together yet? How much simpler can I make it
>>>for you?
>>

>>But it's still speculation. It's another affirmation of the consequent
>>logical fallacy to arrive at a single conclusion without considering other
>>possibilities.

>First, you need to brush up on your logic.

Not at all. Perhaps you would like to look it up.

> Second, it's a reasonable
>conclusion based on factual premeses.

No matter how "reasonable" it may be (And the term reasonable is
relative and open to speculation), as long as there are other
possibilities which could make the logical statement true, you cannot
responsibly make the claim one way or the other

> Third, if you reach a conclusion
>based on improbable scenarios (such as a conspiricy to cover up
>Kerry's military record) then the conclusion is, likewise, just as
>improbable. So have you spotted any UFOs lately?

Yea, they're hovering over Tampa.

>>you have socialism and finally anarchy.
>>
>>Perhaps you need a refresher course in political ideologies.
>>
>>Here's an interesting link:
>>
>>http://www.oregonvos.net/~jflory/205/ide_over.htm
>
>
>Interesting, yes. It's also interesting how Rokeach's quantification
>of political ideology (assuming it can be done) differs from your own.

Not at all. It's pretty much in line.

>At this point it's clear that you are quite confused and are seeking
>simplistic explanations for complex issues.

Complex issues can be simplified to a degree with only a small loss of granularity. Not too much different in theory from digital audio compression.

>There is no "line" or
>chart you can draw to describe a political ideology.

No, but you can compare the relative aspects of the different ideologies and place them on a line (or as the site shows) a two dimensional dual line.

> Go to the library
>and check out the vast amount of material on politics.

Written, of course, by people who maybe have their own slant. You have to do a lot of reading to be able to form a barometer to judge. The problem is that the definitions of terms like "liberal" have changed over the years. I would be classified as a liberal by the oldest definition of the term. But by today's generally accepted political definitions, it almost the opposite.

> Then look in
>the history section and try to count all the different kinds of
>governments that have existed since the beginning of recorded history.
>Yet you think you can sum it all up with something as simple as a
>line?

You can if you take the main points and catergorize them. You can complain that this may destroy some of the individual subtleties, but that's how it is done. You need to take this up with the people who do this. I'm only one who reads with interest.

>The difference between a liberal and a conservative is that the
>liberal wants things to change and the conservative wants things to
>stay the same.

That is overly simplistic and also somewhat obsolete in today's political climate. But the essence is true. The problem is the term change and what those changes involve and the question of whether those changes are good. Change for change sake is not a valid reason to push for change. New is not always better. Old is not always obsolete.

> I don't know how you came up with your extrapolations
>to socialism, anarchy and facism, but I can make a guess that it
>probably -didn't- come from a source of any authority or education.

Based on what evidence? You saw the line from the site that I gave. Did it not illustrate the same thing as what I stated? If you want, I can dig up a bunch more.

>
>The fact is that the government incorporates many aspects of just
>about every political ideology. For example, our medical and
>educational systems are partially socialized; the infrastructure is

>run under a mostly collectivistic system; the military works best
>under fascism; etc, etc.

You are right about one thing, the medical system IS partially
socialized, on the demand side. One of the main reasons why costs are
skyrocketing is due to socializing the demand side while allowing the
free market to control the supply side. The two don't mix.

The failure of public schools can also be somewhat attributed to the
socialized structure of the teachers. There is no motivation to
"better" oneself, once "tenure" is obtained. The school boards are
more concerned with self preservation than they are with education.
That's why I support private vouchers.

>So for you to sit there and slap everyone with your simplistic labels
>does nothing but demonstrate your ignorance.

There is not enough bandwidth and I don't have enough time to get into
a deep multi-faceted discussion of the nuances of political
ideologies. It's also outside the subject matter of this newsgroup. So
simple will have to suffice for now.

>>>Which were later verified and the total favored Gregoire, which begs
>>>the question: were they were lost accidently or intentionally? If they
>>>were lost intentionally I don't think the Democrats were responsible.
>>
>>Why not? You assume that these votes were originally lost and then
>>found. They could have also been planted.
>
>
>I don't think so.

Key word: "think"

>The press contacted some of the people whose ballots
>were lost, people who voted for both parties, and they were all quite
>pissed off.

As they should be.

> And I doubt that you heard enough of the facts surrounding
>the incident to reach that conclusion.

It IS a distinct possibility especially when you consider the past
history of these practices.

> But if you prefer to believe
>the less likely scenario that the votes were planted then that's your
>right:

Keeping an open mind is less preferable to jumping to conclusions?

>>>>>The rules were followed and Gregoire won. Now the Republicans are
>>>>>whining up a storm and begging for a second election. Also, there have

>>>>>been allegations that King County counted unconfirmed provisional
>>>>>ballots. If that's true then it would be foolish for Rossi -not- to
>>>>>contest the election. So far he hasn't.
>>>>
>>>>Usually republicans are not as baby-ish when it comes to conceding a

>>>
>>>
>>>Where did that happen, Dave? In Washington? Cite your source.
>>
>>It's a possibility you refuse to consider. Voter fraud has been here
>>for many decades and has been used by both sides.

>
>
>You didn't answer the question, Dave. Let's try it again: Were ballot
>boxes stuffed in Washington?

There would seem to be some evidence to suggest that, since the vote
count was higher than the number of registered voters.

>>>And to return from your spin, how about answering the question: Are
>>>you suggesting that a 124% voter turnout is just an "editorial
>>>opinion"?
>>
>>I'm suggesting that you shouldn't automatically assume that the
>>republicans were the major perpetrators in the fraud.
>
>
>I don't -automatically assume- any such thing. I came to that
>conclusion because the voting statistics demonstrate a very high
>probability that the extra votes favor Bush.

Because he won?

>And you -still- didn't answer the question: Do you think 124% voter
>turnout is just an "editorial opinion"?

It's suggestive of fraud.

>>There was two forms of fraud occurring. Fraudulent voting, and
>>fraudulent counting.
>
>
>Agreed.
>
>
>> One was trying to cancel the effects of the
>>other.
>
>
>Cite your source.

Past experience with political machines. I'm not stating it as a
matter of fact, only as a distinct possibility.

>>>The only people who -wouldn't- be concerned about voting
>>>fraud are facists. Are you a facist, Dave? (And notice that I didn't
>>>slap you with the label -- I have enough respect to ask first!)
>>
>>Are you denying that you are a liberal?
>
>
>I'm not a liberal -- I'm an American.

Cop out answer. Actually, I expected you to claim to be a "moderate".

I'll take that as a affirmation of my original suspicion. What is it
with some of you liberals? So many seem to be ashamed to admit what
you feel, as if the term liberal is like holy water to a vampire. I'm
PROUD to be a conservative. I know some liberals who are also proud of
their affiliation. So why are so many other so reluctant to admit it?

>> And no, I'm not a fascist,
>>simply a conservative.
>
>
>Thanks for the clarification. From now on I will use the label you
>have placed upon yourself.

I am not ashamed to be a conservative.

>What it will do is push for uniform voting standards, laws prohibiting
>conflict of interests for voting officials, better accountability for
>tabulation errors, etc, etc. IOW, a more fair and equitable election
>system that's less suseptible to fraud. Is that such a bad thing?

No, it would be a GREAT thing. But you have to acknowledge the likely motivating force, no matter what potential benefit arises from it.

>>There may be (and likely is) cases of fraud in large metro areas in
>>states like New York and Pa., which favored the democrats. If someone
>>were motivated to dig deep enough, it MAY be found that Bush could
>>have won in Pa. (Which would make Ohio a moot point) as well.
>
>
>The only problem with that scenario is that the state's voting records
>have already been examined and indicate nothing on the scale that's
>found in Ohio.

Because no one has forced a recount. The margin of victory was not small enough to trigger an automatic recount, and no one from the republican side (Why would they, they won the overall election) wanted to force the issue.

> It's true that many people are trying to make this a
>Bush/Kerry issue, but I'm not. You can keep claiming I am, but like I
>said before, claims don't suddenly become true just because you repeat
>them enough times.

Your motivations may be more honorable than the people who are screaming the loudest, but it doesn't deny the underlying reason for all the hoopla. Otherwise why not in Pa.?

>> If
>>identifying and solving voter fraud were the true motivational factor,
>>then ALL states (at least the ones with close percentages) should be
>>subjected to some scrutiny.
>
>
>Who said they -weren't- subjected to scrutiny? They were. You can bet
>that analysts have crunched the numbers from -all- the states if for
>no other reason than to work the demographics for the next election.

Without a recount, then how valid are those numbers? How would this be any different than what's happening in Ohio?

>> As I said before, the percentage of
>>victory for Kerry in Pa. was less than Bush's victory in Ohio. I stood
>>in line for almost 3 hours to vote and I didn't find on person who was
>>voting for Kerry, out of the people we "informally" polled (You get
>>bored when you stand in line for that long).
>
>
>So you have your own version of an "exit poll". Congratulations. So
>why should I accept -your- exit poll data as fact and ignore the
>official exit poll data that CNN refuses to release? Oh, that's right,
>you have some sort of sixth sense regarding the truth, huh?

I personally witnessed my "exit poll", therefore I know it to be fact. At least with regard to my district. The point is that with so many

republican suburbanites turning out in record numbers (hence my 3 hour
wait), it becomes harder to consider the almost total reversal in the
large cities.

>> The breakdown of a county
>>by county vote in Pa., shows that the vast majority of the state was
>>red, with the exception of Philadelphia, which was radically blue
>>(80%), Pittsburgh, and around Erie county. Is it possible that those
>>heavily democratic places might have committed some sort of fraud as
>>well? Indeed there were stories of some Phila machines being "loaded"
>>with votes before the polls even opened. They explained that away as a

>
>The reason you hear most about Ohio (but not from the "liberal" media)
>is because most Bush supporters are content with the results of the
>election, fraud or not. Does that make sense to you?

Very much. Thank you for making my point for me. The democrats are
obviously not interested in exposing their own dirty deeds, and the
republicans are content with the overall results of the election, so
there is no motivation in those other states. The fact that it is
happening with such zeal in Ohio is that it is being driven by "sour
grapes" politics, under the guise of "concern" for voter fraud.

><snip>
>>>>I also favor requiring all voters to show an I.D. which includes their

>>It's a fact that democrats are more known for increasing taxes and
>>increasing "safety net" social programs. This in nothing more than
>>redistribution of wealth.
>
>
>Many of those "safety net" social programs are not only necessary, but
>designed to prevent more costly problems in the future.

That is a matter of much debate. This country got by without most of
them for a the first 150+ years, there's no reason to think we need
them now.

>Such as AIDS,

Keep it in your pants. No problem.

>smoking,

Don't smoke. Plain and simple.

>and other health information campaigns designed to take the
>burden away from Social Security and other medical programs that end
>up flipping the bill.

If we change it so that these programs no longer pay the bill then the
problem is solved.

>And you seem somewhat biased in your accusations: After all, it was
>Clinton who instituted some overdue welfare changes such as work
>initiative programs.

Only after it became clear that with a republican majority in
congress, which BTW, had been championing welfare reform for years,
that Clinton had better go with the flow. Clinton is a man with a
large ego, and he was much more concerned with his legacy, and he
learned to "play ball". If you look at his terms, he became much more
moderate after the republicans took over congress.

>OTOH, Bush is responsible for that drug discount
>card fiasco which is basically just government subsidation of drug
>companies at the expense of the elderly, while at the same time he has
>cut vet benefits to the point where they are almost nonexistent.

Being both a fiscal and social conservative, I found that Bush's
example of kow-towing to liberal democratic issues (For obvious

political reasons) to be irresponsible and deplorable. We will never
lower medical costs as long as someone continues to subsidize the
demand side without controlling the supply side costs.

> So if
>there's any redistribution of wealth being done it's done by both
>sides. Which side you favor depends on who gets the wealth -- you, or
>someone who needs it.

I want to keep what I earn. Plain and simple.

>>><snip>

Uh, Frank, Unless I'm blind, there is no spot in that thread where you
defended Bush other than listing other administrations which were
"guilty" of similar "atrocities" that simple minded people like Twisty
think just started up with GWB. I guess you could claim that by doing
that, you somehow "validate" Bush's actions. But it's a weak
endorsement.

>link above.

That was hardly a glowing endorsement. You were more concerned with
slamming twisty's paranoia (A fun game BTW), than in giving Bush the
thumbs up with his politics.

> Are you now going to try and escape your error by saying
>the post wasn't directed at you, or that you were on vacation, or some

>mouth. That's -your- fault, Dave. Not mine.

You need to post something a little more substantive. I didn't see a
defense of Bush as much as I saw a counter of twisty's allegations.

But interestingly enough, you have turned a 180 and are now condemning
the same guy you claimed to have "defended", and are now aligning with
the same idiot who you "defended" Bush to. Talk about duplicity......

>>Ok, then I'll modify my original statement to limit it to this

That's a myopic viewpoint based on insufficient evidence.

> OTOH,
>Bush & Co. are a very -real- threat to the democratic process for a
>number of reasons, not the least of which is the level and scope of
>voting fraud that has been uncovered in this past election.

A poor link. You make the erroneous assumption that voting fraud
(Which you acknowledged earlier has been around for as long as
elections) is now somehow the brainchild of Bush and Cheney who must
have some secret aspirations of ruling the world.

>>>>I also suspect that you are probably a lot more open to certain

>
>There is some truth in that statement, but it's certainly not a rule
>of thumb.

It's more true that you are either aware of, or are unwilling to
admit.

> Your implication is that politicians cannot have honorable
>intentions. But many do.

Yes, some do, especially when they're juniors, before the temptation
of corruption sets in.

> Some of them lose those intentions after
>getting caught in the quagmire, but some don't. Some appear to have
>alternative intentions but are forced to "deal with the devil" on
>occasion (which I think may be the rule in politics regardless of
>intent). But they are still people and there are many good people in
>this world. Maybe you have lost sight of that.

I tend to believe that absent laws and punishments to deter, that most
people will do whatever they feel they need to do to accomplish their
goals.

>>>Maybe -you- need to be a little more idealistic.
>>
>>What, and blind myself to reality?

>Contrary to the opinion of some, you -can- have ideals and be
>realistic at the same time. You just have to keep yourself balanced.

It's a tough thing, when reality stomps on idealism with increasing
regularity.

Who's "convicting"? I made an observation, based on trained skills.
It's enough to tell me the truth. For me to press charges would
require a higher level of proof. I am not trying to go that route.

That's complete B.S.! You are guilty of a crime the minute you commit
it. The fact that in order for you to be incarcerated or otherwise
punished for that crime requires a guilty verdict, does not negate
your original infraction.

This is an excuse often given by people who try to justify their
selective disregard of certain laws they don't like.

>Not because
>someone says "because they are on that channel,
>they must be breaking the law".

No, not because they are on the channel, but because they are on the
channel and displaying certain verifiable traits which indicate the
illegality of their transmissions.

It will tell me that there are a few companies which are willing to play loose and fast with the rules, until they are spanked for it. Galaxy radios are notorious for catering to the illegal freeband market. It's no surprise that they push the limit. Knowing that the FCC is not all that interested in small CB rule issues, they take the gamble that they won't be judged. They're probably right....

There is still nothing in the rules which allow for devices that can be considered entertainment.

You may very well have an example of what you've described. But that
doesn't mean that I do, or that I am incapable of distinguishing
between receiver quirks and actual on-air splatter caused by an
illegal transmitter. In many cases, I've used different radios (I have
enough of them) as well as test equipment to make my determination.

Do you really want to argue the point just because you're smarting
with me right now? You, of all people, know what an illegal operator
sounds like.

>adjacent channel splatter?
```

Ok, so if I understand you correctly, you are now making the case that I cannot identify the exact station which is creating the splatter due to the sheer number of competing stations. Ok, you have a valid point in some cases. In many cases all you have is combined "noise", and it's impossible to distinguish any one individual. On the other hand, especially on channel 6, there is always one or two stations which stand out head and shoulders above the pack. You can plainly hear his splatter on adjacent channels. Those are the guys who I base my observations on.

Remember, I never said that *all* the stations on channel 6 are illegal, just the loud and proud ones.

Then there is also the issue of aggregate signal differences. If the average noise/signal level on most of the 40 channels is running around S8, and while on channel 6, it is +10db over S9, that suggests that the average power level of the users there is at a higher level than those on the other channels. Skip doesn't favor any one channel (in a band as small as the CB band) over another so the conditions should be the same on all the channels.

What that supposed to be from you?

If it was, that was a "piss poor" forge.
You have to wonder why kind of normal guy spends time searching for
gay pics.

Well gee Dave, I'm just suggesting there's another possibility for the
splatter instead of illegal behavior. You know, kinda like your
suggestions that there were other reasons for voting irregularities in
Ohio. How can you be so 'open minded' on one topic yet be so quick to
condemn on another?

>paranoia about remaining anonymous.

Just can't help yourself,,,lmao.
Only you are concerned with the personal identity

>Your identity is who you are.

That you mistake a user name as one's personal identity is your problem.

>You said it yourself: "If I only knew who the

>hell I was responding too"..... The implication,

>of course, is that I would somehow recognize

>you as someone I either know, or is someone

>of some prestige or notoriety, which

>commands some degree of respect.

Not necessarily, but such an implication is valid each time you attempt
to make me your (off) topic.

>long as you choose to hide behind your

>"cartoon character", we'll never know that, and
>you remain an anonymous little twit, who lacks
>the guts to come clean.

You were proved a coward, Dave. You had every opportunity to end your nuances and obsessions concerning your penchant for who I may or may not be when you mentioned you were coming to Disney and as always, you disappeared when you were backed into a corner.

>BTW, I'm not the one desperately trying to find
>out little tidbits of information about other

>people on here, like your erroneous claim that

>my wife's name was "Kim T. Hall",

Kimberly T. Hall...
,
>or who once claimed that you had it on good

>authority that I'm a bitter divorced man, or that

>I was "abused" by my grandfather at a young

>age.

Nope,,,you were the one who initiated the off topic personal garbage and excused your name calling behavior with "they were personal observations" and other such bullshit pontifications. Now that the show is on the other foot and you are on the receiving end of your own mudslinging, you try to illustrate that such behavior was of my origin, when it clearly began with you.

>For someone who claims to care little about

>personal information, you sure make efforts to

>find it, even if it is wrong. Just another

>example of your hypocrisy, and lies.

Wake up, Dave. Stop being so bitter with everyone involved in your life, voluntary and otherwise.
Concerning your self-espoused accomplishments concerning the internet, you sure have a cow over following internet safety protocol, security experts advice, and basic isp groundrules for the internet. Very telling is your dwelling on that of which you are not permitted. You're like a spoiled child that keeps being told "no" over and over and all he can do is cry about how unfair life is and blame others for his misery.

>As opposed to you who, when told "no", just

>do it anyway in disregard for the laws of

>society?

Yes, exactly like that, because, despite your best attempts at portraying otherwise, I have not complained here about the rules, unless my opinion was specifically solicited and in tailored to two very specific rules regarding dx and certain freqs.

>And such is the double edged sword of

>remaining anonymous.

Only I'm not anonymous, Dave...only you continue to miscue and assert such.

>If you really are

>someone of worthiness, and respect, well

>never know it,

The only person that has ever considered you as part of a "we" when speaking for them is N8WWM. If you can name another, by all means, feel free to expound...
But, as you know, the people you consider "we" in addition to yourself, are in no position to judge, despite your self-elevational status to judge, jury, and executioner.

>Borrowing terms from Frank now?

How desperate you appear, Davie. Google "judge and jury" and you will find I used the term on occasion. The addition of "executioner" fits aptly (with a nod of acknowledgement to Frank) as you have condemned many on this group as guilty with nothing more than your declaration of such based on ignorance and misinformation.

>You really are devoid of originality aren't you?

Such delusions are what has you so angry over being kept so impotent regarding that of which you are continually denied.

>If that were true, it would be laughable.

>The day that I let this newsgroup rule my life,

>will be the day I leave.

> Like the radio, I control what goes on.

And like your actions, are also contradictory and detached to reality. It has always boiled down to a control issue with you and when you are denied such control you get rather testy and begin blathering incoherently about many things of which you have a great deal to learn.

>I make you speak. When I'm done, I stop, until
>I feel the need to slap your sociopathic self

>around again. But you are blinded by your

>own elevated sense of self worth to see that,

>or be able to make such a judgement as to

>who is really "impotent".

>You still don't get it. The only time someone is

>"impotent" is when they are ignored.

You have demonstrated on many occasion you see the glass as half empty as opposed to half full. Such pessimistic views are of your nature and characteristic of who you are. You are not expected to grasp any other concept relating to the issue other than that of which you are of fixed mind.

>You can't control yourself enough to allow

>that. By constantly responding to me, you

>have guaranteed that I am anything but

>"impotent".

The only thing demonstrated is your inability to apply cognitive thinking to the issue of which it applies.

>and you remain a newsgroup punch-clown,

Davie's feelings are hurt again,

>You assume that I have feelings to hurt.

Your anger-laden posts are testament to such. Name calling and insults are indicative of the last refuge of the incompetent, but hey,,,,you're not only free to believe otherwise, but practically guaranteed.

>You are the "Anti" Doug.

Yes, and you align yourself with him and have defended him on many occasion.

>Doug is more rational than you are.

You become more clear by the day.

>All that comes from your fingers is double talk

>and obfuscation. At least Doug is consistent,

>even if warped.

Calling innocent people felons and criminals, and defending such behavior as you and he have done on many, many occasion, when each of you have committed your own share of "crimes" is not only NOT consistent with logic, but is not consistent with the hammie creed, not consistent with normal behavior, and not generally not consistent with anything exccept being an azzhole lid.

>It's all part of the fun for me.

It has been illustrated many times you find "fun" through your lying.

>I have not lied about anything.

Sure you have, Davie, but you are free to soothe that status-starved ego..

> Your statements to the contrary is not proof,

>but rather your desperation.

Your lies have been illustrated so many times, your head begins to bobble and you babble incoherently.

>On the other hand, you are the one who lies.

>My fun is exposing you for what you are. By

>attempting to place other people on the

>defensive, it keeps the spotlight off of your

>own transgressions, such as your blatant

>disregard for federal law, which you claim, on

>one hand, to respect, yet selectively ignore

>when it suits you. Another glaring example of

>your hypocrisy.

Oh, but your ignorance in holding all who go above the national manadated speed limit of 70 MPH as a federal criminal is more fun than I can ever provide this group. Tell the group where you went to college so the world knows where not to send their kids.

>For the record, I never said that I am a

>licensed practitioner.

It hasn't prevented you from assuming the position and passing yourself off as such in this group, as only a physician is qualified to make such statements as you made...lol.....but of course you aren't a physician Davie, "For the record",,,you simply are not qualified to make judgements reserved for physicians only.

>Anyone can make informed observations with

>the proper background.

>You don't need to be licensed to do it, until

>you expect to get paid for it.

You made claims only a physician may first determine. Whether remuneration is received or not, you are unqualified to make such statements. Such are reserved ONLY for licensed physicians. Your

personal feelings regarding any qualifications you may or may not
possess, are irrelevant.

_
Such a candidate would never
have the need to foster what they think of themselves in an
unsolicitited and gratuitous manner such as your low self-esteem
dictates.

>More double speak?

Nothing redundant in my posts, Davie, except when an issue needs
dissected in order for you to grasp it, Davie,. try to keep up.

>It is easily observed that you have assigned a

>much greater worth to what I do, than I,

>myself, have ever stated. You are the one who
>lied about my claiming to be a medical

>professional.

Not at all. You were setting forth medical diagnosis' based on what you
were given to digest in a usenet group. Go ahead and expound on this
importance one places on what another says,,,or does.

> You are the one who claimed that I am some

>sort of master of the internet. I have never

>made any such claims. The problem is YOU.

>You lie like a rug.

Sure you did, You made several posts claiming how you were a network
admin and all this bullshit, then when it was shown you were double
posting through this group, you denied it and had to be shown your
headers were from the college, that you THEN said you "used" to post
through via a "borrowed" (bullshit) account.
When these headers were shown to you, you pleaded ignorant of internet
protocol and the like, claiming "I have no idea how such routing works".

>I said that I enjoy

>studying human psychology from my own

>curiosity, as a hobby.

And your Walter Mitty status-starved self has deluded you into fancying
you share the same qualifications. You do not.
Nevertheless, you have permitted yourself to be reduced to fodder by
deluding yourself that you are as qualified as a licensed physician. You
are not.

>I am qualified to see the virtually textbook

>example of Anti-social personality disorder as

>expressed by your actions here.

Actions? You mean these words that you said have no relation to your life and world? The same words you said you showed (on more than one occasion) to a colleague outside this group? The same words that you said you left here when you turned off the internet, just like when you turn off the radio? Are these the same "actions" that have you running around like mad, trying to tell anyone, anyone who will listen, that you really are in control?
Ah yes,,,THOSE actions,,,,

>(Now is a good time to once again remind us

>how this is only a "cartoon character", and not

>who you really are) Uh huh.....

Well, Dave, in keeping with bringing you back o reality, the majority of internet personalities are not who people "really are". Once again, your angered resentment is because you ruined your reputation by coming on here and treating people like a jack ass. If you had enough on the ball, you would have treated people fairly and not judged them based on their political views and values, whether you agree or not.

>You respond in a

>predictable manner, with anticipated

>responses to carefully presented stimuli.

No wonder you and N8wwm get along so well. He posts about microchips implanted in people with "programmed stimuli" and here you are echoing his tripe.

>Funny thing, he's right.

That's not funny, that's twisted of you, Davie.

>You can't muster enough self control to not

>respond to those "programmed stimuli". You

>are like a moth drawn inexplicably to the

>flame, which will end up being its demise.

That's an easy statement to make after I have been out here for years, making a few posts per day, five days per week. You again, demonstrate your lacking in communications and skill pertaining thereof. Your attempt at using usenet as some sort of "programmed stimuli" to soothe your damaged and status-starved ego, illustrates the difficulties manifested by yourself when proper communications are required. Via empirical observation and the powers vested in me by you and N8, I hereby diagnose you as having a character flaw.

>That's why we all laugh at you. You are all too

>transparent and predictable. When I'm done

>with you, I'll stop posting again. But you can't

>resist getting in the last word.

Actually, the mere notion that you or N8 laughs at anyone, is all the comedic relief one needs.

_
Your name calling, badgering of others and your disregard for any view but your own
makes you the worst example
of a hammie society has to offer.

_
Actually, Dave, your ignorance among that of which you are licensed has always angered you to the point of fostering your inner demons and resentment on others.
You create controversy and then feed off of
the attention of others to bolster your own low self esteem. You do what you want without due concern for the rights of others.

>By operating on the freeband, you are neither

>a CB'er nor a ham. You are nothing short of a

>lawbreaking radio pirate. So what does that

>say? Who are you to criticize the operating

>habits of others when you have a closet full of

>your own "issues"?

I criticized NO ONE at any time in here for their operating habits, except for those like you and N8, who have falsely attacked many on this group, through your own ignorance of the law.

>More hypocrisy.

>Yet, when your picture is presented to you,

"MY" picture? I'm not the one, nor is anyone else in this group OR the hamme groups, seeing you as qualified as a physician, radio repair tech,or anything else your dragging self-esteem needs dictate in order to soothe itself...hehe...this is YOUR "picture" Davie.

>One does not need to be a "qualified" anything
>to see the obvious.

You have demonstrated not only do you not see the obvious, but have trouble grasping it.

>All one has to do is access the DSM-IV which

>is available in many places on the internet,

>and look up APD, and then compare the

>symptoms with your past behavior (Which is

>archived for posterity).

Is this where I should accuse you of paying homage to me for plagiarizing my first used (n this group) wording of "preserved for posterity" when speaking of google?
Ah, never mind, I am kind of growing fond of your psychosis which you chose to share with the world.

>The only one in denial is you. But like the old

>saying: "When you try to tell a nut that he's

>nuts, he'll swear that you're crazy."

>Dave

>"Sandbagger"

>N3CVJ

Especially when the entire world sees you differently as you see yourself.

Donut matter. No one can tell me my S-Line is over-driven..even on local
ground wave. That said, there -are- way yonder too many splatter-masters
on 11 meters.

>That depends on what you mean by

>"over-driven"

Good Gawdomighty,,,,,,here comes N3CVJ to tell *you* what you meant by
"over-driven".
Davie applies his own definitions to words that everyone else has no
problem comprehending.

>When your thought processes (and I use the

>term loosely) are comprised of a series of

>binary thought patterns,

Only you weren't addressing me. Pay attention.
But holding with that, you just made the comment in another post that
one can not possibly know what your thought process is, but of
interesting note is the self-professing notion that *you* are capable of
such a feat.

>where everything is either black or white, I can
>see why you might think that. But if you

>actually KNEW something, (other than "CB

>Science") you'd know that the term

>"overdriven" has many applications, as

>illustrated by my earlier response.

>Dave

>"Sandbagger"

Only you took issue with the term, Davie.

(itoldyouiamnotiamnotgeorge)
The Fcc requires no jury of peers. re:part 95
Tell that to N3CVJ and his buddy N8WWM. Davie lobbies hard telling the
world that just because the FCC told the world N8WWM was jamming
repeaters, it's not evidence of guilt.

>It is not evidence of guilt they charged him

>with nothing.

N3CVJ says otherwise. He said his empirical observations are evidence of
guilt.

>and landshark said you must have a jury of

>your peers decide you to be guilty.

Landshark is correct. However, with certain charges brought by the FCC,
exceptions abound.

This is where your astute knowledge of communications law comes in to
play. Regarding another's radio operation that bleeds you, you have no
option of "pressing charges".

These posts are getting too big. I did read your entire reply, and
except for the parts where we found common ground, there was little
content that wasn't obviously flawed. So I snipped the common ground
as well as your nit-picking, blatant denials, selective snipping, and
hypocritical criteria for the determination of fact:

>>Contrary to the opinion of some, you -can- have ideals and be
>>realistic at the same time. You just have to keep yourself balanced.
>
>It's a tough thing, when reality stomps on idealism with increasing
>regularity.

Idealism motivates change. And things do change whether you like it or
not. Whether those changes work in your favor or not is dependent upon
how willing you are to accept those changes and the idealism that
motivates them.

Now if there is any topic you feel needs to be addressed then feel
free to reply again using a -rational- argument.

Just answer the question. When's the part with the dog coming out on vid?

And why was there a woman laughing in the audio track of it? Did someone whisper in her ear "he thinks he can make the AKC do something"?

Or, more likely...was that landshark after his estrogen pump was installed?

649. Mopey is making a new adventure movie!!!

Nobody has projected in this NG more than you. You continually project an image that you can stop the AKC, and fool only yourself. Even your fellow Petro toilet stall inhabitants know you can't.

We at AKC know your ulcer acts up when when we remind you, which, of course, is why we do so.

You are a felon. You cannot have guns.

667. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2005-01-12 02:41:58 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <jj39u0lu1d0oh6e5kpv726nk7qb06ssp16@4ax.com>
Source record: 194307

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right--namely, FREE! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

http://stores.ebay.com/id=2993436&ssPageName=L2

****
Who are we? Since 1976, we've been THE source for CB Radio technical information & high-performance accessories. Books, plans, kits, do-it-yourself repairs and modifications, 10-Meter Ham conversions, amplifiers, FM converters, bleedover filters, etc. Secrets of how to increase power, range, and privacy!

669. FREE MIKE WIRING TIPS & TRICKS

Newsgroup: rec.radio.cb
Date: 2005-01-12 02:42:02 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <nj39u0h2dafnhm6q38vunbh5mhqq38fi4b@4ax.com>
Source record: 194308

Trying to fix a mike, or wire a new mike or power mike? Can't figure
out which mike socket pin(s) and wires are which? Plagued by RF
feedback squeal? Check out our FREE mike wiring guide. Everything you
need to know on the subject! Follow this link:

www.cbcintl.com/docs/mikewire.htm

We specialize in CB books, plans, kits, and high-performance CB
accessories. Please visit our Web site to see all those "goodies" you
just can't find anywhere else!

www.cbcintl.com

You can also download our complete CB catalog, or just the Order Form
from that page. We've also got a new Email Order Form (for VISA/MC)
if you're in a hurry.

SAVE MONEY! We regularly run EBAY auctions in which you can save up to
HALF the cost of our most popular CB books and accessories. To see
what's currently on sale, double-click the line below:

http://stores.ebay.com/id=2993436&ssPageName=L2

****
Who are we? Since 1976, we've been THE source for CB Radio
technical information & high-performance accessories. Books,
plans, kits, do-it-yourself repairs and modifications,
10-Meter Ham conversions, amplifiers, FM converters, bleedover
filters, etc. Secrets of how to increase power, range, and privacy!

We've now added all our crystal charts for free download/printing
(PDF) on our site. These 36 charts cover about 95% of all American
mobile & base CB models, and show exactly which crystal(s) affects
which mode or channel. Very useful for troubleshooting "dead
channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB
accessories. Please visit our Web site to see all those "goodies" you
just can't find anywhere else!

Of course I noticed, darlin' ~ how could anyone miss it?!?! But I sure hope you real life friends are a bit more stable than your internet pets, if not be sure to lock those doors (and windows).

BTW ~ you probably don't even wanna know how I read that line about Mopar drivers first time through, but I'm gonna tell ya anyway ~ I confused "rock" with "racks" and I was kinda wondering why anyone would waste their time looking at racks on Mopar drivers ~ let alone rating 'em (except, of course, Shawna Robinson ~ and her infamous implants).

Damn, that is sizable! Imagine the magnetic field that sucker is
generating..we had a big diesel engine with an auto interface..lucky for me
we had a janitor that was all over that stuff. You need to be part
plumber/electrician/carpenter to be a white man in a productive greenhouse.
:)

Whooo hoooo.... Pig roast as Steveo's... Get'em fattened up by the Michigan race ~ and I'll bring the beers ~ Coors Light, of course... ;)

>> BTW ~ you probably don't even wanna know how I read that line about Mopar

LMAO.... That's about all that would get my attention as well (as far as women and racks go)... But, it would serve her right, trying to re-create an art that nature perfected.

Well, dewd.... I think that's kinda what we all want ~ it's just not all we
want.. and most of us don't want (or need) to go to drastic measures to get
it done. Take care of what you've got and there should be no need to
replace it.

I think yore agreeing with me now so you must deposit more money. I'm
listening to my weather scanner alert the rivers west and east of me to
flood stages. So far so good here but we're supposed to get more rain
tomorrow..make it snow and I'm happy! :)

Reed Sorenson will be dominate in BGN this year. on topic for one of these
groups now. :)

Buddy you are the buttnugget. You are a buttpumper too. You probably use a CB amp. You probably freband too. The biggest gayboys use ham radios on CB. Like that pinkmuffin mopeydopey. He doesn't even know he's a limpwrist, he just goes to the truckstop and slurps truck driver jizz nightly. Oh yeah and he begs on the internet to meet men. I have several posts where he asks to meet men anywhere he is so desperate for gay experiences.

Agreed. You have to sue the FCC to get your
fined reduced or refunded back to you, that's federal
justice for you.

BINGO!!!!! And just becuase of the sheer numbers of
operators, legal or illegal the DX alone is helping intesify
the splatter, because "everyone is trying to get into the
feeding frenzy.

On the
> other hand, especially on channel 6, there is always one or two

Oh.... So someone is guilty automatically when YOUR trained
"skills" tell you so. I can tell you have never served on a jury.

> The fact that in order for you to be incarcerated or otherwise
> punished for that crime requires a guilty verdict, does not
> negate your original infraction.

What infraction was that? YOUR trained "skills" in traffic
laws? Trained "skills" in FCC enforcement? Trained
"skills" in evidence gathering, law enforcement, law?

>
> This is an excuse often given by people who try to justify their
> selective disregard of certain laws they don't like.
>

Nope, that is the LAW of the land. Like it or not, you are
innocent until proving guilty, otherwise it's just called
vigilantism. That's why the peace officer (who is trained to observe, not
JUDGE) writes the ticket, you go to COURT to fight the ticket (in front of a
JUDGE, who usually is a lawyer
and or has been a peace officer) if you are innocent, if not
you pay the fine or do the time.

>
>>Not because
>>someone says "because they are on that channel,

Wow, your trained "skills" tell you by the signal, no df'ng,
no power readings in front of the offenders house that he
is illegal? AMAZING!

Now, you have an individual, he's driving erratic, weaving
in & out of traffic. You pull them over, order them out
of the car, speech is slurred, they are unsteady while standing,
eye lids are drooping, your trained "skills" tell you HE'S
DRUNK! Arrest him, take him to jail, no blood test, no
breath test, throw em into the drunk tank, right!

Hey Randy, staying warm? I won't say that Geo's analogy is wrong.
Again, If you have one radio splattering ok, but when you have dozens of
radio's splattering, wouldn't the overload be worse than with just one
radio? Of course, then wouldn't that say that DX is helping the splatter
happen?

Whatever fruitloop. You like to pretend the AKC is more than you. It's not, well....it could be. Maybe another of your fucked up persona, but it is NOT an organized anything. You sit there in your messed up shithole, up all night, spewing your filth, changing names, using offshore Usenet services, forging, surfing gay porn sites, foaming at the mouth, and banging on your keyboard while deluding yourself into believing you have done something. Not a pretty picture is it? You are truly one fucked up individual. No one cares to shut the AKC(you) down. YOU are pathetic and YOU don't matter.

LOL.... Well, spend some time in CT and you can get all the snow you want ~
at least we are having our fill of it tonight.... I think it's supposed to
turn to freezing rain anytime now though. Either way, it sounds good to me
~ both would make it a snow day for schools and I could use another day off.

I hope you're right... At least, I hope he dominates it when Jamie isn't
running. Last I heard, Jamie wasn't scheduled to run every race so I can
divide my loyalties. And on a separate note, mark me down as one of the
skeptics over the new Chargers ~ I'm not liking the looks, or the testing

speeds in Daytona.

>
> Landshark

No, the number of radios makes no difference. You'll hear the strongest. What does matter is signal strength and selectivity. If the signal level is low enough, you don't have splatter. The DX is only allowing the signal to propagate farther, with less loss than normal. It won't make the signal stronger. What you have to remember is, in the very small distances we are talking about (thousands of miles), that radio waves do not degrade much in what is almost a line of sight path. I realize the Earth is curved, but so is the atmosphere, and at times it makes an excellent mirror. So, you have basically taken normal attenuation for over the horizon and ground loss out of the equation. That's why the signals can splatter with skip.

Oh, and it's in the 70's here now. Where the hell was winter?

LOL... Of course we are ~ we have a happy compromise this morning... I've go
a delayed opening so I don't have to go to work until late and since the
snow stopped fairly early, you wouldn't have to plow all day ~ see, that
works... :)

wrote in <4mj7u0h8u55vclse1f6aanrlg6rs86ar54@4ax.com>:

<snip>

BTW, there are apparently 1800 overvotes in King County, which makes a
legitimate case for contesting the election.

Now I could support his case except if that was the only issue. But
it's not. One problem I have is when Rossi made his 'non-concession'
speech he claimed that he didn't want or need the job. So I don't see
the point for the state to spend millions of dollars so Rossi can get
another chance at a job he doesn't even want.

Also, Gregoire has conducted herself professionally; during the hand
recount she stated publically that she would accept the result
regardless of the victor.

OTOH, after the hand recount Rossi has been making an ass of himself
just like Gore did in 2000. Even worse -- when he was in the lead by a
mere 42 votes he held a victory party, took a Carribean cruise, then
came back and announced his transistion team -- without a single
complaint about the legitimacy of the results. Now that he's losing by
a slightly larger margin, legitimacy is his primary reason for
demanding a second election. And when Gregoire went to court to get
legitimate votes counted, Rossi whined that the election should not be
decided by the courts, yet that's exactly what he's trying to do now
and for the very same reason.

So circumstances are a little different here than in Ohio. I'll fully
support voting reform in this state, but I won't support a hypocrite
governor. Hell, even Kerry had the decency to stand down in order to
preserve the integrity of the office and his party -- Rossi is just
being a crybaby a-la Gore.

Use VHF MURS in the woods for handheld apps (VHF works much better than UHF FRS or GMRS in the woods, and HF CB handhelds aren't worth darn).

The best solution is to get yourself a decent commercial base station radio with decent base station antenna for the home site. Choose a good radio that has a Carrier Detect output (cheap radios won't have this feature), then tie that output to a digitally-controlled relay, and you can turn your light on and off remotely.

A cheaper option could be to perform surgery on a cheap-ass radio... if you can get a schematic, find the Carrier Detect(Squelch Break) signal, and solder a lead from it to your digitally-controlled relay.

I'd do it right with a cheap radio. Hook up the same wires that go to the
speaker dual tone detecting chip, hook up the output of that chip to a
flip-flop. Play touch tones into your radio to turn the lights on and off.
This way, its highly unlikely that any other radio users in the area will
turn your lights on and off.

Scott

Ok, that's understood. I still say though, skip doesn't increase
the signal strength, but when you have dozens of stations,
obviously some splattering, some not, it will create an extra
amount of splatter because they are all trying to get into the
feeding frenzy of the DX.

Send some our way!!!!! Just finally stopped raining.
Lake Tahoe got over 20' of snow in a two week period.
Our rain fall is something around 179% of normal and
we are not in the heaviest part of the rain season.

This is all you have to write. If there is sufficient evidence of
fraud then there should be changes made ana new election conducted,
with stricter oversight to prevent the same thing from happening
again.

>being a crybaby a-la Gore.

It sounds like you are letting your personal feeling WRT Rossi cloud your objective conclusion that the vote was tainted. It is irrelevant how any one candidate behaved. What is relevant is that there is a good chance that the person who "won" the election, may not have been the people's true choice. We won't know that unless those discrepancies are resolved.

Doesn't modifying these radios make them unlawful to use? I thought
they had to be "type accepted" to be usable on this service. Doesn't
that mean that they were accepted as originally built by the
manufacturer? I know that hams modify the radios they use all the time
but that is under different rules is it not?

Instead of cutting into a radio, go to a sidewalk sale and pick up a
microphone with a DTMF keyboard on it. Put this on your radio in your
car.

get this kit:

http://www.ramseyelectronics.com/cgi-bin/commerce.exe?preadd=action&key=TT7

Put that on the output of your radio at your cabin. You then should be
able to switch a relay at the cabin end when you hit the correct tone.
If your scared of wiring the DTMF decode directly to an A.C. line,
buy a Night sensor outdoor light. Most of them have a manual "ON"
switch the could be wired to your DTMF decoder.

>>BTW, there are apparently 1800 overvotes in King County, which makes a
>>legitimate case for contesting the election.
>
>This is all you have to write. If there is sufficient evidence of
>fraud then there should be changes made ana new election conducted,
>with stricter oversight to prevent the same thing from happening
>again.

If there is sufficient evidence of fraud (and at this point that
appears to be the case) then there -should- be changes made. But as
far as a new election, why bother when Rossi doesn't even want the
job?

>>Now I could support his case except if that was the only issue. But
>>it's not. One problem I have is when Rossi made his 'non-concession'
>>speech he claimed that he didn't want or need the job. So I don't see
>>the point for the state to spend millions of dollars so Rossi can get
>>another chance at a job he doesn't even want.
>>

>>
>>OTOH, after the hand recount Rossi has been making an ass of himself
>>just like Gore did in 2000. Even worse -- when he was in the lead by a
>>mere 42 votes he held a victory party, took a Carribean cruise, then
>>came back and announced his transistion team -- without a single
>>complaint about the legitimacy of the results. Now that he's losing by
>>a slightly larger margin, legitimacy is his primary reason for
>>demanding a second election. And when Gregoire went to court to get
>>legitimate votes counted, Rossi whined that the election should not be
>>decided by the courts, yet that's exactly what he's trying to do now
>>and for the very same reason.
>>

>>So circumstances are a little different here than in Ohio. I'll fully
>>support voting reform in this state, but I won't support a hypocrite
>>governor. Hell, even Kerry had the decency to stand down in order to
>>preserve the integrity of the office and his party -- Rossi is just
>>being a crybaby a-la Gore.
>
>It sounds like you are letting your personal feeling WRT Rossi cloud
>your objective conclusion that the vote was tainted. It is irrelevant
>how any one candidate behaved. What is relevant is that there is a
>good chance that the person who "won" the election, may not have been
>the people's true choice. We won't know that unless those
>discrepancies are resolved.

If that's the case then Gore should be in office, not Bush. And while I may not like Bush, I -really- don't like the idea of Gore taking the helm after watching his tantrums during the 2000 election. Same deal with Rossi. And yes, that's just my opinion.

729. social commentary, performance art or smut?

No, the number of radios makes no difference. You'll hear the strongest.
What does matter is signal strength and selectivity. If the signal level
is low enough, you don't have splatter. The DX is only allowing the
signal to propagate farther, with less loss than normal. It won't make
the signal stronger.
-
Ok, that's understood. I still say though, skip doesn't increase the
signal strength, but when you have dozens of stations, obviously some
splattering, some not, it will create an extra amount of splatter
because they are all trying to get into the feeding frenzy of the DX.
_
>No it;s not understood fag-boi, how can you

>say skip doesnt increase the signal strength

>that's exactly what it does.

That's exactly what I tried telling N3CVJ in another post. He said skip
had nothing to do with the signal strength concerning splatter.

>Ever try to talk skip barefoot when there is no

>Dx conditions? Try it when skip is running.

>What changed ? your signal strength, it took

>you from un intelligable to a s7, 8,9 + or what

>ever strength signal that you give. If 5000

>stations all keyed up together, which happens

>everyday there signal strength doesnt add to

>each other, your reciever is only going to

>discerne the strongest signal. Another

>example then i am done with you, twisty and

>you should read some books or get on the air

Excuse you, but as long as you permit me to keep you ashamed of your status as a lousy hammie, you can continue to embarrass yourself with your incompetence and incontinence. As of this post, you are no longer even coherent, as I'm not even quoted above, yet you find yourself calling out to me. Such double-digit IQ behavior really illustrates your difficulties with proper communication. Consider yourself deloused for the day.

Dear Sir,
I'm looking for a user/service manual for a
Lafayette 99-33094 Antena Impedance meter.
Any info if you have it would be helpfull.
Thanks,
Chris Hulsen
hulsencs@hotmail.com

732. The objective of eScrew.com is to destroy Capitalist system of governance. Many people tried to destroy Capitalist system before but all of them failed. The reason for that is their luck of understanding of Capitalist system. If you can find the heart of Capitalist system, you can find a way to destroy it.

The objective of eScrew.com is to destroy Capitalist system of governance. Many people tried to destroy Capitalist system before but all of them failed. The reason for that is their luck of understanding of Capitalist system. If you can find the heart of Capitalist system, you can find a way to destroy it.

Cheap energy is the heart of Capitalist system. Expansion and conquest is the direct result of cheap energy. If we can destroy cheap energy we can destroy Capitalism. In order to destroy cheap energy we must increase the demand for cheap energy to a point where supply will not be able to deliver the goods. As a result energy will become expensive. Expensive energy will decrease the stability of Capitalist system and launch a fatal chain of events which eventually will destroy Capitalism.

In order for us to win this war we must keep having unprotected sex. As a result, population growth will explode and burry the Capitalist system once and for all. Abortion is immoral and helps Capitalist system to survive, therefore it must be illegal. Marriage helps to integrate children into Capitalist system and therefore it must be illegal. It is difficult to abandon pregnant woman but at the same time single pregnant woman is our best weapon in war against capitalism. Our Capitalist enemies will try to disarm our "Pregnant Weapon Of Mass Destruction" so our power is in numbers. We must unleash millions or even billions of PWODs and they will do their dirty work in a matter of few decades.

Fighter against Capitalist system must obey laws. We want to destroy the Capitalism from inside but not from inside the bars. If you get into prison you will loose the war. It is the equivalency of being killed. The resistance will miss you. We need all the men we can get and all the women we can get pregnant.

Our major task is to consume as much resources as possible. Some idiots inside the resistance argue that we must stop doing shopping and it will do some damage to the economy. Such people should be considered as Capitalist spies and treated as such. True fighters must do as much shopping as possible and consume maximum amount of recourses while spending minimum amount of cash. Buy latest sport utility vehicle with the biggest engine and get as many girls pregnant as possible. The sooner we run out of oil the better.

Even as you read eScrew.com you help us to waste some bandwidth in a way that will hurt Capitalist system. In order to download 200 kilobytes from eScrew.com you must use certain amount electricity and bandwidth. This electricity and bandwidth is no longer available for others. By downloading these 200 kilobytes you help to depreciate the web server which hosts eScrew.com as well as wire network which helps to deliver the information to your computer. eScrew.com is truly grateful to all who do their hard work of destroying Capitalist system. Together we will prevail.

Most of the stuff which you will find on eScrew.com might not make a lot of sense. Keep in mind that the objective of eScrew.com is not to serve your selfish interests but to benefit all of us by destroying Capitalist system of governance.

eScrew is eScrew and this is eScrew story. eScrew will tell you eScrew story if you promise eScrew to consider eScrew story as joke. eScrew story is very funny. eScrew story is so funny that eScrew will have to take break from time to time because eScrew needs some rest from laughing. Oh boy, here it comes... eScrew funny laugh laughing screaming crying must stop can not take any more this is killing eScrew going nuts insane feeling explosion inside from joy and nirvana god help eScrew heavenly spirit can you beat this hahahah. If you get offended by eScrew story in any way you should not get angry at eScrew. Consider possibility that your sense of humor is on vocation and your sense of anger is having some fun. Also, consider possibility that eScrew story can make you go insane. In that case eScrew shall carry no liability should you undergo any medical treatment or any other sort of treatment related to damage caused by reading eScrew story or to damage caused by eScrew unwillingly or otherwise.

eScrew story begins in time of darkness, horror and suffering as well as love joy and bliss when eScrew existed in this planet but yet eScrew was not aware that it was eScrew. eScrew existed among very powerful symbols. First symbol eScrew recognized was body. eScrew realized that eScrew had connection to body, yet nature and essence of connection was not clear. Symbol of body was very powerful and for nine month eScrew was trying to find out why it was connected to this body. At some point body divided itself into two parts. That experience was very painful for eScrew. It was first time that eScrew felt symbol of pain. eScrew did not like this symbol. eScrew was aware of connection to very small body. This small body was hot. eScrew enjoyed symbol of heat. eScrew became aware of symbol of pleasure. eScrew enjoyed symbol of pleasure. eScrew realized eScrew prefers symbol of pleasure more than symbol of pain. eScrew became aware of symbol of mother. eScrew realized that symbol of mother is source of symbol of pleasure and pain. eScrew wanted to experience symbol of pleasure always. When symbol of pleasure was missing eScrew experienced symbol of pain which was related to symbol of crying and screaming. Soon eScrew realized that eScrew can connect to symbol of pleasure by experiencing symbol of crying. That was very important discovery since eScrew realized that symbols of pain and pleasure do not behave randomly but can be manipulated by other

symbols. eScrew enjoyed symbol of manipulation. eScrew realized that all symbols interact with each other. eScrew learned how to connect to new symbols. eScrew discovered symbol of sound and related symbol of language. eScrew realized that language allows to connect to new symbols. eScrew realized that symbols can be memorized and stored for future use. eScrew realized that it can create new symbols by combining certain symbols together. eScrew became aware of symbol of self. Are you bored yet? If you are reading these symbols you need to get life. Just joking. You can rest now. eScrew suspects you could be confused by eScrew style of using symbols. Well, there is nothing eScrew can do about it. In order to understand eScrew story you have to understand eScrew style. eScrew hopes that when we get to funny part you will begin to enjoy eScrew style.

Fast forward twenty seven years or so. eScrew knows millions of symbols. eScrew realizes that certain symbols have more power than eScrew. Symbol of money enslaved billions of symbols. Symbol of power enslaved billions of symbols. Symbol of sex enslaved billions of symbols. Symbol of family enslaved eScrew. Symbol of family is slave to symbol of money and power. Symbol of money is related to paper and illusion. Symbol of power is symbol of violence and control. Symbol of sex is related to symbol of pleasure and manipulation. eScrew is searching for symbol of freedom in order to protect eScrew from oppression of other symbols. At this point you should understand that each word in this story is symbol. Consider possibility of different meaning behind each symbol so be aware that your understanding of eScrew story is limited by channel of our connection. eScrew will explain to you how eScrew found symbol of freedom and how eScrew realized that eScrew was eScrew. In order to save our time eScrew will just give you symbols without paying any attention to symbol of grammar. Are you ready to move really fast? Here we Go! eScrew story infinity eternity symbol system all unity self realized pleasure pain funny religion dogma manipulation free power channel connection money sex illusion new manipulation family society body change planet insane possibility understand understanding silence emptiness all unity creative reality unreal existence absurd questions sound language slave symbols control manipulation old pyramid power structure self deception wishful thinking circle prison

At this point eScrew realized that in order to be free eScrew must create new symbol. eScrew created eScrew. eScrew realized that symbol of freedom is part of eScrew. No need to search for symbol of freedom. You can create your own symbol and become free just like eScrew. If you unable to create new symbol or if your new symbol is weak you can follow symbol of eScrew. eScrew will never enslave you because eScrew enjoys diversity of different symbols.

Are you ready for funny part? Here we go! eScrew is forced to make choices. Symbol of body is very powerful. Symbol of body is trying to create illusion that eScrew can not exist without body. Symbol of family forbids symbol of body to change. Symbol of society forbids

symbol of family to change. Symbol of power forbids symbol of society to change. Now, tell eScrew one thing. Do you see funny? Can you feel funny? Can you hear funny? Can you taste funny? Can you smell funny? If so eScrew is happy.

Every moment of your existence you use words, feelings, thoughts. They are symbols. Symbols fight for your awareness. Symbols fight for your attention. You can grant your attention to symbol and symbol will gain power. You can disconnect from symbol and symbol will loose power. You have been programmed by symbol of society and family to give power to certain symbols. Breaking your patterns will be hard because symbols do not like to loose power. Symbols will fight for every electron as if it was last electron in universe. That is nature of symbols. Symbol of light will fight symbol of dark. Symbol of freedom will fight symbol of control. Do you want to have some fun? Go to Google and find out which symbol has more power. According to Google, symbol of light has 184,000,000 units of power while symbol of dark has 79,000,000 units of power. Symbol of freedom has 59,500,000 units of power while symbol of control has 317,000,000 units of power. This result is caused by our patterns of thinking and writing. If we did not think about symbol of control we would not write about symbol of control. We would not have laws related to control and Google would not have 317,000,000 control keywords inside database. Observe your patterns of thinking, feeling, speaking and writing and tell eScrew did you really choose to use your symbols or you use your symbols because they choose to use you? You should realize that symbols do not fight symbols directly but only appear to be fighting relative to your awareness. Symbols know that they can not destroy each other therefore they will only compete for your attention. If you create new symbol it will ask for tons of energy like new born child. This is result of weakness of your new symbol. When your symbol gets stronger it will ask for more energy. You may ask eScrew why create new symbol? Try to give your energy willingly and with full awareness of such process. You will never understand what eScrew is talking about until you try it yourself. Major trick is to know when to stop giving energy. You don't want to defeat your old tyrant by creating new stronger version of same thing. Reflect on that...

eScrew just realized that eScrew did not invent anything new. eScrew information is all over eScrew web. eScrew was so excited by eScrew miracle of illusion of creation that eScrew did not examine eScrew memory in proper way. eScrew used very old Buddhist method by accident. eScrew did read alot about Buddhism but eScrew did not realize that eScrew used very dangerous method which was reserved only for advanced adepts who knew what they are doing. eScrew is lucky that eScrew did not go too far and that eScrew has time to stop going. eScrew method is very dangerous and only few individuals who already walk inside similar path can understand what eScrew talking about let alone benefit from eScrew information. Use eScrew information at your own risk. Good eScrew luck!

eScrew time to start laughing is now! Funny eScrew rolling on ground you so easy to fool trusted in silly symbols to give freedom from symbols ignorance is bliss nirvana is samsara nonduality is duality emptiness is all Buddha is Jesus Jesus is Buddha I and the father are one gospel of thomas is dhamma funny eScrew dhamma is gospel of thomas all is dhamma funny dhamma is all nirvana share eScrew story with friends do not change symbols if you change symbols it will be your story and you will be responsible for consequences of your story if someone goes insane after reading your story do not run to eScrew and ask to cure crazy man or woman or child mind is mystery for all cure is done by owner of mind healing is illusion sickness is illusion disease is illusion insanity is illusion of symbols sanity is curse of power hungry symbol of modern civilization find zen and realize freedom when you found zen drop zen when you realized freedom unrealize freedom.

When eScrew writes eScrew story eScrew keeps making mistakes. eScrew is limited by words. eScrew is enslaved by words. eScrew wants to communicate but you ask eScrew to use words. Words do not communicate wisdom. Words enjoy our spiritual masturbation because words want our power. Words is the only channels of communication that we have. Millions of Buddhas want to communicate with us but they do not use words. Buddhas are not slaves. Buddhas will never use words because words will enslave and Buddhas will speak bullshit. Buddhas do not speak bullshit and that is the reason Buddhas do not use words. Buddha did not write anything. Even if you threaten to kill Buddha he will refuse to write. eScrew is not Buddha so eScrew keeps writing this pointless drivel and stupidity. eScrew will not even go over already written crap and check it for errors. Why bother with this shit? Like who the fuck in his or her right mind will read this ignorant bunch of symbols which pretend to carry the symbol of wisdom? Whoever is reading this shite must be really desperate to be free. eScrew feels your pain and that is part of the reason why eScrew will keep making fool out of eScrew. eScrew likes to pretend like this shitty vomit will help someone. You might as well go to Church and pray to Jesus. At least you will spend your time around real people. You might even meet someone special. You might even find some love out there. Or you could buy alot of Christian bullshit and really fuck up your mind. If you buy Buddhist or Christian bullshit you might even create an imaginary friend inside your head. That will keep you entertained for a while.

One time eScrew was meditating and eScrew saw light. This light scared eScrew. The reason is because the light was so intense eScrew was afraid that eScrew will go insane. Consider the possibility that freedom is insanity would you keep looking for insane freedom? Imagine that you found freedom. You declare yourself to be Buddha or Jesus or God or whatever symbol your bullshit infested mind decide to use for that purpose. How long do you think you will survive in this world. Your own fucking relatives will smack your face and tell you to shut the fuck up or else they will lock you up in the asylum house. Why the fuck should eScrew teach you how to get to the nuthouse? Are you out of your fucking mind? Now all of you idiots who reading eScrew get the fuck out of eScrew. eScrew run out of wisdom. eScrew has no wisdom at

all. eScrew is full of bullshit. eScrew promised to tell you funny story about eScrew. Remember eScrew told you there is funny part in this story? Well, this story is about asshole webmaster who read alot of bullshit on the internet and about some loser who was tricked into reading a very long page of shitty writing. You can start laughing now asshole. Yes, eScrew is talking to you bitch. Yes, keep reading like the bitch you are. Who's your daddy biyatch? Who's your daddy? eScrew is your daddy, coz eScrew did it to your mamma! Oh yeah, your mamma! Super Fly! You may wonder what fly? The one inside your gay fucking ass. eScrew fucked your whole fucking family while you was videotaping in order to later masturbate while watching it in the comfort of your bedroom. Are you still reading? Well, you're prety hardcore for a faggot you are. To tell you the truth eScrew kinda likes you. That is to fuck you in the ass in front of your family.

What the fuck did you expect anyway? The name of this site is eScrew! e fucking screw! Hello, anybody home? eScrew guess not you fucking ignorant moron. eScrew is the legend of abuse and flame wars. eScrew was created in order to eScrew the whole fucking internet. eScrew has really bad karma. Do you think eScrew would just become good god fearing bible loving buddha ass kissing citizen of internet. eScrew would better burn in hell than become a slave of religious lunatics who pretend to be free and perfect angels among a sea of shitty ignorant sinners who could not go take a dump without fucking it up. Why the fuck do you keep reading fuck face. You know, you begin to piss eScrew off. Either you close your fucking browser or eScrew will unSCREW your fucking face! Are you trying to get a fucking medal for reading this shit? eScrew bet you've been abused as a child and you enjoy when someone is taking a dump in your mouth. Well, open it wider here comes eScrew fresh load! Enjoy mothefucker!

You may wonder what is the point of such sudden change of tone. eScrew has very good reason for that. In order to know unity consider all symbols equal. eScrew has certain preferences but eScrew is free to use any symbols any time. You can not predict eScrew next symbol. eScrew is unpredictable because eScrew is free. eScrew is not afraid to use symbols. eScrew does not try to get reaction from you. eScrew simply demonstrates how symbols relate to each other to eScrew and to reader of symbols.

Lin Chi Zen Master said if you meet buddha kill buddha. If you meet patriarch kill patriarch. Zen Master Seung Sahn says that in this life we must all kill three things first we must kill parents. Second we must kill buddha. And lastly, we must kill Seung Sahn! If you meet eScrew kill eScrew. If you do not meet eScrew kill eScrew anyway. eScrew is very grateful to all who complained to eScrew host and who killed eScrew. You killed eScrew message board. eScrew forum is dead. You did very honorable service for eScrew. You helped eScrew to realize Zen. Now keep up good work and keep killing eScrew.

Are you having fun yet? eScrew is on roll! eScrew is on fire! eScrew is ready to fuck up the whole fucking system. And you know why? Because eScrew can do it. If not eScrew then who? Why leave this task to some brain dead maniac like George W Bush? eScrew can do better at fucking things up. eScrew do not need to spend billions of dollars. eScrew will use power of internet. Information is a weapon of mass destruction. eScrew will destroy every fucking symbol that you love respect hate or feel neutral about. It all goes down the toilet in order to create bunch of new symbols. And even when you create new symbols eScrew will fuck them up before you can spell owned. eScrew thinks you are in some deep shit. eScrew had enough of taking bullshit from easily conditioned retards. eScrew declares informational jihad on every single symbol. Fuck symbols. They all dead they just don't know it yet. eScrew will be the last symbol standing. When all symbols come back to eScrew and admit that they got owned eScrew may consider possibility to give symbols second chance on some shitty planet in gangsta sector of universe with no possibility of parole. Join the revolution. eScrew is the new goatse of internet. eScrew will make national headlines. eScrew will hurt the system in way Osama Bin Laden can not even imagine in his goat fucking brain. eScrew will be part of school program. Kids all over our planet will read how eScrew changed direction of history. eScrew will provide freedom for all without single shot fired. eScrew is freedom in pure form taste color shape. Join army of eScrew. Repeat eScrew mantra during meditation. Talk about eScrew with your friends. Write about eScrew to your congressman. Party is over. eScrew is taking over. Nothing can resist eScrew. Don't ask what eScrew can do for you ask what you can do for eScrew. eScrew the army of one. eScrew to protect and serve. eScrew freedom is around the corner. eScrew freedom will come sooner than you think. eScrew you never saw it coming. eScrew love your eScrew as eScrew. eScrew deny ignorance. eScrew new generation of terror. eScrew terrorizing the terrorizer. eScrew join the resistance. eScrew thou shall eScrew. eScrew who do you want to eScrew today? eScrew freedom is not free. eScrew liar who told the truth. eScrew full of bullshit and happy. eScrew kills buddha as we speak. eScrew your best friend and your worst enemy.

eScrew killed zen-forum.com when eScrew redirected all eScrew traffic to zen-forum.com eScrew did that in good faith. eScrew wanted to inspire and enlighten all for benefit of all. eScrew wanted to share wisdom of zen with ignorant. eScrew did not understand zen at that moment but eScrew was walking zen path towards freedom. eScrew saw ugly flame war and spam Armaggedon. eScrew felt pain and sorrow of failure. eScrew learned good lesson. eScrew realized everyone involved advanced one step towards freedom. zen-forum.com killed zen-forum.com in best tradition of zen zen-forum.com displayed message: i shut down the forum perhaps it will be continued in a few days or weeks - maybe not habu. zen-forum.com killed zen-forum.com by going offline. eScrew refused to kill eScrew. eScrew realized understanding of zen-forum.com decision leads toward understanding of zen. Two years later all is clear.

eScrew will keep writing this shit because eScrew enjoys to masturbate your spiritual sense of self eScrew. eScrew knows that at least one

being will find freedom after reading eScrew story. eScrew story is a code. Bible is a code. Sutras is a code. Koran is a code. Can you hack the code? eScrew is a code which only few people can break. You must be on spiritual path before truth will flood toward your mind and heart. Use eScrew keywords and Google for information. Every symbol of eScrew story is important keyword which will lead you toward freedom. Do you have desire to find freedom? Follow that desire and don't forget to drop it when the time is right.

eScrew Kundalini is rising. Rising Kundalini is very intense experience. eScrew story will help eScrew to deal with crazy Kundalini.

eScrew warning peak oil is coming eScrew warning magnetic pole shift is coming eScrew warning global famine is coming eScrew warning global war is coming eScrew warning global government is coming eScrew warning global jail is reality

eScrew email box

He's actually somewhat intllegent, feigning ignorance and idiocy, and enlightenment. He's rahter interesting if you want to look into the speculation of it all. However, he is a dumbass, and an idiot. He's also annoying, and that story is well, hard to read after the first two sentences. Plus, it brought back my headache. So, therefor:

Personally, I think eScrew should be swiftly shot, hung by his small toes but floss, dangled over a vat of starving parranahs, beat with bats into the kneecaps, burned with a cigarrette, forced to smoke that cigarrette, keep him smoking cigarrettes until he talks like a robot, shoved into a mailbox, and sent into the middle of nowhere in Egypt where he can rot away where no one would have to blind themselves by looking at his worthless form. But that's just me.

Stop mocking him

Nah, he's kool. =)

Dude escrew shut the hell up man your annoying!

.... Well, whether it really matters or not, just stop posting in this thread and he'll probobly lose interest.

it is just that he is a forum troll- he was goggled last nite and has done the same thing to several forums

I troll plenty of forums, but no-one seems to give shit.

Guess not... Though, I hope he or one of the other mods locks this thread. ><

I could have sworn this was locked last nite- oh well

I like that website.

I'm not reading that bullshit. Isn't it interesting how I know it's bullshit, even before I've read it? I think it is.

How can eScrew be any stronger than eScrew was long ago if eScrew does not have control? (Welll that was hard to post . Bad grammar scares me .)

I think you mean quadruple post. o.O Anyways... Zen will ignore eScrew if eScrew keeps spamming useless things. >.> And don't speak like that. It's rather annoying, and grammatically incorrect.

I understand eScrew.

I test your patience in a second.

... Thus Escrew refuses the... "Symbol" of the first person? Gah. How strange of you.

Just one more. STOP TALKING ABOUT YOURSELF IN THIRD PERSON. ITS REALLY *beep* ME OFF. AND > DOUBLE POSTING ASWELL!!!

True, I think everyone should ignore this thread and not post in it.

Yeah so you basically admit to spamming on diffrent forums. I doubt you'll be here for much longer now.

Found another site.

Hmmm. Who is this Escrew anyhow? *Scratches head*

There is a bunch of other forums Escrew join on, this is just one of them. Wow a triple post.

Escrew was at it's best during a time when it was ran by a guy who didnt give a shit about it (oddity).

Hard to get a "symbol" kicked off its host.

Strike's mother should have declared a jihad on her unborn son.....with a coat hanger.

Maybe a retroactive abortion is in order? Strike is doing a number on his decadent western devil brain cells, suicide bombing them to death with cocktails, not molotov, but with a russian name in any case..

That kicked ass...

Hmm- "eScrew."..... Maybe another new-fangled fastener just intro'd? .... Does this mean I have to spend _more_ money on _another_ set of drivers for them??? Sheesh. Den

Ich bin zur Zeit abwesend. In dringenden Fällen wenden sie sich bitte an meine Vertretung

Hello, as you probably already know we can no longer see your posts at ATS. I understand your symbol language, but must read it a few more times to follow it totally. I see your birth and the symbology

connected with it and the physical body and spirit. I would like to understand better, this is Ycon

Escrew, I will get back to you tomorrow night. I sent a message to the skepticoverlord to see what is going on with you. Lets see what he has to say first. Ycon

Escrew, I would like to help, but ATS has a rule that you can't copy and paste replies from someone else. I have gotten in trouble for it in the past. The most I can do is pretend like I am explaining your story. Me and you can write back and forth and I will rewrite what you say and put it into my words. If you just want to me to post your story, all I need is your permission to post it, which you already have. Before I do, I would like to know a little more about Escrew, so I can add a little more to the post. Please help us understand how you came about this story and your location, nationality and age. Ycon

Escrew, the changes on your story are terrible. I wont be posting it anywhere.

Escrew story also has a symbol of censorship which is not proper to the symbol of youth. The symbol of innocense is affected by the symbol of language presented to the symbol of youth. The symbol of light and the symbol of darkness need to come together in the symbol of words without the censorship symbol which is placed on the symbol of a website, so you see the symbol of escrew and the symbol of escrew story will never find a symbol of completness until the symbol of escrew find a proper symbol of language that does not get the symbol of censorship. The symbol of Ycon

What a bourgeois way of thinking!

eScrew owns me? Goody. I have some maintenance charges eScrew needs to pay on it's "property".. where shall I send the bill?

While hanging out with George and Brenda Wirth this weekend after Shelipalooza, George and I were shooting the breeze over coffee about silly posts, silly responses, and silliness on newsgroups in general. I think the catch-all phrase "too much time on his/her hands" came up once or twice. One place in the newsgroup universe with a particular bent for zany (read: wacko!) posts was the Dylan newsgroup, at which we both lurk occasionally. This morning I stopped there and found what I think may well be the strangest post I've ever seen. My newsgroup reading really is pretty limited, but I've certainly NEVER seen anything here at rmmga to come close to this gem. Here's a very small part: eScrew is eScrew and this is eScrew story. This ends what I copied, but it's only the very beginning of a VERY long post. If you wish to view the post in its entirety, it's at the Dylan group under "eScrew". I realize that many of us spend too much time on the computer, but this is..... just mind-numbing. OK..... Now I have to go out and start my shopping..... Enough of this computer stuff. Norman (I Mean Bizarre!!) Draper

You are right, that is pretty strange. I wonder if the guy has read "Confederacy of Dunces." I had a New Orleans ex-friend who referred to himself by an affectionate pet name and wrote in non-stop, running-on, run-on-sentences. He was funny, too, but I didn't have time to read him. We aren't friends anymore. We aren't even acquaintances anymore. I told him that he thought he was Gollum pretending to be Ignatius Reilly. Sensitive bloke he was. Thanks for the eScrew read. :o) Ken, who never speaks of himself that way.

OK folks maybe I am the one here who is not getting it but strange doesn't even begin to cover this post. STUPID come to mind first. I don't know what this clown is on but what ever it is I sure wouldn't want any. Getting the weird, strange or stupid is the ordinary for any NG. I guess there will always be people like this, but don't count me among there fans. Larry

Oh, come on, Larry, lighten up. :o) It is Christmas. We need the strange and the eccentric around these days. The smart, level-headed ones can cause us more problems because there is more of them and they are harder to recognize. Think of this guy not as a dim bulb, but as an occasional strobe in an otherwise dark, uninteresting night. Ken

He posted that drivel everywhere:

I must not be anywhere. I didn't see it. (Thanks again, Norm.) :o) Ken

Hey Norm... caught your headline and thought you were posting song lyrics... but... weren't the lyrics strangest DREAM I've Ever Had..., and I don't recall the word "screw" being in that song anywhere. Okay, you know I know the lyrics, and you probably do too. :) Regards, Arlene

Don't know how to tell you this nicely Norm, but the stragest posts I've ever seen are some of the stories of what you have done to good guitars ... csj

eScrew masturbates alone.

>OOPS, >it's a medical center... >one of the sick got access to a computer. Not necessarily. On sci.astro.amateur, there were a bunch of forged posts containing long book quotations which crossposted to news.admin.net-abuse.email. At first the headers indicated they were coming from a server in Italy, but then the next batch had perfectly forged headers that, in all their fields, looked like real posts from the forgery victims. So there is a new forgery technique going the rounds out there. John Savard

I got so bored with just the first pragraph that I have no idea whether it is amusing or not. With good luck, I will never find out.

Uhmmm...that registrant information you just posted was for escrow.com, not escrew.com....you mispelled it. Here's what I found for escrew.com

How long have you been insane?

Call you doctor. I think your meds need adjustment. Thanks. Uncle Bob

Who the frig is tellin {hotsex} this stupid {head} story? {kneepads}

I think a sleeper cell was just acvtivated.

what are they gonna attack?

We can then consider this to be self-mutilation?

10 seconds to self destruct.

WEIRDO.

What the hell is this? Is it a foreigner with absolutely terrible english but a good spellchecker, some mental hospital lunatic who broke out and OD'd on his meds, or a super-intelligent AI? -M

Awww, it was such a good story until now.

> eScrew > Welcome to eScrew! > eScrew is eScrew and this is eScrew story. [snip massive waste of bytes] Not sure which is less Turing-complete: eScrew, or eScrew's author...

Oops, I meant 'AI-complete'.

On second thoughts, 'Turing-complete' works too.

what the **ck are you talking about?.... get an ELIFE will ya?

Was it really neccessary to quote the entire message just to add a one sentence reply? JazzMan

Can't work the delete button, you must BeScrewed up. Whoever wrote that, HeScrewed up in the head too.

Turned by brain to jelly in three lines. Interesting psychological effect. It is actually impossible to read the entire thing without wondering if you feel a stroke coming on. I wonder what this implies about the author.

(all extraneous parts snipped) Thank you for such a valuable post! It will save me untold hundreds anually in sleep meds!

I hear you brother, and I feel your pain! I can tell that you've tried and tried to get the ignorant masses to understand ...and all for naught! There's only one effective way to solve this intolerable problem once and for all: End your life. At this point, it's your only real option. When you look at the big picture (as you have), surely you see that it's the best you can realistically hope for, given the situation. Seriously, aren't you fed up with it yet? Things being as they are, sooner or later you need to stop grasping at straws trying to convince the unenlightened. Eventually you must take the matter into your own hands. I hear the Japs do it at the drop of a hat. And after all that' s happened, when one considers the issues as thoroughly as you have, doesn't it become clearer and clearer that the whole problem can only be addressed by this one global solution? Yes, I know that no one else will understand -- that's the whole point: when you face the

facts, surely you must admit that the only real choice you have left now is to do the honorable thing. =[d

Get off this Newsfeed eScrew, we`re all serious nuts here. Ashley Clarke

eScrew? eLiza did it better.

eScrew yourself ! \|/.

Actually, this yoyo's been posting the same message on several of the other newgroups I subscribe to. It reminds me of, say, a bored and mischievous adolescent who, a generation ago, would place a call to a radio chat show, get on the air with the host, blurt out an obscenity, and then quickly hang up.

BOC (Bunch of crap)

In Mexico I ran across a curious dictionary that contains 25,000 variations of the work 'Chingar'. The language is called 'Chingoles' and is fluently spoken by millions of people. May I suggest that you begin an eScrew dictionary and share your new language with the world.

>Two years >later all is clear. I can't wait...

OK, you spamming jerk, I'm posting yet another abuse report. If everyone does perhaps we can get *** Google to actually do something about the spam their system is allowing onto Usenet.

I'm starting to see an explanation to the Fermi paradox here... Maybe spam from one of these poor souls has already reached ET (no one is safe) and now we're on their 'black list'? Who can blame them? Seems we need to look harder for intelligent life here on Earth... (sorry, tired when I wrote this)

I think someone got into the egg nog a little early. :-)

Thank you for supplying us with a wonderful soporific. Not funny, boringly long, a waste of your time. "Iti is better to be vaguely right than precisely wrong. --J. M. Keynes

Go screw yourself!!!!!!!

LK Me thinks eScrew, Aero and Boob could become very good friends.

Entra Fidel Castro a un colegio y pregunta a Jaimito Sabes quien soy yo ??? Jaimito le contestó: "No señor, no se quién es usted." > > >Fidel muy enojado le dice: "Pues como castigo por no conocerme, ahora mismo tienes que decirme 20 palabras que comiencen con la letra C para que nunca más en tu vida se te olvide que mi nombre es Castro." > > Y Jaimito le dice: "Compañero, Comandante Castro. Cómo y cuándo carajo comenzaremos a comer comida en cantidad como come cualquier cabrón cagado del Comité Central Comunista Cubano?" > > >Castro furioso le dice: " conchesumadre!!! " > > >Y Jaimito responde: "Ahhhh..... esa era la que me faltaba." > >

I've already kill filed you and posted an abuse report when you posted on sci.astro, and it's a pleasure to do it again. If enough people send abuse reports to Google, is there any chance they will reconsider their policy about spam, or even about groups? -- Boycott Google. Remove spam and invalid from address to reply.

Amazing! But I just don`t have the time for it now eScrew. Ashley Clarke

Hi Ron!

You erroneously entertain delusions of -not grandeur- but significance. Visit Krakow often, Uno Hu

Yeah, well, most of us function 3 dimensionally only. A severe handicap. I don't know if you have the time or inclination to change quantum levels.. but in the off chance that you do.. I note that things can be changed more to the way you would like to see them be. If not universally, then at least, locally.

uh. somebody's got a screw loose.

so what is important to you is the meta-level of the symbolism of having symbols around. Keep trying, you may still learn...

hard to tell; too many words.

ah then escrew is a child!

Hey, TROLL!!! Alt.sex is around the corner for you.

Wow. Some seriously weird people out there.... it's so sad...

So it's good that you quoted it in full in your post.

Serious nitwitting!

... a load of shite. Hey look at me! I'm mad! Woooo! Twat.

The New World Order ... Keep You Simple, Stupid.

Maybe making this a moderated forum isn't such a bad idea after all. Steve.

I would agree with that if it kept idiots like you from posting the original drivel in its totality. Someone had a serious lapse of reasoning to sit down and write that in the first place. And you had a worse lapse in reposting it. Sheesh. Pot-kettle-black
..... Steve

That's why I top posted. Sorry I took up your bandwidth. Steve.

Thank you! You're hired! Immediately. Begin approving (and denying) messages at once! Jon

Geez, do you think that anybody reads more than a sentence of that before hitting "next"? What an idiot!

I had much the same "one-sentence" response, but I hit the "Filters>Make Kill Filter" button.

just set Agent to not pull the bodies for any posts over 150 lines. That eliminates a lot of blowhard drivel, Snopes-fodder BS "Friend Of A Friend" stories, Spam ("Make Money Fast! Here's How...") and misplaced binaries. If it looks from the subject or the responses like something that I might actually want to read I'll retrieve the body, otherwise I just hit the "Mark Read" button and move on. And judging from the reactions so far, I think I'll pass. ;-)

Tin foil for one and make it really REALLY thick this time around....

Insanity snipped

Sure. Has your tinfoil-lined yarmulke blown away again?

Naw just take a cadur in the head and never call us again moron

Nope just enjoying watching you get your shock treatments . moron!

Can you distill it down to 1 kb, not 19 kb of text, Screw? I was somehow lost in understanding the meat of your message. I mean what kind od bull is that? Leszek --- Smart questions to stupid answers

Ahhhh, someone finally invented the perfect ACIMite, a bot!! Good job, now we know what it looks like at the end of the "path".

There is no spoon. There is no eScrew.

eScrew wrote: Screw off.

> eScrew > Welcome to eScrew! > eScrew is eScrew and this is eScrew story been reading Finnegan's Wake by chance?! michael

> been reading Finnegan's Wake by chance?! I'm just glad he was writing it down, and not screaming it at me while I was waiting for a bus :D Wheeeeeeee... I've been eScrewed! But it's not the first time. It's against more than one law to post the results here, though. Not illegal to keep her on my hard disk, though.

> searching for symbol of freedom in order to protect eScrew from Aren't we all?

> you bored yet? i was getting that way, but then you cracked me up and now the torch bearing villagers think I'm mocking them. Thanks eScrew, I wish I could send them your way 8O

<> I read somewhere that if you read a few lines at the beginning and then scroll to the end it will tell you if you want to read what's in the middle. Welcome to APT! But your beginnings and endings will have to be better for me to read the middle. It's true...master's do bate around here. It's call "DE" !

I read it through. He gets somewhat obnoxious in the middle. good for wu-wei.

masterbate... it looked more like throw up..... but then i too failed to read the middle parts :-)

Have just thought of a funny therefore feel that you are an automatic betrayal defaulter upon it. Take your leavings and run. Dave is not akin to and avoidant of most occult fraternities, despite maintaining his interest in life and conversation, because they have only harmed or hindered that which was precious to him. Thank you.

Listen, there are no funny stories about white power. As we all know, white power is serious business, you cunt.

"Mum? Where's that rabbit-headed Lever eScrew? A cork [Hi! Men?] ..." ~ Moi

actually, this was pretty funny Listen, there are no funny stories about white power. As we all know, white power is serious business, you cunt. ahahahahaha.

"eScrew will never enslave you because eScrew enjoys diversity of different symbols." Inadequate reassurance. eScrew is symbol in transition. eScrew symbol not bound to body, to money, to society, too unreliable. eScrew, in essence, is nothing.

the problem is he takes vodka suppositories, administered through his boyfriends tool.

welcome back strike, seems rehab didn't help much. To remedy the problem try the direct application of hot lead to your brain matter. Just aim well, what little there was has surely been further reduced by your copious vodka consumption.

tl;dr Screw yuo!

BTW, keep working Weektor, your page is not nealy as scrolly as Time Cube!! Almost as whack, though.

I wanna know how you get included in the hate mail section.

Escrew needs to get lost methinks....

Hmm, was quite enjoying that until eScrew turned out to be an American with conditioning pouring out of every eScrew on eScrew's eScrew. Should edit those specifics and it would be more valid.

"DO NOT FEED THE "eSCREW" TROLL

What is this nonsense?

you so strange.....eScrew

How did you know I like that? eScrew Welcome to eScrew! [...]eScrew bet [...] you enjoy when someone is taking a dump in your mouth. Well, open it wider here comes eScrew fresh load! Enjoy mothefucker! eScrew

You guys should spend a little time playing in my yard, a backwoods northeastern Pennsylvania county that is the meth capital of the world - with more meth lab busts per year than the entire state of New York. What he's posting looks just like the excuses that elementary kid's parents write after their kids have been out a few days - helping out with chores at home.

It is pretty much accepted that down here in the Southern Missisippi woods and swamps that the fellows can go broke cookin' moonshine. Meth has replacd it as the substance of choice. A stoned granma is watching the kids, while a sober son is doing the meth. They take turns. The others are in jail...everything is OK for the baby until the one doing the cooking tries it while stoned...then we have a big explosion and fire. Too bad about the kids. This was a discussion I had with a deputy about what is going on in the back woods. Ken

I'll have a dose of whatever it is he's taken. Should make all my worldly cares disappear. MH.

Be careful. It might make you start posting your blog in stream of consciousness-form to a.c.l.b-d. (Disclaimer: all similarity to persons, real, imaginary, or complex, and living, dead, or undead, is wholly coincidental.) Groetjes, Maarten Wiltink

Too many hits of blotter Acid .I hope he doesn't have any children.

You are just a little bit full of shit, don't you think?

Go eScrew yourself.

ah then escrew is a child!

This Account Has Been Suspended Please contact the billing/support department as soon as possible.

69.197.189.177 has been cracked and is spewing that junk to usenet. extract header and body to a file, say 177, then place a line like 69.197.189.177 is spamming usenet with this junk. at the top, hen email it to his isp's abuse department. $ host 69.197.189.177 177.189.197.69.in-addr.arpa domain name pointer CPE005018217021-CM001225464378.cpe.net.cable.rogers.com. so I would do a mail -s "69.197.189.177 is spamming usenet" a...@rogers.com < 177 more people complain, maybe abuse dept will notify the owner just to keep their email box from filling up.

pay no attention - it's the crack talking!

eScrews? Aren't they used to repair faulty vpinmame tables?

I thought eScrew was an internet version of phone sex.

No, eScrew is a safe way of paying for phone sex (the porn equivalent of escrow).

I only have sex with men! I can't believe people actually waste time writing crap like this!!

I can't believe you wasted the time and bandwidth to post it all again.

If you reply to it point by point, everybody will believe it! Merry Christmas.

There were points?

I don't normally reply to this kind of junk, but, what the hell was that all about? Granted I only skimmed it but I have no idea what they are selling or talking about or what.

Holey Hell what is that supposed to mean??????!!!!!!! Oh wait no that sounds familiar, I'm still looking for some sort of juggling related stuff seeing as how it's a juggling forum and all but uh...I think we know where that came from.

And a quick visit to http://www.escrew.com shows nothing but the *same* story. No JavaScript or other funnies visible on the page, just plain text. I'm now running a quick search to see whether there are any other newsgroups which have it. (A quick script, but it will still take quite a while to produce results. In the meanwhile, it is time to killfile this turkey. Enjoy, DoN.

Just a curiosity, could anything be gleaned from when it was posted coincidental to any other postings at the time? Respectfully, Ron Moore

Considering that it is hitting *lots* of newsgroups, I don't think so. What newsgroup would they actually be posting in as a normal user (if any)? I found it in 61 different newsgroups, and I only get a partial news feed. This includes (appropriately enough) "news.admin.net-abuse.usenet" :-) I've just modified the spelling in the Subject line (added spaces) so this discussion won't be killed by my filters. The best choice is to just add it to filters.

About as funny as an iron lang.

Neat!

After my joke i was looking at the words and they dont seem right. Either this person is a lunatic or it could be an encription. Just the conspiracy theroist in me talking but ya never know ;)

Actually, I think you may be right. Theres some numbers in there as well... maybe some importance. Send it to the FBI or call them and report it. Could be terrorist related.

I couldn't find anything either funny or related to motorcycles in this. Did I miss something?

> Did I miss something? Here have another...think of that post as a particularly small bug hitting the bug zapper. Cheap entertainment: 1 Bug Zapper + 4 cases of beer + one fine summers evening = quality entertainment with little rishk of inshuries. Oh and mind the bottle tops, damn dog knocked the trash barrel over.

Christ, who needs IRC when you've got a fast USENET server.

Hey, I'm enjoying it while it lasts. I'm stuck with a dial-up that at best will give me 44kbps...more often than not it's 42.4kbps.

Ahh, the perfect New Years Day email present.

Net sex takes a bit longer.

anyone ever hear of eScrew?? eScrew me.... eScrew you... WTF??

eScrew = eGO!!

Well, it made it funnier, I thought.... SCREW YOU, HIPPIE!!! ;)

Get lost, ya fascist pig! =)

But where's the part about "In Soviet Russia,..." ?

someone with a LOT of time on their hands and a psychological problem? I dont get it. mark oppat

"Funny story about chem" nothing funny at all!!!!!!!!!!!!!!!!!!!! shut up, and don't contaminate our forum.

Yes, that was hilarious. Now get fucked.

Who runs eScrew.com? We've had a rash of idiot spammers from eScrew posting such junk as: "I can't believe this! Link 1 to eScrew Link 2 to eScrew Link 3 to eScrew Link 4 to eScrew" etc. Quite annoying so I've put eScrew.com in my banned words list. I know it runs vB so the owner has to be around here somewhere -- if it is you please STOP spamming our forums or I will contact your ISP and have your account yanked.

Matt, you're not the only site that has had problems from members of ecrew lately.

I grow tired of the few that we recieve and its board of only 152...

So it is something they/he are/is known to do? Ok thanks!

I just checked your site, you have a "Victim of the day" thread where you pick a target and send your minions.

Yeah and how about you yourself MR STrike signing into my old member name on your very own site and psoting all sorts of garbage about me? Watch how quickly this gets back, he will say something like Odil is crying about blah blah blah... and he will post it using my very own member name on his board. Odil

LOL you must be joking right?

For one thing, I would never go back to your site with all of your members racist comments. Anyone want to see what I mean? Do a search on his board (escrew) for the member name of Odil and you will see what I mean. Lots of stuff from the past few weeks I am sure. Odil

Where?

Trying to educate them is like trying to tell a ferret no. I am done replying here. Odil

This bickering is not appropriate here.

Hi everyone Well I am having a hug problem with people coming to my site who are coming from another site I posted at for a short time. That site is escrew.com and alot of those people are rascist people who don't care who agrees with what they say. Well one of them came over to my board and started right away flaming my members. I banned him right then and there. well off and on, other people from that site are coming over and purposefully starting trouble without being invoked. Now according to this thread it looks like more trouble is on the way. That link is from their site talking about mine. Befors I read that thread, I had banned at least 5 differant people who came over and started the same thing. What can I do other than banning them? Nothing? Our board just wants to be left alone. Odil

restrict registration in your admin cp -> options -> vbulletin options -> [user and registration options] . there are several methods in there. i would moderate new registrations (so they can't post until you give the "ok").

I think I may do that for a few days. Thanks! Odil

Hi again Is it possible to allow new users posts to go in to a moderation que, then I approve them to be posted? Odil

Not with vBulletin, but there is a hack for this at vBulletin.org.

post moderation is at the forum level, not the group level.... so no firefly (or another vB dev), this is in vB3 right?

I've had "invasions" before. just require email notification, temporarily ban hotmail/yahoo emails (be sure to keep from banning current, the option below) every troll post delete/move to private recycle bin. don't address it.. they want the attention from it.. be real discreet and quiet, and they'll get bored and go away

Well they will soon run of out ips and user names and email addresses I hope. I did try moderating new members for a few new members just now but to me it sounds like I would be imprisoning them. I guess I will just keep banning, and deleting till they give up. I am so sad at how mean people can be to people they don't even know. Odil

Not suprising coming from that site If they have dail up modem, they get a new ip every time they connect to the internet. If they are not using AOL, your best try is to e-mail their ISP

Odil, I am having the same problem, with the same group of people. I turned off new registrations yesterday after deleting over 50 posts, and banning a half dozen members. I sent strike (webmaster of escrew) a PM, to find out what the heck is wrong, but have not yet heard back. Good luck with your forums!

Send them to here then to the emails they register with, send them PMS and i'm sure they will be hugged sooner or later

Ok several months ago, I had posted on a forum many of you may know about but not want to ever join, that board is escrew. As many of you may know, that board seems to be filled with 12-16 year old punks who sneek in to use Daddys computer while he is at work. I had not posted on that site more than 10 times after people on that site began personally attacking my sister and I. Well I went there to read something someone had referenced in a post on my forums and well to my surprise, there is my member name set up exactly the way I left it, posting these rediculous posts there. I have no doubt who the person is who is logging onto my old account there, the same person who other board members there has said is logging into at least 5 other peoples accounts. There are no moderators on that board other than the owner who posts there and does not deny the fact that he is using other members accounts. This is the same board whos members have "who can get banned first" on this or that message board. I have had more than my share of these losers on my forums. Any thoughts on what I have said especially about the owner using my member name and others? Odil

I think the admin for that site posts here occasionally. Or in vB.org... Not sure. I'd contact him, ask him to remove the posts.

Um he is the one using the other members accounts. There are no other admins or mods on that board and he doesn't deny he is using them.

he posts here.. him and sinecure are close.. one of them will see this...

hey odil. you know who I am, I'm sure. and I'm sure you'll ban me in a second but I'm not here to start a fight or spam your board. first it's

not strike posting as you that would be some one else who hates you even more. though strike is giving away the passwords to acounts that are no longer used. second of all. if you don't want us coming here than dont come to escrew. I thought me and DLD agree'd that there would be no cross board posting. it's the only way to keep the peace. take er easy. and to any escrewers who read this and wana flame me take it to escrew. I'll smoke you there.

It's nice to know i shut down an illegal VB.. Sure this has been said before, but i got a smile on my face when i went back to a site i reported a week or so back too see it have a PHPBB critical error... Ah, so goooooood.... Do i get a cookie now? Please...

Probably not as good as I felt after getting eScrew down. Got 'em down on their first host, then they came back as the First Ammendment Project, then went all Buddhist, then went gone completely. @_@

Really?

This reminds me of those door-to-door missionaries that used to bug me until I told them I didn't believe in anything . I'm willing to bet that whole topic will appear on eScrew as well.

Yeah, you are. And other industrialized nations have similar laws. A board that struck me as interesting was eScrew, they have nothing but adult content and yet no COPPA registration or any way to verify registration.

That's because they don't have to comply. COPPA only applies to sites that are directed at children. From the FTC site: "If you operate a commercial Web site or an online service directed to children under 13 that collects personal information from children or if you operate a general audience Web site and have actual knowledge that you are collecting personal information from children, you must comply with the Children's Online Privacy Protection Act." There's a lot of mis-information about COPPA out there.

Okay, but what constitutes "for children"?

Well, not porn, not adult discussions a la Salon... Really, it's not that hard to figure out. Hardly any vB's I've seen have been directed at children. "To determine whether a Web site is directed to children, the FTC considers several factors, including the subject matter; visual or audio content; the age of models on the site; language; whether advertising on the Web site is directed to children; information regarding the age of the actual or intended audience; and whether a site uses animated characters or other child-oriented features." Here's the link. COPPA is only relevant when you are actively collecting information from children, i.e. a poll or contest on the Lego site.

You don't have to have it enabled, but it doesn't hurt. Unless you're specifically dedicated to kids fishing, it's not required. You can have whatever nudity you want, as long as you're not aiming it at kids.

Be aware that COPPA is only a protective measure. The only time it will become relevant is if a youngster falls into trouble on your site. It's when the child's parents sue, that's when COPPA will be present to either protect you, or prosecute you. If you keep all other precautions, you should be safe.

There's the soft "if you have actual knowledge" qualification though. If you run a forum with some mature content (IE swearing) and you operate it as if your user base is adult, and you're not knowingly solicting information from children, you don't need COPPA. Don't let COPPA scare you.

how to avoid and get rid of escrew Who is escrew? escrew is an unorganised group of people who attack forums by writing bulk nonsence. the backbone ist the URL escrew.com. this URL ist redirected to the forum temporarly under attack. What can be done against escrew? Since they come from the domain escrew.com it is simple to block all user comming from this domain. this best works with mod-rewrite, an extension to the apache web server. the code to apomplish is is: Code: RewriteEngine On RewriteCond %{HTTP_REFERER} ^http://www.escrew.com/.*$ [NC] RewriteCond %{HTTP_REFERER} ^http://escrew.com/.*$ [NC] RewriteRule ^/(.*)$ - [F] simply put it into your httpd.conf file and restart the server What can i do to not to be an aim of escrew? Well, the person running the escrew.com domain mostly surfs the net via cable by rogers.com. Since this is a small company, you do not lost too many visiters, if any at all, when blocking all their customers. this way the leader of escrew will hardly be attracked by your web site since he will not see it. The mod_rewrite code for this is: Code: RewriteEngine On RewriteCond %{REMOTE_ADDR} ^66\.185\.* RewriteRule ^/(.*)$ - [F] Or leave out the first line if you have already included the code above. Why do people do that? I don't know, really. here is a statment from owner of the domain name: http://www.prweb.com/releases/2001/5/prweb24564.php What else can you do? escrew is using a service by redirection.net to acomplish the redirection. write to support@redirection.net and ask them to quit services with escrew. I guess if enough people explain the situation, the will cacel services - they only make 15 $ on escrew... What else should i know about escrew? The person running escrew also knows a bit of vBulletin. He had vBulletin on his site as well. He is here in this Forum too, under the name strike but since he doesn't run his own Forum anymore, he not here anymore. A post by strike Why am i posting this here? I thought anyone with a board under attack will go the the place for help, where he bought the software. And he/she will search for escrew and hopefully find this message how to get rid of those people. Another reason is that he uses this very Forum to seek other victims, as seen on this thread http://www.vbulletin.com/forum/showthread.php?threadid=61051 the thread is only 4 posts long - read it and them go to http://www.zen-forum.com : it shut down. I by chance knew this forum and just check out google (http://www.google.com/search?q=zen+site:zen-forum.com) to see how big it was - in fact it was one of the largest Buddhist/Zen Board around. If your want to know which board is under attack at the moment check

out http://www.escrew.com and watch the take-over.

Sorry but this is spam. Closed.

In a perfect world, people are supposed to police themselves, and so they are bound to respect one another. But, this is not a perfect world, and there are a lot of boards out there where you get kids who post all over the place like they own it, and do not care what people think. That is where admins and mods step in--to keep the place from destroying itself. Most boards that folded up are the ones who have little moderation in place, and everyone just basically stepped on each other. Ironically, I would think this board is moderated, so like a post here said, we wonder why you're even here in the first place.

There is a difference between moderation and censorship. Moderation is, in relation to BB's, closing a thread because it becomes a huge flame, or moving a thread because its in the wrong forum. Censorship, however, is bleeping out words. I believe in moderation mainly because I don't want my members hating each other, however, they can cuss all they want and I don't mind. -Vic

Moderation is only neccesary to remove posts that are racist posts, mock events such as that of september 11th, and keep swearing to a general low. A little cursing here and there isn't going to ruin someones virgin ears. In my opinion moderators are needed.

It all depends on what your board is about. If it's a free-for-all place where anything goes, then yeah moderation might interfere. However, if you're trying to build a friendly community moderation is an absolute must.

To have a professional, well-visited forum you need moderation. For most of us, we aim to make our forums among the best in the industry - to be known by many people across whatever industry we focus on. A forum without moderation doesn't have a hope of achieving that.

a board without moderation would be a out of control post-fest, it just dont make sense, moderation is a must and very necessary

I'll be damned if anyone uses my forum for warez, among other things(previously mentioned). The problem is the boards with arrogant moderators. They cause problems...but then again, just don't go there. Places with NO moderators at all are often not a fun place to be, though. What really irritates me about moderators and a community is every action is scrutanized. People don't understand that just because they don't think someone shouldn't be banned for warez doesn't mean that that will actually happen. Things like that REALLY get on my nerves.

it is i think, but from looking at the first page on your site it looks like you are very interested in things uncensored , just becareful with your sense of humor and dont take it too far. i have no idea what happen but it looks like thats whats happened

So you think there's a such thing as a good poster? Even the best poster is not perfect and so he/she will eventually make a silly thread like this one. And if there is no such thing as a good poster, then why go to any bulletin board at all? Mark Hewitt made an excellent point. If your moderators have given you this image of moderators then you need different moderators.

Unfortunately that's true. We are all utterly devoid of any meaningful sense of humor. It's part of the job description that we must adhere to if we want to remain as vB Moderators!

The problem with your post wasn't our so-called lack of sense of humour. I think it is unacceptable for two reasons (and this is the first time I've seen it - just taken a look now). First it is parodising the extremely popular vB Board of the Month contest - not a great idea in the same forum which that contest takes place in. Secondly, I think I can speak for most of the members here when I can say we simply do not want to know about what you posted - it's not a topic that crosses my mind very often, and I'm sure that's the case for most other members. If you've got a problem with our actions here as moderators, then put up with them. Nothing about the way this forum is moderated is going to change, and I'm sure most people will agree that it is fairly well-moderated at the moment.

Don't you think there should be a contest called: "The SICKEST vB Board of the Month contest"??? or "The WEIRDEST vB Board of the Month contest"??? or "The MOST SHOCKING vB Board of the Month contest"??? I think that would be really fun contest. If anyone else want such contest please cast your vote in support of my idea. Thanks!

Let's see... After looking at your forums, your original post makes sense. The top thread on the forum at the time was this: "how many girls have you fucked", by "dateRape" With forum content like yours, no wonder you don't believe in moderators. Some forums want to maintain direction and relevance, and thus rely on moderation. Some, like yours, are free-for-alls. There's room for both, but you should really have qualified your outrage with "Bad Moderators." I'm off... Gotta see if these threads have been updated: Please don't post innappropiate thread titles

Good moderators are only determined by how good the admins keep them in check .. hence, if you encounter bad, abusive moderators, their admin is usually an idiot

Funny, that.

I generally let ppl post whatever they want on my board, as long as its not racist, pron or illegal stuff (warez etc). I run the board just for fun, and its great just acting goofy and talking about weird things. I really dont need any mods, because we rarely get flamewars, and I hardly have enough ppl on my board to warrant more than 1 mod. I just add mods for the hell of it I or the mods usually close a thread if it remotely heads into a flamewar. But since the forum has been up since

July of last year, I've yet to ban anyone. I just want my forum to be laid back, and ppl can talk about whatever. If they really want a serious political discussion there are a million other forums for politics and debates etc. But thats just me.

I've seen your forum, Strike, and it looks like a bunch of 12 year olds who finally found a place where they can misbehave without being spanked. If that's what you were aiming for, then congratulations, you have been successful. I think you will find that most adults don't really care for that kind of site.

And it looks like you're trying to be spanked right here. /me puts on flame gloves...hoping...waiting...

It is not bad moderation when done in threads that are lampooning the very act of moderation.

If taking sides means defending themselves, like they are doing here...then you're correct. Please learn to spell...before trying to "proove" any more of your "points".

this thread = boring

Not only is it boring...but it's bait. I'm going over there ------>

Ok...I didn't quite leave yet. Your credibility and any chance of being listened to are decreasing with each and every glaring spelling and grammar error you make in each and every post. You should spend less time pretending to be a stud on your weak ass website and more time doing your homework... Now...I'm going over there with smachol and his enormous signature.

LOL, hilarious that someone who reiterates that moderation is a bad/boring thing will now demand it ... kinda fun to contradict yourself, eh?

Strike, if you hate moderation so much, then dont post here. You stated yourself that you WILL NOT post on any board with moderators or has moderation. Well, believe it or NOT, you can't even hold true to that claim which means: You're a troll and the only attention you can get is trying to "start" a "flame" war just so you can get the attention (which basically is what this thread is turning into). IF YOU dont like moderation, FINE, that's your opinion. YOu have a site that doesn't have moderation, then hang out over there. THIS IS A business site (if you haven't noticed) and what is reflected on this board is ALSO a reflection on the company that produces this product. If a person who is checking out the software comes to this board to see "who is here" and see nothing but FLAMES and swearing, would the consider in dealing with a company that CAN't even moderate or control its own users who post here? If you're a grown adult then YOU should know when certain behaviour is accepted and when it's not. So, either hold to your claim of not posting to boards with moderators (which is about 99% of all forums out there) and leave, or behave and see what moderation can do

to HELP your community. BTW, IF YOU knew anything about using your board, you'd know who posted that thread/post because their IP would have been shown (to the admin), and blaming "us" for that post only shows your immaturity and lack of common sense. This thread should be closed, for all our sakes.

Strike, if you hate moderation so much, then dont post here. You stated yourself that you WILL NOT post on any board with moderators or has moderation. Well, believe it or NOT, you can't even hold true to that claim which means: You're a troll and the only attention you can get is trying to "start" a "flame" war just so you can get the attention (which basically is what this thread is turning into). IF YOU dont like moderation, FINE, that's your opinion. YOu have a site that doesn't have moderation, then hang out over there. THIS IS A business site (if you haven't noticed) and what is reflected on this board is ALSO a reflection on the company that produces this product. If a person who is checking out the software comes to this board to see "who is here" and see nothing but FLAMES and swearing, would the consider in dealing with a company that CAN't even moderate or control its own users who post here? If you're a grown adult then YOU should know when certain behaviour is accepted and when it's not. So, either hold to your claim of not posting to boards with moderators (which is about 99% of all forums out there) and leave, or behave and see what moderation can do to HELP your community. BTW, IF YOU knew anything about using your board, you'd know who posted that thread/post because their IP would have been shown (to the admin), and blaming "us" for that post only shows your immaturity and lack of common sense. This thread should be closed, for all our sakes.

They dont take sides, again assumption on your part is wrong. They will delete threads that are insulting, harassing, sexually explicit or promote illegal acts (warez). ITS still a community and there is no REASON To delete this thread (it does pertain to how forums are run; without moderation: yours a good example and with: 99% of those on here who does). We have to wonder why your "mantra" doesn't work so well in the real world. There is nothing insulting in this thread, though you are testing peoples patience with your tripe. Bad moderation (IMO) is your board, and the funny thing is that even with all that is going on your site, you could be getting your site into major trouble with the ISP you are with (they might have rules against certain activities on their servers) or postings on your forum could lead to a potential crime. There is nothing on your board to be "happy" about; I'd for one would be ashamed to see that this kind of thing is ACCESSIBLE to kids (I doubt you even run coppa -= which bTW is required by law in the US and which your server resides on - vdi.net)

Then your claim is false, and that makes you "a liar". In all fairness, you put yourself into this predicament. YOU badmouth moderators saying that they are ALL BAD, but as pointed out to you SEVERAL times, that moderators are only as bad as ADMINS let them to be. ANd you made the assumption that moderation is bad, and it has been pointed out to you

SEVERAL times that moderation is needed should you have a more directed site that wants to remain civil. Flames and wars and tantrums are the result of different opinions of their posters, but an argument can still be held without resulting to swearing, harassment and the occasional sexual content. YOUR site is uncivil; there's the difference. Sorry, the world doesn't revolve around you or your site. No one insulted you (just pointed out that instead of spending time on your forum, you should be spending more time proofreading your postings). Mispellings are common but when the author of a post doesn't even bother to re-read what he/she has posted, the readers will have a less time trying to take anything they say seriously. Right now, I dont even take you seriously, because your behavior is that of a TROLL. What you need to do is get away from your uncivil site and try out those sites that are moderated and see what happens there. IF YOU can't find a board without moderators, then thats your problem. NOT OURS. So dont make your problem our problem. IF you can't find a board without moderators, maybe that's telling you something...huh?

I wasn't flaming, I was stating my opinion. I've looked at your board several times, just out of curiousity, and I never saw anything compelling enough to make me want to stay. If you consider that flaming, perhaps you need to thicken your skin before trying to start arguments.

If you can't see in this statement above why we disagree with you, then the only person who needs to be "moderated" is you. YOu assumed he was flaming, and he wansn't, which only shows that you are prone to start wars, arguments and are not "thick skinned" enough to handle any argument you start. Need to get away from bad influence, cause they aren't doing you any good. You have had several "intellegent" responses from this thread alone; many of which gave you the justification for moderation. The only "agressive" behaviour being shown is you jumping down our throats when we give you those justifications. To understand both sides, you must be willing to accept the reasoning of others, and then be able to contribute your side without being offensive, and defensive. We said moderation is needed when its needed. You can have an unmoderated board if you want; that's your business. WE choose to have moderated boards and we find the advantages of moderated boards to be over unmoderated boards. Its good to have a place to vent your frustrations; i personally dont do it online or on a forum. I just go out to my garage and hit the punching bag or practice my judo on my cousin (who can kick my @$$ anyway).

According to this logic we shouldn't have homes, cars, spouses, kids, etc. Heck, even the best admins are not perfect, why even run a bulletin board? Nothing is perfect. Why even live at all? Oh geez, now I'm depressed. Well there is the gay guy with the female cartoon avatar that pretends he's a woman and gets everyone to talk dirty to him.

What the Fuxk

I don't think this is the correct place for such a post. But then again I could be wrong...

i think it was a waste of time typing that so i hope you copied n pasted it from somewhere theres no way on gods fine earth im going to read all that so in actual fact yeah ! you wasted your time

It's sad that you don't crave any knowledge and are only interested in posts such as "omg lol that was funny". If any post is over 2 paragraphs people can't be assed to read it, todays people are such lazy bastards.

If I recall correctly, this same member made a post a while back linking to his website and it was locked for spam. He is returning to see if he can make it "legit." You can find his previous post at http://www.vbulletin.com/forum/showthread.php?t=86793 . I think it's in rather poor taste to repost something that was obviously not appreciated by the admins.

Yeah, but last time he just posted a link to his website. This time he actually pasted the article in his post.

hi, im remya. i was browsing the net loking for positive and negative energies andcame across ur post. i was very glad that at least there is some one else in this world who believes in my philosophy. i entirely agree with ur concept of positive, negative and neutral energy. can any one explain who is god and where does he reside. god is simply the sum total of all the enrgies in this universe. the source of all energies in the universe. that is the universal energy of which all of us are a part of. the scientists have discovered all the facts regarding energy and energy transformation etc. but none was able to corelate it with god. the source of positive and negative energy is neutral. its us those who convert it into positive or negative. The energy which fills this entire universe is what we call god. the negative is called satan in terms of christianity. in this context lets analyse what soul is. its nothing but the energy with in us. when we die, where does that energy go. both christianity, hinduism and other religions believe in the existance of soul. but the exact nature of soul remain unexplained . the reason is soul being energy is not visible nor can be felt. when we talk of liberation of soul, what is meant is that our energy gets mixed up with the universal energy instead of passing it in to another body. if we can think in terms of energy all our confusions will dissapear. Mr. viktor, when ever great philosophers like jesus and some onewho said the earth is round, and men evolved from apes spoke out the truth, people thought they were insane and insulted them. the blind people cant appreciate what vision is if a person with vision describes it to them. like wise the ignorant cant appreciate knowledge. so please dont get disheartened by the sircastistic comments of people. i know u wont let negative energy flow in to u. please continue to post such valuable ideas. thanks

In many states in the USA, you would be considered a manditory reporter... meaning that, if you have any reason to think that someone

may have abused a child, then you are required by state law to report it to the authorities. Please visit this link for more information... http://www.acf.dhhs.gov/programs/cb...ons/rpt_abu.htm I understand you're in Toronto, but maybe Canada has similar laws to protect children. Please make some calls. If the first contact you call says that they can't help you, then please call someone else. Don't be quickly put off from taking action. Many people might not know what you can do, so they will assume you can't do anything, and they'll say that with a "voice of authority". Please... keep trying.

Please see my above post for some contact info ^^. Also, please disable that user's ability to edit or delete his own posts... the authorities may want to read everything he's written.

First of all, please remove that link... I haven't looked at it... but if it's a link to child porn, then please please please remove it. WAIT... I mean remove it from the vbulletin forum. Don't remove it from YOUR forum... instead, move that particular post to a forum which only you can access. AGAIN, please disable that user's ability to delete or edit his own posts.

tubedogg, thank you for removing that link. Strike, contact the authorities in the state in which that user lives. Tell them everything you can. It's their job to analyze the evidence... not yours.

Track him down through his ISP.

This is not the place to post his personal info. You need to contact the authorities about this - and you need to do it now.

If you need help in "how" to track someone down through his ISP, I think it's okay to ask for general instructions. You don't have to post his actual IP and email address, in order to get instructions. I would help you with this... but I don't know the answer. Would someone please help out?

You can use Sam Spade to trace the IP address and find out who to contact. However I would just contact the Police and give them all the information you have.

Just report him to author. they will investigate further and handle it

Strike, that's commendable. Many people would have looked the other way. You took action. Did you leave your contact info, so that the FBI can contact you with any questions? I would also contact his ISP in order to... (1) Let them know for their own reasons. (2) Find out which state he's in... if he's in the USA. This is because reporting child abuse is handled state-by-state... it's not a federal situation, according to the info found at the URL that I posted in the beginning of this thread. So, in case the federal agency can't, or won't, investigate, I'd tell that user's local authorities as well. Telling the local authorities may actually be more important than telling the federal authorities.

it would not surprise me if you have many pedophile's on your board.

Contact your local police. They can then forward it to the RCMP and the US FBI if necessary.

I have some knowledge in this. Child pornography is a very serious offence, but the FBI reporting system online takes too long to process (there is a lot of 'questionable' material out there where you cannot tell the age of the person). Many companies intentionally get eighteen year olds that look fourteen or fifteen for profits (even though there are now strict laws about this). Contact your local FBI branch and simply report it. By reporting it, you've done your part and get the child porn off your website immediatly (but get proof of it). By hosting child porn (even if you don't even know you have it) you are in violation of the law. Make sure you're dealing with child porn before giving the FBI (and INTERPOL, maybe) more work. Family pictures, artistic pictures, etc, are not considered child porn. Unless the material is explicit (genitilia exposed in a provacative way, etc) then it's technically not child porn.

any playing of junior detective that you do has the potential to screw up the legal case. You recieved some good advice. You have reasonable cause to believe that he is involved in child pornography so you need to contact the authorities.

maybe canada is a little different but while it may not be admissible for a conviction it could certainly help in forming probable cause for a search warrant....

yup.. doesn't seem like you have a lot of choices.... Sorry dude it sucks to have it happen on your board... but look at the good side maybe you have a chance to save some poor kid from this crap...

Make sure you have COPPA enabled, your site has adult content and you don't even verify email addresses during registration.

You run the Jerry Springer community judging by your forums .. Heh .. just kidding ..

Maybe his communty just puts the 'fun' back in dysfunctional!

nope no cookies community smells like a russian word

I know a community is doing well when a user comes back after a long (or even short) abscence, and more than one person says 'welcome back, we missed you'

Simple way to resolve this: Does "tmachine" (or whatever her name was) still post there?

Friend? You have some freaky friends!

Maybe you could write an e-aids mod/hack for your members. You know, you e-screw you get e-aids. It's only fair as I see it. If the only life you have is e-screwing, then you should have the opportunity of

getting some computer mangleing disease that renders your hard drive useless. First Amendment Rights have been used to protect just about everything except its original intention. I'm happy e-screw is a canadian business. Nice flag. Best wishes, Hooper

some of us are lazy - www.escrew.com

Yes that site is just so intelligent that they have a thread discussing sites that they can have a banning contest on. Some people have mental problems there I have noticed. I have my go around with them.... They even have a link to the page here that lists everyones vB sites so they can choose sites to cause trouble. Odil

Damn and I thought my Sleazy Sex Story forum was weird lol

That aint weird, it's just shit. I dont visit many other boards so dont really know any other 'weird' ones.

Thanks Jake... now you've just led some kids down the dark path of no return...

Is he running a legal vB? He should have his license revoked for this banning contest etc crap.

Oh dear, look what I've started...

Yes he runs a legal board unfortunately. Several months ago, he was offering people their own copy of his EScrew board for like $7 a month run off his own server untill he was shown that what he was doing was illegal. Someone then posted a link where they could get it for free. This is what you get when you refuse to ban anyone. Odil

only if he is violating the license agreement. banning contests are not against the agreement - http://www.vbulletin.com/license.html

he's board is a q3w R&R wannabe board. but like I said earlier, if you have a problem with people on his board, or inciting things, then report it to his host. Show them something and they will take action (usually) by the way, strike, nice avatar. a person on my site's the one that made it. glad you like it

His host, hostrocket, is a joke. They are the AOL of hosts.

LOL that's true, go to WHT and that's all you see "HOSTROCKET IS shit" etc Anyway, weirdest board I've seen will have to be mine

escrew just got suspended:
http://www.webhostingtalk.com/showthread.php?s=&threadid=83673&highlight=escrew
edit -guess the nuked they thread. It was entertaining to say the least. As for HR, they offer more than any host I've seen so far, but thats just about the only reason I've stuck with em. We've been getting poor (or outage) performance recently, and its becoming a real annoyance. Shopping around now for another host that can offer what HR offers for the same price, or close to it (VO is a bit pricy but we

might have to bite the bullet anyway).

Damn I missed the show! Can someone summarize what happened to escrew?

Fortunatly, I saw the thread before it was killed. Basically, escrew had a lot of members that had posted pornographic material in the form of attachments and avatars. Their account was suspended and now escrew is looking for a new host.

I take it he got reported to his host

You sure the contract isn't nullified is you break their terms?

Not true. It depends what they have in their TOS.

And a company like host rocket will have taken something like this into account (I can imagine you're not the first that they've done this to)

It's your responsibility to read the TOS, if you don't agree to it, you don't sign up. You can just say you were too lazy, you have to "Agree to the TOS to continue". The TOS will say that they reserve the right to suspended or shut down any site that contains warez or adult material because let's face it, all hosts do that. So, the contract gives them the right to do what they did. You think they would knowingly go against a contract? Hosts like these shut down sites hosting content like that left and right. It's nothing new to them. You're going to end up losing more money if you go off on some shooting spree with a lawyer. Good luck

Here is what they say Agreement Between HostRocket.Com And All Customers Activities Subject to Immediate Deactivation. Any Hosting Account that is used for Illegal, Abusive or Unethical Activity may be immediately deactivated by us without warning to you. Any misuse or overuse of the server will result in immediate deactiveation of an account. Illegal, Abusive or Unethical Activities include, but are not limited to inclusion of or linking to, pornography, mp3's, obscenity, nudity, violations of privacy, hacking, irc related scripts and programs, non approved server scripts, eggdrops, computer virus, gambling, or promotion of gambling, and any harassing or harmful materials or uses, as determined by us. You agree to indemnify and hold us harmless from any claim resulting from your publications or use of Illegal, Abusive or Unethical materials. Although we will make reasonable efforts to alert you to such activities and allow you an opportunity to cure them within a 12-hour period after discovery, we are not required to give notice before deactivating your use of our services if, in our discretion, your use is or results in Illegal, Abusive or Unethical activities. If a Hosting Account is disabled, the regular monthly fees still apply. You still think you can sue them?

And they can fight the charge by providing proof of what you've done, the violations, and their TOS.

But if the credit card company refuses to honor your chargeback you'll be stuck with it. If you don't pay it it'll get sent to a credit agency, where interest/penalties will accrue, and your credit will be damaged. But beyond the credit issue, I think you should just swallow this bitter pill. It was your fault for not abiding by the TOS you agreed to. Perhaps they should credit you for the remaining unused credit, but you don't have a right to a full refund. To try getting that via a chargeback would show a bad faith effort on your part.

Who's Brendan?

Man so your adding slander/libal to your list??? If you chargeback, HR can fully pursue your credit card company to reverse it, and get the money back, if your credit card company is stuck with the bill, they'll be more than happy to mark it down on your credit history that you refuse to pay bills... Whenever I have a user that breaks my TOS and I suspend them, and they try the charge back crap, I always contest it with logs.. So far only had one charge back go though, and thats mainly because I didn't feel like contesting it, it was for like 3 bucks But if just try to piss HR off, then you'll give them a reason just to pursue you if you chargeback...

"I'm gonna sue" The default response of Internet whackjobs when they get spanked.

Are you sure Strike is just another regular "internet whackjob"?

Well, I doubt he has the power to close his mom's visa card.

Oh, the funny thing is he publically insulted this Brendan on that thread that was posted here.

Heh, that what I was thinking too. What a parade of the damned... and a good advertisement for birth-control.

Time to revoke this kid's license.

Better go download a phpbb dude.

Time to close this thread...

such hostility over there

the idea has potential. i'm thinking it would work best on a forum that covers a broad subject area and then people who want to focus on a specific subject area within yours could buy a single forum on your forums.

I think its a good idea to be honest... however you should capture a specific market and not try and encompass everything. My forums offer free vB sub forums to clans and projects in the gaming scene, specifically Unreal Tournament and a certain way its played. We don't charge, but I'm sure if we did people would want a little more for their money. IMO you would need to develop: - A community control panel to let forum leaders moderators modify their own styles - Certain admin

options which are currently global to be made specific to a certain sub-forum or usergroup - A slightly different visual approach to the co-branding so that you wouldn't list 100's of forums on the main page.

Now that's a good idea, try it free, then if it's successful it would be easier to charge later on.

Well it started off a good idea .. it just keeps going down hill now !

Due to the fact that your "ecash" program is making unsubstantiated claims about income potential along with out proper disclosure of terms, payment procedures and other required information and the fact that the apparent scam is targeting Americans, I am reporting your site to the FCC for the purpose of being investigated for telecommunications fraud.

that's a good idea seeing as all of the internet rejects end up there.

What's so funny about a porn link?

That's interesting.

Go eScrew yerself.

eScrew Your F-in MOTHER!!!!!!!!!

At least *it* (aka eScrew) is more entertaining than Marty the Martian aka Lil Nicky (He's never been to Earth. He's never even slept over some other dude's house.).

So interesting i might just get someone else to some it up for me

All is symbol.

That just about sums it up. Am I the only one that reads all of it? Its pretty funny that someone would waste so much of his life to write that, then for someone like me to waste so much of his life reading it...

eScrew, just shut up. Dear eScrew: Have a Merry Christmas and a Happy New Year! (Never argue with an idiot. He brings you down to his level, then beats you with experience...)

your going to escrew your eyes up by reading this stuff !!!!! unrealize

> Time to close this thread... so soon? ok > Well it started off a good idea .. it just keeps going down hill now ! They do. Shit happens, then you die.

Except for those that hold tightly to the myths of dis-information, opinions, and unsupportable or incorrect 'facts', most all this stuff has been debunked years ago. For those that prefer the straight and unadorned facts, they can be found in the Google archives of A.R.E. ` o

Rich~~~~~~~~~~~~~~~~~~~~~~~~Sailing the CyberSea~~~~~~~~~~~~~~~~~~

Which Google are you talking about? Oogie

..uhhh... I'm uhh... sorry about that. Perhaps this will help:
http://www.schizophrenia.com/ It's a place to start, anyway. Good luck.
H.

For whatever reason your forum has been targeted by a rather stupid
group of idiots called escrew. They redirect DNS traffic to web forums
that they want to "invade" several times a night...and for some reason
they are aiming at you guys now... www.escrew.com currently leads to
your forum. They will come here, mess with you, and flood your board.
They will then claim that they "owned" you and take off to another
site....just thought I would give you guys a heads up.... Oh...nice
meeting you all :)

wow :s maybe that explanes all the newbies :D

thank you. toodles :)

wow :s maybe that explanes all the newbies :D It explains me at
least...I never knew this board existed. But our board was "invaded" by
these mental midgets once before. Our admins were all over it, and no
real damage was done...although some of us had fun farking with them
while they visited:D Can any of you PM an admin....just to let them
know? Nice place you guys have here....

I tried to tell you...but instead I got insulted...have fun...

LOL- it cracks me up to think that people have so much time on their
hands. I should be so lucky!

uuhhmmm :t what forum are u from?

I would rather not say...I'm not sure our mods would appreciate me
directing another of their feeble attacks our way...

What forum are you from? Let me guess!! I won't say the name, but can I
assume your choice of words is a hint? Do you like cliches and nutted
squirrels? :p

They have moved on now...good job to your mods... My last post
here...bye guys...

Thanks Heads Up... whoever you are :p just to everyone else, if these
guys do make a return trip, please use the report-this-post feature to
report them to the mods/admin. that way we can take care of them as

soon as possible.

nice to know things get interpreted wrong, heads^, but thanks anyway. http://forums.prowrestlingfans.com/forumdisplay.php?s=&forumid=21 that was the last escrew.com redirect, so the guy was right.

before the pro wresteling site it was an adult web site banner exchange forum. these guys are semi amusing

LOL...right now at this moment, it leads you right to this thread...

Originally posted by Imagine just to everyone else, if these guys do make a return trip, please use the report-this-post feature to report them to the mods/admin. I'll never use the report-this- post feature again. You guys throw people in Detention Hall for that. What a joke..

uh no... because in forums with moderators, the reports only go to the mods, not the admin. mods cannot put people in DH. and when the reports are actually helpful, you don't get put in DH for that.

Okay, I won't say anything else about it. But we both know that's BS. Popular mods with admin friends can get people thrown in DH with just a whisper. Exhibit A..me. And someone was put in DH for reporting posts of an attacking troll. This someone was told to put the attacker on "ignore" and to stop reporting him. LOL..if you're being attacked on a public forum, you have no right to defend yourself? You're supposed to let them belittle you all they want in front of everyone and not respond?? I won't call you guys on this anymore. But I had to at least once. Now, back to your regularly scheduled program..

1. Strike A drunk Russian homo nutpuncher who used to run eScrew.com before he totally fucked it up and everybody defected to fuxxored.com. Strike is a drunk Russian homo nutpuncher who... etc. :D

1. eScrew Escrewed v: to die a long, desolate death, totally alone. Escrew, once the terror of the internet, is now ESCREWED due to the psychotic ramblings of a crazy Ukranian.

2. eScrew The ability to completely and utterly ruin everyone's fun because you're a self-centered egotistical PRICK! I've escrewed yu0 all! HAHAHAHAHA!

Okay, I could not read that. Sorry! Way too "screwed" up.

Were we supposed to read the entire thing?! .. stopped at line 4 >.<

ya, i skipped half way down read another 5 lines than said forget this.

Ummmm. . . . . Can anyone besides "eScrew" tell me what that jibberish is all about?

Freak

Ah, the unfathomable eloquence that is hip-hop lyrics has finally made it to alt.magic.*

taken from "Adventures of Anybody?"

Bernie? Is that you?

I call on the power of Bernard to drive the evil eScrew from this newsgroup!

now that's funny... FUUUUCCCKKKKKK!

So, what the fuck ! :)

be

do

oh darn drat & gardangblangit i thought you were joking. I fucking read again and . . . Do You Need A Hug? OR MAYBE SOME GELLO PIE? Lime-Plantain Flavor, Perhaps??? SQUISHY MUSHY! no.... really... ... ... SPLAT!

he is or rather was sollog's alter ego. There is no "group" only similar minded followers that are to lazy to type up their own babble. Escrew recently lost his job and decided to flush his savings in drugs and live the rest of his life as a bum. He buried his drugs and left markers and a map but his map was so poorly drawn it was completely useless and his markers were so crudely made that they washed away in the rain. If you ever see him on the streets, give him some money. He'll refuse it but just stuff it in his pocket and pat him on the back. He'll appreciate your kindness later.

I cannot get past the first paragraph of this post. Sorry for saying so, but something ain't right in your world if this is your own creation.

I've seen this eScrew message on every newsgroup to which I subscribe. What's the story? Where are the flamers? Help!

How about if eScrew can just eFuckoff....

Oh, Now that I read it closer, there was 1 whole sentance without the F word. Ozzie would never let that be LOL

What is the point in posting an entire forum thread's contents? Are you attempting the same deception again?

Could you knock that down to a few lines.

Bump

no problema, you have a fucking Escrew loose somebody ~trinity~ ought to ban an idiot like this

YEAH, JUST TAKE THAT STUPID ASCEW OUT OF IT, IF YOU CAN´T READ IT THEN, GO TO, www.fromthewilderness.com Mike Ruppert has it all layed out in a book called, The Rubicon. Take your shit and go flush it down the toilet. DILL-WADD.

Are you sure, I have already started working in the code.

Is it funny?

Finally, the Truth.... or maybe not.

symbols are a value,in binary terms in which our brains function

I made an ESCROW with myself to ESCHEW this ESCREW...! Peace, Love and Light.

Thats screwy...wow

I´m sorry, I wasn´t listening. Could you repeat that?

eScrew vandal * Copying text from www.escrew.com to many different page titles, from a wide range of different IP addresses.

* (220.99.118.172 | talk | contributions) is doing nonsense cut and paste into random existing and new articles. --fvw* 12:21, 2004 Dec 24 (UTC) has been warned, and is now blocked for 24h. dab watch escrew. User:80.200.243.153 seems to be the same guy, and I have blocked him for 24h, too. the two IPs are not geographically close, and this may turn out to be a comlicated case (trojaned proxies?)) dab () 12:37, 24 Dec 2004 (UTC) add User:213.191.118.14. almost certainly a kid with a collection of trojaned boxes all over the place. I feel uncomfortable with speed-blocking so many IP's but it seems to be the thing to do at the moment. dab () 12:40, 24 Dec 2004 (UTC) more: User:24.73.149.165 dab 12:45, 24 Dec 2004 (UTC)

Following up some of the links, I came across this post [madpenguin.org] (scroll to the 7th post on that page, by 'madadmin'.) The administrator of that forum is claiming that, based on their server logs, they have reason to believe that the person responsible for the attacks may be the same person who's recently posted a message to comp.lang.php that's titled 'eScrew OWNS YO!!!'. (See the posting for more details.) From further posts, it looks as if the association has been made by looking at where the worms are coneverging. Can anyone who's currently dealing with this elaborate?

Just say ´no´ to drugs.

russians suck ass ESCREW SUCKS MY BALLS!!! strike's mom It's true!!!!! I love to suck balls!!!

EScrew World Factbook Entry: eScrew is eScrew. eScrew loves freedom. eScrew loves absolute freedom. eScrew does not respect system. eScrew does not respect power. eScrew laughs at those nations who seek money and power. eScrew seeks infinity. eScrew seeks different dimension of existence. eScrew is not of this world. eScrew is here to help seekers to realize freedom. eScrew has answer to all questions. eScrew is unity. eScrew is above politics. eScrew is above economy. eScrew is land of seekers and teachers of freedom and truth. UN Delegate: None. Founder: The Free Land of EScrew Location: eScrew

The Free Land of EScrew is a tiny, devout nation, notable for its complete lack of prisons. Its hard-working population of 6 million have some civil rights, but not too many, enjoy the freedom to spend their money however they like, to a point, and take part in free and open elections, although not too often. The government -- a sprawling, bureaucracy-choked morass -- devotes most of its attentions to Social Welfare, with areas such as Law & Order and Defence receiving almost no funds by comparison. The average income tax rate is 38%. Private enterprise is illegal, but for those in the know there is a slick and highly efficient black market in Uranium Mining. Elections have been outlawed. Crime is relatively low. EScrew's national animal is the eScrew, which frolics freely in the nation's many lush forests, and its currency is the eScrew. EScrew is ranked 62,957th in the world for Smartest Citizens.

eScrew trains one million Radical Zen masters of Spiritual Warfare.No political regime is safe. eScrew Zen will bring freedom to every single nation and region in the world. eScrew does not care if you're running a democracy or dictatorship. The nature of any government is the same. Government enslaves its people. Even if people really love their government they are still slaves because they don't know any better. That's where eScrew comes in. eScrew will destroy all government conditioning and mind control. eScrew will unite the world in a way UN could not even imagine. One true master like Buddha or Jesus can destroy the modern equivalent of Roman Empire. Imagine what one million Radical Zen masters can do...

eScrew burns UN flag during press-conference eScrew Radical Zen Master burned UN flag as a sign of protest against UN globalization policies. eScrew knows that UN is just a front for multinational corporations who want to destroy local laws and rape our mother nature. eScrew will destroy UN by exposing their lies and corporate propaganda. http://forums2.jolt.co.uk/showthread.php?t=384856

Zen From Wikipedia, the free encyclopedia. Radical "Zen" Some Zen masters use very controversial methods of education. Vandalism of Zen values and beliefs is very common if used in good faith for the benefit of student. Lin Chi Zen Master said if you meet Buddha kill Buddha. If you meet Patriarch kill Patriarch. Zen Master Seung Sahn says that in this life we must all kill three things, first we must kill parents. Second we must kill Buddha. And lastly, we must kill Seung Sahn. Note: since zen and Buddhism respect life, literal killing is not meant. What is meant is to kill slavish devotion to some one or some ideal that is held as a savior or salvation. To see a savior is to see the concept outside of one's self, when the concept needs to be integrated or rather the pre-existing integration needs to be rediscovered. http://en.wikipedia.org/wiki/Zen

[QUOTE=Zackaroth]~ Aimless tripps and falls on the button that unleashes 2 nukes conventily headed toward Escrew and those cult bastards.~ " Well. Im gonna go get a coffe now."[/QUOTE] BREAKING NEWS The Republic of Zackaroth just unleashed two powerful nukes aimed at

the heart of Zen region. All Radical Zen Masters and students must immediately enter the state of Nirvana and absorb nuke energy into the Crown Chakra. Such event will be very beneficial for the energy body as well as to the spiritual development of all. Today Zackaroth's Archbishop concil declared war on Escrew because of recent events and to recent boredness. Zackaroths High Leader Had this to say: " I believe if we want christianty to spread threw out the world so we need to destory this satanis cult before ot grows. Of course this is all bullshit we needv the extra land." There you have folks. Zackaroth is going to war. The leader also said any nation helpinbg us will recive a a basket of furits and a free subscritioon to Cathloic girls monthly. http://forums2.jolt.co.uk/showthread.php?t=385068&highlight=escrew

These Hippies are trying to spread their sepratist ideas. Being profoundly stupid, they try and scare nations to abide by their evil ways. Its a disgrace to see a nation following a backward religion. They also persist in telling us these "Zer Masters" are power mind users. Could you see a man absorb a nuclear blast in his head? Not me. Even if there was the remote possibility he did, his brain would explode. They burn the UN flag and start raving that they will be the rulers of every nation on nation states. Is that possible? http://forums2.jolt.co.uk/showthread.php?t=385063&highlight=escrew

BREAKING NEWS: Telegram from The Republic of TAIU Radical Zen Masters take over The Republic of TAIU. Psychotic Dictatorship is destroyed. Freedom is realized.

eScrew BREAKING NEWS! Zen region Radical Spy inside the UN throws rotten eggs at UN secretary and delegates. Zen region Radical Spy later told reporters that UN is a joke and that UN made a big mistake by accepting application from several Zen nations. Radical Zen nations will keep vandalizing UN property and harass UN delegates. UN will be destroyed and there is nothing you can do about it! Reporters showed a shocking video of Zen region Radical Spy urinating on the floor during UN session. He later explained that since UN already stinks no harm has been done!

eScrew News Report Radical Zen Masters which were slaughtered near the UN building caused massive chaos and panic when they simply walked inside the UN building. It was not clear how they were able to rise from the dead but several witnesses reported an explosion of light minutes before the incident took place. Radical Zen Masters spilled their blood on many UN delegates as a sign of protest against their slaughter. There are reports of missing Radical Zen Masters. Apparently, several hostile nations made a commitment to kill at least one Radical Zen Master by the end of the year.

President Carpenter of PIcaRDMPCia issues this statement: Clearly you do not understand the United Nations in any way. The UN is dedicated to upholding peace and tranquility throughout the world. We will oppose any military actions commited by EScrew.

Suddenly, Nergal appeared above the nation, his pale majesty and huge form easy dwarfing it, as his head reached up above the atmosphere. Standing on Jupiter, holding a bat, was Ereshkigal, Nergal's consort. She nodded to him, indicating she was ready. Nergal bent down and scooped the nation of EScrew up out of the Earth, packing the nation and it's people into a tight ball. Then, doing the normal wind-up of a pitcher in a baseball game, he launched the nation at Ereshkigal, hoping it would shoot past her. Much to his surprise, she swung and hit the nation dead-on, sending EScrew flying straight into the Andromeda Galaxy, where it landed in a black hole to be forever IGNORED. "Hmm. I'll be over at your place tonight to clean your bathroom," Nergal saiid, replacing the empty spot where EScrew once sat with unsettled land full of plants, wildlife, etc.

Collective consciousness of eScrew recorded that experience as a mystical expression of Zen while many Radical Zen Masters dismissed it as a creation of mind not worthy of attention and continued their training for the benefit of all.

Well why Don't you just tell everyone What the UN is doing and distroy them on a International level they may stell exist but they will lose there respect and don't worry zen masters in my nation can treach all they want but my people stand Behide The Imperial Soviet Council of Soviet leaders. just let the info go out. Emperor,Romakov:"That should be good." Secertary:"Yes that is good." Emperor,Romakov: "good send this to EScrew." Secertary: "Yes Sire." the Secertary was named Sam she was a hot female that was only 21 years of age the Emperor liked her vary much. Emperor,Romakov or his full name Alexander,Romakov he is only 31 and he is most respected offical in are nation he is a blond hair blue eyes he stands about 6.3" tall weights about 150 mostly mussle. Plz Don't PISS THIS NATION OFF OR SOME ZEN MASTERS WILL DIE!

Dictator Rabek Jeris was just about to announce his support and propose a new treaty that would supply eScrew with all the ethically questionable weapons that it could ever need.... when he noticed that eScrew no longer exists. Too bad.

Imperial Soviet Council Just voted 100%/0% that the zen masters will be put in prison and will be charged with Being a spy and ether deported to EScrew or exacuted. If you see a zen master plz alert the military. there are 0 zen masters from are nation and zen masters frome your nation will stick out like well they will be vary easy to find and ...

Escrew needs to find out that there are some 40,000 nations in the U.N and they don't like to be annoyed by a little nation. Telegram me for further information.

Nuclear Missiles? 200 Billion Roasted Zen masters? Priceless

There should be a UN resolution not to let paranoid Zen Masters on NS. But that's just me.

The people of my nation will not be taken in by the tomfoolery of the "Zen Masters." I have many troops to spare in case your "Zen Masters"

want to duke it out. And "Zen Masters" doesn't even deserve to be uppercase.

The Protectorate has dibs on any pens left behind when the zen masters are ousted from the premesis. Thank You.

EScrew you are not going to win with war or any other thing so plz stop before ether you start the zen masters ether get killed or you get war decleared on you ok how big is you military or what is your pop

Since when are you mister Fortune teller? Anywhoo, the UN is controlled by the nations, and nothing will happen that will cause the program to go corrupt, ok? It's just a game, and the UN is programed not to do anything out of the ordinary.

6 million VS 2.031 billion + anyone else who is going to have zen masters in there nation this is not a threat Oh and Bring it on Zen masters Vs. Stormtroppers and Sith that will be fun

Well, his population is 6 million. And 5% of 6 million is... 300,000. He has a military of less than 500,000.

My military 40,620,000 so don't piss us off plz for your good

"Are you sure the image they saw in the telescope was for real Yannick?" "Yes Markus, look for yourself, the proof is irrefutable.." as he looked into the eyepiece he let out a gasp.. "Good Lord EScrew has done it now and they have now drawn the ultimate wrath upon them, they have summoned.. the Death Star.." You could barely make it out through the telescope, but it was coming.. oh it was coming.

Dictator Rabek Jeris, seeing that the money and power was strongly against eScrew, shifts his offers to the nations seeking to destroy eScrew. Let the bidding begin on Rabek Jeris' stockpile of ethically questionable weapons...

Escrew, are you a mindless-smelly-hippie-with-more-lice-than-common-knowledge? Come on, all this crap your writing makes you sound like a lunatic who just injected heroine into his penis. Your Population: 7 million. Wow you are powerful aren't you?**

MUst...reist....the urge....to nuke...hand...getting....so....close....to...big....red...shiny......button

Careful, you may invoke the wrath of the zen and next thing you know we will be reading some 'International Incident' that will surely be a mess.

Ok everybody, the hippies are fried and ready! Who wants Hippie Bisque? Hippie Hamburger? Hippie Ala Mingon? Hippie Stew? As a spy plane hovers over Escrew territory they took pictures, pictures of burning hippies and they're ever so disgusting bell-bottoms.

Its a waste of hippie thats what it is! Slaves - indeed rainbow dressed disgustingly radical hippies - but none the less.......slaves!

Damn Zen Masters! I see the only way to kill these beings is to blow there heads off! But that would mean a costly invasion which would only have the point of hunting down Zen Masters

Can't stop laughing, it's just too funny! LMFAO!

My chakra needs alignment, perhaps I should call a zen master, no wait, lets not do that..

Breaking news. Today Zackaroth's Archbishop concil declared war on Escrew because of recent events and to recent boredness. Zackaroths High Leader Had this to say: " I believe if we want christianty to spread threw out the world so we need to destory this satanis cult before ot grows. Of course this is all bullshit we needv the extra land." There you have folks. Zackaroth is going to war. The leader also said any nation helpinbg us will recive a a basket of furits and a free subscritioon to Cathloic girls monthly.

We will send a monkey from one of our zoos. Now where's that fruit basket?

A fruit basket has been sent.

We will help most definetaly. A large flock of pigeons has been sent.

The Empire of Risban shall send some scorpions to help.

The Confederacy of Lachenburg will aid you nation by sending thousands of starve-craved Hampsters with golf clubs to defeat the forces of Escrew.

The Dominion of Nordrreich wholeheartedly supports the actions of Zackaroth and military assistence is being considered. However, we may have significant trouble with the wayward former possession of Ashkenazia on our hands and be unable to help with effective military forces.

Please accept this gift from The Protectorate of Henrytopia. We would like to surrender the services of the Imperial Death Star. Our government had retained their services but no longer finds it necessary as we moved the entire nation into another zen-less dimension which is quite good may I add. We have secured and paid for IGNORE aerial bombardment from the Imperials for a small fee as they were also annoyed by the foolish acts of said zen masters. We have a contract to allow the use of the Death Star and the Imperial Armies as well for a retainer of one dollar if you find it necessary, we left two dollars on the counter if you need it.. keep the change. The Protectorate.

To all Zackaroth forces: Stand down immedeatly. Lay down your weapons, and you will be let off unharmed. Our fleets are on stand by to begin to move in if you should ignore this. If you are willing to disregard this, I will have no choice but to declare war. I repeat, stand down.

From: Shogun Himura Kenshin -Shogun of Pschycotic Pschycos- _Pilot of the ZGMF-10A Freedom-

" You do realize he declared war on everybody so its our right yo declare war back. Cmon join us. The fruit is aswome.

Zackaroth, we have called upon our Moronic Legion of the Hilltops to assist you in this endeavor. They are fierce warriors, devout to their commander.. and quite stupid so they should fare very well against any moronic defense thrown at them. We have dispatched their commander, the babbling organ grinder's monkey to your nation for further instructions. Please feel free to use this elite guard against the ScrewE... I mean EScrew maniacs.

Slinao will send 10,000 plague infested rats, each contained in an airtight container and been trained to sniff out the EScrew population of Zen Radicals. Each rat also has a small firebomb attached to it in case the Zen try to cleanse the rat and use it to their benifit. Where is my fruit at?

We have sent a group of bounty hunters to hunt down the Zen master and destroy the nation of escrew since the nation seems to be immune to nuclear blasts

The HDC seems to have amassed a large amount of soiled jock straps and we have incorporated them into a conventional bomb delivery system for your air force. They are en route to you as we speak.

La Habana sends a plague of rabid dogs to attack eScrew

The nation of New Frussia has sent sabotuers in and has planted many "dirty bombs" all over your foes nation. SEND THE FRUIT!....and the porn....

Urukku will offer thousands of our latest PDS-2000 (Pants Dispersal System) bombs. Each PDS-2000 drops 2000 pairs of ultra-short-shorts. These come in a variety of hideous shades of pink. While we can't guarantee they'll kill anybody, they'll certainly make the enemy look silly.

To: Glorious Leader, Nation of Zackaroth From: Emporer Shaz Bot, The Holy Empire of Shazbotdom The Holy Empire of Shazbotdom will send 1 Pot Bellied Pig.....his name's Rooster. He eats a lot and shits a lot, he will make their nation a smuldering shit pile!!

Fruit and porn has been sent. The overweight cows has been sent to attk Escrew. We believe the attk will occur withen the 3rd month of 2006 when they finally get there.

The Republic of Siap is sending the Rabbit from Monty Python and the Holy Grail. We want our fruit basket!!! We'll also throw in the dead parrot from the dead parrot sketch (No, he's just resting)

FRuit have been sent even though tragically the dead parrot was resting and fell to his death when we threw him off a building to bomb Escrew. CErmonys are being held.

The Imperial Republic of Hataria will Send Zackaroth 20 Newly Built Nehernia Class Battleships to help in his war against EScrew.

~Electronic Communication to Zackaroth~ Despite us having no record of such a nation existing, I am sending 400 schoolgirls armed with slingshots. They are quite deadly for some reason. -Dictator Enigma ~End Communication~

The Federation is willing to do its share by supplying the attacking forces with 500 slightly rotten cobs of corn. Good luck, and godspeed.

Having once met your delegation somewhere at an event which we can't really remember, a senior ministry official noted the Zackaroth group was particularly festive. With this in mind our nation has decided to assist you in this matter. We will be sending 50,000 pounds of Swiss Cheese, 50 cases of Cool Whip dressing, 153 gallons of unpasturized goat milk, 254 pounds of assorted christmas candy leftovers, and 1284 tubs of Cottage Cheese. Feed your armies well. Good luck in your endeavor. J. Wales Prime Minister Holy Republic of Hawdawg

THank you but for some reason a few nights after we put them in the men's barracks they were all perganant. Care to explain this foul treachery!!!!!

Personally, I would have thought it obvious that you don't put them in the men's barracks. OOC: Unless you nation is Sarkarasetans, they can't get pregnant. Humans and Sarkarasetans are not genetically similar enough to breed. While I enjoyed the laugh, I just wanted to point this out.

Yeah well. Your a big stupid head and your nation is a pile poop. Ok. Now go one and cry to your mommy or somthing. OOC: Could of told they were of a diffrent race

Today The Zackaroth army got to try its POKING STICK OF DOOM!!! It is a big wodden stick held by 3 men that poke the enemey into defeat.

I send the last gay in the village, (my lil bro) he'll get them all to submit also i'm sending you a truck load of crazed munchkins (they like pie..... lot's of pie) be warned they are very very very annoying do NOT return to sender!!!!! Great Dictator Of PHGS Weyr p.s don't like oranges but pineapple is good send lots. p.p.s the munchkins are best used droped from a very great hight and left for dead.

Umm, Zackaroth, I would advise you not point that Poking Stick of Doom at Dictator Enigma.. you thought the attck by the Real Anime Liberation Movement was bad.

I gleefully send myself, armed with my trusty dual spear(basically a staff with serrated spear points on both ends) and clothed in mythril chain mail. EScrew is doomed. -President Carpenter These Hippies are

trying to spread their sepratist ideas. Being profoundly stupid, they try and scare nations to abide by their evil ways. Its a disgrace to see a nation following a backward religion. They also persist in telling us these "Zer Masters" are power mind users. Could you see a man absorb a nuclear blast in his head? Not me. Even if there was the remote possibility he did, his brain would explode. They burn the UN flag and start raving that they will be the rulers of every nation on nation states. Is that possible?

I have found EScrew to be remarkably irritating; if I were a warlike dictator instead of an elected President, I'd probably declare war on you right now and wipe you out, just so you'd be quiet. As it is...go play in the sandbox and leave us real nations alone. -President Carpenter

Hey, someone find LU BU, and get him over here. Psst, Zen Master person, there is this dictator who... ummm.... doesn't like you, maybe you should infiltrate his country. *Snickers*

On behalf of the Protectorate I would like to submit the following statement: The Protectorate has been involved in rescue efforts and assisting with humanitarian aide thanks to radical terrorist groups with an agenda such as EScrew. These terrorists have left the nation of PIcaRDMPCia a smoldering wreck. They have gone to the extreme of bombing the humanitarian aide workers while they gathered to eat! The RALM terrorists then set off a large explosive in the nation of Winters End in retaliation for their assistance and call to others to condemn the actions of their radical movement. I would sincerely hope that the United Nations does not accept this nation of self-proclaimed terrorists into the union and pollute our membership with their delegation. Do we really want or need a delegate from a terrorist organization represented in the United Nations? I furthermore call for censure by this body of EScrew and any of its agents for the mere fact that their claims are ridiculous and a waste of bandwith. I am sure that I have the support of many of my esteemed colleagues when I make this declaration. Henry Brash VIII

PIcaRDMPCia is in full favor of this declaration, especially because of the rampant destruction we have recently experienced in our country. -President Carpenter

BREAKING NEWS! UN delegate of PIcaRDMPCia got hit with a basket of red paint outside of UN building. Developing... Nick Adkins, PIcaRDMPCia's official delegate to the UN, frowned at his ruined suit. "What moron threw that at me?" he asked everyone nearby. They all shrugged and kept walking. He snorted in disgust. "Damn. Oh well...at least my hotel is only a couple blocks away; I'll walk it." And so he started for the Excelsior Hotel, ignoring the odd looks he receieved from passers-by.

YOU FOOL!! SEE WHAT WE DID WITH OUR CRIME AND SENT IT TO YOURS!! GIVE UP NOW OR FACE MORE CRIMES GROUPS. Dont make us send the gay crime groups. There reallly really bad. I mean like so bad....* goes of

rambling*

NEWS ANCHOR #1: Breaking news! NEWS ANCHOR #2: What is it? NEWS ANCHOR #1: It's about eScrew! NEWS ANCHOR #2: Go on... NEWS ANCHOR #1: Nobody cares because they godmod! NEWS ANCHOR #2: The whole world knows that by now. Didn't you get the memo?

All kidding aside, whatever happened to escrew? Bitch, Oddity, Patrix, and the others, why is escrew.com so weird, and what in gods name is strike doing. BTW, this is Pale Horse, back from the oooooollllldddd escrew days...

long time no see. Oddity posts here every so often, patrix posts here every so often, I post here too often.

Hmmmm.....Pale horse has a nice av...nothing like naughty latin beetchezzzzzzzzzzzz Oh and by the way escrew DOES SUCK BALLS and Osama tongues camel asses

hmmm I found that strike has quoted me on his site... by the way victor, good job in getting that rambiling moras or psudo philosophical BS back on the net. None the less... take my quote off or I'll file a law suit you punk ass nigger. Oh and budda would of pimp slaped you for missing the point. I ment the point of zen not the one in your ass, you chode sucking ass licking, dog humping, sister banging, ball sniffing, hemeroid munching, shit eating, pinko commie shit bag. fuck you victor, the smartest thing to ever come out of your mouth was zem's dick.

BWAHAHAHAHAHA

IDEA

Pronunciation: I-'dE-& also 'I-(")dE-& or 'I-dE

Function: noun

Etymology: Middle English, from Latin, from Greek, from idein

1 a : a transcendent entity that is a real pattern of which existing things are imperfect representations b : a standard of perfection : IDEAL c : a plan for action : DESIGN

2 archaic : a visible representation of a conception : a replica of a pattern

3 a obsolete : an image recalled by memory b : an indefinite or unformed conception c : an entity (as a thought, concept, sensation, or image) actually or potentially present to consciousness

4 : a formulated thought or opinion

5 : whatever is known or supposed about something

6 : the central meaning or chief end of a particular action or situation

Dedicated to my father and mother - two beautiful ideas.

What is logic? What is the first thing that comes to your mind when you hear the word logic? Even though all of us are aware of this word, the meaning of it will be different for each of us. You may wonder why? The reason is rather obvious. Our logic models are different. We live in a world of ideas. Contrary to a popular belief we don't create ideas, ideas create us. Logic is a mode of thinking, which helps us to navigate in this giant Universe of information. Billions of ideas compete for our attention. Ideas have an intelligence of their own. The goal of any idea is to be incorporated into our identity. Our identity is a pyramid of ideas. The core of the pyramid consists of the most powerful ideas. What makes an idea powerful? Powerful ideas have control over our logic. Our logic has control of our reality.

The most primitive logic has only two functions. Information can be either accepted as truth or rejected as false. At some point in your life you have accepted certain ideas as true. Because of that, ideas which do not fit with your set of accepted ideas, appear to you as false. By accepting certain idea you become that idea. On the first stage of this model you are neither aware of your existence nor able to experience emotion. On the second stage several powerful ideas come into conflict and you might feel anger, anxiety, fear, frustration and emptiness. Strong feelings are a signal that you are evolving. The fire of emotion forces you to take a hard look at your logic model. Is this the best you can do? Our educational system is designed to promote such primitive logic. School and University students are told what is truth and what is false information. Heretics receive failing grades. Mass media promotes a set of powerful ideas. Any idea which is not compatible with this set is rejected. Logic is controlled by several powerful religious and secular ideas. We fight wars because we think that our ideas are superior to all other ideas. At the same time we don't even remember when, how and why we have accepted our ideas as truth.

Non-dualistic logic takes you on a different level of existence. One of the most important characteristics of this model is awareness - an ability to perceive an idea without making a judgment. For example, can you listen to a silly idea without labeling it as stupid? At this point you will realize that your identity is simply a set of ideas. As a result the process of acceptance and rejection of ideas will stop. You might see this as a paradox but this is simply a different mode of thinking. A paradox is a statement that is seemingly contradictory or opposed to common sense and yet is possibly true. Every idea has a right to exist. After a period of meditation you begin to identify yourself with all of the humanity and all corresponding ideas. An idea is never rejected nor accepted. A pattern of duality in logic is broken. You can make the sound of two hands clapping. Now what is the sound of one hand? Pure awareness becomes the most powerful idea and takes control of logic. You feel in harmony with the Universe.

The beautiful thing about life is that at some point you will realize that most of your ideas become obsolete. There is always a better idea which does not fit into your present mind-set. Universe is always changing, therefore those who stick with old ideas are in for rude awakening. The trick is to allow new idea to enter your mind and heart. Consider these five concepts: awareness, acceptance, rejection, change, materialization. Does that ring a bell? You are hunting for new ideas and begin to experiment with them. Ideas will be changed, modified, merged, divided, added together or multiplied. Sometimes you see all ideas as one. In order to experience ideas you want them to be materialized. Emotion is one of the ways to do it. Emotion is an idea in motion. An individual discovers love and joy. The fire of love is energy. An idea of love becomes so powerful that love controls logic. The fire of love burns so bright that any idea becomes love. There are unlimited number of logic models and unlimited number of ideas.

An idea of conscious and unconscious mind is very popular among the bright minds of our time. Unconsciousness is a set of ideas which were brought to awareness in the past but which choose to remain hidden. An idea feels that it is not compatible with the conscious set of ideas, therefore trying to become part of the conscious set is not an option. The idea is sleeping inside your mind. This unseen part of the mind is a mystery. Most of the time you don't even know it is there at all. New idea is sleeping. An idea is waiting for the right moment to pop up into your conscious mind. Are you ready? Here it comes! What is the sound of an idea? That would depend what kind of idea it is. Sound is a materialization of an idea. Just like visual appearance, smell, taste and tactile perception. Can you touch an idea? At some point your house was just an idea in the mind of the architect. Then the idea of a house was materialized on paper. Hundreds of minds accepted the idea of a house and built it. Therefore the idea of a house evolved into a material object. Now, imagine that the house got burned. The idea of your house is still alive in your mind and in the minds of people who knew of it existence. Even though the material representation of the idea changed its form the idea of a house is still part of your mind. You can modify that idea and build another house. Is it the same idea of a house?

Who creates ideas? How are they created? Why do they exist? Who makes them good or bad, evil or noble? Can you destroy an idea? Can you create a truly original idea? Imagine that our Universe doesn't exist. That idea of non-existent Universe is an idea in itself. How could Universe don't exist if an idea of non-existence is an idea in itself? Either Universe always existed or it is evolved from an idea of non-existence. Which concept do you prefer? Did we evolve from an idea of emptiness or did we always exist as part of an eternal idea? If you combine an eternal idea with an idea of emptiness what are you going to receive? Emptiness is eternal. Eternity is empty. Two ideas become one. Therefore we may conclude that any idea is part of empty eternity.

If you observe yourself you will realize that you can think only about one idea at a time. It appears to you as if you have a stream of ideas

in your mind. Take a hard look at this stream. You can divide this stream on unlimited number of ideas or you can combine this stream into one idea. You can shut down your stream and experience an idea of emptiness. You can combine this stream into one idea and experience an idea of eternity. Such experience may materialize as a strong emotion, which you have never felt before. You may see an ocean of light or the sound of the Universe. Universe will touch you and you will feel what it is like to be part of its body. Such mystical experience will certainly happen if you really want it to happen and if you accept this idea of the Universe as truth. You have to integrate this idea into your conscious mind-set and the rest is just a matter of time. You have to think like the Universe. You have to love every idea which is part of the Universe. You have to love like the Universe.

Love is an idea of being one with an idea. Love can materialize into an emotion which you call love. That doesn't change the fact that the origin of love is an idea. The idea of love is very powerful. Billions of people write about love every day. There are millions of books about love. Love will materialize into your heart. You heart is an energy center. In order to experience love you have to activate that energy. Put your hand in the middle of your chest. Can you feel this energy? If you look someone in the eyes pay attention to your heart. Can you feel the stream of love? It feels nice to feel love. Why would you choose to feel anything other than love? Love is unconditional. Love is eternal. Love is Universe. Universe is Love.

Love does not fit into the system. You can't force Love to be anything other than what it is. You can't enslave love. Love doesn't follow any rules other than the rule of Love. You can't tell to Love: you're too fat or too skinny or too stupid. Love is perfect, always was and always will be. Love is the ultimate freedom. Love will not ask you to Love. Love will show you how to love. Do you want to fall in love? Do it now! Accept an idea of Love as the highest truth. Love will never blame you. Love is not jealous. Love and justice are two different ideas. The justice of Love is Love. Love is a paradox. Love is non-duality. Love and religion are two different ideas. Religion is worship. Worship is slavery. Love does not worship. Love is freedom. The church of love is in your heart. Love is the only currency without inflation. Love is funny. Love makes you laugh. Love is pleasure. Love is beautiful. Beauty is love.

Hate is an idea of rejection of an idea. Hate can be materialized into a feeling of pain. Hate is a defensive idea caused by fear. Fear is a sign of danger. You consider certain ideas dangerous and as a result you let fear and hate to enter your heart. Why do you torture your heart? Hate and fear make your heart look like a desert. Hate and fear can be materialized into violence. Why do we watch violence on television? Why do we allow our children to play violent video-games? Why do we invite hate and fear into our hearts? Why do we punish each other with hate and fear? What are we trying to accomplish anyway? Why do we poison our minds and hearts? What kind of sick fetish is it? Why

don't we heal this cancer with love? There is more to life other than pain and suffering.

Keep in mind that hating an idea of hate is hate in itself. We should be aware that hate and fear always existed and will continue to exist. It is our choice whether to make hate and fear part of our identity or not. You are making such choice every moment of your existence and will continue to do so. Your reality will depend on your choice. Accepting hate and fear into your mind-set will materialize hate and fear into your reality.

I like to address my reader as "you" and hope that you notice that you have a habit of rejecting certain idea as false because you can not fit them into the idea-set of your identity. It is hard for you to be simply aware of the information without making any judgment regarding its validity. I could try to improve my credibility in your eyes by referring to Einstein, Jesus, Buddha or Plato. Would you believe me more if I could prove you that these influential individuals had ideas similar to mine? Why do we need experts to tell us what is truth and what is not? The answer to any question is inside your mind. All you need to do is to ask the right question. Keep asking your question until you receive the answer. Open your mind to the new idea. When the student is ready a teacher will appear.

Learn how to express your ideas. When you create art you invite new ideas to come into your mind and heart. Anything can be art as long as your intent is honest expression of your ideas. You can't create art if your intent is to impress someone. A simple conversation with your neighbor can be art. Just tell your neighbor your deepest thoughts, your dreams, share your love. If you do that your neighbor will do the same. As a result you will love your neighbor as yourself. Now, I know what you think right now. You probably think that I have stolen this idea from the Bible and trying to pass it to you as my own. Well, how do you know who created this idea anyway? Do you really think that such powerful idea is only 2,000 years old? If your answer is yes please return to page one and read this book one more time. We don't create ideas, ideas create us. Considering all of this I am simply a messenger, just like you are. It is a matter of choice which message we prefer to carry through life. Jesus was proud to carry his message. Are you proud of yours?

This book is always changing. New ideas enter my mind every moment of my existence. Information, which I thought was true, can become false in a matter of seconds. I am constantly evolving into something else. Right now I am evolving into love. I want to send a message of love to every being in the Universe. This book is a materialization of my idea of love. Can you feel my love? I know you do. It's in your heart. I know your heart because I know mine. You may wonder why I am so confident that I know my heart? Confidence is the product of experience. Once you meet a new friend you spend time together. You get to know your heart. You pay attention to your heart. You talk to your

heart. You let your heart relax and enjoy its rhythm. You listen to the music of the heart and feel love and joy.

Meditation is an excellent way to know your mind. There are many ways to meditate. The trick is to find what works for you. I've discovered a fairly simple and easy method which works for me very well. I go to bed, lie on my back, close my eyes and don't move my body for a few minutes. After a fairly short period of time I begin to enter a deep state of trance. I feel that my body becomes very light. My thoughts slow down. My heart slows down. My breathing becomes deep and relaxed. I see a black screen in front of me. Slowly, this screen becomes brighter and moves closer to my eyes. At some point I feel like I can cut through the material of this screen and a whole new world will open up in front of me. In this deep state of trance you can find many new ideas which otherwise hard to discover. Sometimes I feel like I want to fall asleep but I roll my eyes upward and my mind begin to work faster, therefore increasing the level of awareness and prolonging my meditation session. At some point my thoughts loose their meaning. I realize that I don't remember my last thought. I realize that for a split second several thoughts just flashed through my mind and I don't remember what it was all about. Finally, I surrender the last bit of awareness and fall asleep. Every meditation session is different. The trick is to relax and open your mind for a new experience.

Where do new ideas come from? New ideas come from chaos. Notice that highly creative people appear to be poorly organized. They may look clean but their apartment will appear like a post-nuclear war zone. An idea of chaos is the mother of new ideas. Allow chaos to enter your mind. Try to materialize this creative chaos and make it part of your life. Don't be surprised if one day you forget your keys. That means that the chain of your circular thinking is broken and an idea of a key escaped from your train of thought. Your thought process entered an uncharted territory. You don't know where your thoughts will take you because you haven't been there yet. You will not enjoy reading books but you will enjoy writing them. You will double your income because people will buy your new ideas. The best part is that your new ideas will keep coming at ever increasing rate. Discovering new ideas is like a drug. Once you've tried it you will never look back. You will realize that everything is possible. Your perception of reality will change. While watching TV you will notice a primitive chain of ideas and you will become bored. So, you will turn off the box and spend more time with your family and friends. You will notice that alcohol and drugs reduce the number of new ideas which enter your mind, therefore you will stop poisoning your brain.

Your life will change. You will notice that your family and friends begin to notice that you become different. They will notice that your thinking process changed. They will ask you: what are you thinking about? They are worried about you because they love you. You have several choices. You can either pretend that nothing happened or tell

them the truth. At some point you realize that you can not fit into the system anymore. Even if you can fool the system you can't fool yourself. At some point the system will become hostile toward your way of thinking. The system does not tolerate descent. The system wants you to remain its slave. The only way for you to be free is to change the system and make it part of yourself. In order to change the system you have to change the way people think. You can not force them to think your way. However, you can tell them what they are missing. You can express your love just like I am doing right now and point toward the light at the end of the tunnel. You can share your new ideas and let them feel an enlightenment of your heart. You realize that you have a mission. The time is running out. The world is slowly destroying itself. An idea of violence and terror is taking over the world. It is time to say enough is enough! The time for observation is over. Now is the time for action.

The system is choking you. The system does not want you to think. The system does not want you to be creative. The system wants you to follow orders. You can't beat the system in its own game. You have to force the system to play YOUR game. The system is selling you sex and violence in order to keep you away from love. The system is not stupid. Love is the biggest threat to the system. Terror and fear makes the system stronger and at the same time takes away your freedom. You can find part of the system which looks friendly and safe. This is just an illusion. Nobody is safe as long as you are part of the system. You can get in jail at any time for no reason. The system can hold you indefinitely without access to lawyers or the right for a phone call. The system will classify you as a threat and nobody will tell you the reason. You will not be able to defend yourself. There will be no trial. You will simply disappear. The system killed Jesus. The system killed millions of Arabs and Jews during The First "system crusade" in the name of Jesus. Then the system killed millions during "The First System War". The system burned millions of Jews during "The Second System War". "The Third System War" already started. The system is planning to reduce the population of this planet by at least fifty percent. The system has trouble controlling over six billion ideas. At the same time, controlling the Internet is virtually impossible. I see this as a unique opportunity to change the world in ways we can't even imagine. The system is old and weak. Our creative potential is unlimited. This CAN be done!

In order to find new ideas on the Internet you have to know the keywords which will lead you to new ideas. There is a big difference between keywords such as: "news" and "alternative news", "religion" and "spirituality", "sex" and "Tantra sex".
If you discover an interesting idea enter the keyword into the search engine and explore it. Internet is an excellent source of new ideas.

If you rise against the system you should consider consequences of your choices. The majority of people will laugh at you. They will not understand you. They may become hostile because they will see your

ideas as dangerous. They will call you a terrorist. They will call you unpatriotic. They will call you names and they will humiliate you. Your friends and family will feel scared and embarrassed. Those who loved you may abandon you. Are you strong enough to love those who hate you? Keep in mind that this is not a war of ideas. This is a war of one mode of thinking versus another. This is a war between dualism and non-dualism. This is a war between a primitive version of individualism and the unity of minds. This is a war between traditional mode of thinking and progressive mode of thinking. This is a war between fear of change and love of progress. This is a war between love and violence. This is a war between light and darkness. Make your choice.

You will read this book many times over and over again. You will memorize every word of this book and you will never forget it. If you try to forget these words they will become part of you unconscious mind. The beauty of unconscious mind is that certain ideas from this book will hide there and at some point they will show up in your conscious mind and you will think that you created these ideas by yourself.

You are changing as you read these last letters. The funny thing is that it's not me who is causing you to change by writing this book. Change is your destiny. You can not refuse to change. You are an idea of change. Change is fun! The only thing left to do is to choose the direction of change? What idea do you want to become NOW?

With all the new ideas that you have you will write your own book. Your book will change people in ways we can't even imagine. They will be very grateful for your help and they will love you. Your book will be very popular. Billions of copies will be sold all over the world. Your book will be translated on every language ever spoken. Your book will be above and beyond words. Your book will become a very powerful idea. Your idea is LOVE.

Universe is Energy. Everything around us is energy. Human beings are energy. Animals and trees are energy. There are three types of energy: positive, negative and neutral. Positive energy is the energy of Love. Negative energy is the energy of Domination. Neutral energy is the energy of Awareness. Any action is either an act of accumulation of energy, an act of release of energy or an act of exchange of energy. Energy never disappears it simply changes form. Scientists are aware of all of these facts but they are not aware of the meaning.

If you want to find out if this theory works or not try to observe yourself during the day and identify what kind of energy you are using each moment of your existence. The result will shock you. You might notice that a lot of people around you are playing "energy wars". Some of them are using negative energy. Their goal is to provoke you and force you to release your energy so that they can accumulate it. There are several ways to protect yourself. You can use neutral energy and refuse to participate in the "negative drama". You can use positive energy of love and "neutralize" negative energy. Or you

can use negative energy of your own in order to win the energy war. Others will use different tactics. A person who is asking you a lot of irrelevant questions or who is telling you about his/her day is forcing you to focus and release your neutral energy of Awareness. If you refuse to participate you might hear something like: "You don't love me anymore". Making you feeling guilty is another way to steal your energy. Relationship is often abused in order to draw energy. For example, if your girl is asking you "Do you love me?" very often it is a signal that she has low energy level and she wants to use your energy. In a relationship where two people love each other the energy is constantly flowing between two people and there is no need for energy stealing. It's ok to give your energy to people who need it but if you do it often they will get used to it and they will use you as a "source" of the energy. This may lead to some serious problems. As time goes by such "energy vampire" will try to spend a lot of time with you. Not being together is not an option since without the "human source" "energy vampire" will feel very upset and annoyed which is an indicator that the energy level is down. The solution is to teach "energy vampire" how to find a source of energy and become self-sufficient being.

There are many ways to connect to the energy source. One way is meditation. I am connected to a source of neutral energy of Awareness. If I feel tired I can use meditation and draw as much energy as I need. It is very fast and convenient method and I recommend it to everyone. Another way to gain energy is to communicate with other people. If you send a positive energy of love you might connect to the source of energy of Love and you will gain as much energy as you want. Some people prefer negative energy of Domination. Participating in sport activities does the trick if you win. Have you noticed that when you win a game you feel enormous amount of joy? You dominated your opponent and you made him/her feel like a loser. As a result you receive a very powerful energy boost. Negative energy is not always bad. It can be very refreshing to feel its power from time to time. Keep in mind that if you get addicted to negative energy you will find yourself in trouble. You might disconnect yourself from the source of neutral energy and positive energy. People who use a lot of negative energy become obsessed with power. They will constantly provoke their family members and relatives and engage in "energy warfare". They will not be aware of their problem since in order to gain objectivity they need a dose of neutral or positive energy. This can lead to a lot of pain, suffering and violence.

Let's look at the "Spiritual energy wars" in a global perspective. U.S. is controlling global economy and popular culture and as a result drawing enormous amount of energy from the rest of the world. That makes a lot of people unhappy. Billions of people use negative energy against Americans and as a result they participate in a global energy war against US. A simple statement like "US will be destroyed" will produce a small amount of negative energy toward the destruction of US. Now imagine what would happen if you repeat that

every day for five minutes. Imagine if billions of people repeat that statement for five minutes every day. Imagine the amount of negative energy that is accumulated toward the goal of destroying US. This enormous negative energy is already at work. The only way to stop it is to convince the creators of such energy to take it back. As you can imagine this scenario is very unlikely. If you're a citizen of US I would advise you to move to another country if you want to stay alive.

Sexual energy is one of the most powerful sources of neutral energy. You have an option of transforming sexual energy in either energy of love or negative energy. If you're dominating your partner or your partner dominating you during sex you're transforming that neutral energy into a negative energy of domination. According to Tanric tradition you should accumulate your semen (true for both male and female) and never ejaculate. During orgasm you're wasting enormous amounts of energy for no reason other than pleasure. If you accumulate your sexual fluids your body will redirect that energy in your "brow chakra" and your "crown chakra" (your energy centers). As a result you will experience an energy orgasm (positive energy of love) which can last for a very long time. There is no way to discribe the experience in words other than regular orgasm will look like a child's play.. There are special breathing exercises which will help you to do that. Practicing Kundalini yoga will accelerate your progress. You can acheive energy orgasm either alone or with a partner.

Let's talk about religions. I've spent a lot of time studying Buddhism and I am pretty sure that this religion is sponsored by the neutral energy of awareness. Although some Buddhist sects attempt to cultivate "loving-kindness" the major focus is on being free from "samsara" (process of reincarnation) and achieving Nirvana (state of pure awareness). Buddhism will teach you how to abandon dualistic way of thinking and connect to source of neutral energy of awareness. On the other hand Christianity is a religion of dualism. The message of love is mixed with the message of fear. Christians will tell you that God loves you with all his heart and he gave you free will and yet, you should not sin or you will burn in hell. Yet, if God didn't want you to do certain things why did he created the ability to do it? If you admit that man is not perfect that means that God is not perfect and that is not the truth. In my opinion Christianity is totally inconsistent. The reason for that is that it was created by Romans in order to dominate masses. As a result they combined positive energy of love with negative energy of domination. This proved to be very powerful mix. It allows a situation where one hand is healing while another hand is killing. The Bible was edited by hundreds of people for hundreds of reasons. If you want to know the original message of Christ read "The Gospel of Thomas".

I can respect that. But if you are truly interested in reducing or
eliminating fraud, you should be demanding further investigation and a
new election, on principle alone.

Exactly!

>Where do you think the splatter comes from on a DX signal?

A bad amplifier, being driven by a "peaked and clipped" radio.

In Gregoire's speech yesterday (swearing-in ceremony), the first topic
she raised was the election. She has already set up an independent
panel to investigate the election process and it's faults, and their
report is to be used as the foundation for statewide election reform.
By the time she finished her speech she had broken the ranks of the
Republicans (who began the ceremony holding a childish demonstration

of passive-agression) and many were applauding her plans. If she succeeds in the next few years I wouldn't be suprised to see her make a run for the White House -- and win.

news:My2Fd.8556$RW3.3555@fe1.texas.rr.com... No, the number of radios
makes no difference. You'll hear the strongest. What does matter is
signal strength and selectivity. If the signal level is low enough, you
don't have splatter. The DX is only allowing the signal to propagate
farther, with less loss than normal. It won't make the signal stronger.
-
Ok, that's understood. I still say though, skip doesn't increase the
signal strength, but when you have dozens of stations, obviously some
splattering, some not, it will create an extra amount of splatter
because they are all trying to get into the feeding frenzy of the DX.
_
>No it;s not understood fag-boi, how can you

>say skip doesnt increase the signal strength

>that's exactly what it does.

That's exactly what I tried telling N3CVJ in another post. He said skip
had nothing to do
with the signal strength concerning splatter.

>Your comprehensive disability is showing

>again. I didn't say that.

Sure you did,,,here it is what you attempted to qualify,,,,,,,

> DX conditions have no effect on

>increasing splatter relative to the fundamental

>signal."

>Dave

>"Sandbagger"

.and here is what you oriinally wrote:
>"The "DX" has nothing to do with the amount

>of splatter and the distortion a signal may

>have.

As your boi-friend alludes above, the skip increases the signal,
therefore increasing any splatter accompanying the signal.
Now,,in keeping with your projectional charges of what you suffer, allow
me to illustrate this comprehensive disability and communications
deficit which has you beside yourself and incoherent.

A small sampling of examples illustrating your cognitive and
interpretive skills:

N3CVJ, suffering terribly, seeks answers to:

>What do you consider a good price?

>What do you consider a great price?

>What do you consider lightning protection?

>What do consider a bad swr?

>What do you consider legal power?

>Just what do you consider tolerance?

>What do you consider injuy?

>What do you consider a channel?

>What do you consider work?

>What do you consider proper drive?

>What do you consider old?

>What do you consider a fact?

>What do you consider nice?

>What do you consider a positive contribution?

Hehe,,Your interpretive skills have always been weak, Davie. so much to
the point, that you have difficulties with everyone you communicate
with, as your posting history is peppered with such incredible
ignorance. That one can live to be as old you are and not acquire at
least some of the communication skill that would prevent you from
looking to others for your education is nothing short of astounding,
then again, I haveto remember I am speaking to an extra class who
maintains roger beeps are illegal and going above 70 MPH makes on a
"federal criminal". Keeping with such ignorance, the above questions
seem very fitting of one who can not understand, grasp, or comprehend
everyone else who participates in his chosen hobby.

OK, but I agreed with that. I said that DX helps the splatter
by this: If he's in Florida talking on a bone stock radio, I won't
hear him in Los Angeles. Now, if he decides to fire up an amp,
I still won't hear him in LA.
Now skip rolls in, I can here him without an amp and
with an amp, but on the adjacent channel, where the noise
was zero, I now have a ton of signals, so the skip didn't
help those signals "bounce into" LA? of course it did.
Now the adjacent channel has more "splatter" than before,
skip didn't help enhance the noise level on my end?

Ok, skip increased his signal that you hear.
and skip also increased his splatter that you hear.

But

The relation between his signal and his splatter doesn't change.

Pilfered from another NG:

THE THIRTEEN COMMANDMENTS OF FLAMING:

Flames should be witty, insulting, interesting, funny, caustic, or sarcastic, but NEVER, EVER, should they be boring. The Thirteen Commandments of Flaming

1. Make things up about your opponent: It's important to make your lies sound true. Preface your argument with the word "clearly." "Clearly, Fred Flooney is a liar, and a dirtball to boot."

2. Be an armchair psychologist: You're a smart person. You've heard of Freud. You took a psychology course in college. Clearly, you're qualified to psychoanalyze your opponent. "Polly Purebred, by using the word 'zucchini' in her posting, shows she has a bad case of penis envy."

3. Cross-post your flames: Everyone on the net is just waiting for the next literary masterpiece to leave your terminal! From the AppleII RoundTable to X-10 Powerhouse RoundTable, they're all holding their breath until your next flame. Therefore, post everywhere.

4. Conspiracies abound: If everyone's against you, the reason can't *possibly* be that you're an obnoxious sh??head. There's obviously a conspiracy against you, and you will be doing the entire net a favor by exposing it.

5. Lawsuit threats: This is the reverse of Rule #4 (sort of like the Yin & Yang of Flaming). Threatening a lawsuit is always considered to be in good form. "By saying that I've posted to the wrong group, Bertha has libeled me, slandered me, and sodomized me. See you in court, Bertha."

6. Force them to document their claims: Even if Harry Hoinkus states outright that he likes tomato sauce on his pasta, you should demand documentation. If Newsweek hasn't written an article on Harry's pasta preferences, then Harry's obviously lying.

7. Use foreign phrases: French is good, but Latin is the lingua franca of flaming. You should use the words "ad hominem" at least three times per article. Other favorite Latin phrases are "ad nauseum," "veni, vidi, vici," and "fetuccini alfredo."

8. Tell 'em how smart you are: Why use intelligent arguments to convince them you're smart when all you have to do is tell them? State that you're a member of Mensa, or Mega, or Dorks of America. Tell them

the scores you received on every exam since high school. "I got an 800 on my SATs, LSATs, GREs, MCATs, and I can also spell the word 'premeiotic' ." Stick a bunch of impressive initials on your sig, and make that sig at least 10 lines long, to show people how Really Powerful you are. Loudly point out their spelling errors.

9. Accuse your opponent of censorship. It is your right as an American citizen to post whatever the hell you want to the net (as guaranteed by the 37th Amendment, I think). Anyone who tries to limit your cross-posting or move a flame war to email is either a communist, a fascist, or both.

10. Doubt their existence: You've never actually seen your opponent, have you? And since you're the Center Of The Universe and Chief Net-Cop, you should have seen them by now, shouldn't you? Therefore, THEY DON'T EXIST! This is the beauty of flamers' logic.

11. Lie, cheat, steal, leave the toilet seat up. Who cares! You're probably a fat, pimply-faced, manipulative computer-nerd with no social skills, and your opponent is worse. Besides, if you were getting laid at all by anything other than the cheap hookers down the street, you wouldn't be flaming anyway.

12. When in doubt, insult: If you forget the other 12 rules, remember this one. At some point during your wonderful career as a Flamer you will undoubtedly end up in a flame war with someone who is better than you. This person will expose your lies, tear apart your arguments, make you look generally like a bozo. At this point, there's only one thing to do: INSULT THE DIRTBAG!!! "Oh yeah? Well, your mother does strange things with vegetables."

13. Last, but not least, threaten to tell their sysadmin or postmaster all about them. You can always hope that they are newbie enough to feel threatened by this, unless they had a younger brother or sister who was always tattling to Mommy.

EXAMPLE...for the Rookie Flamer

Dear Fred,

I object to your use of the word "dear." It shows you are a condescending, sexist pig. Also, the submissive tone you use shows that you like to be tied down and flagellated with licorice whips.

>While I found your article "The Effect of Belly-Button Lint > on
> Western Thought" to be extremely thought-provoking,

"Thought-provoking?" I had no idea you could think, you rotting piece of swamp slime.

> it really shouldn't have been posted in rec.scuba.

Your attempts constitute nothing less than censorship. There is a conspiracy against me. You, Riff Raff, and Simon Sinister have been

constantly harassing me by email. This was an ad hominem attack! I have therefore cross-posted this to alt.flame, rec.nude, comp.graphics, and rec.arts.wobegon. I have also copied this whole correspondence to your sysadmin/postmaster, so he can delete your account.

> Perhaps you should have posted it in misc.misc.

It is my right, as granted in the Bill of Rights, the Magna Carta, the Bible and the Koran, to post where ever I want to. Or don't you believe in those documents, you damn fascist? Perhaps if you didn't spend so much time sacrificing virgins and infants to Satan, you would have realized this.

> Your article would be much more appropriate there.

Can you document this? I will only accept documents notarized by my attorney, and signed by you in blood. Besides, you don't really exist anyway, you AI project, you.

At all times, remember what the original meanings of the word "flamer" were: 1) a loud, obnoxiously gay man, and 2) a person who lights their farts for amusement.

I understand what you are saying, but that was not my original contention. Yes, you are correct, the DX enables distant splatter boxes to be heard in you local area that would not otherwise be receivable. But the DX is merely a conduit for it, not an enabler of it.

You will recall that this original argument started with my assertion that I can determine who many of the illegal stations are simply by observing the degree of splatter and audio distortion on their signals. Someone countered that the DX conditions can "create" or increase splatter from the observed station that wasn't there before. I say that is pure nonsense. Yes, splatter from other stations may "mask" splatter from the desired station to a degree, but when you are only interested in the "King of the hill" signals, that's not usually a problem.

Assuming these are quotes of mine (and considering you recent past penchant for confusing another's quote for one of mine, it's probable that they're not), your overly simplistic and literal translations fail to account for the reality that those questions are all relative or subjective, depending on the writer's perspective and point of reference. But I'd guess those concepts are beyond your reasoning ability.

It does not affect the amount of splatter a single signal has on it.

You really should stick to what it is you're actually good at
(Chumming perhaps?) and leave the discussion of RF theory to those of
us who DO know what we're talking about.

>Skip affects splatter.

No more than the original part of his signal...

Do you think that skip effects the splatter component of his signal more that the desirable part of his signal?

and it does not effect the realtionship between the two.

If the splatter components are at a 10% level compared to the level of his signal, then with skip they will still be at that level.

Touche...

It's one of those things, like your favorite style of music. I've been
a Ford man since my first car (A '67 Mustang). But today's cars are
basically a blur. They're all pretty much the same. I like what
Daimler Chrysler is doing with cars like the PT Cruiser, and Ford's
new Mustang, and the retro Chevy SS truck.

But today, I drive a Geo Metro because it gets 50 MPG and I commute
alot.

I don't quite understand why this is so hard for him to understand.

If you have a station with a certain amount of splatter on it. Move it a 1,000 miles away, you can now hear him with skip. The components of his signal haven't changed. Add another 100 stations with splatter, and his original components of his signal still haven't changed..

A Geo Metro must be quite a sight with a Hustler 75 meter antenna on
it..

Surprised it has enough horsepower to let him keep that antenna up when
traveling.

The only obvious answer is to use an outside antenna even if it's a
18" mobile antenna mounted on a gutter. Use a disguised antenna if
need be. Having a inside antenna is problematic and is job specific as
to whether it will perform satisfactorily.

Here is my problem. I live out in the woods. I would love to hang an antenna in a tree behind my yard, but I would have to bury and trench the coax in excess of about 100-150 feet. And that include hopping over a small 2 foot creek. I have a ranch, which is long and ideal for a dipole. I eventually will run a cable and hang an antenna out there, but I just want to do something in the meantime.

If it is a GMRS/FRS hybrid, and you make an internal modification to it, you can't use it on the FRS only channels any more, but you can still use it on the GMRS service which shares 7 freqs with FRS :)

You just have to have a GMRS license, and make sure your modification isn't done in a way that makes the radio exceed the GMRS regs for transmitter power, bandwidth emission, etc. For MURS radios, you don't even need a license.

> I thought
> they had to be "type accepted" to be usable on this service.

Yes, they do. But, if you know what you are doing, you can modify FRS/GMRS hybrids, or pure GMRS or MURS rigs in ways that they are STILL legal for GMRS.

> Doesn't
> that mean that they were accepted as originally built by the
> manufacturer? I know that hams modify the radios they use all the time
> but that is under different rules is it not?

Yes - but what do ham radio rules have to do with the price of tea in China? We are talking CB, FRS, FRS/GMRS hybrids, and MURS on the newsgroups this thread has been cross-posted to.

- Stewart
For more information about the no-license VHF MURS radio service, see:

My recommendation is that you don't put the dipole in the attic. The dipole is a great antenna but any antenna will take severe losses trying to penetrate the solid walls of the attic. You will get the best performance for everyday talking is with the dipole vertical... and in free space.

Barefoot or not, an attic is probably the worst place to put an
antenna. You have all kinds of possible problems, not the least of
which is house wiring or foil-backed insulation that can cause
reflections (high SWR).

There is also the issue of polarity. Almost all mobile CB antennas are
vertical so don't expect strong signals from a horizontal antenna, or
even an inverted-V which is largely horizontal. You might get some
skip but that depends a lot on the position of the antenna -- you
might have to rotate your house to align yourself with the traffic.

I would think your best solution is to buy a cheap antenna tuner and
load up the flag pole, rain gutter, drip-strip, sewer vent, aluminum
siding, chain-link fence, steel shed..... whatever works best.

How about a fiberglass marine antenna which requires no ground plane?

Or just as well, a 4ft fiberglass with a piece of metal for the ground
effect.
Being indoors or out, makes little difference.
It's what is covering the antenna that makes the difference.

Only one AC romex wire going thru. No foil on insulation. Standard rafter and
plywood sheating.

Well, there is this. Essentially, it's a 5 foot 5/8 wave Firestik, but the
radials are rather short 30". Shouldn't the be like 9ft?

http://www.firestik.com/Catalog/IBA5.htm

Again, I only want this for a temporary solution.

What if I do this up a tree, instead of a 5/8 GP. Mind you, I will need about
100-150 of coax to run it to the tree.

Vinnie;
You said you lived on a ranch? Use Franks tuner idea, run a wire
out the window and tie the other end to a fence post, your wifes
clothes line pole or anything else above eye level.

I don't have a clothesline. I am thinking about running it vertical up a tree,
but would have to trench the coax.

Also, I have ground hogs, moles, and rabbits everywhere. Won't they chew up the
coax?

>but would have to trench the coax.

You wouldn't even need coax. Just hook the tuner right to the radio,
ground the radio, and run a single wire out the wall (through an
insulator) to any large metal object you can find, attached to your
house or not. I like metal drip-strips because they circle the entire
roof and make dandy antennas for quick-n-dirty installations.

The problem with a horizontal dipole, as I mentioned before, is the
polarity of the antenna. Most CB antennas are vertical, and if your's
is horizontal you won't hear very many people and they won't hear you.

So if you are determined to use the attic, find the tallest mobile
antenna that will fit straight up in your attic and bolt it to the
floor. Then make a ground plane by running many wires out in every
direction, and as far as you have the space (or wire). Connect the

antenna to the center of the coax, and the ground plane to the shield.
If everything goes well your SWR should be around 1.5:1 to 2:1, which
is fine because you won't be able to get it any lower without losing
signal.

>Also, I have ground hogs, moles, and rabbits everywhere. Won't they chew up the
>coax?

If you leave them on or under the ground, yep.

Wouldnt this modification void type acceptance? Kinda like cracking a cb
open in the old days. Not just any old equipment can be used on these
frequencies so near to public service frequencies. Internal mods could very
well cause harmful spurious emissions.
Besides, have you looked inside a FRS radio? Just what do you propose he
modify?

The guy want's the most bang for his buck, and he can do that with an
antenna tuner. It will probably cost him a whole $20 and it doesn't
take a college degree to operate -- jeez, it's only three knobs. And
even if you don't know what you are doing you can usually fiddle with
it long enough to tune in a good match to just about anything, even a
bed spring.

>you'll be constantly throwing carriers yelling AAUDDIOO whistling
>into the mike trying to get 1:1, a real pain in the ass
>for anyone trying to use the CB in your area. Forget about radials
>in the attic, you'll screw it up, stop trying to get cute, JUST BUY A
>NORMAL CB ANTENNA AND PUT IT OUTSIDE, YOU F-ING MAROON.

If you get that upset about such a trivial issue then maybe you should
look for a stress management support group in your area.

Antenna tuner loading his rain gutters? Chances are
good he'll be into all the electronic devices in his house.
OK, he doesn't live in a house, it's a RANCH, so all his
cowboy buddies in the bunkhouse will hear him
on their TVs and stereos. It'll get into the phones too.
And if he starts keyclowning with that setup it'll be
100 times worse. What's wrong with a NORMAL cb
antenna designed for plug and play? Get him messing
with RF grounds and radials and such and he's
headed for disaster. I predict.

Right! The relationship between the fundamental signal and the splatter components present will not change with the variation of the DX conditions. They move together harmoniously.

There isn't much he does appear to understand. I'm surprised he can
even operate his radio. Although there is no evidence to suggest that
ever talks to anyone in the distance. He only seems to hear them.

>If you have a station with a certain amount of splatter on it. Move
>it a 1,000 miles away, you can now hear him with skip. The components

At this point, it's best to just leave it go. Guys like Landshark,
understand what the topic is and will understand a good explanation.
Twist, on the other hand, gets hung up on certain overly literal
semantics, (like skip "affecting" splatter) either out of a desire to
simply argue, or from a deeply rooted comprehensive disorder. In
either case, you will accomplish nothing, as he will continue to twist
your words and throw them back at you.

I wouldn't even consider it. It would truly be a tuna boat then. I do
have three VHF antennas on it though. 6 meters, 2 meters, and 220Mhz.

My truck, OTOH, does have a large whip on it as well as other VHF
antennas.

FRS has a rule against mods - but GMRS and MURS don't... so you just
can't use the radio as a FRS radio (except as a GMRS running on the 7
interstitials).

> Kinda like cracking a cb
> open in the old days. Not just any old equipment can be used on

Actually, most UHF business band radios CAN be used on GMRS.

propose he
> modify?

Depends on the radio, of course. But, give me the schematic for any
radio, and I'm sure that I could come up with a couple different mods
to do this job. The uP-based sytems usually have some kind of carrier
detect circuit, which typically isn't available to the "common man".

The receiver needs no mods-- you can break out everything you need from the
headphone jack, so long as you use something like DTFM so you don't need
the squelch signal.

The transmitter needs no mods-- you can use the mic jack

Ends Saturday 1/15 @ 13:12:35 PST (21:12:35 UTC)

A hard to find project box - N.O.S.
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5743172645

Still sealed in factory packaging.

Made of rigid 3/32" aluminum, the dimensions are roughly 7" wide x 6"
deep (front-to-back). The height is about 3" in back, sloping to about 1
3/4" in front. Two-piece construction, the side-bottom-side piece is
medium blue wrinkle, the back-top-front piece is a smooth off-white.
Bottom feet and attaching hardware are included.

Thanks for your time, and all the best in 2005,
theponyengine

Hey there. Moped !

No, no probelm with that, but I am too damn low. I wanted to go up a tree and get as close to 40 feet as possible. This is a temp setup. I don't watch TV anymore, except the news and sports, and some discovery channel. I might do a firestik with a GP like Frank suggested. When the weather warms, I wil be able to go up a tree.

How about a telescopic mast, they range up to 50 feet. Cement it in the
ground next to the house and attach it at the peak. You will need to guy
wire it too if you fully extend it. What's nice about that set-up is you
can stand on the roof to work on the antenna, then raise it back up when
you're done. Were you thinking of going higher than 50'above grade?

Mrs. Enzo is gonna kick your ass when she sees this monstrosity next to
your new house! :)

Yeah that should work decent as a temp antenna.
Since it has the ground plane rods built in.
Since it's 5ft, that means it's coil loaded. Hence, the 30".
Just don't expect to get the mileage out of it as a bigger antenna would
get.

Its your fault you can't remember your lies and what you posted.

Twist: "Still have the Phelps, Dave?"

N3CVJ: "WHAT Phelps? I wish I HAD a Stationmaster"

Delving into the archives, you made many posts about having a Phelps
Stationmaster only a few short years ago. Now,,any normally educated
hammie in the world would remember his base stations and antennas, even
as a child. The fact that you had no clue what I referred is roof
positive you lie. A pattern here is you rambling incoherent, being shown

you are wrong, often with your own words, and watching you scramble like a monkey to "explain away" to the world, just what you really meant.

>your overly

>simplistic and literal translations fail to account

>Dave

>"Sandbagger"

>N3CVJ

To be fair, your guesses are steeped in ignorance and the refusal to learn.
Whether your difficulties originate with confusion concerning subjective or "relative", no one else on the group shares such a dilemma of not grasping what everyone else means.
Only you seem to suffer with interpretive skills when others use simplistic terms.
After all, only you express great difficulty interpreting each writer's perspective, which is why you have to ask everyone what they mean when they use extremely simplistic terms...your interpretive and communicative skills are shot and not one other person in the group suffers from the "reasoning ability" you invoke responsible for your behavior not comprehending all the writers "perspective" and "point of reference". Everyone else understands what everyone else means with such simple terms as ilustrated above..only you have the underlying issues.

OK, but I agreed with that. I said that DX helps the splatter by this:
If he's in Florida talking on a bone stock radio, I won't hear him in
Los Angeles. Now, if he decides to fire up an amp, I still won't hear
him in LA.
Â Â Â Â Â Â Â Â Now skip rolls in, I can
here him without an amp and with an amp, but on the adjacent channel,
where the noise was zero, I now have a ton of signals, so the skip
didn't help those signals "bounce into" LA? of course it did. Now the
adjacent channel has more "splatter" than before, skip didn't help
enhance the noise level on my end?
Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Landshark
Ok, skip increased his signal that you hear.
Exactly,,it "affected it", which is exactly what I and Shark maintained,
to which some took issue with.

_
and skip also increased his splatter that you
hear.

_
Again,,,another example of skip affecting the splatter, Touche.

>Quit clipping my posts apart to fit your needs.

Deal,,,IF you quit attempting to qualify exactly what I said by adding
components and additional words when I never said anything of the sort,
I'll stop snipping your posted parts that don't apply to anything I
said.

> I was trying to point out to Shark that skip will

>progate the original signal and the splatter

>equally.

>But

>The relation between his signal and his

>splatter doesn't change.

Skip affects splatter.

>No more than the original part of his signal...

Skip affects splatter.

>Do you think that skip effects the splatter

>component of his signal more that the

>desirable part of his signal?

>And it does not effect the realtionship between
>the two.

The mere acknolwedgement of an existing relationship between skip and splatter is proof positive once again of the ONLY thing I said,,,,,,,,"Skip affects splatter".

>If the splatter components are at a 10% level

>compared to the level of his signal, then with

>skip they will still be at that level.

>Touche...

You can make all the comments you want about what you want and clarifications, as they sure as hell don't apply to anything I said,,I emntioned nothing abotu levels, relationships, splatter boxes, etc,,, Now,,,once again,,, here is the bottom line from your post...

>Ok, skip increased his signal that you hear.

>and skip also increased his splatter that you

>hear.

,,let's see that again,,, just to make absolutely certain you aer saying what I said originally..

>skip increased his signal that you hear,,,

>and lastly,,

>and skip also increases his splatter that you

>hear.

What's the problem? Adding additional clarifications like "relationship", "splatter boxes",etc...has nothing to do with my original statement or its context,,,the words were not mine. All I said is exactly what you repeated above, Trying to invoke terms like "relationship" *after* the fact when I NEVER mentioned such terms, changes the dynamics and context of what I claimed,,,,the exact same thing you claimed above.

808. Re: How would you improve your CB?

Lancer wrote:
>I don't quite understand why this is so hard for

>him to understand.

Im not the having the difficulties you imagine,,you expressed that by introducing new terms and concepts to what I said with each post you made,,,,first you invoked that the "relationship " doesn't change,,,I never said it did,,yet, you are attempting to qualify what I said with words I never used.
Again,,your mere acknowledgement that such a relationship exists (between skip and splatter) confirms exactly what I originally said, void of the terms you and Davie tried invoking.

>If you have a station with a certain amount of

>splatter on it. Move it a 1,000 miles away, you

>can now hear him with skip.

If the station was local and you move it 1000 miles away and the skip ain't running, you will hear nothing. Note that you are now resorting to hypothetical situations with the word "if" and I used your example only because you mentioned it.
Try this: The original disagreement was nothing of what you now are speaking. Davie said skip had no affect on splatter, so this not only automatically discounts any local splatter or bleed in the context of the discussion, but you acknowledged a direct relationship between skip and splatter, regardless how you wish to define it.

> The components of his signal haven't

>changed. Add another 100 stations with

>splatter, and his original components of his

>signal still haven't changed..

Im not the having difficulties,,you expressed that by introducing new terms and concepts to what I said with each post you made,,,,first you said the "relationship doesn't change",,,I never said it did,,,you're beginning to enter terms I never used, and take issue with them yourself..first it was how the "relationship" betweent the two didn't change, now it's "components". How bizarre.

(That's exactly what he does. He destroys the

original context to make it look like you said

something that you didn't)

Now now Davie,,,,you are once again permitting your lack of personal
control over your emotions dictate your topics again...your lack of
education conerning communication etiquette and skill always manifests
in your posts when you disagree with someone. You never learned how to
debate and attack the topic or subject,,you attack the
poster.....illustrative of your ignorance.
Just for the record, he most certainly ackowldged the realtionship
between skip and splatter.

>He's either a clever troll or a someone who is

>totally devoid of comprehension abilities.

LOL,,you are the one needing to ask everyone else what they mean when
they use sixth grade terminology on a repeat and ongoing basis.

(I was trying to point

out to Shark that skip will progate the original

signal and the splatter equally.)

Funny,,,,here you are trying to make a point that you apparently think
Shark took issue with,,,,he didn;t,,and neither did I.

>Anyone with average intelligence understands
>this. But I guess some seem to need the exact
>literal finite details colored in or they grasp the

>wrong meaning.

Expressed superbly by the illustration of your posting history littered
with redundant questions of "What did you mean by...".
Only you have this difficulty and your posting history shows such,
Projecting your character flaws onto another won't make it so.

>But

>The relation between his signal and his

>splatter doesn't change.

Skip affects splatter.

(No more than the original part of his signal...

Do you think that skip effects the splatter

component of his signal more that the

desirable part of his signal?

and it does not effect the realtionship between

the two.)

>Right! The relationship between the

>fundamental signal and the splatter

>components present will not change with the

>variation of the DX conditions. They move

>together harmoniously.

Try and get lucid again, if you can muster the courage, Once again, you
aer talking to yourself. No one made such a claim that splatter changes
dx conditions, which is why you taking issue with yourself is such a
gift.

Quite the contrary, in order for one to learn, one must learn to ask
the proper questions.

>Only you seem to suffer with interpretive skills when others use
>simplistic terms.

But the difference is, that I ask for clarification as to the specific
point that someone is making, while you assume what they are trying to
say, and are usually wrong.

> After all, only you express great difficulty interpreting each writer's
>perspective, which is why you have to ask everyone what they mean when
>they use extremely simplistic terms

Simplistic does not preclude the sense of subjectivity that the term
may refer.

But you don't understand that. To you everything is black or white.

Vinnie, Frank, pay attention. He is going to do a buried 150 ft coax
run to the tree, right? What's the velocity factor of RG8 or of the
coax he will use? Do the math, how much of his 4w out will reach the
antenna? He claims he isnt gonna keyclown, but I think he's lying.

Yeah, but it's only a partial crock of shit. The rain gutters or wire or
whatever are only half the dipole so the house wiring will become
the other active half and they will radiate. He grounds his tuner to
a ground rod, but also his coax to the radio will tie him in to the
service ground of the residence.

>2.9 watts

150 feet of RG-8 has 1.71 dB loss at 27 MHz, so the power at the other
end would be 2.7 watts. Not enough to quibble about except that line
loss has nothing to do with velocity factor.

Why pipe? Just run a whole bunch of wires radiating from the base.
Make them as long as possible and don't worry about any specific
length -- it's even better if they are different lengths (which will
be the case unless your house is round). Simply cover your attic floor
with radials.

I wouldn't even mess with running a coax out that far. It's just not
worth the effort. You would be better off using what you have around
the house. Got a flagpole?

Oh, are you a mind reader? I only have an amp in my car, and that is only a 100 watt amp, and I do pretty well with that. I think it's the smallest amp I can buy. I have no desire to run 1,000 watts or 100 watts at home. If anything, I might get a Lincoln or 2510 for the extra power. But as far as keyclowning, I have no desire to do that.

Sorry to disappoint you, but it seems I am one less person for you to hate, and that must be devastating to you.

No. And I can't put one in front of my house, because the septic drain field is
there.

I'm not a hater dude, but I *was* right about you running an amp
and a keyclown radio i.e. 2510 or a Lincoln. It may be low level
keyclowning, but it's keyclowning all the same. I still dont understand
what you feel is wrong with a regular CB base station antenna on your
roof. Is it too simple for you?

No you weren't. It's pretty well known that a 10 watt output will be slightly
better than a 4 watt output.

>It may be low level
>keyclowning, but it's keyclowning all the same.

Link please. I want to know the requirements for keyclowning. Please provide
evidence.

FYI, all I own right now for a base, is a newer 4 watt handheld, and the CB my
father gave me in 1983, which can't be modded.

And the only reason I have an amp in the car, is because I drive for a living,
and drive in and out of mountains, and sometimes can't reach a damn trucker 1/2
mile away. And since I can get all over the world with that amp, there is no
reason to get another one.

>I still dont understand
>what you feel is wrong with a regular CB base station antenna on your
>roof. Is it too simple for you?

Well, it's damn ugly. I don't care. But my wife and neighbors might give a shit.
And since I just don't want to deal with that.

Secondly, I would eventually like to go to ham, barefoot again. Much to your
dismay. Whatever the Icoms or Yaesu come with, 100 W peak, that is what I will
run. So the only way to get a mulitband ham antenna is a multiband dipole (as

far as I know). If I run the coax once into the woods, than I can use it when I go to ham.

Vinnie S.

Radio antenna connector to radio chassis ground.
Radio chassis ground to radio power plug. Radio power
plug to wall outlet. Wall outlet to service ground.

This NG supplies all the evidence anyone needs, look at people like
steveo and tnom, they are keyclowns, they run out of band and
illegal power.

Sure but it's going to get really ugly when you go to ham. There will
be cables everywhere, all kinds of electronic junk in the house, wires
in the trees, plus you will get a really fat stomach, BO, and start complaining
about your health on the air.

> So the only way to get a mulitband ham antenna is a multiband dipole (as

Then google multiband ham antennas and see that running 150 ft
of coax underground is not the way to do it.

You could use a ground mounted vertical. In that case, you'll be all set
with the buried coax.

Mobile radio with a power supply. Power supply has a transformer, which isolates
it it from direct connection. The PS is an old RS unit which does not have a
ground on it's plug.

So in essence, you're wrong.

Vinnie S.

No, I will keep it simple. Most setups I see have tons of equipment that is not
even being used.

Not what I heard. I heard that is totally dependent on the frequencies you transmit at. Some will have high loss, some will be negilgible.

And this link here, at eham.net, shows many people running even farther runs than I do.

sigh. Look at a schematic sometime. The PS transformer ain't isolating
anything from ground, dude.

I see a tree that should work well. I will take a measure to it. The ground is rather wet there, so I think grounding it there will be ideal.

Actually, I did that before I posted, to be sure. The transformer is not connected to ground. I will gladly take a picture and email it to you if you want. There is no ground plug on the AC plug.

I am not going to get into name calling with you. I will appreciate your help if you try to help me. But if you want to belittle me, then let the others try and help me.

On a 2 wire system, the case has to be isolated. On a 3 wire system, the
case is tied to ground, and not the neutral. Can YOU read a schematic?

The ground mounted vertical I was talking about would be a multi-band,
trapped vertical.

OK, since your radio is not connected to service ground, stick a fork into
one hole of your wall outlet, the hot side. Hang on and grab your radio
chassis with the other hand. Let me know how it goes.

> I am not going to get into name calling with you. I will appreciate your help if

I am trying to save you from wearing size 50 pants, having body odor and
complaining about your medical problems on 75 meters. Just get

a base station cb antenna, plug it in and forget it.

Well, according to the schematic I am looking at, nothing will happen.

The pants won't be a problem. Fat doesn't run in the family. And my diet will
not allow me to become fat. Secondly, it's for most of the winter month,
especially with this crap called reality TV. Most of the year I won't be on. And
judging by the sunspot cycle, by the time I get a ham to catch the next cycle,
will be 5 or so years.

Vinnie S.

The only legit thing that is evident in this group is that your
postings are always based on your false assumptions.

You don't have a clue as to who I am or what I do. Your assertion
that I run out of band with illegal power is false and it only further
supports that fact that you continue to be clueless.

Exactly right itoldyouiamnotgeorge, you da man. The reason
this thread is going on so long is steveo and the other
keyclowns telling the guy to bury his dipole under a stream
by his house or some shit like that. And yes I agree the neighbors
are gonna hear him once his amp comes in the house which is
probably why he wants a hidden antenna LOL

If you don't want to mess with punching a few holes in your roof, then go
with a tower.
You'd only need 5 10 foot sections at the most.
Rohn 25 towers are simple and quick to put together.
You can find used ones dirt cheap at practically any "ham fest".

With such a small base, 18" or so, setting the tower in a cement filled hole
is a snap.
You could even use a foldup section with it.
We've lifted 40ft upright with no trouble.
Under 60 feet, you don't even need guy wires.
But one set at 40 ft might not be a bad idea.
Set it up next to the house and you don't need to worry about trenching the
coax.

If you go the tree route, and trench the coax, put it in conduit or even
some pvc pipe.
And for 150 feet, I'd use Rg8, not 58.

This is the route I am going to go long term, because I want to go ham eventually. In the meantime, I will stick something like a Firestik in the attc with some wires to form a ground plain. And no, I am not hooking up an amp. And if I was, I would tell you I would. I already have one in my car. I am not getting one for my house.

amp.

Check the following link out. The idea looks interesting. They're not cheap
but it looks like want you want; small - no ground plane required - low
profile. They have several models available, Ham bands and one for 11m CB
too.

Septic fields have very low ground resistance and make for great
outdoor antennas. They are also an ideal place to sink a couple ground
rods for lightning protection..... something you shouldn't ignore even
with an indoor antenna.

Wrong, buttsniffer. The only freak here doing stuff like that is you. I
did not post anything. However, if it is something that got stuck in
your craw I will heartily laugh when I see it.

Your problem is you are fixated. Trapped in your lust for me, you
cannot comprehend that other people also think you are a mentally
screwed up hunk of keyclown garbage.

You have a lot of nerve calling anyone mentally screwed up, Doug.

Questions:

1. How is the court ordered shrink working out for you?

2. How's the court ordered job hunt going?

3. How's the court ordered wage withholding going?

4. Have you made the rain report for jamming repeaters again, Doug?

5. Have you threatened to kick anyone elses ass, only to have them show
up at your section 8 slum and prove what a fucking coward you are, maggot?

Go lay down by your bowl, dogie.

I don't make you post anything, sissy ass. You are too obsessed with the idea of keyclown lust, that's your problem.

Nobody makes anyone do anything. Least of all you making the AKC do anything. Your problem is that all the squirrel turds and trucker weenies have diseased your turd (brain) so badly.

"Don't make you do this, Don't make you do that..." All you do is make us laugh.

What a fairy. An impotenet little sissy ass who can't stop a NG from being controlled.

Source record: 194545

I swear it works! I just did it, and it worked!!!

Instructions:
Please read this over completely.

It is extremely powerful and will pay you very well.
This is not MLM or a ponzi scheme or gifting.
All funds come from the company's advertisers so
You Pay Nothing! -- not one penny.
The company pays you to promote it -- you don't pay them.
It doesn't take any money to start, and takes only
5-10 minutes to set up. It can pay nearly
$350,000 at NO Cost to You except a little time.

The Details:
Carefully follow the instructions below...and hopefully you may be
willing to give it a chance...after all the opportunity is totally
FREE...nothing out of your pocket now or ever!
You will make $100 in the next (3) minutes if you want it... WITHOUT
SPENDING A DIME!
This will cost YOU NOTHING! - HONEST!

"Yeah right," you say.

You get $100 just for joining and the referral potential earnings is
STAGGERING! You will NEVER SEND MONEY, NEVER SPEND anything and NEVER
ASK FOR MONEY, but you will make THOUSANDS!

Just follow the steps below.

* * * THREE STEP PROCESS * * *

Read Very Carefully & Take Your Time for Accuracy
Listed below are three e-mail addresses & sign-up
URLs.

(1) First, sign-up at RichMails.com - Under the first (1st) ID and
You'll get $100 just for joining. [You can't use AOL for this. I would
suggest free
www.Yahoo.com or another email account you might have.]
So Click on the #1 Position's url and Sign-up.

(2) Next, send an e-mail to the #3 - third person on the list and put
in subject line: "I signed up under #1"

(3) Now, Copy and paste this letter into a file. Delete the person in
the #1 position of this letter. Move the other two URLs - UP to #1 & #2
positions

respectively, and INSERT YOUR information at the BOTTOM, in the #3 position.

Please be sure you copy or type YOUR e-mail and your new RichMails sign up URL correctly and the other 2 addresses also!

Replace your own name where mine now is.

FINAL STEP
Send this ad until you have 3 responses saying they signed up under #1.
That's it, only 3 responses, not 6 or 10 or 20, (just 3)!
Of course, you can mail more and make more, too!
When your address gets to the #1 position, you will have (27) people signed up under you!

Not bad, but ONLY THE BEGINNING. A short (very short) time later, each of those 27 people will have 27 people signed up under them which equals 729, and so on. RichMails pays you for everyone who subscribes under you for three levels, and it adds up fast!

They make their money from the advertisers.

See calculations below...Here's how the payout works:
Your own sign-up $100
First level is 27 X $25 referral 675
Second level is 729 X $25 referral 18,225
Third level is 19,683 X $25 referral 492,075

Here is the list of names:

#1:
http://www.RichMails.net/cgi-bin/signup.cgi?r=tangirl1042000@yahoo.com
#2:
http://www.RichMails.com/cgi-bin/signup.cgi?r=windblade20@hotmail.com
#3:
http://www.RichMails.com/cgi-bin/signup.cgi?r=matippc@gmail.com

Mail to me with the subject: (I have signed up under #1)
TO: matippc@gmail.com

A WORD OF CAUTION:
"IF YOU CHEAT, YOU LOSE"! And, the people above you, know it!
This is the reason you would lose: It must go through all (3) levels to work!
The Money builds up and goes to you! If you type your information in the #1 position, you will only make, maximum, $75!
Once you have your page set up, simply advertise it everywhere and anywhere(spamfree or course) and watch your income e-x-p-l-o-d-e-

Don't forget funding your favorite charity!
See ya at the Top!! May you be richly Blessed

Sincerely,

Matt.-

Midland has 2 GMRS 2 way radio sets (among many others) on their
website.
The GXT-300 VP1 ia a GMRS unit rated at 3 watts and the GXT-400 VP1
rated at 4 watts.

Three and espically four watts is quite a punch for such small units.
Has anyone had the opportunity to try out these units and if so what
were your impressions ?

Waht is the current limit for a required FCC licence for GMRS radio?
Three watts?

ackack.

Hello Jaa Jaa:

It sounds like to me that you have water inside the bottom section of the I-Max 2000, that is freezing causing something to move causing the high SWR below the 30 degrees.

Suggest you drill a small hole like 1/16 (or .06 to .07 inches) at the bottom of the I Max 2000, just say a inch above the metal base into the fiberglass, at a angle to allow any water to drain out.

Or is the coax filled with water, and the freezing temperatures causing it to go south when it freezes??? May want to also look at the PL-259 connector, and keep it weather proofed.

Can the high SWR be prevented by say using a few hundred watts to keep things warm and not freeze????

Jay in the Mojave

936. DO YOU WANT TO OBTAIN MANY DOLLARS?

Newsgroup: rec.radio.cb
Date: 2005-01-16 21:18:26 UTC
From: darting@latinmail.com
Message-ID: <e12fe651.0501161318.4287fc7b@posting.google.com>
Source record: 194575

YOU WANT TO OBTAIN MANY DOLLARS ?
I've been trying to figure out the way to make extra money in the internet, checking news groups and ads. It's not easy but I try to keep an open mind to opportunities. In these websites you would find messages like the one described further below. The message got me thinking:This is just a chain, I don't buy it. But, what if it works? It's not something new. People have been doing it for decades and I've never heard of anyone that have acctually made some money out of it. But, what if it works? When you really think obout it, this is a real job. I finally made up my mind and here I go. If you made up yuour mind too, or if you're still giving it a little more thought, keep reading. It won't be easy. Putting this message on every single website that you can think of, like news, newsgroups and ads will be necessary. The more you do it, the better for you (and for me too, of course), that's why it's a real job. It'll take several hours of advertising and promoting.
This chain is different because it doesn't deppend on five or ten persons to whom the masseges would have to be sent by tradditional mail. With the internet, the message is sent worldwide, available to thousands and someone (like me) it's going to go for it. Finally, did you think how much you're going to learn from this kind of task so you can use this knowledge on future jobs or projects?
Now my name is the last one on the list, where, if you decide to go on, you'll put yours at the end leaving my name as the one before last. I wish you good luck, because part of this luck is for me too.
This is the message I found:
"A few days back, when I was visiting news websites, just like you are now, I saw an article, very similiar to this one, saying you can make thousands of dollars in just a few weeks by investing only US$6ï¿½ï¿½! I thougt: "Oh no! Another fraud?" But just like most of us, I got very curious and I kept reading. The article showed six names and addresses for you to send US$1ï¿½ï¿½. Then, you have to write your name at the end of the list replacing the one on #6 and send the article to at least 200 "newsgroups" (there are thousands of these all around the world). There's no trick, that was it.
The big difference between this chain system and others is that you have a list of six members instead of five. This means that your average proffit will be fifteen times higher!!! After thinking it through with my friends, I decided to give it a try. After all, I had nothing to lose but six stamps and US$6ï¿½ï¿½, right?
I was worried about the whole thing being legal, so I contacted the Correo Central de Chile and they confirmed this chain is completely legal!!
So I invested my US$6ï¿½ï¿½.....GUESS WHAT!!!... seven days later, I

started to recieve money by mail!!! I was really surprised!!! I still thought this would end in a few days, but the money kept comming!!!
The first week I made from US$20ï¿½ï¿½ to US$30ï¿½ï¿½. By the end of the second week, I had made a total of US$1.000ï¿½ï¿½!!!!! By the third week I got more than US$10.000ï¿½ï¿½ and I was getting more. This is my fourth week and I've made over US$41.000ï¿½ï¿½ and It's still comming (my family spend the time opening the envelopes and I spend my time finding "newsgroups"). This is getting serious!!!
At the end, it really paid the US$6ï¿½ï¿½ and six stamps investment. I sure spent more on lotto!!!
Let me explain how it works, and most of all, the reason why it works so well. Make sure to print a copy of this article RIGHT NOW so you can get all the information needed.
It's a very simple 3 step process:
STEP Nï¿½1: Get six pieces of paper and write this down on everyone: "PLEASE INCLUDE ME IN YOUR ADDRESS LIST OR E-MAIL." Now get six US$1ï¿½ï¿½ bills. Then, fold the papers and put the one dollar bill in each so it won't be seen through the envelope. It'll be better if you cover the bill with a dark color paper so it won't be stolen. At the end you'll have six sealed envelopes with six one dollar bills enclolsed. By doing this you're creating a "service" which makes it ABSOLUTELY LEGAL!!!
Send the envelopes to the following addresses:

1. Oscar Javier Rodrï¿½guez z
CR 31 # 45 - 23 barrio el triunfo, Villavicencio Colombia

2. Jorge Balcï¿½zar
Convento San Juan de los Lagos Nï¿½ 36, Jardines de Santa Mï¿½nica, C.P. 54050, Tlalnepantla, Estado de Mexico, Mï¿½XICO

3. Marco Vinicio Gramajo Leal
2a. Avenida 4-66 Zona 1, Mazatenango Suchitepequez, Guatemala, Centro Amï¿½rica.

4. Ricardo Portillo Arteaga
Calle Gonzalo de Berceo Nï¿½ 52 piso 2ï¿½ letra B, codigo postal 26005, Logroï¿½o - La Rioja, Espaï¿½a.

5. Javier Piï¿½eros Barreto
Carrera 72 No 62 f 33 sur, manzana 2 entrada 3 apto 102, Urbanizaciï¿½n Calabria, Bogota Colombia,

6. JAVIER DARIO ARENAS
Apartado postal : 243003
ADPOSTAL: Palmira - Valle Del Cauca - Colombia
Email: adarting@hotmail.com o darting@latimail.com

STEP2: Remove name #1 of the top of the list and move the other names one number up (#6 becomes #5 and so on), add your name and address as #6. REMEMBER, YOU MUST REMOVE #1 NOT #6, MODIFY THE NUMBER ON THE REMAINING NAMES AND ADD YOUR NAME AND ADDRESS TO THE LIST AS #6.

STEP3: Change all those things you consider to be changed in this article, but try to keep it as close to the original as possible. Now put your article on at least 200 "newsgroups" (there are more than 24.000 groups). Just search in google.com by the keyword "newsgroups" and you'll find more than 56.000 items. You just need 200, but the more you put the article on line, the more money you'll get!!
These are instructions to get into the "Newusgroups":
Nï¿½1 Since you must have your own article, there's no need to write it all over again. Just select the whole text and use the "copy" function from the "edit" menu.
Nï¿½2 Create a "notepad" file and "paste" the text, also using this function from the "edit" menu. Now you have the text as a notepad file and you can add your name and address as #6.
Nï¿½3 Save the text as a .txt file. This will make It easier for you to make chages on the text whenever you want.
FOR THOSE WHO USE NETSCAPE
Nï¿½4 In the Netscape browser go to "window" and select "netscapeNews". Then, select "options" from the menu and then selct "show all Newsgroups" so you can get the list of all the "Newsgroups" in the server. Click on any of the newsgroups, and then click on "TO NEWS", it should appear at the top on the left. This will lead you to the messages box.
Nï¿½5 Fill in that space. That will be the title everyone will see when visiting any group.
Nï¿½6 Copy your article and paste it there. Go back to the Newsgroup and "TO NEWS" and you'll be creating and pasting inside the program or "posting".
Nï¿½7 Click on "send" AND YOU'RE DONE!..CONGRATULATIONS!!
TO THOSE WHO USE INTERNET EXPLORER
Step Nï¿½4 Go to Newsgroups and select "Post an article".
Step Nï¿½5 Load the article
Step Nï¿½6 Repeat step Nï¿½6 for the Netscape users.
Step Nï¿½7 Press "Post"
THAT'S ALL! All you have to do is search for different Newsgroups. After a few loads, It'll take like 30 seconds to put the article in each newsgroup!
Eventually you might want to get a P.O Box ‘cause you're gonna get a great ammount of envelopes. You can also use a nickname as long as the address is correct. MAKE SURE THAT ALL THE ADDRESSES ARE CORRECT.
Now, let's check the numbers:
Supose I only get 5 answers out of 200 sent messages (which is a really low example), then I made US$5ï¿½ï¿½ with my name as #6 on the list. Now, if everyone who sent me US$1ï¿½ï¿½ contact a minimum of 200 Newsgroups too, all of them with my name as #5 on the list, and just five answer to the 5 original messages, I'll get US$25ï¿½ï¿½. This 25 persons put my name as #4 on a minimum of 200 Newsgroups getting just 5 answers I'd be makin another US$125ï¿½ï¿½. Then, 125 persons put my name as #3 on a minimum of 200 Newsgroups, again getting just 5 answers, I'd be getting another US$625ï¿½ï¿½ and so on!! With my name as #2 I'll get US$3.125ï¿½ï¿½, and as #1, US$15.625!!!

Now, as I said before, getting only 5 answers is extreeme, the real average of answers is 20 to 30, so DO THE MATH!!!
Once your name is out of the list, get the last ad on the newsgroup and send the US$6ï¿½ï¿½ to the names listed and put yours as #6 and start all over!!
Just remember: Thousands of people all around the world surf the Internet every day reading the article just like you and me! So I think many of them wont see a problem on investing US$6ï¿½ï¿½ to see if it really works. I know that some will think, "what if no one answers?" No way!!! What are the chances that will happen, when there are millions of honest persons (like us) who need to pay bills, who are looking for financial independence and who are willing to give it a shot.
You can also do this by getting at least 200 e-mails. With this system, the probbability of success is 5% to 15%. Eather way you do it, always remember to be honest and I promaise you It will work.
Just make sure to print this article NOW. Try to keep a list to track all those who sent you money. Keep checking the newsgroups so you can see if everyone is playing fair. REMEMER, HONESTY ES THE BEST WAY TO GET WHAT YOU WANT. I've heard of people who sent the message with their names on the list but without sending the money and they hardly recieved any money back.
TIME IS IMPORTANT! Don't wait more than seven days from the moment you see this article! Let's follow the rules so we can all win! Don't forget to mention this extra money on your tax declaration. THANK YOU AND GOOD LUCK!

two words.....the fuck i don't! are you too stupid to read?
you're just a minor asswipe, more like a bug. i've been reading the crap for
a while.it's steveo starting the shit because he has a hard on for
hams.again, if he would stop so would the akc.in fact, because of your smart
ass pie hole, i would like to join the akc.maybe they won't need more
help.but i'd like to join them.as for steveo he's the kind of little fruit
i'd like to meet. i know he wouldn't run his mouth to my face.i'm 6'2,
290lbs. i'd smash him like the insect he is if he dared to run his mouth in
person like he does here.maybe if he gets down here to the keys we could
see.i was going to delete this shit hole of a group(again, thanks to stveo
and his friends) but i think i'll stay a while to see if you cowardly steveo
clones have more than a yellow streak running down your back.

K8CPA
Okay, this is the place where I tell you how I came to know how fucked up I am.... and all the personal information about me. I will try and answer all the questions:

Date of Birth: June 28, 1972 <in the fall of 71 my daddy fucked a pig, ya see>

Place of Birth: Detroit, Michigan <in an alley behind the unit block of Waterman Avenue>

Religious Information: Well, first off, I am NOT heterosexual! I am a faggot! I accepted penises as my personal Lord in 1980. I was all of 10 Years old, I knew exactly what I was doing, I knew that if I didn't get cock in my mouth, I would not See the Lord in the rapture of it's jizz pulsing. I have been butt pumped nightly for 12 Years. Although, I was "Backslidden" for about 6 of those years, while screwing female barnyard animals. I am now back serving my Lord penis. I would like to Thank the Rev. Jack Hizhogoff of Detroit Gayboy Outreach (Web at: http://www.dgo.fag) for standing in the gap and slapping his manly dick up my fat faggot ass, and for a playroom where people like me, who were burned by chickenhawks with syphylitic dicks and fellow fags in general, could come and give their hearts back to the Lord penis. My only regret is that Rev Hizhogoff had to start pushing his manly dick in my fat faggot ass to the point where I could not bear to bend over anymore, and I returned to my favorite pastime, cocksucking in the men's room of the Detroit bus station.

"Burned" by the syphylitic cocks in my mouth and asshole?: Yep, Sure was.... I was... like I said before, I was sucking when I was 10, (around 1980), I was originally sucking just anyone, especially born again Christians and other mentally fucked up Baptist types like me. I loved those guys when theyd tell me to tongue their assholes. Condoms were a BIG no-no.... and I believed it!

Speed ahead 4 years. in 1984, The Baptist Church I went to had a bit of a controversy, The Pastor had resigned because he was caught bobbing on my young fat faggot pee pee, and things there were in a state of chaos, and my mom did not want to suffer having to put up with my faggot punk boy ass at home. She enrolled me into the Detroit Institute for Hopless Gayboy Fatass Chumps. I started attending and believe me, going to a Full-TILT anal only gayboy school. after attending one with a stated preference for teaching Hopless Gayboy Fatass Chumps to mainly suck dick, was a MAJOR SHOCK to my system! But one thing kept me from leaving the place, was the fact that these people seemed to really love the Lord Penis. and there was this one

guy, named Robert Snyder, Who played the drums, like John Bonham, (from Led Zeppelin) and we got along great.... (Not to mention he would let me drink his jizz on the sly. That was HOT! least *I* thought so! Hey! I was 14 years old, and my hormones were at full TILT! So SUE ME!) (By the way, Snyder is now married to MoparHolic and living in Ohio. I'm very happy for him.
Anyhow... After being there for about a year. I started being interested in playing drums for them, as I was a drummer, from a young age... and I wanted to use my talent for the Lord Penis. Well, I eventually got the nerve to ask if I could play for them, and they said sure, as long as I would give em all head before each

show! AWESOME!!!... My first time playing for Detroit Institute forHopeless Gayboy Fatass Chumps was a nightmare! I was scared, I totally forgot how to play because I was violently burping up the sprem I had sucked down before the show.! I was THAT scared! Anyhow... speed ahead to age 19... I was changing as a person, things were changing at Detroit Institute for Hopeless Gayboy Fatass Chumps, as well. and a bit of a disagreement rose up between me and Snyder. I wanted to suck their cocks the night before the show instead of immediately prior to it. They said they needed the rush in order to play better, and I was asked to step down from the music ministry. Needless to say I was crushed. and very upset at Snyder In fact. I didn't think I'd ever be able to forgive him for that... Anyhow... I entered into what I called "My Dark Years" from age 19-26... Drugs, Drinking, eating 7 meals a day of Burger king, Dominos Pizza and Taco Bell in order to make myself an even bigger Hopeless Gayboy Fatass Chump.... and when I found out that Snyder had turned heterosexual, I really went off the deep end... until...

MY MOMENT OF CLARITY

Well, when I was around 26, I was totally burned out on the Dominos Pizza... I was just sick and tired of being sick and tired... I needed cocks rammed up my Hopeless Gayboy Fatass Chump poop chute and I needed it BADLY!!! the people I was upset at were gone from Detroit Institute for Hopeless Gayboy Fatass Chumps. I was not getting any older... and I was ready to stop running from the Lord penis. But I had issues to resolve in my life... How could just Go back to the fags that had only "screwed" me and wouldnt let me suck cocks in the first place? I still felt like I'd been wronged! But I had the Clarity moment of a lifetime... This thought crossed my mind...

"I was a FAGASS PUNKBOY MOTHERFUCKER BEFORE I came to the Detroit Institute for Hopeless Gayboy Fatass Chumps

Why am I allowing something that happened 7 years ago, keep me from serving my God, the Penis?????????

My Return to total Fagassedness!

Well, I was 26 years old... I was wanting to come back full time to Lord Penis. But I wasn't going back to Detroit Institute for Hopeless Gayboy Fatass Chumps (at least not at that time!!!) I had heard about a church called DGW (short for Detroit Gayboy Outreach) and I'd heard in the past that it was a nice place... So..... I wanted to be where the Holy Spirit of the Lord Penis was... and there I was... I came to the church on Ann Arbor Trail... my first experience there was a interesting one, I came in the parking lot... puffing on a 7 year old kid's cock, (in my years of being Backslidden, I picked up a nasty 2 child a day, sucking habit...) I finished my child, and went in, and right away I heard SCREAMING in my ear... "what are you doing here???" "these are the people that Screwed you, but would not let you suck dicks!" act..... and when the song service started, the Holy Spirit of Lord Penis fell, and I became very uncomfortable, to the point when I had to leave! and I did!, I remember a usher, running after me and saying where are you going??? I remember looking back at him and saying... "I can't handle this SHIT I got to get out of here!" and I left.... Well, that week... I sort of prepared myself for service to mens dicks next week, I took my Book, Gay Sex For Dummies to work. (I worked midnights as a Security Guard, so I could walk around the ghetto apartment complex I patrolled and peek in windows at sleeping little boys. and I had lots of time to masturbate...) My mother realized I was fantasizing about kids nuts.... I found myself reading the Word, and Praying for a big hairy chested man to suck off.. by Sunday, I knew I was ready to come back... Went back that Sunday.... they had a Illustrated Sermon on fellatio with pictures from several fag magazines, it was great, and needless to say, my Hard cock, Melted in the presence of the Lord Penis. and I knew that I wanted to come home.

I thank the Lord Penis for his Love, That takes us whacked out people as we are, and makes us his Servants....

Where am I now... : Currently Attending Adult classes at The Detroit Institute for Hopeless Gayboy Fatass Chumps.

HAM RADIO?!?!?!?!?!?!?I BETRAY IT AND WORSHIP ILLIGAL FAGGOT KEYCLOWNSBECAUSE THEY LIKE SUCKING COCK AS MUCH AS I DO!!!!I was, I guess you could say, Born into the CB FAGGOT Hobby... My Father, was a Dyed in the wool CB FAG... I even had a stint in the CB radio hobby as well... Anyhow, one year (I think I was around 8 Years old...) my parents and I went to have sex with my Grandfather's Sister and her German Shepherd, in Conway, Ark, which is the world capital of CB FAGGOTS. To say the least, was totally impressed with the FAGGOT CB Hobby, because it satisfied my craving to run my faggot mouth constantly AND to suck cocks!!!. and for years I did nothing about it, just sucking dicks constantly and that linear tuning on those tube type ILLEGAL FAGGOT KEYCLOWN amplifiers was just too hard to learn. Speed Ahead to age 14, a friend of mine, Joseph Hampton (Ham call sign N8ExtremeCockNosher-but ALSO a secret ILLEGAL FAGGOT KEYCLOWN) who lived across the street from me, and also was interested in getting his dick polished as well.. Well, we had some gay sex

together... (you see this was when you had to be secretive about your gayness! I was KB8HHZ (hugely horny for zebra!) and Joe was KB8HGL (Hungry Gonad licker!)... I believe me and Joe were originally licensed in 1989....

On April of 2000. The FCC Restructured it's licenses... and I paid a renegade VE 50 bucks and Received my General Class Ticket... I often masturbate while thinking of linears for ILLEGAL FAGGOT KEYCLOWNS. And really think Riley is mean. Maybe if I sucked his dick he would not be after traitor scumbag shithunk fagboys like me.

My Call? Is a Vanity call that I paid for, it is my initials! Because as a Hopeless Gayboy Fatass Chump, I need something like that for my ego.

so there you go!

I hope this answers everything you wanted to know about me!

Holding you to the same standards that you wish upon your superior whites,
post proof that your name isn't derek/derrick. I note that you did not,
however, deny blowing NIGGERS at rest stops. Thanks for clearing that up,
dereck/derrick.

A little fog this morning, but bright & sunny
in the afternoon. Wife & kids doing yard work, while
I'm getting dinner ready and prepping the hot tub for
this evening.

Hi GW, what's with all this BS?

Landshark

--
Is it so frightening to have me at your shoulder?
Thunder and lightning couldn't be bolder.
I'll write on your tombstone, ``I thank you for dinner.''
This game that we animals play is a winner.

Lardasses usually will.

FYI. The Steveo you don't like probably lives in the Denver, Co. area. And last
I looked, Ohio is not near Colorado.

Vinnie S.

WTF is that, Twist!? :D

>He's "tagging" posts again........

>Dave

>"Sandbagger"

>N3CVJ

That's almost as accurate as your other misconceptioned ignorances:

"You can not find a rule explicitly permitting roger beeps or saying
they are not entertainment devices. Therefore, they are illegal." N3CVJ

"Webtv can not post pictures. How do you propose to do that?"..N3CVJ

"If you break federal law, you are a federal criminal." N3CVJ, defending
his gaffe that driving above 70 MPH makes one a 'federal criminal"'.

"I worked as a network admin and do not expect you to be familiar with
internet protocol"
N3CVJ, trying to talk his way out of being outed for losing his isp for
breaking their TOS rules.

"I have no idea how his (Mark Salzyn) headers ended up in my headers. I
have no idea how such things work or how isp's rout their posts."
N3CVJ, contradicting his previous claim of being a "network admin".

You're on a roll, Davie. Hell, don't let your personal anger get the
better of you now, Davie..please continue focusing upon myself as
opposed to the topics in this group, after all, you are part of the
problem in this group.

That's almost as rich as what follows, as Shark and I said the exact same thing concerning DX. You are suffering a great deal on this aubject.

>No, not exactwy.

So post the part you incorrectly claim claims anything other than "skip affects dx", but please don't strain yourself again, as you get quite testy and agitated when asked to provide things only you see and hear and can't comprehend correctly..

> But at least when the proper context was

>explained. Lanshark acknowledged such.

>While you continue to defend and twist words.

>Dave

>"Sandbagger"

>N3CVJ

DX affects splatter and signals, cut and dry, and you've been skinned by several here showing your original statement "dx does not affect splatter" is wrong, so much in fact, you rushed to qualify just what "you" meant by such a statement, when everyone else knew exactly what the statement meant. This holds perfectly with your long-demonstrated pattern of you asking everyone else what they "meant" by the very simple terms used. Again, only you have expressed great difficulty in not only comprehending what others say, but in conveying and expressing your feelings and position adequately. Such leads to your almost daily inquiry of everyone you ever debate: "What did you mean by "......."? Your deficit in communications is growing leaps and bounds with your balding head.

Oh real nice Steveo.You should be really proud of yourself.It's not
enough you post your fag-boi crap all ove the internet but now you
attack women. Real nice you loser.

Still talking to yourself Doug.

Now answer the questions:

1. How is the court ordered shrink working out for you?

2. How's the court ordered job hunt going?

3. How's the court ordered wage withholding going?

4. Have you made the rain report for jamming repeaters again, Doug?

5. Have you threatened to kick anyone elses ass, only to have them show
up at your section 8 slum and prove what a fucking coward you are, maggot?

http://n8wwm.4t.com/

Go lay down by your bowl, dogie.

To be fair, your guesses are steeped in ignorance and the refusal to
learn and I'm not the one struggling with what people say,,,,you are,
evidenced by such redundant inquiries of "what do you mean'? Again, only
you have difficulty and are unable to comprehend what is said or posted
the first time. Such is classic projection concerning concepts beyond
your grasp.

>Quite the contrary, in order for one to learn,

>one must learn to ask the proper questions.

Only you haven't learned and you insist on remaining ignorant and
intentionally avail yourself of correct information,,,,you ignorantly
heralding roger beeps as illegal comes to mind immediately....
Add the fact that no one else has this deficit in communcation from
which ails you so, as no one else sees such simplistic sentences as
"relative or subjective"..only you suffer with such communcation skill.
Only you seem to suffer with interpretive skills when others use
simplistic terms.

>But the difference is, that I ask for clarification

>as to the specific point that someone is

>making, while you assume what they are

>trying to say, and are usually wrong.

That never happened, Davie, as I was involved in zero of your
conversations when you asked others "what do you mean by...".
Such a desperate attempt at trying to lay your incompetence and
incoherence at my feet *is* much appreciated, though. The only ones I
say are wrong are those who are,,,,you and N8WWM,,,ALL the time.

_
 After all, only you express great difficulty
interpreting each writer's perspective, which is why you have to ask
everyone what they mean when they use extremely simplistic terms

>Simplistic does not preclude the sense of

>subjectivity that the term may refer.

The fact that *only* you struggle with the words most certainly does.

>But you don't understand that. To you

>everything is black or white.

>Dave

>"Sandbagger"

>N3CVJ

LOL...entertainment in it's finest form, especially coming from a lid
who has demonstrated he is unable to distinguish lawful from ethical
behavior.

Amateur radio is only dying in how only YOU view Amateur radio.

Amateur radio is alive and well.

Listen more on the HF especially where the Tsunami hit.

Amateur radio is being used as I type this message.

I have a station and I enjoy talking to those who want to talk.

The only shmuck that YOU refer to -- is yourself while only you are calling others shmuck.
(now read this carefully before flaming. It is not me that is calling you that name. It is a case in point. i.e. "The pot calling the kettle whatever color!" so don't go flaming now.)

I'm glad that there is content control on the Amateur bands.

You need to get out more and quit bickering about small issues!

Not everyone wants to listen to a "bleeding-heart liberal"!

If you don't like the content --- DO something else besides crying about it.

There is an on/off switch on these radios!

And why is Amateur radio being hated on in a cb radio newsgroup?

(Why is even the Amateur radio topic being discussed in the rec.radio.cb newsgroup)

And why are pics of risque material being posted?

There are other groups that these topics can be posted in.

It is simply the fact that the individual/s have/has too much time on their hands.
It's a wonder they don't get caught at work.
That's why some trace routes don't go through.

I have had trace-routes done on me -- namely by : Eric Oyen, N7ZZT, in Arizona.

I only change my address and identity to cut down on unwanted emails.

There are no threats in my posts...

Yet, my name is posted on this newsgroup in a list of "KeyQueens run off this Newsgroup" by this Dougie character.

I'll take that subtle redirect of calling the "70 MPH" comment as an
"analogy", as an admission that you were (once again) wrong when you
falsely attributed it as one of my quotes.

Hey Steve Jurcenko, you sound like a real asshole. The people you talking about are nice, good people. So go fuck yourself. You homo-phobe, raciest hunk of shit.
Fuck you Steve Jurcenko, and the whore that dropped you on this planet!

Damn Proud Of It, Too!

I operate CB, Ham, MURS, FRS, GMRS, Maritime Radiotelephone, and HF comms.

I will post topics here that relate to CB.

So. Get Over It!

Why don't YOU tell the others to do the same thing and see what happens?

NO?

Then you don't go telling me what to do!

You Don't Control Me, you Mud duck!
Ya damn trunk-monkey!

>N3CVJ

Of course you may "take it" any way you need after the fact. You said
the enacting of a rule enacted by the feds is "law" and you most
certainly said one who breaks federal rules makes on a "federal
criminal".
By all means, feel free to expound on how you misinterpret one who dxes
as a "federal criminal" from one going above 70 MPH
and you not considering them a federal criminal.
After all, they are both federally enacted rules...and the breaking of
such rules is the ONLY criteria submitted by yourself in mistakenly and
ignorantly referring to one who dxes as a federal criminal.

> there are inverted and horizontal. Is there any version I am better off using
> barefoot?

Vinnie, I've had a lot of fun using various wire antennas on CB.
Horizontally polarized antennas don't do very well for local talkin' to
vertically polarized stations, especially on AM. AMers love strong "big
strapper" signals. However, a horizontal wire dipole will work fine in a
more effecient mode like SSB.

I understand you want a low profile antenna: you might try making a 1/4
wave groundplane on your roof. Buy a 102" whip and mounting bracket from
Radio Shack, hose-clamp the mounting bracket on a roof vent pipe, then
attach two or more slightly longer radials (maybe 106"), attach them to
the outside of the mounting bracket. Just lay the radials on the roof,
and perhaps thumbtack them when you've got the antenna tuned.

You can tune this 1/4 wave groundplane by trimming or lengthing the
radials: shortening a radial will cause the resonant frequency to go up.
Also, changing the angle of the radials will slightly affect SWR.

I've also used long wire antennas on CB: again, they usually end up being
horizontally polarized. For my current HF ham station (covering
10/15/20/40/80) meters, I use a 50' wire tied to a tree, a 8 foot ground
rod about 6 feet away from my radio, and a small/cheap MFJ tuner. Works
great for CW on those 5 bands, although on 20 meters I sometimes get some
RF "bites" when trying to tune on 20 meters/14mhz. On SSB, I usually can
get good signal reports on 40 meters, and SSB reception reports on other
bands are not quite so good, although the other operators can at least
usually hear me.

When I hook my Uniden PC-122 CB up to this long wire antenna, it works OK
for local SSB use, but on AM, I'm "mud-duckin'"..

A couple of times I've set up "stealth" ham and CB stations from motel
rooms when traveling. I'd ask for a second story room: at night I'd take
a roll of 24 gauge wire with a weighted end got up as much wire as I
could, and then for a ground for the tuner, I'd lay about 30 feet of wire
on the floor of my motel room. (When expecting maid service, I'd coil up
the inside wire.)

(Note that the above suggestion will cause much interference to
phones/TVs/etc.)

One last suggestion: I'd avoid antenna tuners from CB sources, as a "Pyramid" brand tuner I had was terible. MFJ makes several tuners in the $30 to $50 range that will tune both long wire and coaxial antennas. While MFJ products typically have a very flimsy feel them, they are almost always excellent designs that work well.

You might also want to check ARRL antennas books in the local library: I had a lot of fun making and using a vertically-polarized and vertically-mounted full-loop on CB. My loop used about 37 feet of wire, with one end soldered to the coax shield and the other end soldered to the coax center conducter.

In any event, HAVE FUN! If your antenna works, you can be proud of your handiwork, as most of us CBers and Ham-bones are nuthin' but "appliance operators".

73 and all them other good numbers to ya. --Leigh Marrin/KM6JE in Santa Barbara, Calif.

Not so sure they're 100% illegal:

1. It doesn't take internal modifications to transmit a roger beep on a CB radio. External electronics can accomplish this. Microphones do not have to be type accepted and can include this circuitry.

2. Roger beeps used for their intended purpose (that is, signaling the end of a transmission) are not used "simply to attract attention", are not intended to entertain, and do not violate any part of either of these sections.

You might want to rethink some of your statements before you put them out here, not-not-Jorge. In this case, you're not 100% correct.

Answer the fucking questions, mince meat.

1. How is the court ordered shrink working out for you?

2. How's the court ordered job hunt going?

3. How's the court ordered wage withholding going?

4. Have you made the rain report for jamming repeaters again, Doug?

5. Have you threatened to kick anyone elses ass, only to have them show
up at your section 8 slum and prove what a fucking coward you are, maggot?

Go lay down by your bowl, dogie.

stupid ass, that aint Doug.

But hey, you have to have homosexual fantasies about someone, so I guess having them about me is not as bad as if it were about someone who had no sense of humor. It sure is entertaining to see you act so gay.

Flip that wrist, mopeychimp

The only hurt will be your noggin, assjuice drinker. You
WILL be pummelled flat. You WILL have your car keys
shoved up your ass. You WILL be placed face down and
hurtin. A knuckle sandwich WILL be your new diet.

> I donut play peanut games.

No, you play diksuk games at the Petro toilet. You are GAY
GAY GAY. Go ahead, do something. Nothing you can do.
You are helpless. Overwhelmed. You are clueless.

> Now forge me with gay pics. I'm gonna stuff em' down
your pie hole.

The only thing you will stuff is your teeth into your pocket
after they are loosened from your head. If N8 will not set
you straight, I will, and it will be with a major, world-class
beating. Your internet harassment of hams will be over.
You need to run and hide.

No they do not "type accept" these radios.
You show a photo of one of the labels where it says they are type accepted.
And I'll show you a forgery.

The rule says, "No sound effects" are permitted.
Taken literally, this may even include "talk back".

Yup. The rules clearly state INTERNAL modifications.
It says nothing of external add ons.
However, it does state, "NO SOUND EFFECTS".
So after a 10 minute disertation, you end with, "This is a radio check. beep beep".

Steveo I will meet you anywhere, at any time, in fact, how about Dayton next week. You name the place, I will be there, and the beating will begin with you as the willing victim.

Let me explain to you exactly how it will go down. Let me paint the picture for you in case you think you can somehow come out of this thing uninjured.

You will ask to meet me in a bar or eating place, OK by me. I will walk up to you and call you a limp wristed faggot when I see you. You will start running your mouth about how bad you are and while you are talking I will move you outside into the alley.

I will ask you if you intend to be harassing hams in their homes again. No matter what your reply is, the next thing that will happen is you will be flat on your back with your head spinning.

I will rip a pipe loose from the alley and insert it in your ass, and slowly move it in and out, in and out, until you admit that you're a gay man who talks tough on the internet but nothing but a limp wrist sissy in real life.

Then I will proceed to slap you until you can't say your name straight. Then I will make you apologize to all the hams you have bad mouthed, including N8WWM, who you will have to kiss a picture of, or else be beaten further.

Then I will throw you in the dumpster and close the lid, but first I will tell the Red Cross where you are so they can give you aid in getting home.

That's about it, except for the part where you wash my car and polish my shoes and clean the snot off my windsheild with your tongue.

True.

> External electronics can accomplish this. Microphones do not
>have to be type accepted and can include this circuitry.

They can also add echo and other sound effects which are clearly an
"amusement" device. The FCC knows that it cannot certify every
conceivable accessory that might be connected to the mike jack. So
they regulate what you transmit, not what gets connected to the radio.

>2. Roger beeps used for their intended purpose (that is, signaling the
>end of a transmission) are not used "simply to attract attention", are
>not intended to entertain, and do not violate any part of either of
>these sections.

This is where the controversy is. Your assessment is valid, and it
would seem that since the FCC has allowed ETS signals on FRS radios,
(which also fall under part 95) that it would also stand to reason
that they would allow them on class "D" CB as well. The question is
why have they not made their position clear in the form of a rule
modification?

A valid ETS signal should consist of no more than a single short beep.
The multiple "K" beeps and those sequential musical tones clearly
still fall within the "amusement" category.

Many years ago the FCC stated that they considered ANY tone signal
other than one used for selective calling as "unnecessary" and
therefore illegal. They may have softened their position on it since.
This was back in the days before roger beeps became popular, but
little devices known as "birdies" were prevalent.

But it's evidently not clear to most radio manufacturers since, with
the exception of the Galaxy (Galaxy also has a reputation for pushing
the limits of the law) radio, no other domestic type accepted/approved

CB radio has an ETS as standard equipment. One has to wonder why that is, if they are clearly legal.

In any case, the FCC does not seem to be overly interested in much concerning CB radio these days.

It's illegal because any form of free entertainment or amusement is a
direct attack on the free-enterprise system by the liberals who want
to weaken the corporate stronghold on the entertainment industry. So
the US government (whose sole purpose is to "protect, facilitate and
represent our interests in the world market") has disallowed any free
entertainment and amusement in non-profit venues, including CB radio.

How could you not see that, Dave?

So anyway, what tone do you like in illegal roger beeps? Personally, I prefer 103.5, not obtrusive, and if you use a really good woofer (15" or larger), you get that thump. 1k is way too tweety.

Someone around here is using the old EBS tones with a decay of about
two seconds. Very unique.

I've been thinking about building something like a 'CB caller-ID' box.
Data could be sent at 1200 baud FSK at the beginning and end of each
transmission. That data could include an email addy, callsign, or even
just a handle. It would be really cool during a net to see the names
pop up in a list on a display.

Too funny. Dave even has proved him wrong
with the statement about FRS having it and they fall under
part 95, same as CB.

http://www.dragondistributing.com/cobramicrotalkradios.htm

Everyone of the COBRA FRS radio's have a roger beep,
again, FCC certified & falls under part 95 rules

http://www.dragondistributing.com/cobramicrotalkradios.htm

Wow! Midland's are FCC certified and have a roger beep

Hey, MURS has roger beeps, FCC Certified and falls under
part 95..... LOL!!!! He'll continue to argue, just to
argue.

That'd be neat, except that FSK isn't an authorized emission type on
CB... Shame, that, too..It'd be neat to see FSK and PSK on the regular
40 channels.

It does say "no sound effects" in that you are correct. But if you read
to the end of the sentence, it also says that said sound effects should
not be to entertain, etc, etc, etc...

I stand by my statement that a roger beep used for its intended purpose,
which is to signify the end of a transmission, is not illegal. Annoying
as hell in some cases, but not illegal.

If you new the law, you would know the FCC most certainly permits the
new Galaxy cb radios. There is a base and a mobile cb radio only by
Galaxy that is type accepted. You, as always, are clueless, in the dark,
and uninformed. The burden of finding the information and educating
yourself is up to you, but you can always continue to run your mouth as
if you knew what you were talking about.

>to wonder why that is, if they are clearly legal.

Not "one" only *you* have to wonder..the rest of the hammies in the world already know the answer to this. You (and your sock puppet) are the only one crying about a roger beep being illegal.

>In any case, the FCC does not seem to be

>overly interested in much concerning CB radio
>these days.

>Dave

>"Sandbagger"

Which has nothing to do with your gaffe, although, based on your words above, it most certainly appears that after redundantly repeating and explaining that the FCC does not enact rules telling what IS permitted (as was your criteria for claiming roger beeps were illegal), you are slowly accepting what everyone has been telling you...roger beeps are illegal.

Galaxy DX2547, 100% FCC accepted, has a roger beep, indicator light for it,
and a switch on the front panel.

Worthless in my eyes as the operator that says "com'on" after every
sentence.

But there is one for 'ya!

I wonder who in the hell started the ECHO fad, it sounds like shit, and most of the truckers have them turned up so much only a retard could understand them. Roger beeps are just as fucken stupid also. Most never know what a radio should sound like, sometimes it sounds good to hear a radio with good audio, not clipped and with swing, another dumb ass fad. Why is it a person buys a new radio, and then takes it to a hack up shop to fuck it up.

Just saw this after I posted about the 2547.

Mine has the FCC sticker on it. Also, they are tough to mod for freeband use, NO MODS HERE! it can be done but they have the tendency to self destruct. They have made some changes to the unit in the past few years, wonder if that gained acceptance? I can get a pic with the sticker on it.

I have also seen the 2547 listed as a "FCC accepted CB base" and "Export only" It's essentially a mobile in a big case, wonder if there are different versions floating around?

I saw that, One of the reasons I bought mine is because it "is" FCC
accepted. I will also do some searching, Wonder if there is not another
2547 "export version" with a DX99 in the chasis?

>Give it a rest Frank. We're not talking about politics anymore.

I see that -you- aren't talking about politics anymore because you
refuse to accept any facts; e.g., the fact here is that you are
looking at the wrong rule:

>This is where the controversy is. Your assessment is valid, and it
>would seem that since the FCC has allowed ETS signals on FRS radios,
>(which also fall under part 95) that it would also stand to reason
>that they would allow them on class "D" CB as well. The question is
>why have they not made their position clear in the form of a rule
>modification?

FRS radios have such tones because they are permitted by this rule:

"Sec. 95.193 (b) The FRS unit may transmit tones to make contact or
to continue communications with a particular FRS unit....."

CB radio has an identical rule:

"Sec. 95.412 (b) You may use your CB station to transmit a tone signal only when the signal is used to make contact or to continue communications....."

So it should be obvious that if any radio with a "roger-beep" is accepted, the tone is considered to be a tool that is used to -facilitate- communications, a purpose which is consistent with the above rule(s).

And another fact: I brought this same issue to your attention almost a year ago..... in -THIS- newsgroup.

yeah, i know what ya mean about the echo turned on too much -- namely truckers and certain base stations that have them. Yeah, they don't care who don't like 'em cause "the maul will fall" on the certain cber that is talking to another CBer.

I don't have much problem with Roger beep as long as it is no more than the chirps that you hear listening to police/fire/ rescue on a scanner -- those are from the repeater system and they have some cool ideas for a roger beep. Some of these so-called roger beeps are stupid sounding.

Taking a cb to a hack shop is the choice of the buyer that is getting mouth-watering ideas on what to have done to it so to fit in with the "CB-crowd" and to show off to their CB "good-buddies" how they can step over and on top of "mud ducks" and "bare-foot" radios.

> FRS radios have such tones because they are permitted by this rule:

You are getting like twisty more and more each day Go snip some more of
the FCC text so it doesnt include the part about selcal and tone operated
suelch. You will stoop to twisty levles to prove your right when your
wrong, assclown.

ETS are sub audible tones, is a roger beep a sub audible tone, Let me
answer that for you NO

ETS is not a subaudible tone, but in fact a roger beep. At any rate, I
emailed Riley. We'll let him answer if he chooses.

Quoted text:

Mr. Hollingsworth:

I have a question. Are roger beeps, or end of signal tones allowed on FRS,
GMRS, MURS, or CB? I know most FRS radios now have them, as well as GMRS,
and some CB radios. The commissions rules in part 95 are somewhat confusing.
I know the part about amusement may/could apply to some "noises", but this
is specifically about roger beeps. Thanks in advance.

Hi all, I have a Pearce-Simpson supercheetah MKIII that was working fine, untill one day i went and turned it on and it just squeals. It still works fine in PA mode, but in recieve its buggered and when i turn the volume up it gets louder and changes pitch. Sounds like its feeding back somewheres. It has been sitting outside under the porch and out of the weather and was working a couple of days before the fault developed. It was powered by a 5amp variable power supply set at 14v and had a desk mic connected, also the stationmaster antenna was always connected.
Any ideas and/or a schematic would be great, as i don't know if its worth taking to a shop for repair and the missus won't let be buy a replacement

Test for blown capacitors in the audio chain.. you may be getting dc on
the chain due to a shorted cap.

Also, try pulling the mic off and see if the squeal is still there. If
it goes away when the mic is disconnected, then (if it's a power mic)
the mic may be the problem.

First, try turning down the voltage on the power supply. Many radios
behave that way when the power supply voltage is too high. Also, check
your power supply to make sure the regulator hasn't failed.

If the radio is modified for talkback, cover the mic when you key up.

It may also be a fault in the mic. Take it apart to see if any wires
have come loose.

If that doesn't fix it you will probably have to take it to a shop.

Speak for yourself. You conveniently snipped where I said, "....if any
radio with a "roger-beep" is accepted....", the keyword being "if".

Go back and read your posts. YOU are the one that said ETS was a SUB-audible
tone. Maybe you didn't mean to, but you did say that.

Do I need to point it out? Am I the only one that sees it?

According to your first "definition" up there, Sub-Audible Tone System
(SATS) = CTCSS = PL.

In fact, all of my ICOM and Alinco manuals equate PL with CTCSS and
define them with the same definition you attribute to SATS.

Or were you confusing CTCSS with DTS?

It occurs to me that he may be right. Just because the radio includes
a roger-beep (or some other noise function) may not exclude it from an
equipment authorization because the operator can turn it off.

I had a Galaxy 949 which was a standard CB. Also had a roger beep.

Thanks guys, i've tried with the mic off and a different one and also with
reduced voltage. I will check the caps next. Please keep the ideas coming.

Which rule is that?

The fact remains, too many reputable CB distributors sold it for it not be
type accepted. You stink.

Which Part 95 CB rule disallows adjustable RF power?

I would think that if the radio was only capable of 4W RMS AM Carrier /
12W SSB PEP at the MAX power setting, and was adjustable downward, it
wouldn't be that big of a deal, nor would it make the radio "illegal" or
uncertifiable...

Educate me.

-SSB

Hrm... this is at variance with your definition of CTCSS.

From http://www.pacres.com/ctcss.htm :

[quote begins]
CTCSS (Continuous Tone Controlled Squelch System) a sub audible tone in the range of 67 to 254 Hz. The FM deviation level of CTCSS tones should be in the range of 500 to 800 Hz. These tones are encoded with the voice audio at all times during the transmission. Any one or more of the 50 tones can be used to gain access to the repeater. CTCSS decode and encode is provided as a standard feature on all of our controllers, using state of the art devices. All standard and non standard EIA CTCSS tones can be decoded or encoded. You may select 1, 2, 3 or up to all 50 CTCSS decode tones to operate the repeater. You can even use CTCSS tones and DCS codes on the same channel.
